

Exam Questions MD-100

Windows 10

<https://www.2passeasy.com/dumps/MD-100/>

NEW QUESTION 1

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

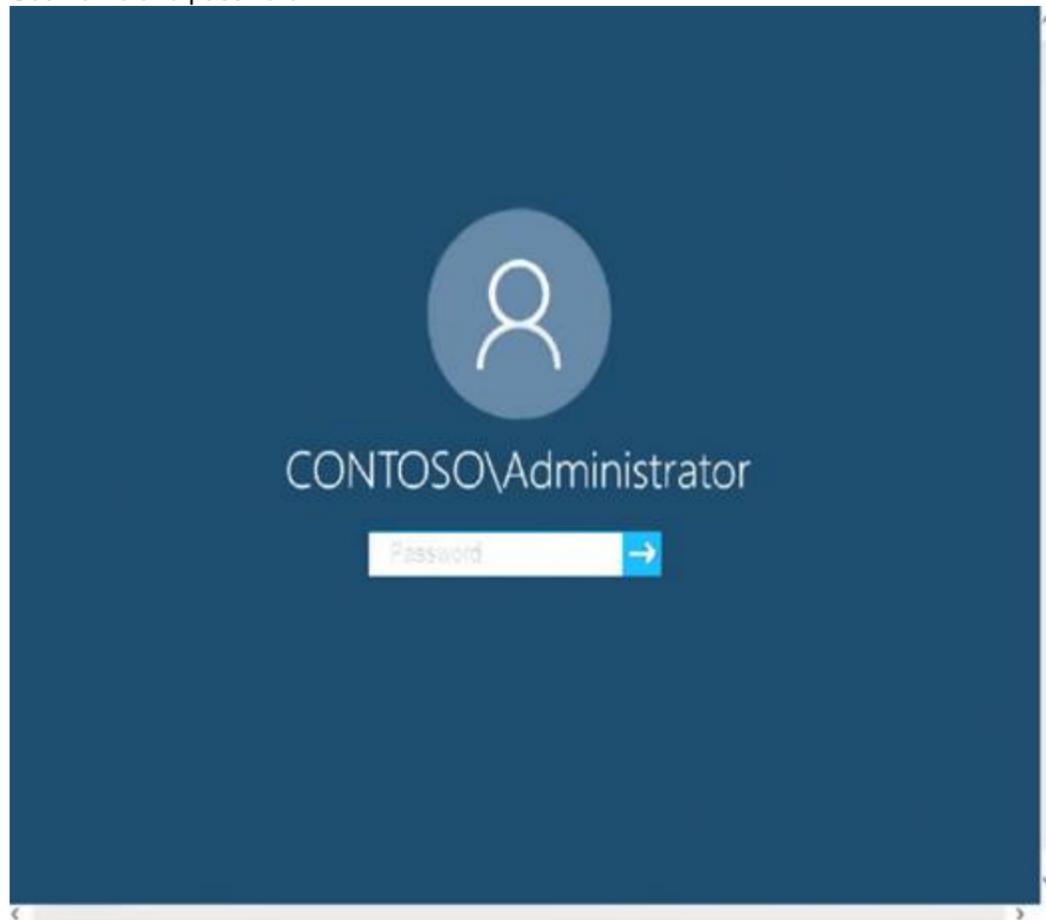

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

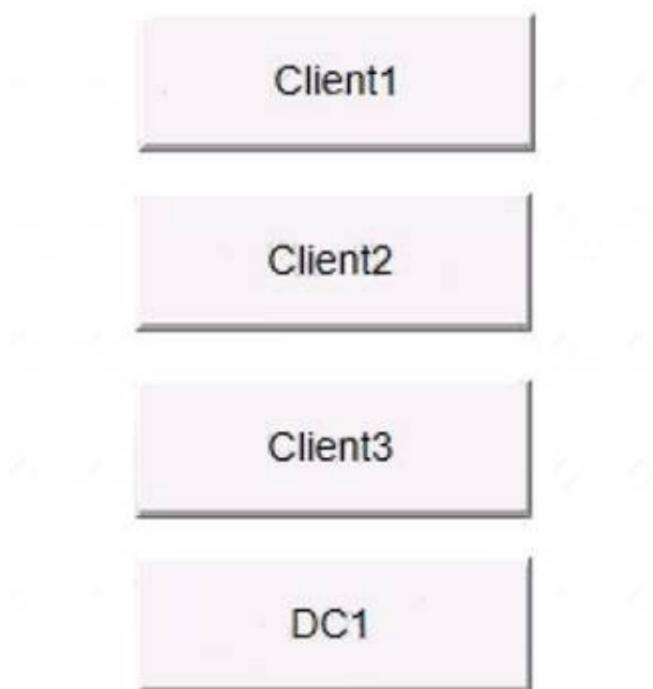

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a user account named User5 on Client2. The solution must meet the following requirements:

