

Microsoft

Exam Questions MD-100

Windows 10

NEW QUESTION 1

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

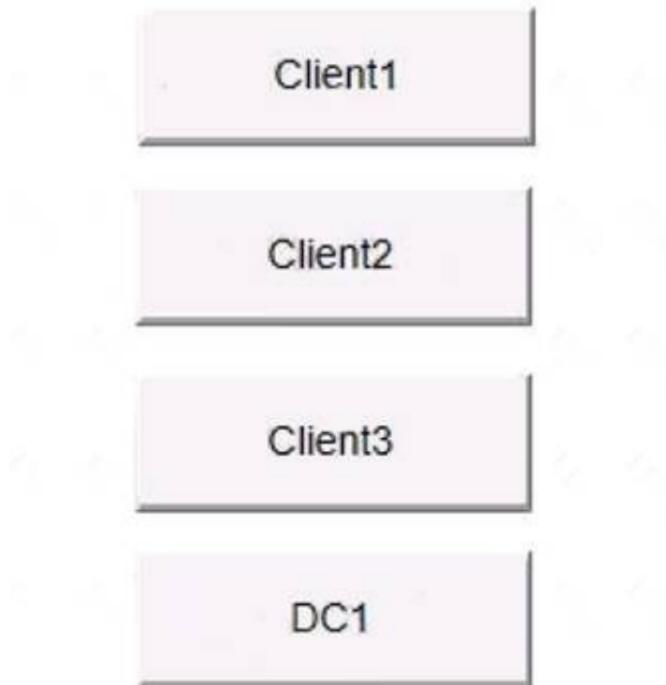

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- > Prevent User5 from changing the password of the account.
- > Ensure that User5 can perform backups.
- > Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/user-rights-assignm>

NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks. You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 3

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 4

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share. What should you do?

- A. From File Explorer, use Network File and Folder Sharing
- B. Assign the Read permission to Group2.
- C. From File Explorer, use Advanced Sharing
- D. Assign the Read share permission to Group2.
- E. From Control Panel, use Advanced sharing setting
- F. Configure file and printer sharing for the network profile of the domain.
- G. At a command prompt, run the net share Share=C:\Folder1 /grant:adatum\group2, read command.

Answer: D

Explanation:

Reference:

<https://techgenix.com/net-share-command-30/>

NEW QUESTION 5

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

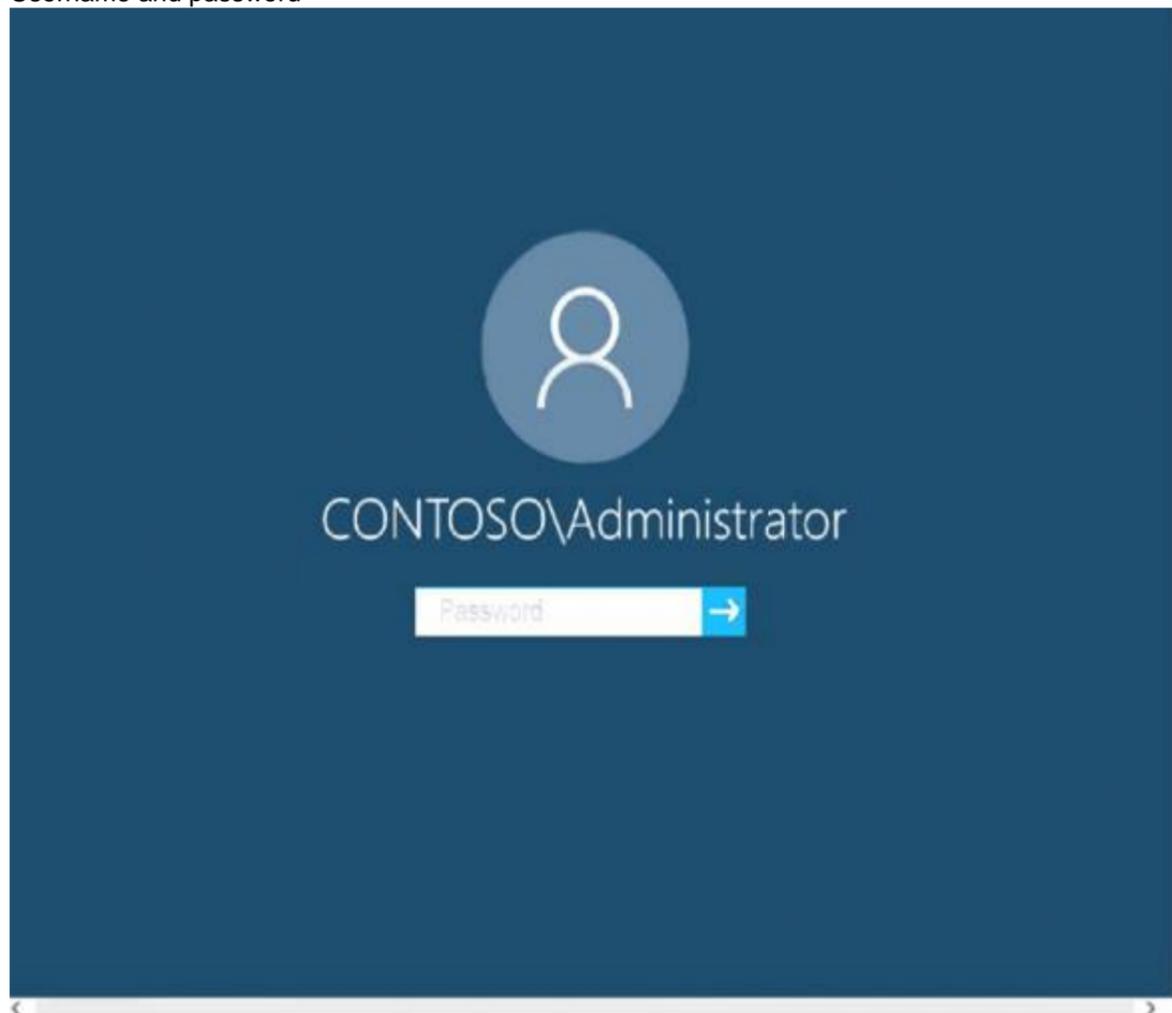

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

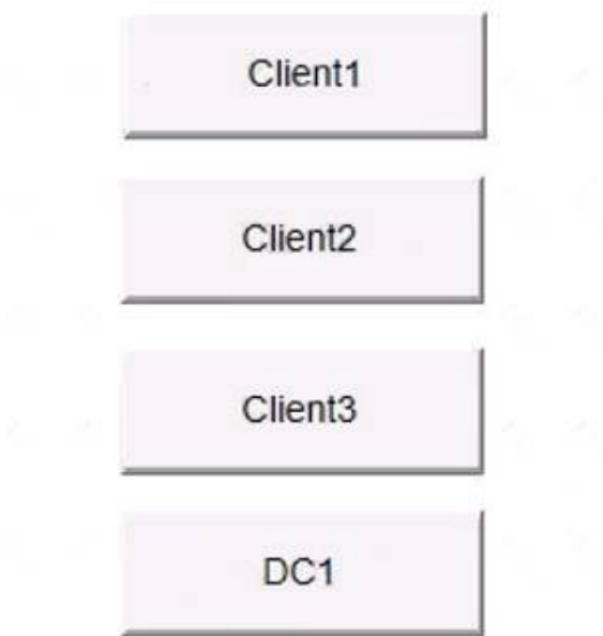

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.

To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > Open Event Viewer.
- > Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- > You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical, Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.
- > You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Reference:

<https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.htm>

NEW QUESTION 6

- (Exam Topic 4)

Your company uses Microsoft Deployment Toolkit (MDT) to deploy Windows 10 to new computers. The company purchases 1,000 new computers.

You need to ensure that the Hyper-V feature is enabled on the computers during the deployment. What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add a task sequence step that adds a provisioning package.
- B. In a Group Policy object (GPO), from Computer Configuration, configure Application Control Policies.
- C. Add a custom command to the Unattend.xml file.
- D. Add a configuration setting to Windows Deployment Services (WDS).
- E. Add a task sequence step that runs dism.exe.

Answer: AE

Explanation:

References:

Provisioning package works with Windows Configuration Designer to provision win10 features and runtime settings. WCD (provisioning Package) is GUI based while DISM is command line based and dose same function. Unattend.xml / answer files are used with installation media. It contains settings, definitions and values to use during Windows Setup. In an answer file, you specify various setup options. These options include how to partition disks, where to find the Windows image that will be installed, and which product key to apply.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/create-a-windows-10-reference-im>

NEW QUESTION 7

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to configure the computers to send the error events in the System log to a computer named Computer1 that runs Windows 10.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Computer1:

<ul style="list-style-type: none"> Create a source-initiated subscription. Create a collector-initiated subscription. Create a custom view in Event Viewer. Configure Event Forwarding by using a Group Policy Object (GPO).
--

100 Windows 10 computers:

<ul style="list-style-type: none"> Create a source-initiated subscription. Create a collector-initiated subscription. Create a custom view in Event Viewer. Configure Event Forwarding by using a Group Policy Object (GPO).
--

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. Source: <https://learn.microsoft.com/en-us/windows/win32/wec/creating-a-source-initiated-subscription>

NEW QUESTION 8

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10. You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs). You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From Microsoft Edge, open `edge://settings`.
- B. From a command prompt, run `scanstate` and specify the `/apps` parameter.
- C. From a command prompt, run `scanstate` and specify the `/genconfig` parameter.
- D. From a command prompt, run `gpreport` and specify the `/H` parameter.

Answer: D

NEW QUESTION 9

- (Exam Topic 4)

Your company purchases 20 laptops that use a new hardware platform. In a test environment, you deploy Windows 10 to the new laptops. Some laptops frequently generate stop errors. You need to identify the cause of the issue. What should you use?

- A. Reliability Monitor
- B. Task Manager
- C. System Configuration
- D. Performance Monitor

Answer: A

Explanation:

References:
<https://lifelhack.com/how-to-troubleshoot-windows-10-with-reliability-monitor-1745624446>

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.
 Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 10

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1. What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the disclparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the booccfg /debug command.

Answer: A

Explanation:

Reference:
<https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 13

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

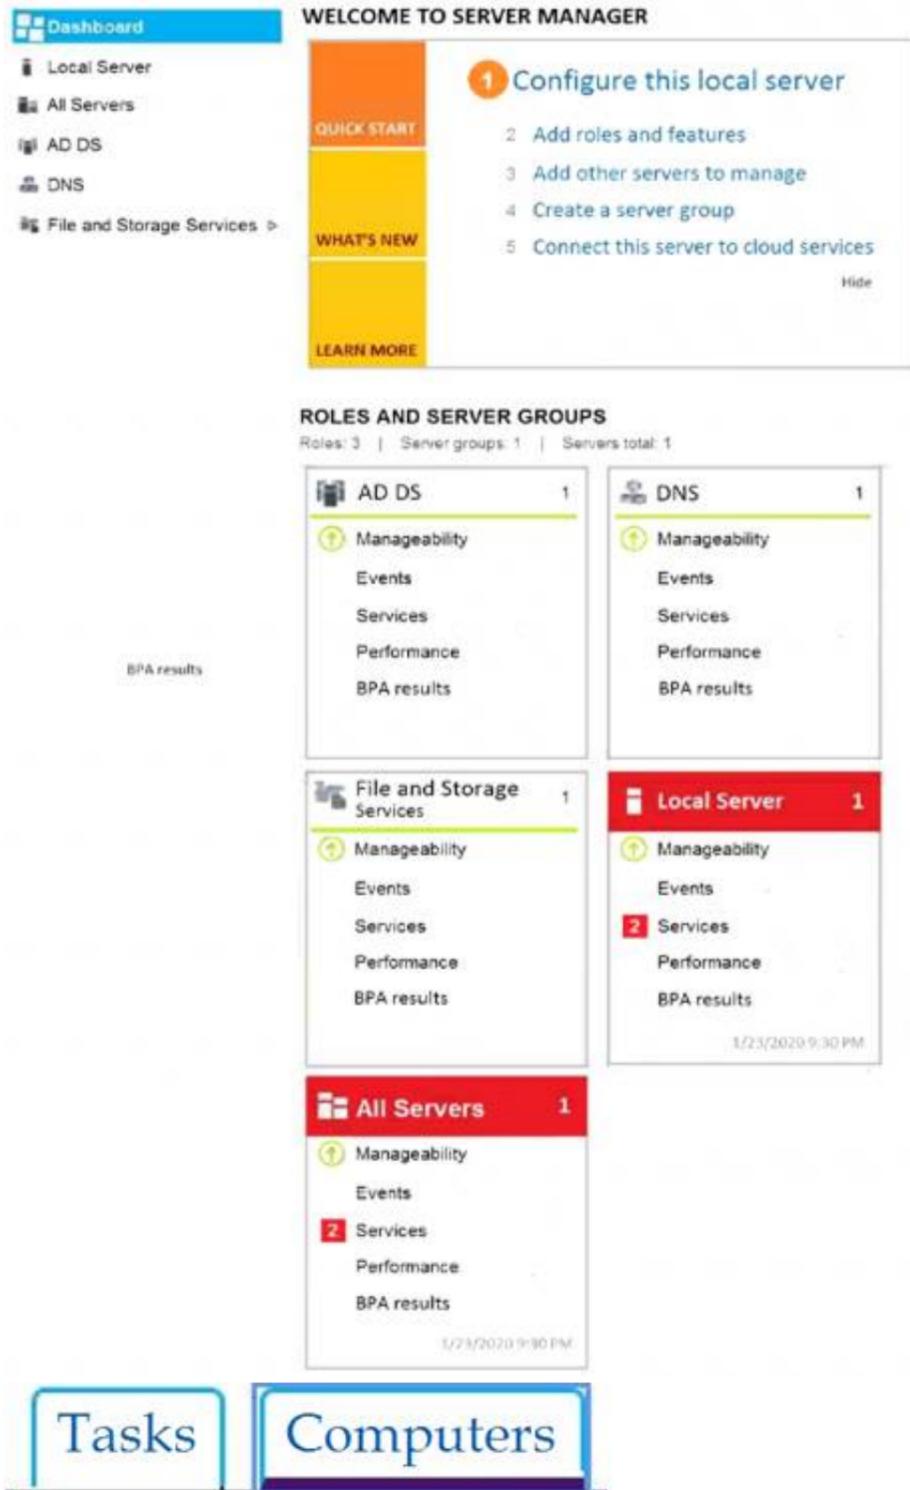

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Start button, then select Settings > Update & Security > Windows Update.
- Under Update settings, select Advanced options.
- From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference: <https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 16

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. You need to ensure that Client3 starts in safe mode automatically the next time the computer restarts. After completing the task, you must NOT restart Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

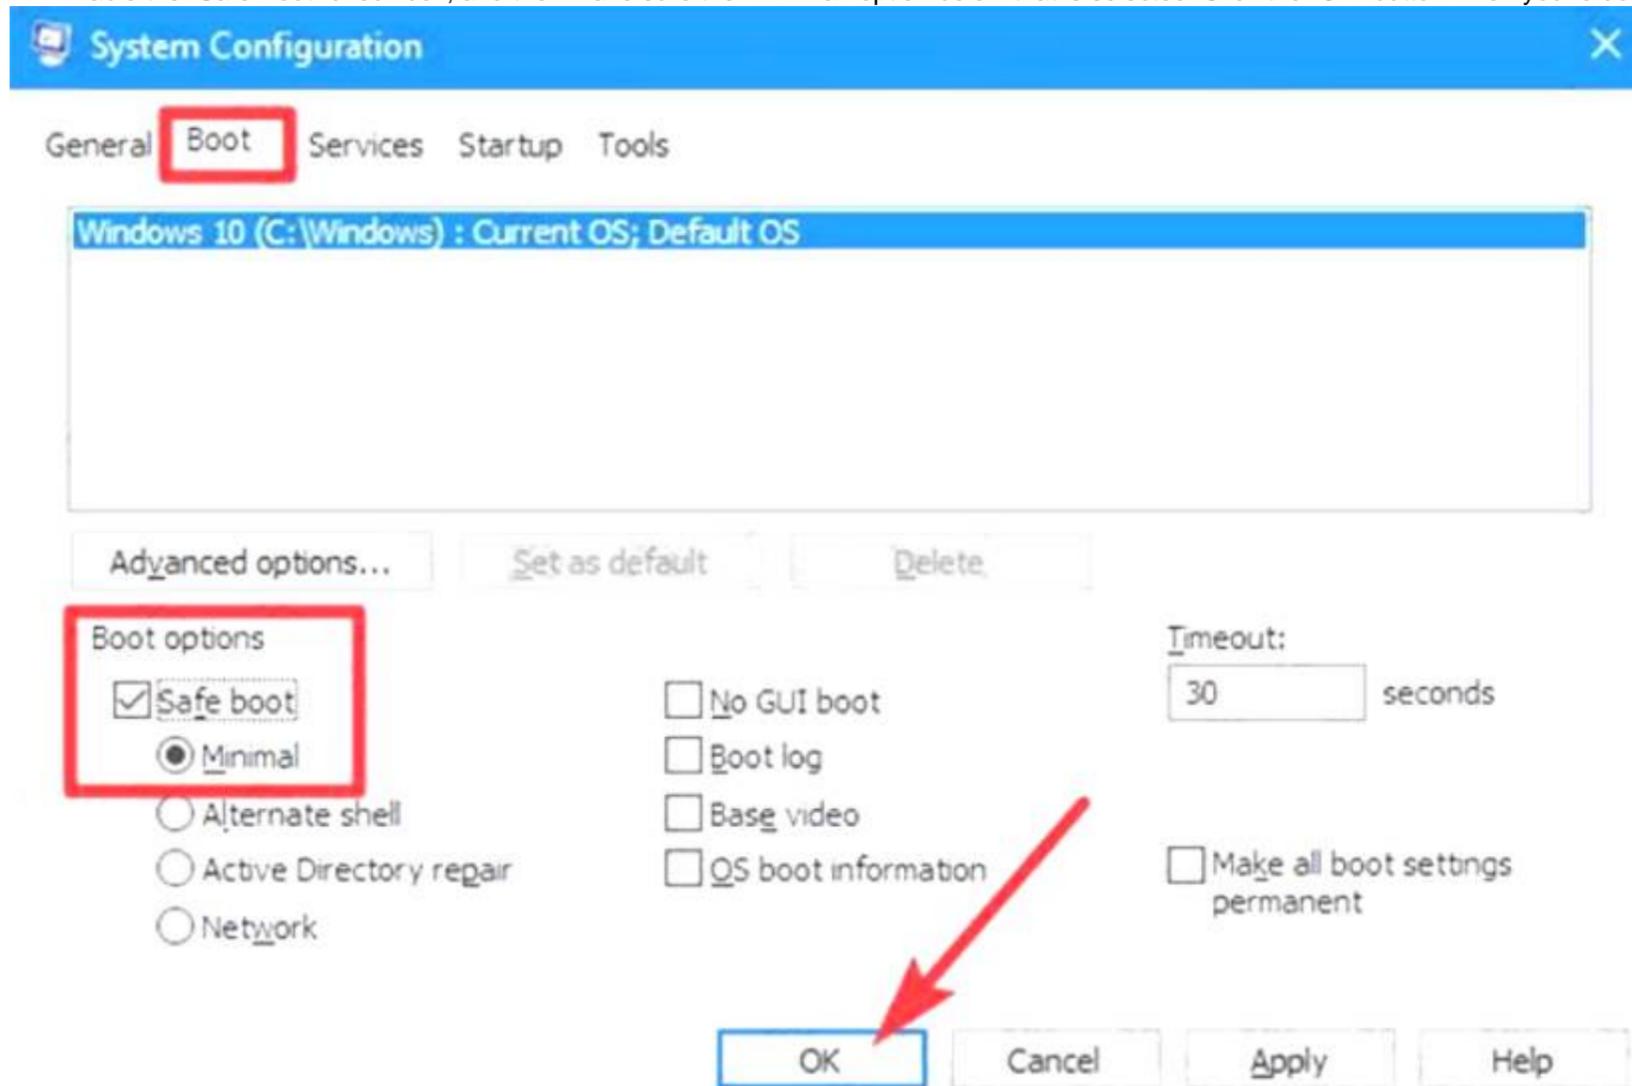

Answer: A

Explanation:

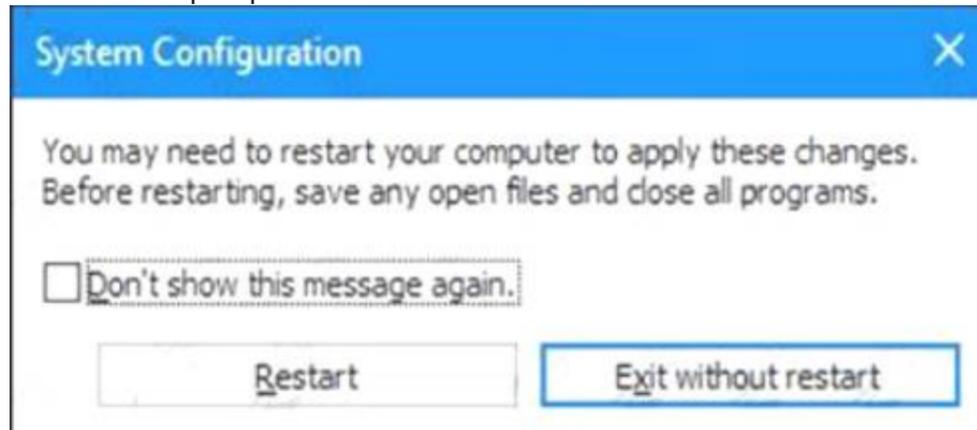

- * 1. From Client3, open the System Configuration utility by pressing the Windows & R keys simultaneously to display the Run box .
- * 2. Type "msconfig" into the box, and then click OK.

- * 3. In the "System Configuration" window, switch to the "Boot" tab.
- * 4. Enable the "Safe Boot" check box, and then make sure the "Minimal" option below that is selected. Click the "OK" button when you're done.

- * 5. You will be prompted to Restart or Exit without restart. Click Exit without restart.

<https://www.howtogeek.com/howto/windows-vista/force-windows-to-boot-into-safe-mode-without-using-the-f8>

NEW QUESTION 17

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more

than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 19

- (Exam Topic 4)

You have a computer that runs Windows 10 and has File History enabled. File History is configured to save copies of files every 15 minutes.

At 07:55, you create a file named D:\Folder1\File1.docx.

You add D:\Folder1 to File History and manually run File History at 08:00. You modify File1.docx at the following times:

- > 08:05
- > 08:12
- > 08:20
- > 08:24
- > 08:50

At 08:55, you attempt to restore File1.docx.

How many previous versions of File1.docx will be available to restore?

- A. 2
- B. 3
- C. 4
- D. 5

Answer: C

NEW QUESTION 24

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: From the local computer policy, you configure the Filter Options settings for the user policy. At a command prompt, you run the gpupdate.exe/Target:user command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 26

- (Exam Topic 4)

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these question will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 28

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run `wecutil ac /q`.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run `winrm qc -q`.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin>

NEW QUESTION 29

- (Exam Topic 4)

You have three computers that run Windows 10 as shown in the following table.

Name	TPM version	Operating system
Computer1	None	Windows 10 Enterprise
Computer2	2.0	Windows 10 Pro
Computer3	1.2	Windows 10 Enterprise

All the computers have C and D volumes. The Require additional authentication at startup Group Policy settings is disabled on all the computers.

Which volumes can you encrypt by using BitLocker Drive Encryption (BitLocker)? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

You can encrypt volume C on:

▼

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2 and Computer3

You can encrypt volume D on:

▼

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2 and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Volume C on = Computer 2 and 3 only Volume D on = C1, C2, C3

The "Require additional authentication at startup" setting is located in the Computer Configuration\ Administrative Templates\ Windows Components\ BitLocker Drive Encryption\ Operating System Drives path. If the policy is disabled and there is no TPM chip installed, operating system drives can not be encrypted using BitLocker. Additional data volumes can be protected using a password as a key protector for example.

References:

<https://www.windowscentral.com/how-use-bitlocker-encryption-windows-10>

NEW QUESTION 32

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the `whoami` command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
the command prompt will open without a prompt

NEW QUESTION 34

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. All users have been issued with laptop computers as well as desktop computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.

A user named Mia Hamm informs you that she must perform a BitLocker recovery on her laptop but she does not have her BitLocker recovery key. You need to ensure that Mia Hamm can perform a BitLocker recovery on her laptop. What should you do?

- A. Instruct Mia Hamm to log on to her desktop computer and run the repair-bde.exe command.
- B. Instruct Mia Hamm to use the BitLocker Recovery Password Viewer to view the computer object of the laptop.
- C. Instruct Mia Hamm to log on to her desktop computer and go to <https://account.activedirectory.windowsazure.com> and view the user account profile.
- D. Instruct Mia Hamm to run the Enable-BitLocker cmdlet on her laptop.

Answer: C

Explanation:

The BitLocker recovery key is stored in Azure Active Directory. Reference:
<https://celedonpartners.com/blog/storing-recovering-bitlocker-keys-azure-active-directory/>

NEW QUESTION 39

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Restart the operating system	
Enter a Windows 11 Pro product key	
Enter a Windows 11 Enterprise product key	
From Programs and Features, enable the Hyper-V Windows feature	
From the Activation settings in the Settings app, select Change product key	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

NEW QUESTION 40

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You need to enable boot logging on Computer1. What should you do?

- A. At a command prompt, run the bcdboot.exe command and specify the /v parameter.
- B. From the Settings app, configure the Start settings.
- C. From System Properties in Control Panel, configure the Startup and Recovery settings.
- D. From System Configuration configure the Boot settings.

Answer: D

Explanation:

Reference:
<https://www.windowscentral.com/how-enable-boot-log-windows-10>

NEW QUESTION 45

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies. Which command should you run?

- A. gpresult
- B. secedit
- C. gpupdate
- D. gpfixup

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

NEW QUESTION 48

- (Exam Topic 4)

Your network contains the segments shown in the following table.

Name	Domain controller connectivity	Internet connectivity
Segment1	Yes	Yes
Segment2	No	Yes

You have computers that run Windows 10 and are configured as shown in the following table.

Name	Shared folder	Share permission	Active Directory joined	Connected to
Computer1	Share1	Everyone: Full control	Yes	Segment1
Computer2	Share2	Everyone: Full control	Yes	Segment2
Computer3	Share3	Everyone: Full control	No	Segment1

Windows Defender Firewall has the File and Printer Sharing allowed apps rule shown in the following table.

Computer	Domain	Private	Public
Computer1	Allowed	Not allowed	Not allowed
Computer2	Allowed	Allowed	Not allowed
Computer3	<i>Not applicable</i>	Allowed	Allowed

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input type="radio"/>
You can access Share3 from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
You can access Share1 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share2 from Computer3.	<input type="radio"/>	<input checked="" type="radio"/>
You can access Share3 from Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 52

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.
 Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	Not applicable
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
 Graphical user interface, text Description automatically generated

NEW QUESTION 55

- (Exam Topic 4)
 You plan to deploy Windows 10 Enterprise to company-owned devices. You capture a Windows 10 image file from a reference device. You need to generate catalog files and answer files for the deployment. What should you use for each file? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

Catalog file:

Deployment Image Servicing and Management (DISM)
Windows Configuration Designer
Windows Deployment Services (WDS)
Windows System Image Manager (Windows SIM)

Answer file:

Deployment Image Servicing and Management (DISM)
Windows Configuration Designer
Windows Deployment Services (WDS)
Windows System Image Manager (Windows SIM)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://docs.microsoft.com/en-us/windows-hardware/customize/desktop/wsim/open-a-windows-image-or-catalo>

NEW QUESTION 56

- (Exam Topic 4)

You have a computer that runs Windows 10 and contains the folders shown in the following table.

Name	Path
FolderA	C:\FolderA
FolderB	C:\FolderA\FolderB
FolderC	C:\FolderA\FolderB\FolderC

You create the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User2, User3
Group3	User1, User3

On FolderA, you remove permission inheritance. To each folder, you assign the NTFS permissions shown in the following table.