- Prevent User5 from changing the password of the account.
- Ensure that User5 can perform backups.
- Use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Client2, press the Win + X keys on your keyboard. Then, click or tap the Computer Management option from the menu.
- Expand the Local Users and Groups from the left side of the window, and select Users.
- Right-click somewhere on the blank space found in the middle section of the window, and click or tap on New User. This opens the New User window, where you can enter all the details about the new user account.
- Type the user name and, optionally, its full name and description.
- Type the password to be used for that user and confirm it.
- Select the User cannot change password check box.
- Click Create and Windows immediately creates the user account. When you are done creating user accounts, click Close in the New User window.
- Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Back up files and directories policy in the right pane.
- Click/tap on the Add User or Group button.
- Click/tap on the Object Types button.
- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/user-rights-assignm>

NEW QUESTION 2

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 connects to multiple wireless networks. You need to view the wireless networks to which Computer1 connects. What should you use?

- A. the System log in Event Viewer
- B. Wi-Fi in the Settings app
- C. the properties of the wireless adapter in Network Connections in Control Panel
- D. the Details tab for the wireless adapter in Device Manager

Answer: B

Explanation:

Reference:

<https://www.windowscentral.com/how-connect-wi-fi-network-windows-10>

NEW QUESTION 3

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

NEW QUESTION 4

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share. What should you do?

- A. From File Explorer, use Network File and Folder Sharing
- B. Assign the Read permission to Group2.
- C. From File Explorer, use Advanced Sharing
- D. Assign the Read share permission to Group2.
- E. From Control Panel, use Advanced sharing setting
- F. Configure file and printer sharing for the network profile of the domain.
- G. At a command prompt, run the net share Share=C:\Folder1 /grant:adatum\group2, read command.

Answer: D

Explanation:

Reference:

<https://techgenix.com/net-share-command-30/>

NEW QUESTION 5

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit privilege use.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Files and folders are objects and are audited through object access, not through privilege use. Reference:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 6

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You configure Microsoft Edge settings by using domain and local Group Policy Objects (GPOs).

You need to generate a report that contains all the Microsoft Edge policy settings applied to a computer. What should you do?

- A. From Microsoft Edge, open edge://settings.
- B. From a command prompt, run scanstate and specify the /apps parameter.
- C. From a command prompt, run scanstate and specify the /genconfig parameter.
- D. From a command prompt, run gpreport and specify the /H parameter.

Answer: D

NEW QUESTION 7

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You attempt to start Computer1 but you receive the following error message: Bootmgr is missing.

You need to be able to start Computer1. What should you do?

- A. Start the computer in recovery mode and run the boocrec /rebuildbcd command.
- B. Start the computer in recovery mode and run the disclparc /repair command.
- C. Start the computer in recovery mode and run the bcdboot /s command.
- D. Start the computer in recovery mode and run the boocfg /debug command.

Answer: A

Explanation:

Reference:

<https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 8

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the wusa.exe command and specify the /uninstall parameter.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 9

- (Exam Topic 4)

You plan to install Windows 10 Pro by using an answer file. You open Windows System Image Manager.

You need to create an answer file. What should you do first?

- A. Open the Install.wim file from the Windows 10 installation media.
- B. Open the Boot.wim file from the Windows 10 installation media.
- C. Install the WinPE add-on for the Windows Assessment and Deployment Kit (Windows ADK).
- D. Install the Windows Assessment and Deployment Kit (Windows ADK).

Answer: C

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these question will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 10

- (Exam Topic 4)

You have 20 computers that run Windows 10.

You configure all the computers to forward all the events from all the logs to a computer named Computer1 that runs Windows 10.

When you sign in to Computer1, you cannot see any security events from other computers. You can see all the other forwarded events from the other computers.

You need to ensure that the security events are forwarded to Computer1. What should you do?

- A. On each computer, run wecutil ac /q.
- B. On each computer, add the NETWORK SERVICE account to the Event Log Readers group.
- C. On each computer, run winrm qc -q.
- D. On Computer1, add the account of Computer1 to the Event Log Readers group.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/use-windows-event-forwarding-to-assistin>

NEW QUESTION 14

- (Exam Topic 4)

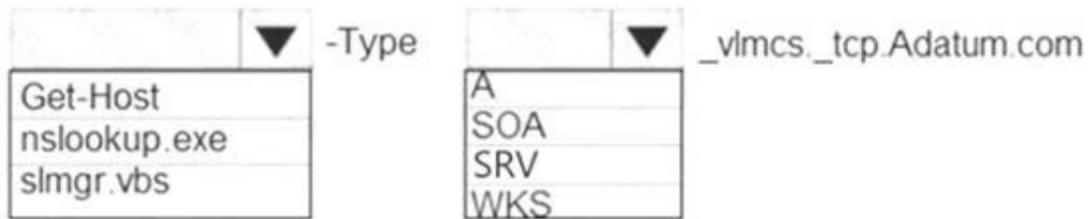

Your network contains an Active Directory domain named adatum.com that uses Key Management Service (KMS) for activation.

You deploy a computer that runs Windows 10 to the domain. The computer fails to activate.

You suspect that the activation server has an issue. You need to identify which server hosts KMS.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://blogs.technet.microsoft.com/odsupport/2011/11/14/how-to-discover-office-and-windows-kms-hosts-via-d>

NEW QUESTION 18

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of domain group
User1	Authenticated Users
User2	Device Managers Authenticated Users
User3	Help Desk Authenticated Users

The Authenticated Users group has the Add workstations to domain user right in the Default Domain Controllers Policy.

The Device Managers and Help Desk groups are granted the Create Computer objects permission for the Computers container of the domain.

You have 15 workgroup computers that run Windows 10. Each computer contains a local user account named LocalAdmin1 that is a member of the following groups:

- > Administrators
- > Device Owners
- > Authenticated Users

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>
User2 can join a maximum of 10 computers to the domain.	<input type="radio"/>	<input type="radio"/>
User3 can join all the computers to the domain.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is a member of the Authenticated Users group which has the Add workstations to domain user right. However, with the Add workstations to domain user right, you are restricted to joining a maximum of 10 computers to the domain.

Box 2: No

User2 is a member of the Authenticated Users group which has the Add workstations to domain user right.

User2 is also a member of the Device Managers group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User2 can join more than 10 computers to the domain.

Box 3: Yes

User3 is a member of the Authenticated Users group which has the Add workstations to domain user right. User3 is also a member of the Help Desk group which is granted the Create Computer objects permission for the Computers container of the domain. The Create Computer objects permission overrides the 10-computer limit imposed by the Add workstations to domain user right so User3 can join all the computers to the domain.

NEW QUESTION 23

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

C:\Users\admin1>
    
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
the command prompt will open without a prompt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
the command prompt will open without a prompt

NEW QUESTION 28

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators. What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as Used and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

Answer: B

Explanation:

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

NEW QUESTION 33

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Accounts in the Settings app, you turn off Sync settings. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 34

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to ensure that Computer1 will respond to ping requests.

How should you configure Windows Defender Firewall on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Rule to create:

▼
A server-to-server connection security rule
An authentication exemption connection security rule
An inbound rule
An outbound rule

Protocol type to allow:

▼
ICMPv4
IGMP
PGM
TCP
UDP

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Rule to create:

- A server-to-server connection security rule
- An authentication exemption connection security rule
- An inbound rule
- An outbound rule

Protocol type to allow:

- ICMPv4
- IGMP
- PGM
- TCP
- UDP

NEW QUESTION 36

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the users accounts shown in the following table:

Name	Member of
User1	Administrators
User2	Users, Administrators
User3	Users

Computer1 has the local Group Policy shown in the following table.

Setting	Value
Startup script	ScriptA1
Shutdown script	ScriptA2
Logon script	ScriptA3
Logoff script	ScriptA4

You create the Local Computer\Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptB1
Logoff script	ScriptB2

You create the Local Computer\Non-Administrators policy shown in the following table.

Setting	Value
Logon script	ScriptC1
Logoff script	ScriptC2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
If User1 shuts down Computer1, script ScriptA2 will run.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Computer1, scripts ScriptA3, ScriptB1, and ScriptC1 will run.	<input type="radio"/>	<input type="radio"/>
If User3 signs out of Computer1, scripts ScriptC2 and ScriptA4 will run.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291\(v=ws.10\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-vista/cc766291(v=ws.10))

NEW QUESTION 38

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1. You need to log any users who take ownership of the files in Folder1.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Modify the folder attributes of Folder1.
- B. Modify the Advanced Security Settings for Folder1.
- C. From a Group Policy object (GPO), configure the Audit Sensitive Privilege Use setting.
- D. From a Group Policy object (GPO), configure the Audit File System setting.
- E. Install the Remote Server Administration Tools (RSAT).

Answer: BC

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/auditing/audit-sensitive-privilege-use>

NEW QUESTION 42

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. the sc command
- B. Task Manager
- C. Services
- D. the sfc command

Answer: A

NEW QUESTION 45

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Guests
User3	Users, Administrators
User4	Users, Guests
Administrator	Administrators

User3, User4, and Administrator sign in and sign out on Computer1. User1 and User2 have never signed in to Computer1.