Folder	Permission
FolderA	Modify to Group1 Read to Group2
FolderB	Write to Group2
FolderC	Read to Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

User1 can read and write all files in FolderC.

Yes No

User2 can delete all files in FolderB.

Yes No

User3 can delete all files in FolderC.

Yes No

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

YES YES NO

NEW QUESTION 60

- (Exam Topic 4)

You have a computer that runs Windows 10. You need to identify the following information:

- The name, username, and SID of the computer
- The user groups to which your user account belongs Which command should you run?

- A. whoami
- B. query
- C. msinfo32
- D. userinit

Answer: A

NEW QUESTION 65

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. A user named Mia Hamm has a computer named Computer1. Mia Hamm reports that when she logs on to

Computer1, she cannot access servers on the network but she can access computers on the internet.

You run the ipconfig command on Computer1 and receive the following output.

```

Command Prompt

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . : test.local
Description . . . . . : Intel(R) Ethernet Connection (2) I218-V
Physical Address. . . . . : 78-22-AF-D6-7C-93
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::520:245f:638d:7ee6%19(Preferred)
IPv4 Address. . . . . : 192.168.1.197(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Monday, 20 May 2019 08:31:40
Lease Expires . . . . . : Wednesday, 23 May 2019 10:11:06
Default Gateway . . . . . : 192.168.1.1
DHCP Server . . . . . : 192.168.1.2
DHCPv6 IAID . . . . . : 447488523
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-E2-A7-79-78-24-AF-8C-0C-9B
DNS Servers . . . . . : 131.167.19.4
                       192.168.1.3

Primary WINS Server . . . . . :
NetBIOS over Tcpip. . . . . : Enabled
    
```

You successfully ping the default gateway, the DNS servers, and the DHCP server. You need to resolve the connectivity problem on Computer1. Which setting should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface Description automatically generated

The preferred DNS server is located on the internet as it has a public IP Address. The local DNS server should be the preferred DNS server. We could manually change the preferred and alternate DNS server addresses or we could select the "Obtain DNS server address automatically" option to have the DNS servers configured through DHCP.

NEW QUESTION 66

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server1 that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://techdirectarchive.com/2020/09/14/error-0xc1510111-you-do-not-have-permissions-to-mount-and-modify>

NEW QUESTION 71

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computers you allow incoming ICMPv6 traffic in Windows Defender Firewall. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 76

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 81

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Guests
User3	Users, Administrators
User4	Users, Guests
Administrator	Administrators

User3, User4, and Administrator sign in and sign out on Computer1. User1 and User2 have never signed in to Computer1.

You are troubleshooting policy issues on Computer1. You sign in to Computer1 as Administrator. You add the Resultant Set of Policy (RsoP) snap-in to an MMC console.

Which users will be able to sign in on Computer1?

- A. User1, User3, and User4 only
- B. Administrator only
- C. User1, User2, User3, User4, and Administrator
- D. User3, User4, and Administrator only

Answer: D

Explanation:

The Interactive logon: Number of previous logons to cache (in case domain controller is not available) policy setting determines whether a user can log on to a Windows domain by using cached account information. Logon information for domain accounts can be cached locally so that, if a domain controller cannot be contacted on subsequent logons, a user can still log on.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/interactive-logon-n>

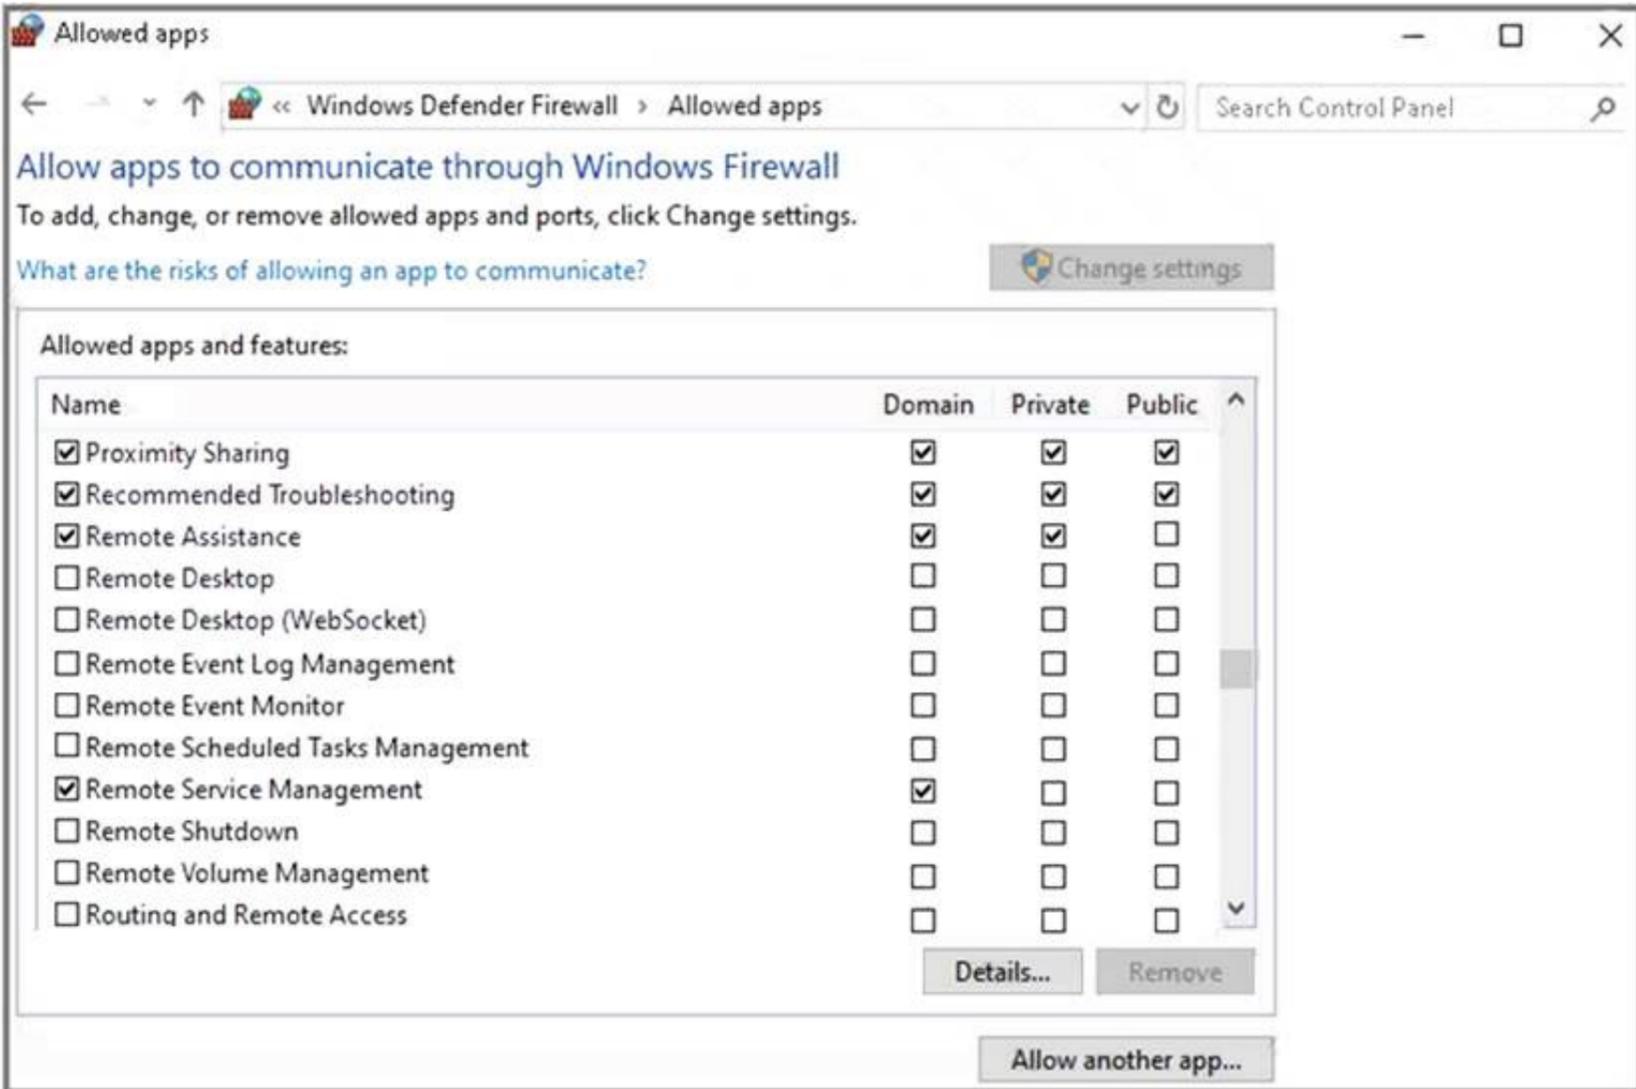

NEW QUESTION 86

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password. On Computer1, Windows Defender Firewall is configured as shown in the following exhibit.

The services on Computer1 have the following states.

Status	Name	DisplayName
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No
 Because the firewall is blocking Remote Volume Management.
 Box 2: No
 Because the Remote Registry Service is stopped.
 Box 3: No
 Because the Remote Registry Service is stopped. Perfmon needs both the RPC service and the Remote Registry service to be running.

NEW QUESTION 88

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool:

▼
Connection Manager Administration Kit (CMAK)
Local Group Policy Editor Microsoft Deployment
Microsoft Deployment Toolkit (MDT)
Windows Autopilot
Windows Configuration Designer

File type:

▼
ADMX
CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

NEW QUESTION 89

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released. From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 90

- (Exam Topic 4)

You have a computer that runs Windows 8.1. You upgrade the computer to Windows 10.

You need to analyze the actions that occurred during the upgrade and review the performance statistics for errors by using Windows Event Log viewer.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Event log file:

- Install.etl
- Setup.etl
- UpdateSessionOrchestration.etl
- WindowsUpdate.etl

File location:

- \\$Windows.~BT\Sources\Panther
- \Windows\Logs
- \Windows\Panther
- \Windows\Temp

NEW QUESTION 95

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set a data limit. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 97

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Change access to Share1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-active-directory-enable#assign-access-permiss>

NEW QUESTION 102

- (Exam Topic 4)

You need to ensure that User1 can add a third-party driver package for a printer to the driver store of the computer. The solution must use the principle of the least privilege.

To which local group should you add User 1, and what should User1 run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group:

Run:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 105

- (Exam Topic 3)

Which users can create a new group on Computer3?

- A. User31 only
- B. User1 and User32 only
- C. Admin1 and User31 only
- D. Admin1, User31, and User32 only

Answer: A

Explanation:

Reference:
https://ss64.com/nt/syntax-security_groups.html

NEW QUESTION 106

- (Exam Topic 3)

Which users can sign in to Computer3 when the computer starts in Safe Mode?

- A. User31 only
- B. User31 and User32 only
- C. User31 and Admin1 only
- D. User31, User 32, User33, and Admin1
- E. User31, User32, and User33 only

Answer: A

Explanation:

Only users with membership of the local Administrators group can log on to a computer in safe mode. Admin1 cannot log in because Computer3 is not joined to the domain.

References:
<https://support.microsoft.com/en-us/windows/advanced-startup-options-including-safe-mode-b90e7808-80b5-a2>

NEW QUESTION 110

- (Exam Topic 3)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://www.sciencedirect.com/topics/computer-science/security-event-log>

NEW QUESTION 115

- (Exam Topic 3)

You implement the planned changes for Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can write to D:\Folder1\Report.docx.	<input type="checkbox"/>	<input type="checkbox"/>
User2 can write to D:\Folder1\Report.docx.	<input type="checkbox"/>	<input type="checkbox"/>
User3 can write to D:\Folder1\Report.docx.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

Box 1: Yes

User1 already has full control access through membership of Group1. Therefore, User1 can write to the file. Box 2: No

The planned changes will grant User2 full control access to the file. However, User2 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User2 will not be able to write to the file.

Box 3: No

The planned changes will grant User3 full control access to the folder. That permission will be inherited by the file. However, User3 is a member of Group2 which has Deny/Write access. The Deny permission will always take precedence. Therefore, User3 will not be able to write to the file.

NEW QUESTION 116

- (Exam Topic 2)

You need to meet the technical requirements for the helpdesk users.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Add the help desk users to:

<input type="checkbox"/>	The local Administrators group on the Windows 10 computers
<input type="checkbox"/>	The Domain Computrers group in the domain group
<input type="checkbox"/>	The Event Log Readers group in the domain group
<input type="checkbox"/>	The local Event Log Readers group on the Windows 10 computers
<input type="checkbox"/>	The Group Policy Creators Owners group in the domain group
<input type="checkbox"/>	The local Power Users group on the Windows 10 computers

Troubleshooting tool that the helpdesk users should use:

<input type="checkbox"/>	Get-GPOReport
<input type="checkbox"/>	GPRresult
<input type="checkbox"/>	GPOUpdate
<input type="checkbox"/>	Group Policy Object Editor

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://www.itprotoday.com/compute-engines/what-group-policy-creator-owners-group>

NEW QUESTION 117

- (Exam Topic 2)
 You need to meet the quality update requirement for ComputerA. For how long should you defer the updates?

- A. 14 days
- B. 10 years
- C. 5 years
- D. 180 days
- E. 30 days

Answer: E

Explanation:

References:
<https://www.thewindowsclub.com/delay-defer-feature-updates-365-days-windows-10>

NEW QUESTION 121

- (Exam Topic 1)
 You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

NEW QUESTION 124

- (Exam Topic 1)
 You need to implement a solution to configure the contractors' computers.
 What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 128

- (Exam Topic 1)

You need to recommend a solution to configure the employee VPN connections. What should you include in the recommendation?