You are troubleshooting policy issues on Computer1. You sign in to Computer1 as Administrator. You add the Resultant Set of Policy (RsoP) snap-in to an MMC console.

Which users will be able to sign in on Computer1?

- A. User1, User3, and User4 only
- B. Administrator only
- C. User1, User2, User3, User4, and Administrator
- D. User3, User4, and Administrator only

Answer: D

Explanation:

The Interactive logon: Number of previous logons to cache (in case domain controller is not available) policy setting determines whether a user can log on to a Windows domain by using cached account information. Logon information for domain accounts can be cached locally so that, if a domain controller cannot be contacted on subsequent logons, a user can still log on.

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/interactive-logon-n>

NEW QUESTION 50

- (Exam Topic 4)

You have a computer that runs Windows 10.

You discover that Windows updates are failing to install on the computer.

You need to generate a log file that contains detailed information about the failures. Which cmdlet should you run?

- A. Get-LogProperties
- B. Get-WindowsErrorReporting
- C. Get-WindowsUpdateLog
- D. Get-WinEvent

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdate-log?view=win10-ps>

NEW QUESTION 51

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set a data limit. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 53

- (Exam Topic 4)

You need to ensure that User1 can add a third-party driver package for a printer to the driver store of the computer. The solution must use the principle of the least privilege.

To which local group should you add User 1, and what should User1 run? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Group:
Administrators
Device Owners
Power Users
Backup Operators

Run:
Add-PrinterDriver
Add-WindowsDriver
pnputil.exe
print.exe

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 55

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

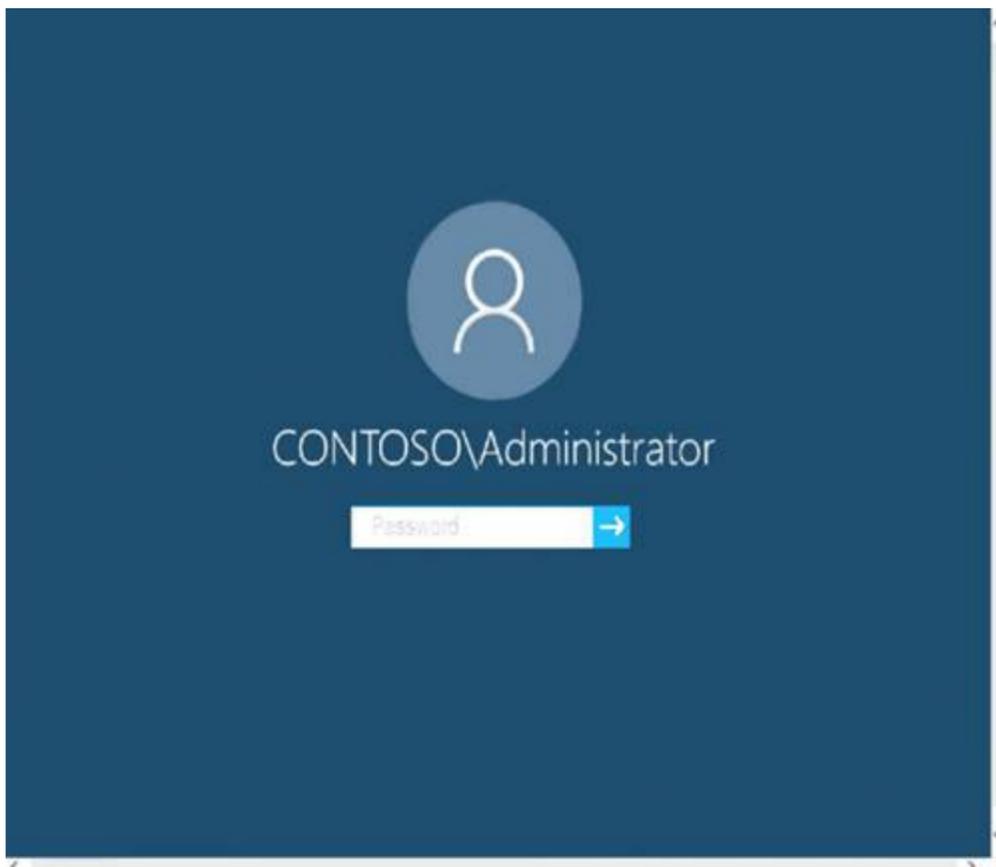

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

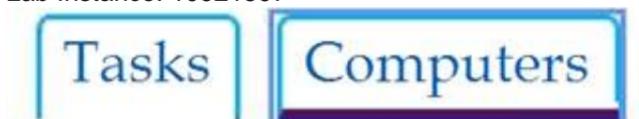

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- > On Client2, Press Windows+R
- > Type lusrmgr.msc
- > Right click Groups and click New Group.
- > Type in the Group name and a description.
- > Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- > Click Create and Close.
- > Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- > Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- > Click/tap on the Add User or Group button.
- > Click/tap on the Object Types button.