- A. Remote Access Management Console
- B. Group Policy Management Console (GPMC)
- C. Connection Manager Administration Kit (CMAK)
- D. Microsoft Intune

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-access/vpn/always-on-vpn/deploy/vpn-deploy>

NEW QUESTION 130

- (Exam Topic 1)

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

Answer: A

Explanation:

<https://technet.microsoft.com/en-us/mt227395.aspx>

NEW QUESTION 132

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:

Event Viewer
Performance Monitor
Windows Memory Diagnostic
Windows Performance Analyzer

Task to perform:

Create a subscription
Attach a task to an event
Enable an event trace provider
Create an alert

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 133

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.
 You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.
 What should you do?
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

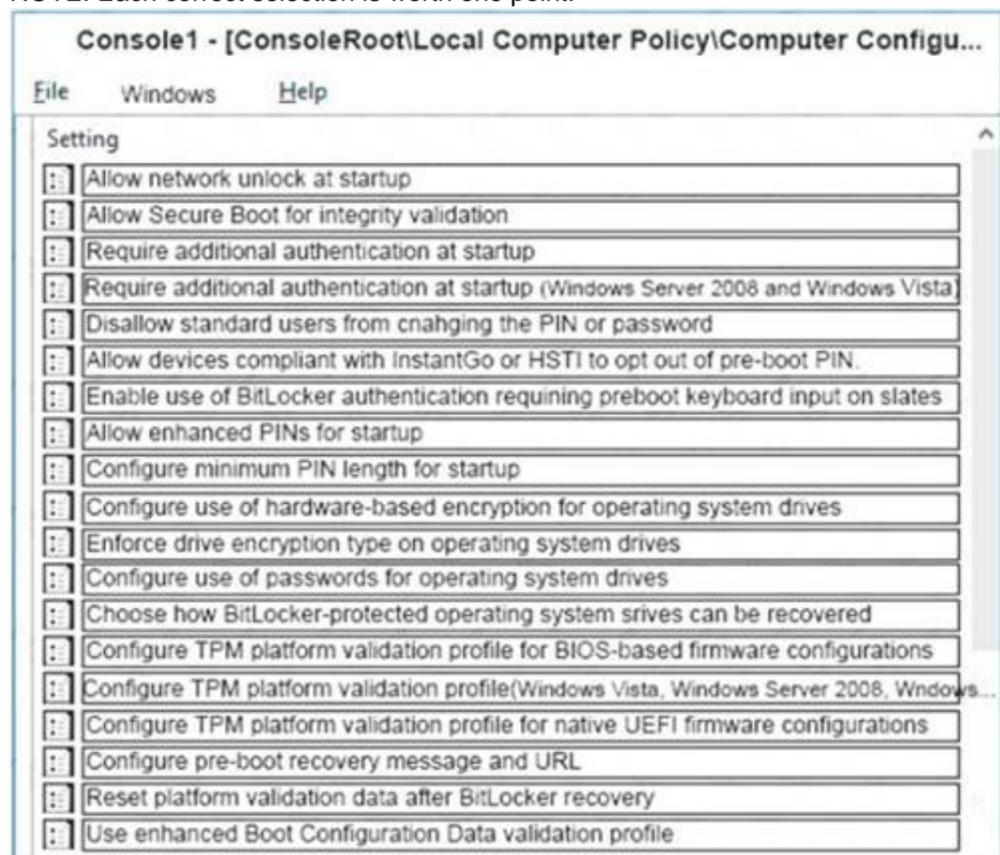

- > On Computer1, select the Start button > Settings > Accounts > Sign-in options.
- > Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:
<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 136

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM.
 You need to be able to encrypt the C drive by using BitLocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.
 Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.
 NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 137

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.
 The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- > The new computers must be upgraded to Windows 10 Enterprise automatically.
- > The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- > The users must not be required to accept the End User License Agreement (EULA). You need to deploy the new computers.

What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

Answer: D

Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 141

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the local users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group1

You create a folder named Folder1 that has the permissions shown in the following table.

Principal	Access	Inherited from	Applies to
Group2	Deny Write	None	This folder, subfolders, and files
Group1	Allow Full control	None	This folder, subfolders, and files
Administrators	Allow Full control	None	This folder, subfolders, and files

You create a file named File1.txt in Folder1 and allow Group2 Full control permissions to File1.txt. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can create a new file in Folder1	<input type="radio"/>	<input type="radio"/>
User1 can save changes to File1.txt	<input type="radio"/>	<input type="radio"/>
User2 can view the content of File1.txt	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.dell.com/support/article/za/en/zadhs1/sln156352/understanding-file-and-folder-permissions-in-win>

NEW QUESTION 145

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

NEW QUESTION 148

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Several users have signed in to Computer1 and have a profile.

You create a taskbar modification file named LayoutModification.xml.

You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

NEW QUESTION 149

- (Exam Topic 4)

You have a computer that runs Windows 10.

The computer fails to start, and you receive the following error message: "BOOTMGR image is corrupt. The system cannot boot".

You need to repair the system partition.

Which command should you run from Windows Recovery Environment (WinRE)?

- A. fdisk.exe
- B. chkdsk.exe
- C. diskpart.exe
- D. bcdboot.exe

Answer: C

Explanation:

DiskPart, which has replaced fdisk, is a command-line utility that provides the ability to manage disks, partitions or volumes in your computer running all versions of operating system since Windows 2000.

References:

<https://www.diskpart.com/windows-10/diskpart-windows-10-1203.html>

NEW QUESTION 150

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 151

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. Users in the finance department use the computers.

You have a computer named Computer1 that runs Windows 10.

From Computer1, you plan to run a script that executes Windows PowerShell commands on the finance department computers.

You need to ensure that you can run the PowerShell commands on the finance department from Computer1. What should you do on the finance department computers?

- A. From the local Group Policy, enable the Allow Remote Shell Access setting.
- B. From the local Group Policy, enable the Turn on Script Execution setting.
- C. From the Windows PowerShell, run the Enable-MMAgent cmdlet.
- D. From the Windows PowerShell, run the Enable-PSRemoting cmdlet.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=powershell-6>

NEW QUESTION 154

- (Exam Topic 4)

You have a computer that runs Windows 8.1.
When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.
You need to view the setup logs on the computer. Which folder contains the logs?

- A. %Windows.~BT\Sources\Panther\
- B. Windows\Logs
- C. Windows\Temp
- D. %Windows.~BT\Inf

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 155

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence. Does the meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 158

- (Exam Topic 4)

You are troubleshooting the network connectivity of a computer that runs Windows 10. The computer is connected physically to the network but rejects network traffic from an external source.

You need to reinstall the TCP/IP stack on the computer. What should you run?

- A. the netsh int ip resec command
- B. the Resec-NetAdapcerAdvancedPropercy cmdlet
- C. the netcf g -d command
- D. the Debug-NetworkController cmdlet

Answer: A

Explanation:

Reference: <https://howtofix.guide/reset-tcp-ip/>

NEW QUESTION 160

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with computers that run Windows 8.1.

A user named Mia Hamm has a computer named Computer1. You upgrade Computer1 to Windows 10 by performing a clean installation of Windows 10 without formatting the drives.

You need to migrate the settings for Mia Hamm from Windows 8.1 to Windows 10. Which two actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Run scanstate.exe and specify the C:\Users folder
- B. Run loadstate.exe and specify the C:\Windows.old folder
- C. Run usmultils.exe and specify the C:\Users folder
- D. Run scanstate.exe and specify the C:\Windows.old folder
- E. Run loadstate.exe and specify the C:\Users folder
- F. Run usmultils.exe and specify the C:\Windows.old folder

Answer: DE

Explanation:

D: As we have performed a clean installation of Windows 10 without formatting the drives, User1's Windows 8.1 user profile will be located in the \Windows.old folder. Therefore, we need to run scanstate.exe on the \Windows.old folder.

E: User1's Windows 10 profile will be in the C:\Users folder so we need to run loadstate.exe to apply the changes in the C:\Users folder.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-common-migration-scenarios#bkmk-fourpcre>

NEW QUESTION 164

- (Exam Topic 4)

You have a computer that runs Windows 10.

From the Settings app, you view the connection properties shown in the following exhibit.

Network profile

Public

Your PC is hidden from other devices on the network and can't be used for printer and file sharing.

Private

For a network you trust, such as at home or work. Your PC is discoverable and can be used for printer and file sharing if you set it up.

[Configure firewall and security settings](#)

Metered connection

If you have a limited data plan and want more control over data usage, make this connection a metered network. Some apps might work differently to reduce data usage when you're connected to this network.

Set as metered connection

On

[Set a data limit to help control data usage on this network](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

▼

set the Network profile to Private
 run winrm qc at the command prompt
 turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

▼

set the Network profile to Private
 run winrm qc at the command prompt
 turn off Metered connection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

▼

set the Network profile to Private
 run winrm qc at the command prompt
 turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

▼

set the Network profile to Private
 run winrm qc at the command prompt
 turn off Metered connection

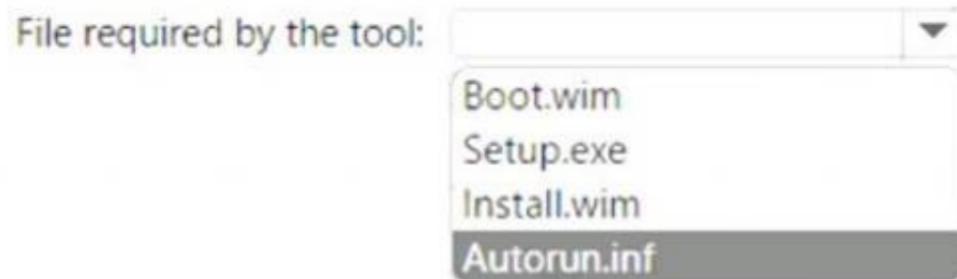

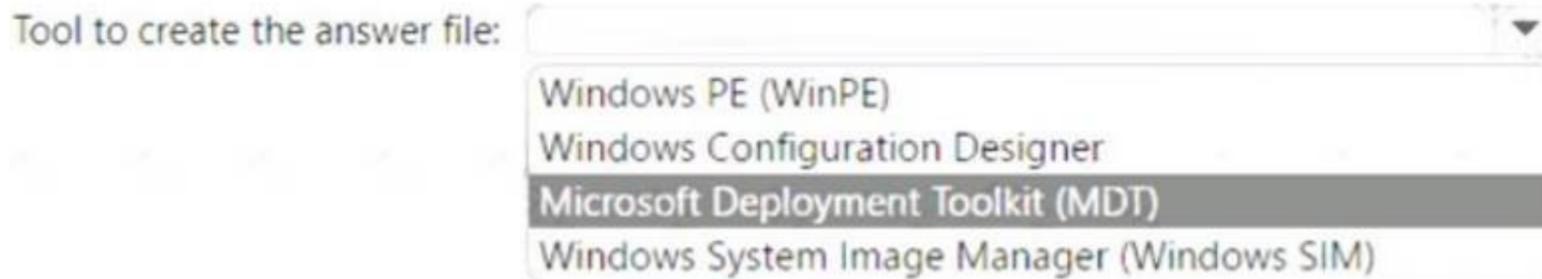

NEW QUESTION 169

- (Exam Topic 4)

You plan to install Windows 10 on a new computer by using an answer file. You need to create the answer file.

Which tool should you use to create the answer file, and which file is required by the tool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 172

- (Exam Topic 4)

You deploy 100 computers that run Windows 10. Each computer has a cellular connection and a Wi-Fi connection. You need to prevent the computers from using the cellular connection unless a user manually connects to the cellular network. What should you do?

- A. Set the Use cellular instead of Wi-Fi setting for the cellular connection to Never
- B. Run the netsh wlan set hostednetwork mode=disallow command
- C. Clear the Let Windows manage this connection check box for the cellular connection
- D. Select the Let Windows manage this connection check box for the Wi-Fi connection

Answer: C

Explanation:

References:
<https://support.microsoft.com/en-za/help/10739/windows-10-cellular-settings>

NEW QUESTION 174

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

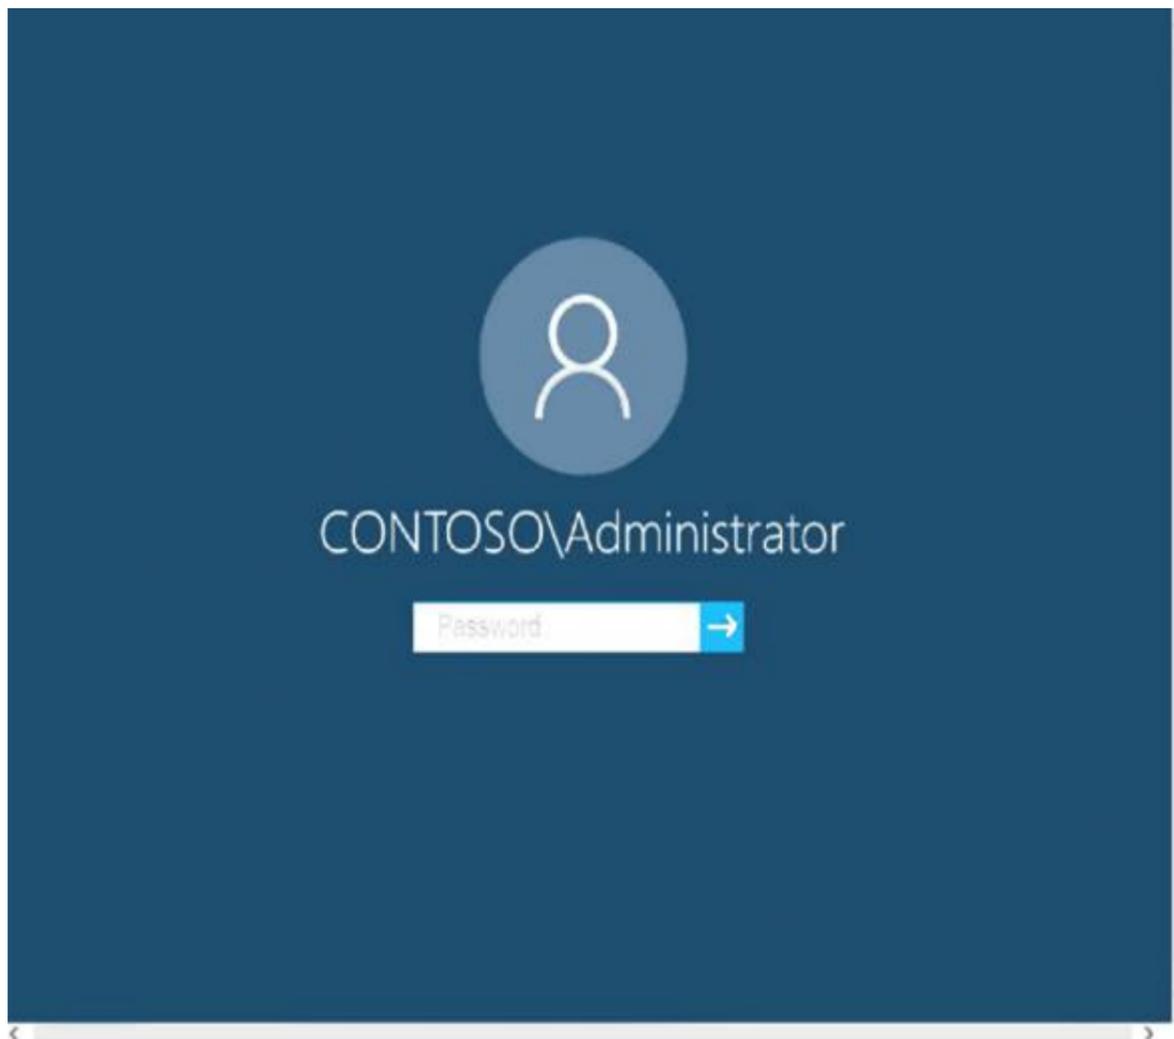

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks

Computers

You need to ensure that C:\Scripts\Configure.ps1 runs every time a user sign in to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

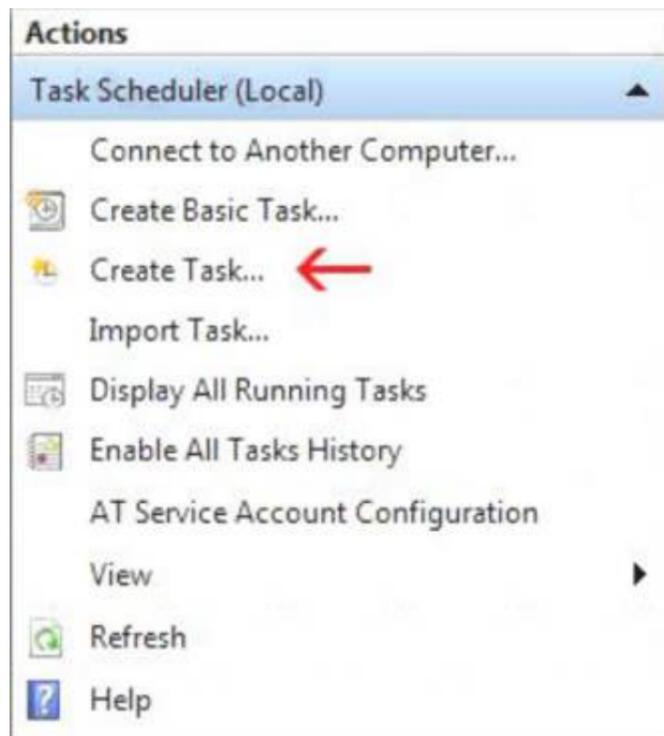

Answer: A

Explanation:

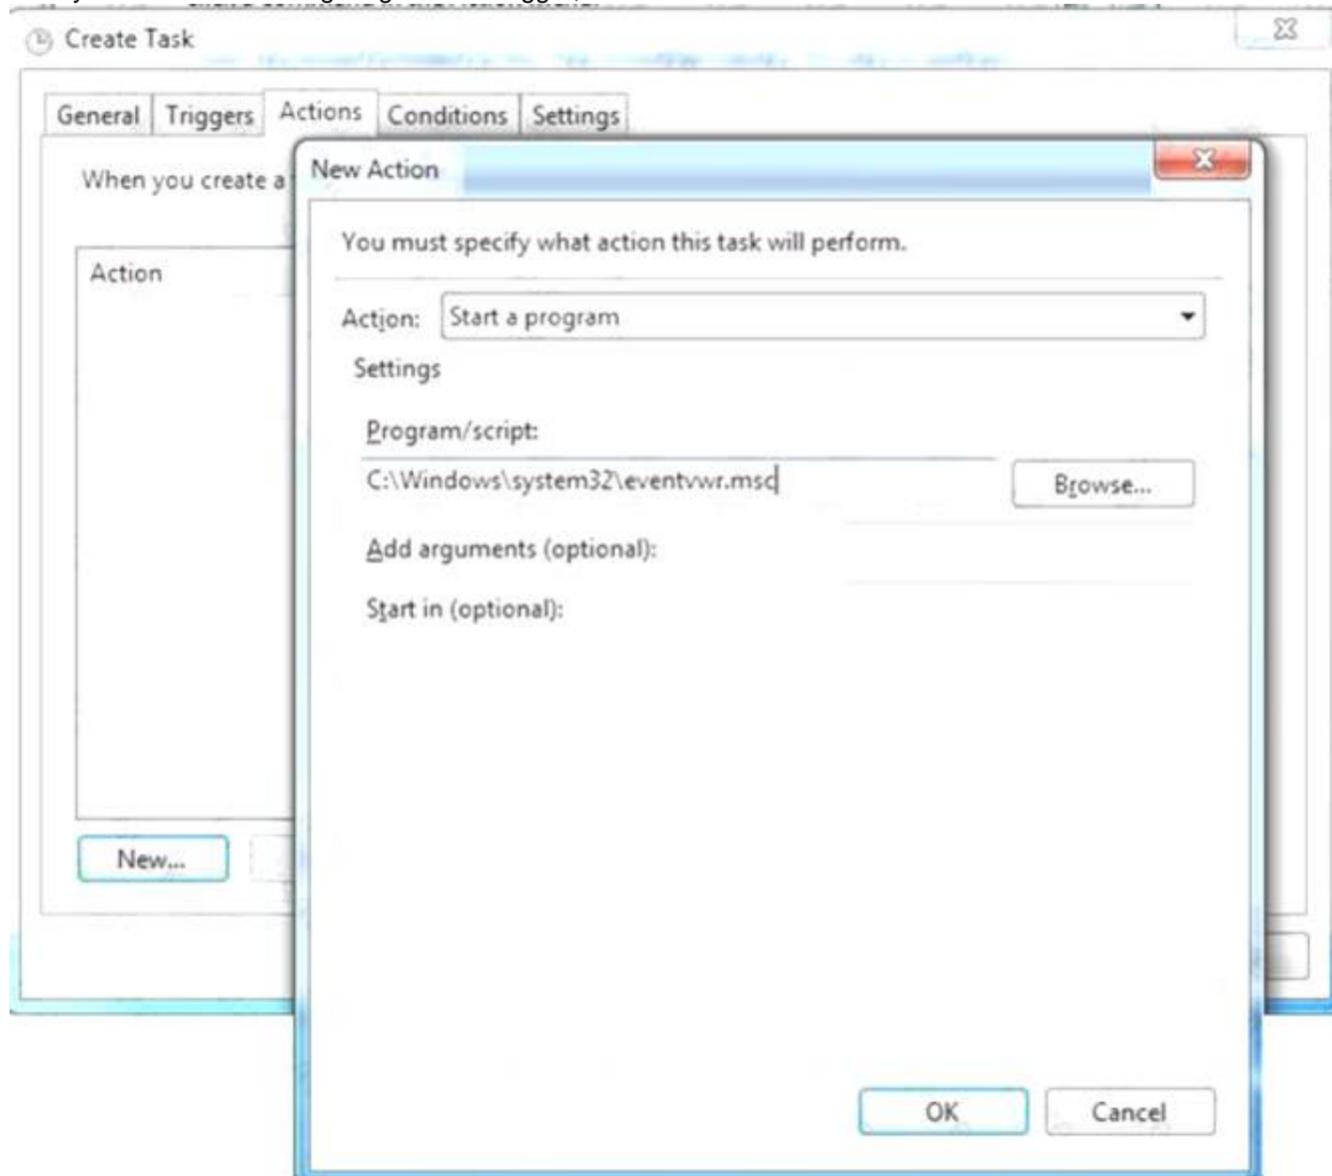

Go to the Start menu, type "Task Scheduler" and select it from the search results.

Task Scheduler can also be accessed in the Control Panel under Administrative Tools. In the right side of the Task Scheduler menu, under Actions, select "Create Task."

On the General tab, enter a name and description for the task you're creating. Check the box "Run with highest privileges."
 Once you have filled out a name and description, click the "Triggers" tab, and then click "New."
 In this menu, under "Begin the task:" select "At log on." Choose which user you would like the task to run for at log on. For our purposes, Any user.
 Configure any of the applicable advanced settings you would like.
 After you are finished configuring the new trigger, click OK and then select the "Actions" tab. Click "New" to make a new action.

Choose "Start a program" under the Action menu and then click "Browse" to point to C:\Scripts\Configure.ps1.
 Click OK to exit out of the Actions menu. The "Conditions" and "Settings" tabs can be left alone.
 Click OK on the Create Task menu, and you are finished. Reference:

NEW QUESTION 179

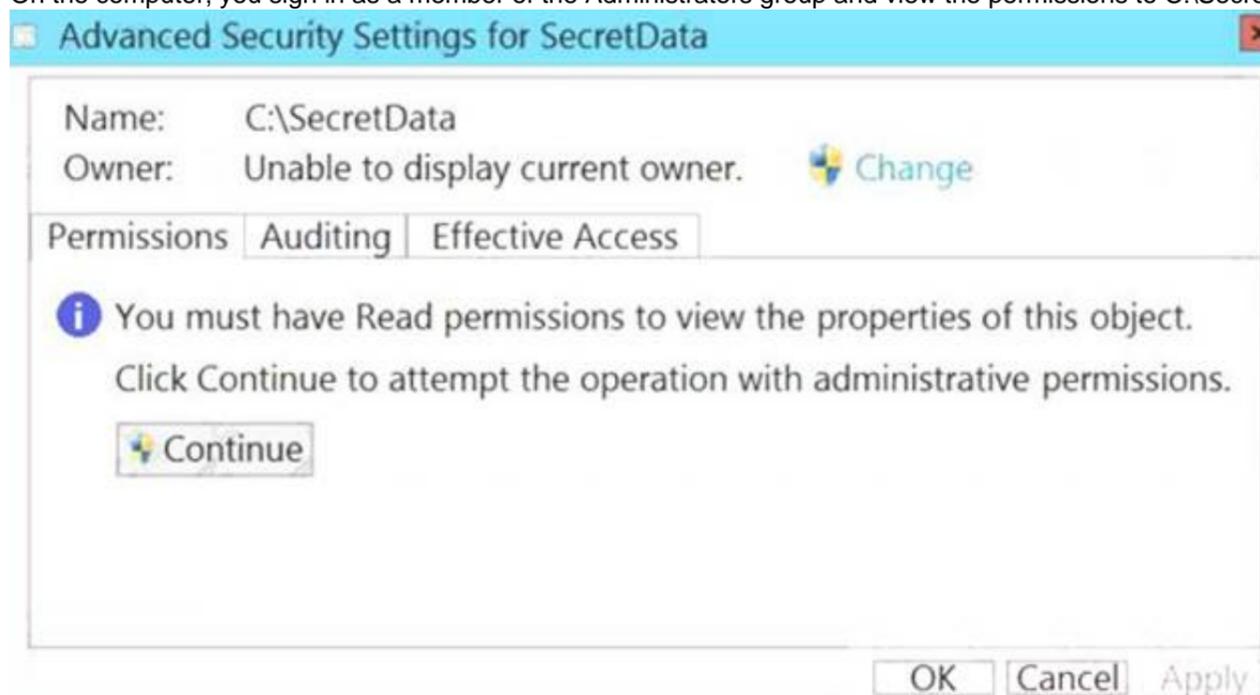

- (Exam Topic 4)

User1 is a member of the Administrators group on a computer that runs Windows 10.

When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore Use1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run `cacls.exe c:\secretdata /g user1:F`.

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

NEW QUESTION 182

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 183

- (Exam Topic 4)

Your company has a Remote Desktop Gateway (RD Gateway).

You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway. You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connection settings
- B. Server authentication
- C. Local devices and resources
- D. Connect from anywhere

Answer: D

NEW QUESTION 184

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Power Users, Users
User3	Backup Operators, Users
User4	Users

You plan to add a key named Key1 to the following three registry branches:

- > HKEY_CURRENT_CONFIG\Software
- > HKEY_LOCAL_MACHINE\Software
- > HKEY_CURRENT_USER\Software

You need to identify which users can add Key1.

What user or users should you identify for each branch? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

HKEY_CURRENT_CONFIG\Software:

HKEY_LOCAL_MACHINE\Software:

HKEY_CURRENT_USER\Software:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1 and Box 2.

These are system-wide registry keys so only Administrators can modify them. Box 3.

This key affects only the logged in user. Therefore, any user can modify this key.

NEW QUESTION 185

A web service installed on Client1 is used for testing. You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

To create an inbound port rule

- > In the navigation pane, click Inbound Rules.
- > Click Action, and then click New rule.
- > On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- > On the Program page, click All programs, and then click Next.
- > On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- > On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- > On the Action page, select Allow the connection, and then click Next.
- > On the Profile page, select the network location types to which this rule applies, and then click Next.
- > On the Name page, type a name and description for your rule, and then click Finish.

Reference:

- <https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>
- https://en.wikipedia.org/wiki/List_of_TCP_and_UDP_port_numbers

NEW QUESTION 190

- (Exam Topic 4)

Your company is not connected to the internet. The company purchases several new computers with Windows 10 Pro for its users. None of the new computers are activated. You need to activate the computers without connecting the network to the Internet. What should you do?

- A. Make use of the Volume Activation Management Tool (VAMT).
- B. Make use of the Key Management Service (KMS).
- C. Make use of the Windows Process Activation Service.
- D. Run the Get-WmiObject -query cmdlet.

Answer: B

Explanation:

You can configure one of the computers as a Key Management Service (KMS) host and activate the KMS host by phone. The other computers in the isolated network can then activate using the KMS host.