- Check all the boxes for Object types, and click/tap on the OK.
- Click/tap on the Advanced button.
- Click/tap on the Find Now button, select the name of the user or group
- Click/tap on OK.
- Click/tap on OK.
- When finished, you can close Local Users and Groups.

NEW QUESTION 57

- (Exam Topic 2)

You need to meet the technical requirements for EFS on ComputerA. What should you do?

- A. Run certutil.exe, and then add a certificate to the local computer certificate store.
- B. Run cipher.exe, and then add a certificate to the local computer certificate store.
- C. Run cipher.exe, and then add a certificate to the local Group Policy.
- D. Run certutil.exe, and then add a certificate to the local Group Policy.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/crea>

NEW QUESTION 60

- (Exam Topic 2)

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Answer: D

Explanation:

References:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 61

- (Exam Topic 1)

You need to recommend a solution to monitor update deployments. What should you include in the recommendation?

- A. Windows Server Update (WSUS)
- B. the Update Management solution in Azure Automation
- C. the Update Compliance solution in Azure Log Analytics
- D. the Azure Security Center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-monitor>

NEW QUESTION 64

- (Exam Topic 1)

You need to reduce the amount of time it takes to restart Application1 when the application crashes. What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool to use:

Task to perform:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://www.howto-connect.com/how-to-attach-a-task-to-this-event-in-event-viewer-in-windows-10/>

NEW QUESTION 65

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile. On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.

Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

- Run scanstate.exe and specify the C:\Users subfolder.
- Run loadstate.exe and specify the C:\Users subfolder.
- Run scanstate.exe and specify the C:\Windows.old subfolder.
- Run loadstate.exe and specify the C:\Windows.old subfolder.
- Run usmutils.exe and specify the C:\Users subfolder.
- Run usmutils.exe and specify the C:\Windows.old subfolder.

Answer Area

First action:

Second action:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

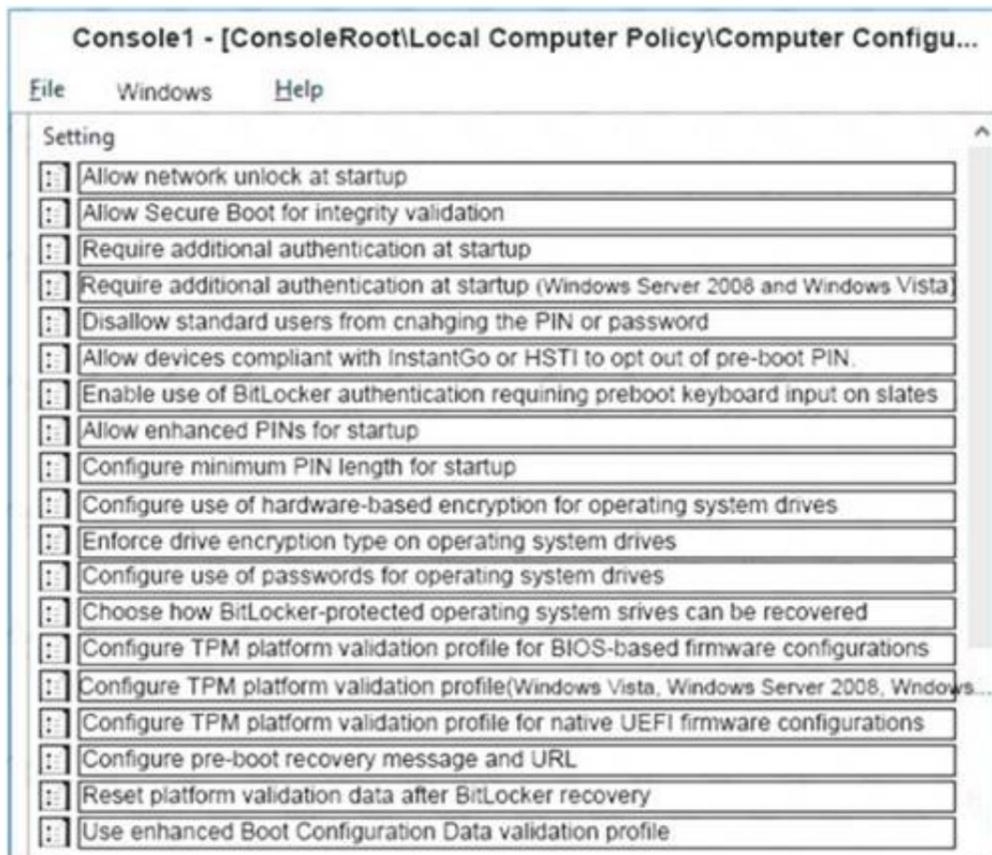

NEW QUESTION 69

- (Exam Topic 4)

Your domain contains named Computer named Computer1 that runs Windows 10. Computer1 does not have a TPM. You need to be able to encrypt the C drive by using Bitlocker Drive Encryption (BitLocker). The solution must ensure that the recovery key is stored in Active Directory.