Installing a KMS host key on a computer running Windows 10 allows you to activate other computers running Windows 10 against this KMS host and earlier versions of the client operating system, such as Windows 8.1 or Windows 7. Clients locate the KMS server by using resource records in DNS, so some configuration of DNS may be required. This scenario can be beneficial if your organization uses volume activation for clients and MAK-based activation for a smaller number of servers. To enable KMS functionality, a KMS key is installed on a KMS host; then, the host is activated over the Internet or by phone using Microsoft's activation services.

Reference:

- <https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

NEW QUESTION 192

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1. You need to meet the following requirements:

- > Provide a user named Jon Ross with the ability to modify the permissions of C:\Folder1.
- > Ensure that the principle of least privilege is maintained.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > In Windows Explorer, right-click the C:\Folder1 folder, and then click Properties.
- > Click on the Security tab, and then click Edit.
- > In the Permissions dialog box, add Jon Ross.
- > Specify the Allow Modify permissions for the Jon Ross.
- > Click OK twice to close the Security dialog box.
- > Click OK twice to close the Properties dialog box.

<https://docs.microsoft.com/en-us/iis/web-hosting/configuring-servers-in-the-windows-web-platform/configuring>

NEW QUESTION 197

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a group named Group1.

All the computers in the domain run Windows 10. Each computer contains a folder named C:\Documents that has the default NTFS permissions set.

You add a folder named C:\Documents\Templates to each computer.

_You need to configure the NTFS permissions to meet the following requirements: All domain users must be able to open the files in the Templates folder.

_Only the members of Group1 must be allowed to edit the files in the Templates folder.

How should you configure the NTFS settings on the Templates folder? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Inheritance: ▼

Enable inheritance.
Disable inheritance and remove permissions.
Disable inheritance and copy explicit permissions.

Permissions for domain users: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

Permissions for Group1: ▼

Allow Read&Execute
Deny Read&Execute
Allow Modify
Deny Modify

NEW QUESTION 198

- (Exam Topic 4)