Which two Group Policy settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

NEW QUESTION 74

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- > The new computers must be upgraded to Windows 10 Enterprise automatically.
- > The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- > The users must not be required to accept the End User License Agreement (EULA). You need to deploy the new computers.

What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

Answer: D

Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 75

- (Exam Topic 4)

You are troubleshooting Windows 10 updates that fail to install on a computer that runs Windows 10. You delete the contents of the SoftwareDistribution folder. You need to delete the signatures of the Windows Update packages. Which folder should you delete?

- A. %systemroot%\system32\catroot2
- B. %systemdrive%\recovery
- C. %systemroot%\WinSxS
- D. %systemdrive%\System Volume Information

Answer: A

Explanation:

References:

<https://tipsmake.com/how-to-delete-pending-updates-on-windows-10>

NEW QUESTION 77

- (Exam Topic 4)

You have a computer that runs Windows 10.

The computer fails to start, and you receive the following error message: "BOOTMGR image is corrupt. The system cannot boot".

You need to repair the system partition.

Which command should you run from Windows Recovery Environment (WinRE)?

- A. fdisk.exe
- B. chkdsk.exe
- C. diskpart.exe
- D. bcdboot.exe

Answer: C

Explanation:

DiskPart, which has replaced fdisk, is a command-line utility that provides the ability to manage disks, partitions or volumes in your computer running all versions of operating system since Windows 2000.

References:

<https://www.diskpart.com/windows-10/diskpart-windows-10-1203.html>

NEW QUESTION 78

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 83

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence. Does the meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 88

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks

Computers

Client1

Client2

Client3

DC1

You need to ensure that C:\Scripts\Configure.ps1 runs every time a user sign in to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

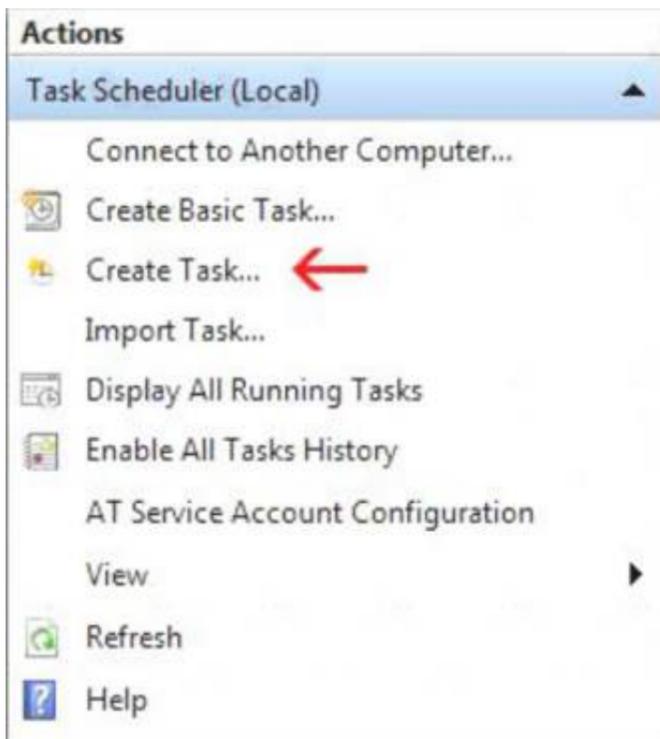

Answer: A

Explanation:

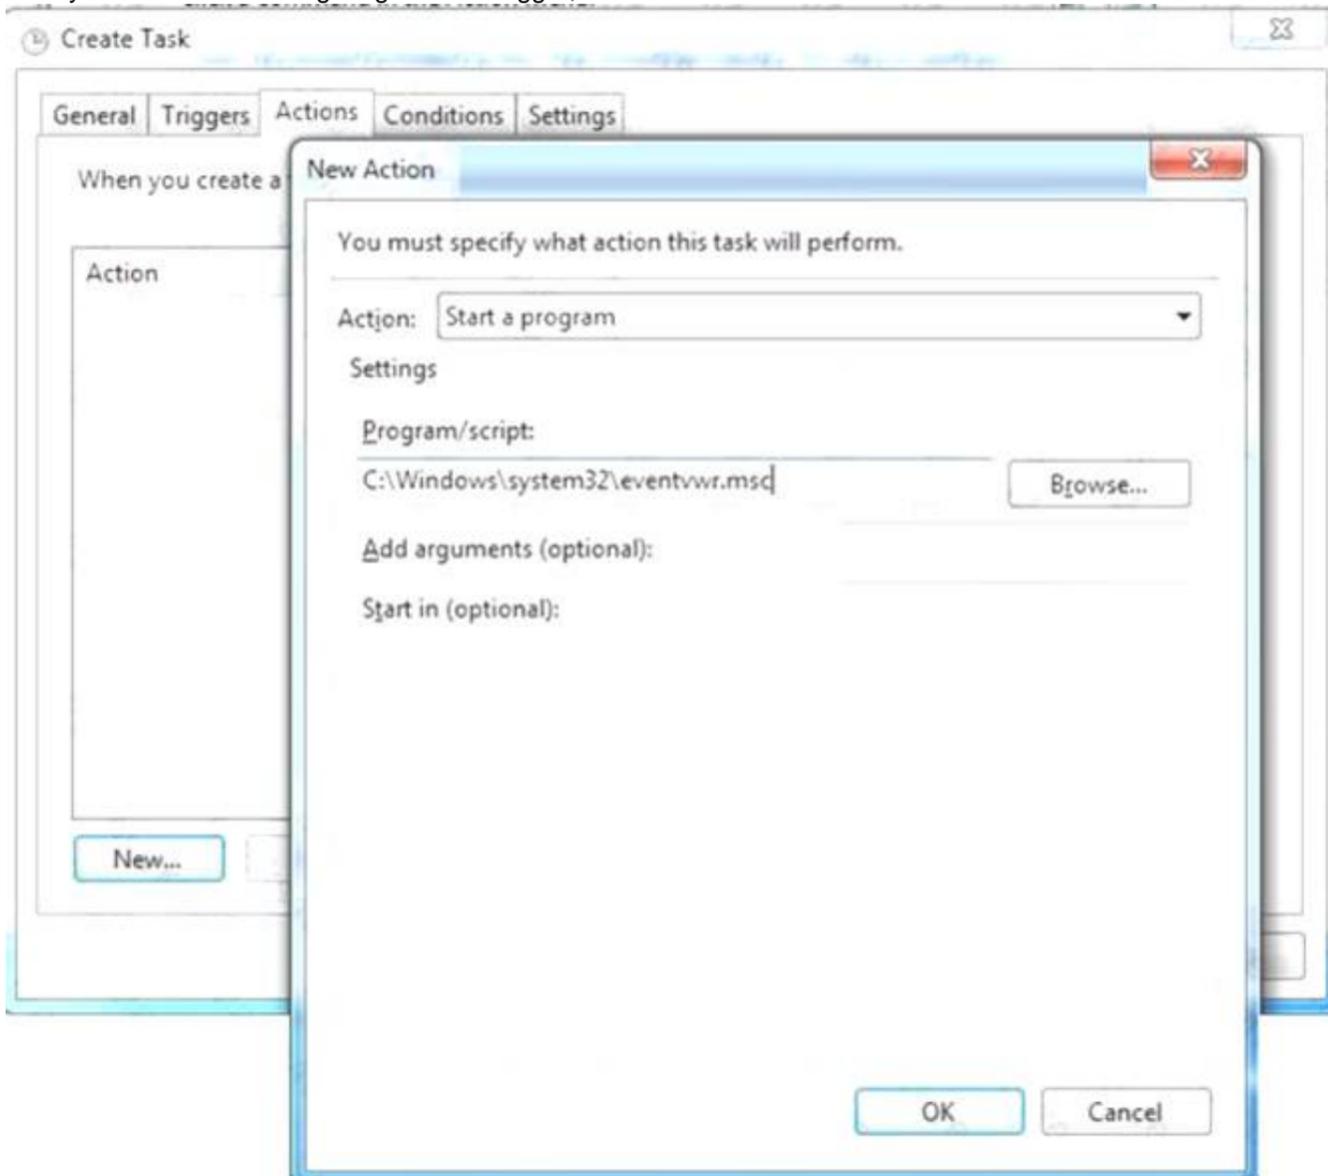

Go to the Start menu, type "Task Scheduler" and select it from the search results.

Task Scheduler can also be accessed in the Control Panel under Administrative Tools. In the right side of the Task Scheduler menu, under Actions, select "Create Task."