You have a computer that runs Windows 10. You view the domain services status as shown in the following exhibit.

```

-----
| Device State |
-----

AzureAdJoined : YES

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Microsoft Edge is configured by using: ▼

a Group Policy object (GPO)
 Microsoft Intune
 the Internet Explorer Administration Kit (IEAK)

The computer is: ▼

enrolled in Microsoft Intune
 managed by using Microsoft System Center Configuration Manager
 joined to an on-premises Active Directory domain

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Device is Azure AD joined; not domain joined.

The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>

NEW QUESTION 199

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

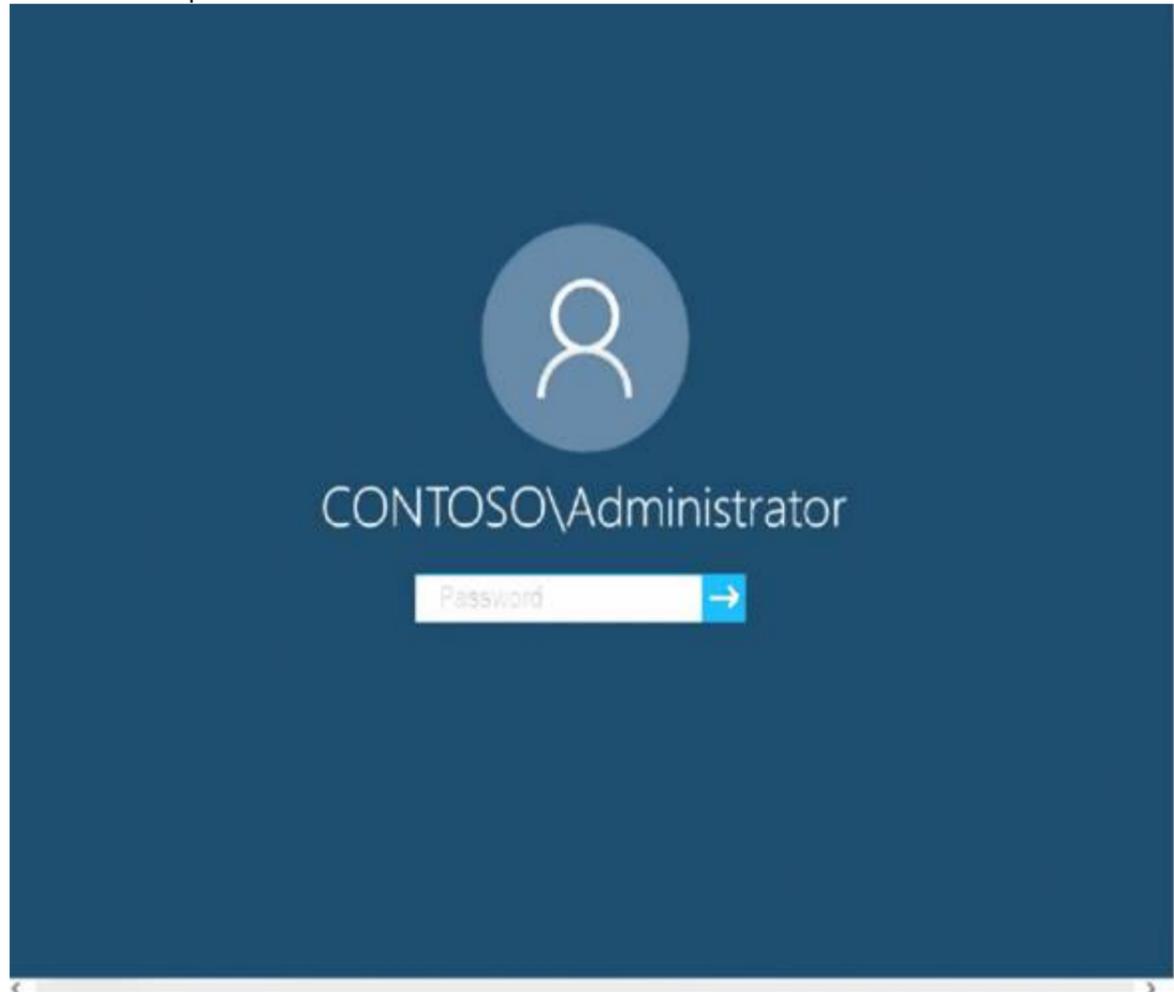

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to connect to your company's network and create a VPN connection on Client2 named VPN1 that meets the following requirements:
 VPN1 must connect to a server named vpn.contoso.com.
 Only traffic to your company's network must be routed through VPN1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, click on the Start button and go to settings.
- Select Network & Internet.
- Select VPN on the left-hand side
- Click on the Add a VPN connection button.
- Next, select the VPN provider—This will almost always be Windows (built-in).
- Name your connection and enter the server name as provided by your IT technician. (VPN1 and vpn.contoso.com).
- Add in your username and password as provided by your IT technician.
- Click Save when done.
- Closeout the PC settings windows.

NEW QUESTION 203

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to create a custom Windows Sandbox configuration file. Which file extension should you use?

- A. .ps
- B. json
- C. .wsb
- D. .xml

Answer: C

NEW QUESTION 206

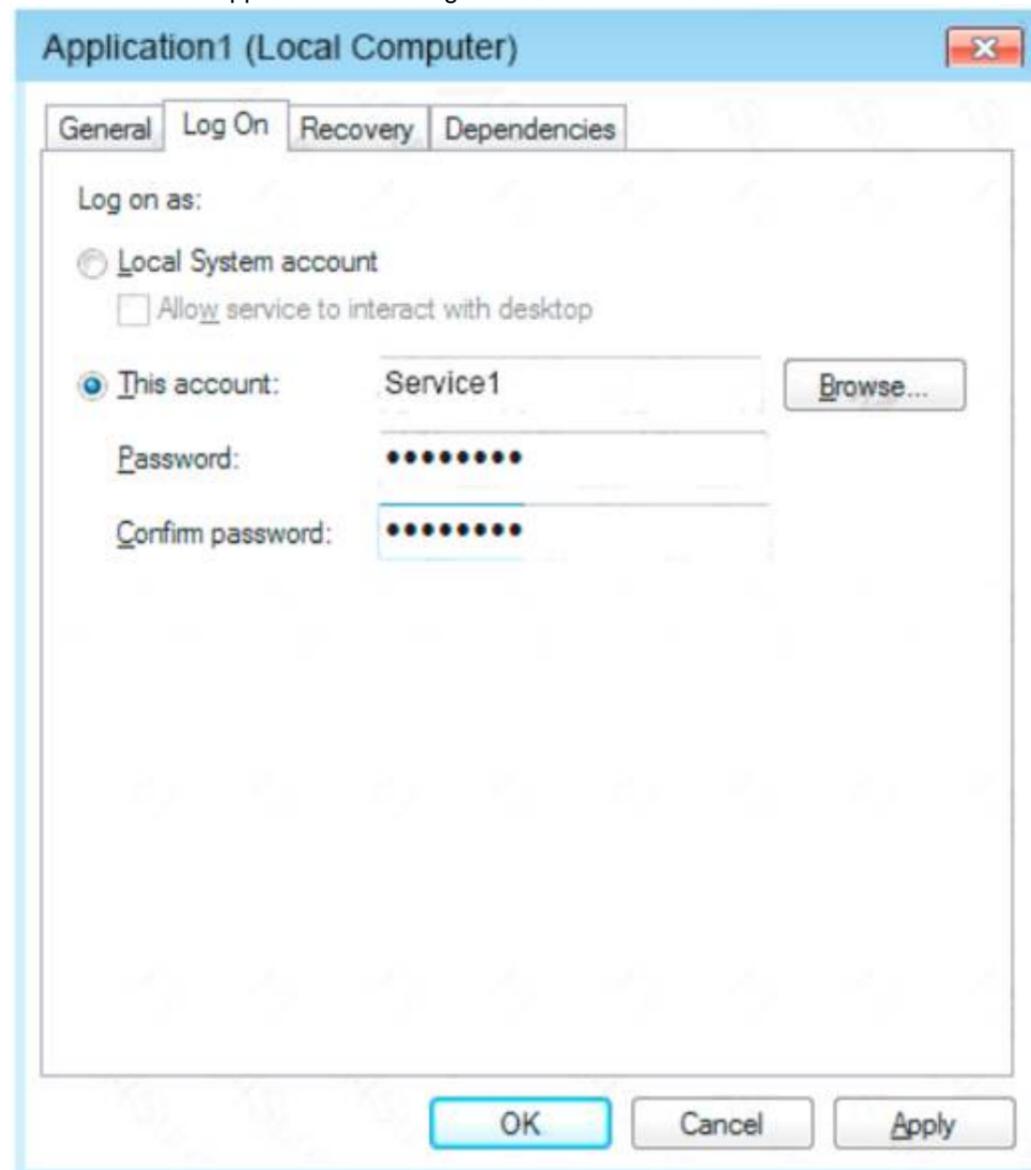

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

NEW QUESTION 207

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. The domain contains the users shown in the following table.

Name	Member of
Admin1	Domain Admins, Group1
User1	Group1
User2	Group2

Computer1 has four printers as shown in the following table.

Name	Type	Added by	Permissions
Printer1	Local printer	Admin1	Print: Group1 Manage the printer: Group1
Printer2	Network printer	Admin1	Print: Domain Users Manage the printer: Domain Users
Printer3	Local printer	User1	Print: Group1 Manage the printer: Group1
Printer4	Local printer	User2	Print: Domain Users Manage the printer: Domain Users

Which printers will be available to User1 when the user signs in to Computer1?

- A. Printer3 only
- B. Printer1 and Printer3 only
- C. Printer1, Printer2, and Printer3 only
- D. Printer1, Printer3, and Printer4 only
- E. Printer1, Printer2, Printer3, and Printer4

Answer: E

NEW QUESTION 210

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Commands

dism.exe

copy.cmd

mount.exe

diskpart.exe

Answer Area

Prepare a WinPE working directory: Command

Mount and unmount a WinPE image: Command

Add scripting support to a WinPE image: Command

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Copyype.cmd Dism.exe Mount.exe

NEW QUESTION 212

- (Exam Topic 4)

You have computers that run Windows 10 Enterprise as shown in the following table.

Name	Servicing channel
Computer1	Semi-Annual Channel (SAC)
Computer2	Long-Term Servicing Channel (LTSC) 2016

Both computers have applications installed and contain user data.

You plan to configure both computers to run Windows 10 Enterprise LTSC 2019 and to retain all the existing applications and data.

You need to recommend a method to deploy Windows 10 Enterprise LTSC 2019 to the computers. The solution must minimize effort to install and configure the applications.

What should you include in the recommendation for each computer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

▼

Perform a clean installation.
 Perform an in-place upgrade.
 Update the product key.

Computer2:

▼

Perform a clean installation.
 Perform an in-place upgrade.
 Update the product key.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

Administrators report that they cannot use Event Viewer to remotely view the event logs on Client3. You need to ensure that the administrators can access the event logs remotely on Client3. The solution must ensure that Windows Firewall remains enabled. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Go to Control Panel -> System and Security -> Windows Firewall.
- * 2. Click on the Advanced settings link in the left-hand side.

- * 3. Enable COM+ Network Access (DCOM-In).

- * 4. Enable all the rules in the Remote Event Log Management group.

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

- > Open Server Manager.
- > From Tools menu, select Active Directory Users and Computers
- > Double click at your domain on the left and then select Builtin.
- > Open Remote Desktop Users on the right pane.
- > At Members tab, click Add.
- > Type the AD users that you want to give Remote access to the RDS Server and click OK.
- > After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.

- * 1. Open Group Policy Editor. To do that:
 - * a. Simultaneously press the Windows + R keys to open run command box. 
 - * b. Type gpedit.msc and press Enter.
- * 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.
- * 3. At the right Pane: double click at Allow log on through Remote Desktop Services.
- * 4. Click Add User or Group.
- * 5. Type remote and then click Check Names.
- * 6. Select the Remote Desktop Users and click OK.
- * 7. Click OK at 'Select users, computers...' window.
- * 8. Finally click OK again and close Group Policy Editor.

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- > On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- > A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- > Private.txt will now show its file name in green color.
- > Right-click Private.txt and then select Properties.
- > Click Advanced on the General tab.
- > Click Details on the Advanced Attributes tab to open the User Access dialog box.
- > Click Add to open the Encrypting File System dialog box and then select User1.
- > Click OK to add User1 to the list of users who have access to the file.
- > Click OK until you've exited out of the dialog boxes. Reference:

<https://www.top-password.com/blog/password-protect-notepad-text-files-in-windows-10/> <https://sourcedaddy.com/windows-7/how-to-grant-users-access-to-an-encrypted-file.html>

NEW QUESTION 227

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. The computers are in a workgroup. You perform the following configurations on Computer1:

- > Create a user named User1.
- > Add User1 to the Remote Desktop Users group. You perform the following configurations on Computer2:
- > Create a user named User1 and specify the same user password as the one set on Computer1.
- > Create a share named Share2 and grant User1 Full control access to Share2.
- > Enable Remote Desktop.

What are the effects of the configurations? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

If User1 attempts to access Share2 from Computer1, the user will:

<input type="checkbox"/>	Access Share2 without a prompt
<input type="checkbox"/>	Be prompted for credentials
<input type="checkbox"/>	Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

<input type="checkbox"/>	Sign in to Remote Desktop without a prompt
<input type="checkbox"/>	Be prompted for credentials and be able to sign in as User1.
<input type="checkbox"/>	Be prompted for credentials and be prevented from signing in as User1.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If User1 attempts to access Share2 from Computer1, the user will:

<input type="checkbox"/>	Access Share2 without a prompt
<input type="checkbox"/>	Be prompted for credentials
<input type="checkbox"/>	Be denied access to Share2

If User1 attempts to sign in to Remote Desktop on Computer2 from Computer1, the user will:

<input type="checkbox"/>	Sign in to Remote Desktop without a prompt
<input checked="" type="checkbox"/>	Be prompted for credentials and be able to sign in as User1.
<input type="checkbox"/>	Be prompted for credentials and be prevented from signing in as User1.

NEW QUESTION 231

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a computer named Computer1 that runs Windows 10. Several user settings are configured in a Default Domain Policy Group Policy Object (GPO). Users sign in to Computer1 as shown in the following table.

Name	Created in/on	Member of
User1	Contoso.com	Domain Users
User2	Computer1	Administrators

You configure the following GPOs on Computer1:

- > Local Computer
- > Local Computer\User2
- > Local Computer\Administrators
- > Local Computer\Non-Administrators Each GPO has different user settings configured.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
The Local Computer GPO applies to User1.	<input type="radio"/>	<input type="radio"/>
The Local Computer\Administrators GPO applies to User2.	<input type="radio"/>	<input type="radio"/>
The Default Domain Policy GPO applies to User2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
The Local Computer GPO applies to User1.	<input type="radio"/>	<input checked="" type="radio"/>
The Local Computer\Administrators GPO applies to User2.	<input checked="" type="radio"/>	<input type="radio"/>
The Default Domain Policy GPO applies to User2.	<input type="radio"/>	<input checked="" type="radio"/>

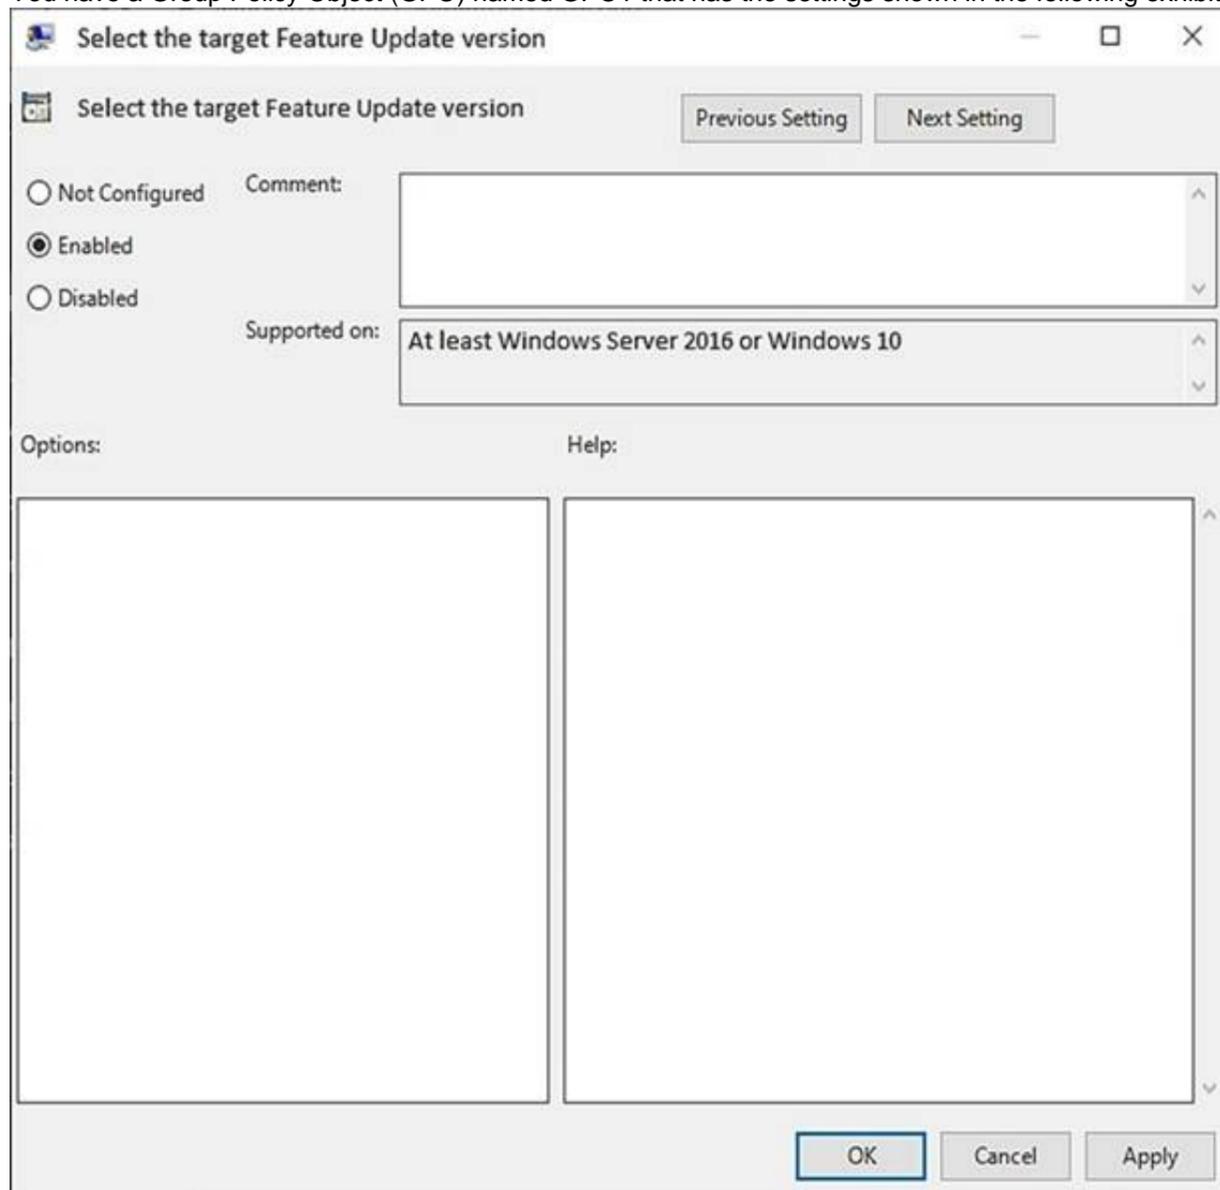

NEW QUESTION 232

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. The computers are configured as shown in the following table.

Name	Version	Organizational unit (OU)
Computer1	1909	Devices/OU1
Computer2	1909	Devices/OU2
Computer3	20H2	Devices/OU2

You have a Group Policy Object (GPO) named GPO1 that has the settings shown in the following exhibit.

A domain administrator links GPO1 to OU2.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Computer1 will install Windows 10, version 2004.	<input type="checkbox"/>	<input type="checkbox"/>
Computer2 will install Windows 10, version 2004.	<input type="checkbox"/>	<input type="checkbox"/>
Computer3 will install Windows 10, version 2004.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

<https://support.microsoft.com/en-us/topic/feature-update-through-windows-10-version-20h2-enablement-packag>

NEW QUESTION 234

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

NEW QUESTION 238

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains a user named user1@contoso.com. You have a computer named Computer1 that runs Windows 10.

You join Computer1 to Azure AD. You enable Remote Desktop on Computer1.

User1@contoso.com attempts to connect to Computer1 by using Remote Desktop and receives the following error message: "The logon attempt failed."

You need to ensure that the user can connect to Computer1 by using Remote Desktop. What should you do first?

- A. In Azure AD, assign user1@contoso.com the Cloud device administrator role.
- B. From the local Group Policy, modify the Allow log on through Remote Desktop Services user right.
- C. In Azure AD, assign user1@contoso.com the Security administrator role.
- D. On Computer1, create a local user and add the new user to the Remote Desktop Users group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/client-management/connect-to-remote-aadj-pc>

NEW QUESTION 240

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

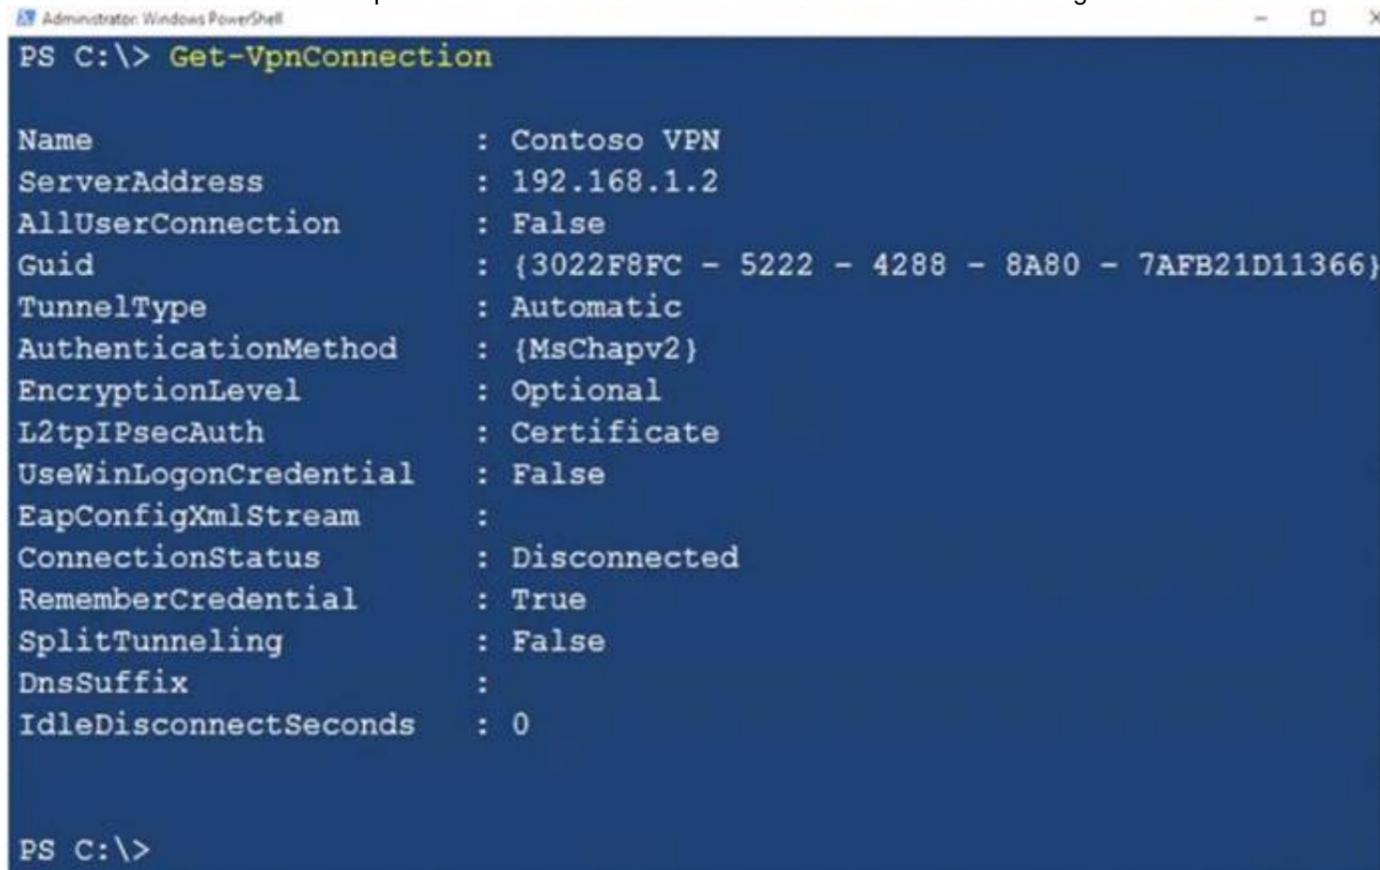

NEW QUESTION 243

- (Exam Topic 4)

You have a VPN server that accepts PPTP and L2TP connections and is configured as shown in the following exhibit.

A user named User1 has a computer that runs Windows 10 and has a VPN connection configured as shown in the following exhibit.

User1 fails to establish a VPN connection when connected to a home network. You need to identify which VPN client setting must be modified. What should you identify?

- A. ServerAd dress
- B. TunnelType
- C. AuthenticationMethod
- D. L2tpIPsecAuth
- E. EncryptionLevel

Answer: A

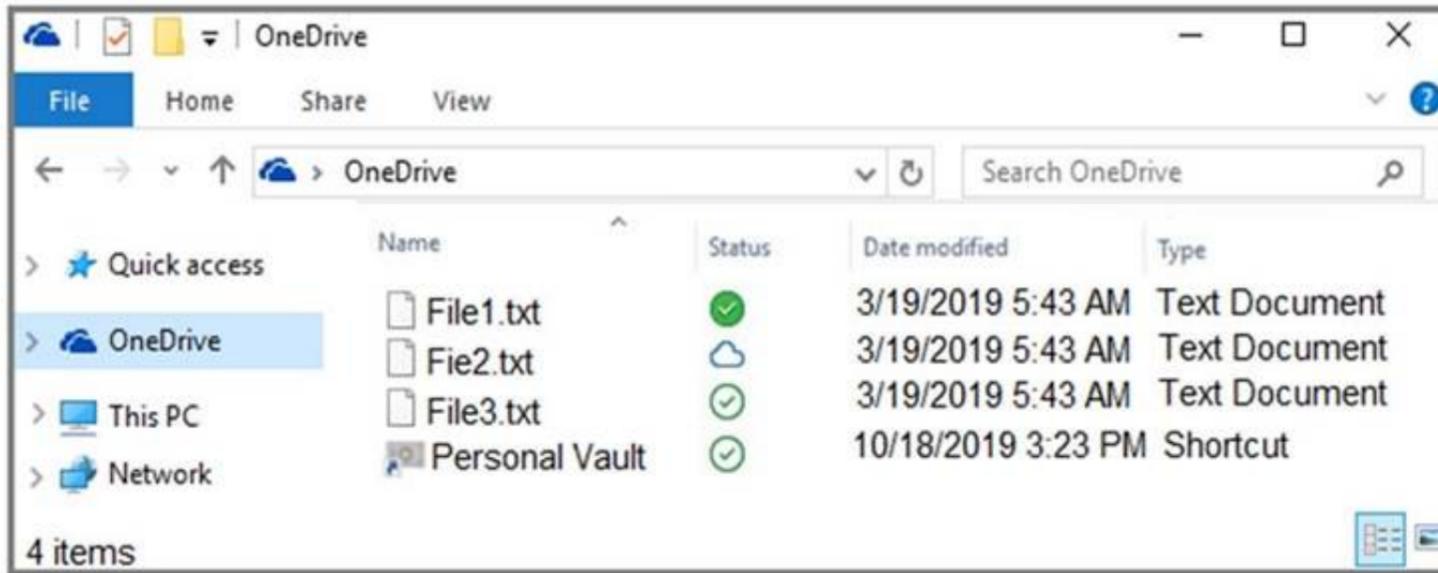

Explanation:

The server address is a private IP address. This needs to be the public IP address of the VPN server.

NEW QUESTION 247

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.
 NOTE: Each correct selection is worth one point.

Answer Area

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

▼
File2.txt only
File1.txt and File2.txt only
File2.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

▼
File1.txt only
File1.txt and File2.txt only
File1.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

▼
File2.txt only
File1.txt and File2.txt only
File2.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

▼
File1.txt only
File1.txt and File2.txt only
File1.txt and File3.txt only
File1.txt, File2.txt, and File3.txt

NEW QUESTION 251

- (Exam Topic 4)

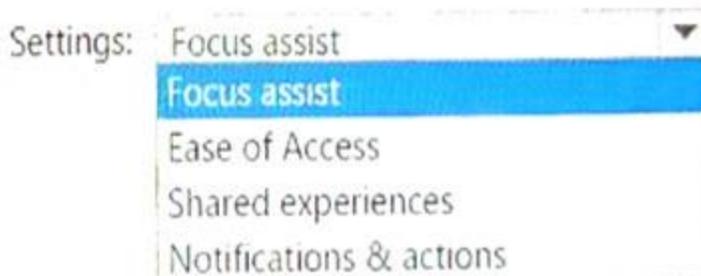

You have a Windows 10 device.

You need to ensure that only priority notifications are displayed during business hours.

Which settings in the Settings app should you configure, and where will standard notifications be sent during business hours? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

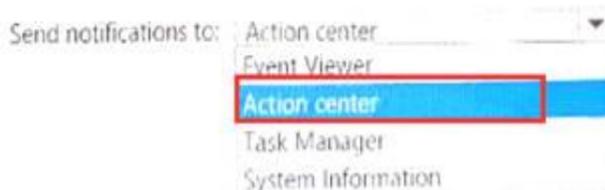

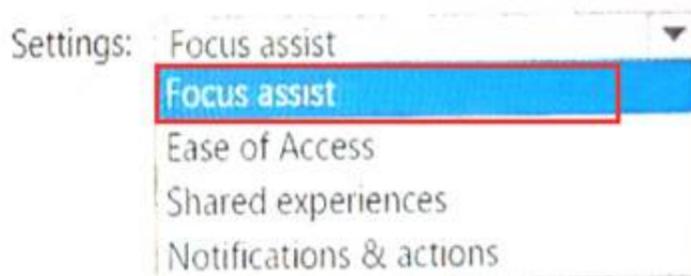

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 253

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

On Computer1, you need to run the Invoke-Command cmdlet to execute several PowerShell commands on Computer2.

What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet
- B. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2
- C. On Computer1, run the New-PSSession cmdlet
- D. On Computer2, add Computer1 to the Remote Management Users group

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

NEW QUESTION 254

- (Exam Topic 4)

You have a Microsoft 365 Enterprise E3 license.

You have a computer named Computer1 that runs Windows 10.

You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

- A. Sync your settings in the Settings app
- B. the File Explorer desktop app
- C. the Microsoft OneDrive desktop app
- D. Default apps in the Settings app

Answer: C

NEW QUESTION 256

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Settings app, you modify the properties of the Wireless1 known Wi-Fi network. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Removing Wireless1 as a known Wi-Fi network on Computer1 will prevent it from automatically connecting. Note: You can also type netsh wlan show profiles in the Command Prompt to manage and delete wireless network profiles.

NEW QUESTION 257

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

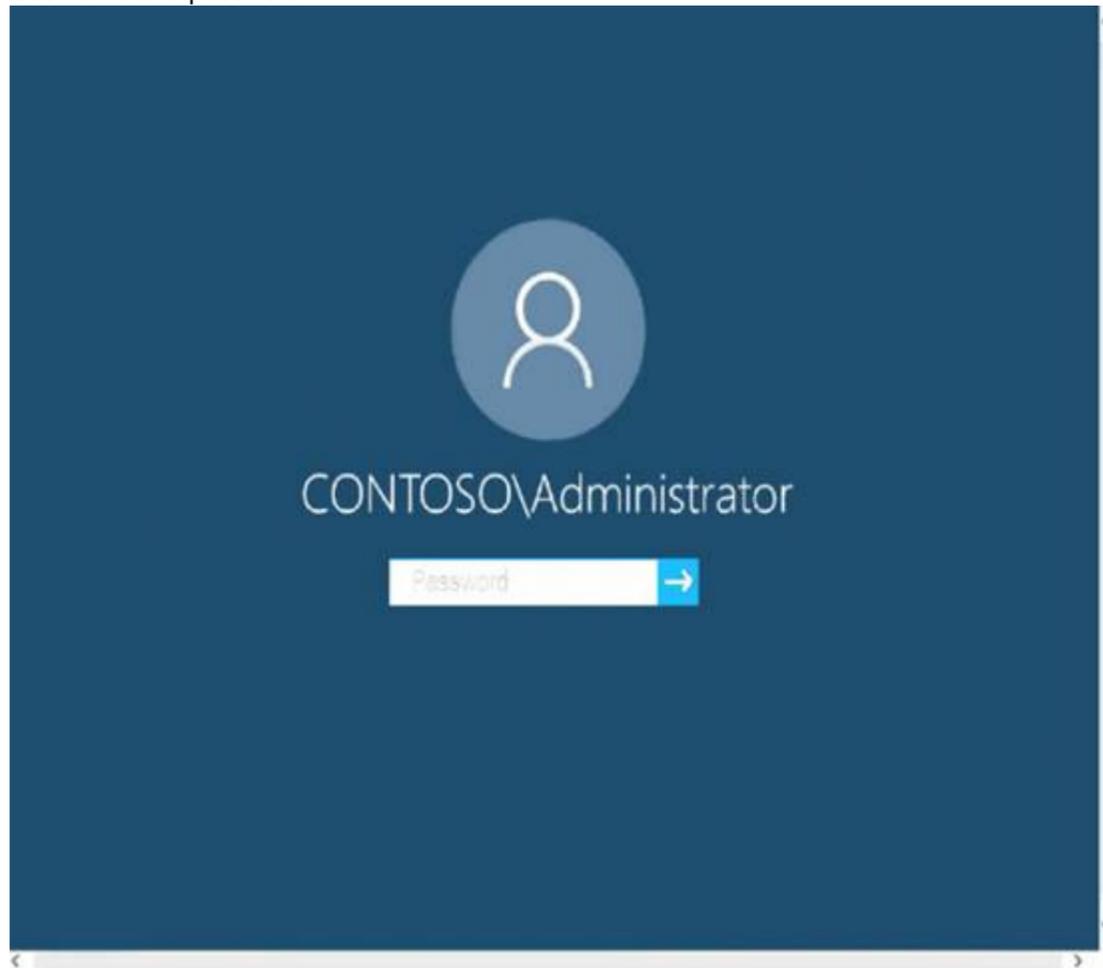

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks

Computers

You need to ensure that a local user named User1 can establish a Remote Desktop connection to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Add User to Remote Desktop Users Group via Settings App

- > Open the Settings app on Client2 and go to System -> Remote Desktop. Click on the Select users that can remotely access this PC link on the right side.
- > When the Remote Desktop Users dialog opens, click on Add.
- > Click on Advanced.
- > Click on Find Now and then select any user account you want to add to the "Remote Desktop Users" group, and click OK.
- > Click OK and you're done.

NEW QUESTION 259

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Name	Type	Member of
User1	User	Group1
User2	User	Group2
Group1	Global group	None
Group2	Domain local group	None
Computer1	Computer	Group1
Computer2	Computer	Group1

Computer1 contains the shared folders shown in the following table.

Name	NTFS permission	Share permission	Folder enumeration mode
Share1	Group1: Write	Group1: Full control	Access-based
Share2\$	Group2: Full control	Group2: Read	Unrestricted

The computers have the network configurations shown in the following table.

Name	Network Discovery	Windows Defender Firewall
Computer1	On	Incoming connections: Block all connections to apps that are not on the list of allowed apps
Computer2	Off	Incoming connections: Block all connections to apps that are not on the list of allowed apps

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Share1 is listed if User1 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share1 is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share2\$ is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible.

Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

NEW QUESTION 260

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

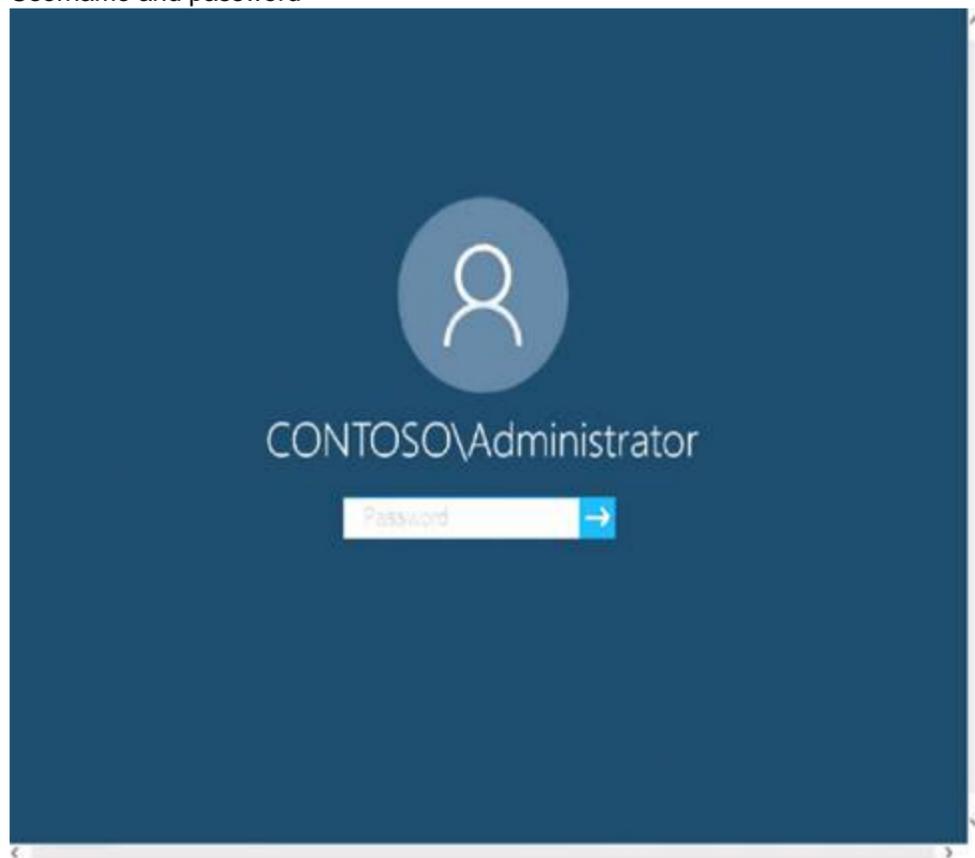

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

The screenshot shows the Windows Server Manager interface. On the left is a navigation pane with 'Dashboard' selected. The main area is titled 'WELCOME TO SERVER MANAGER' and contains a 'QUICK START' section with five numbered steps: 1. Configure this local server, 2. Add roles and features, 3. Add other servers to manage, 4. Create a server group, and 5. Connect this server to cloud services. Below this is the 'ROLES AND SERVER GROUPS' section, which shows a grid of role cards for 'AD DS', 'DNS', 'File and Storage Services', 'Local Server', and 'All Servers'. Each card lists sub-features like 'Manageability', 'Events', 'Services', 'Performance', and 'BPA results'. At the bottom of the interface are two buttons labeled 'Tasks' and 'Computers'.

You have already prepared Client1 for remote management.
 You need to forward all events from the Application event log on Client1 to DC1.
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Configuring the event source computer

* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

* 2. Start group policy by running the following command:

```
%SYSTEMROOT%\System32\gpedit.msc
```

* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.

* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.

* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied:

```
gpupdate /force
```

Configuring the event collector computer

* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

* 2. Run the following command to configure the Event Collector service:

```
wecutil qc /q
```

* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:

```
wecutil cs configurationFile.xml
```