On the General tab, enter a name and description for the task you're creating. Check the box "Run with highest privileges." Once you have filled out a name and description, click the "Triggers" tab, and then click "New." In this menu, under "Begin the task:" select "At log on." Choose which user you would like the task to run for at log on. For our purposes, Any user. Configure any of the applicable advanced settings you would like. After you are finished configuring the new trigger, click OK and then select the "Actions" tab. Click "New" to make a new action.

Choose "Start a program" under the Action menu and then click "Browse" to point to C:\Scripts\Configure.ps1. Click OK to exit out of the Actions menu. The "Conditions" and "Settings" tabs can be left alone. Click OK on the Create Task menu, and you are finished. Reference: <https://www.howtogeek.com/138159/how-to-enable-programs-and-custom-scripts-to-run-at-boot/>

NEW QUESTION 89

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History. You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

Answer: B

Explanation:

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

NEW QUESTION 91

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

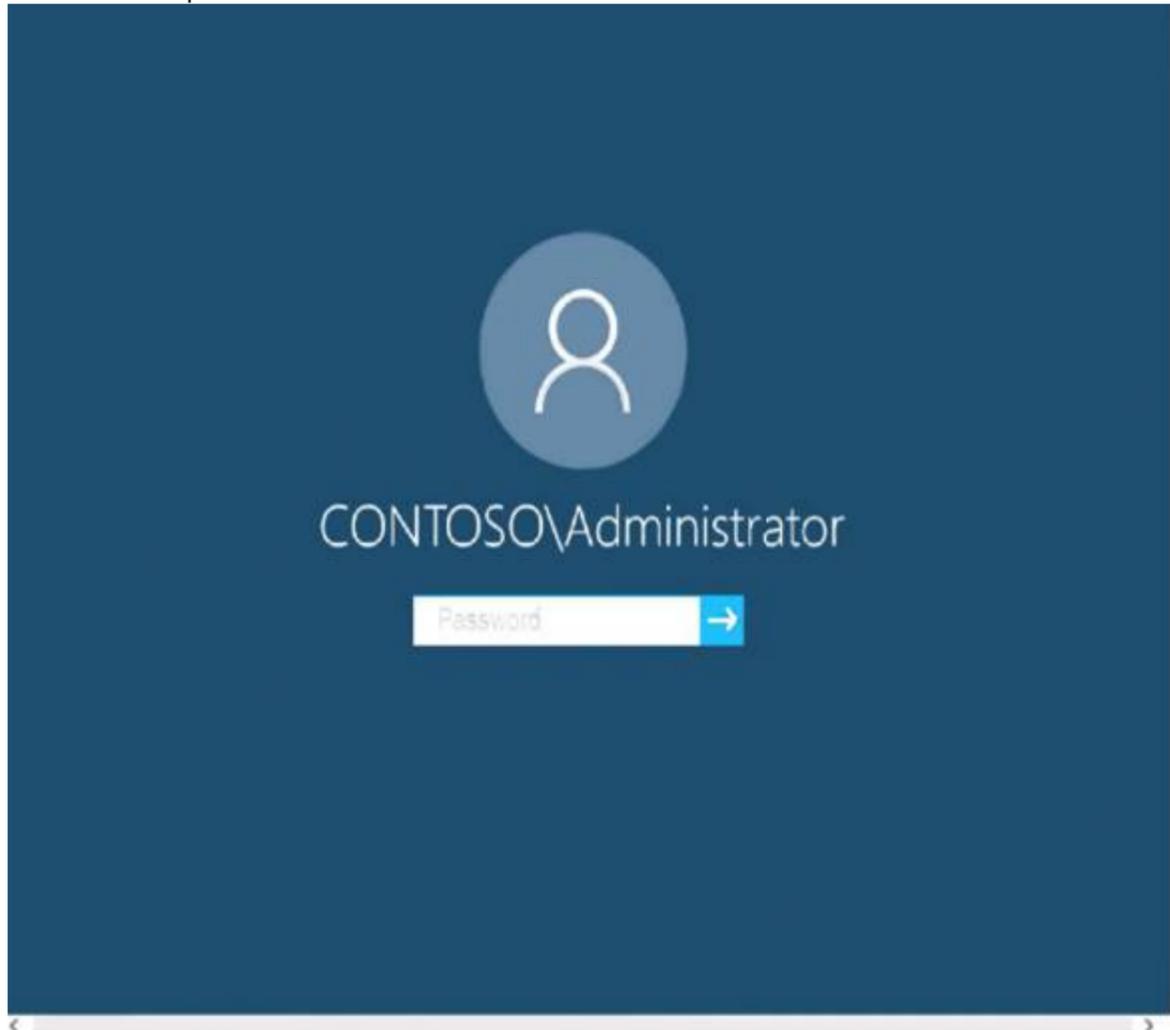

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

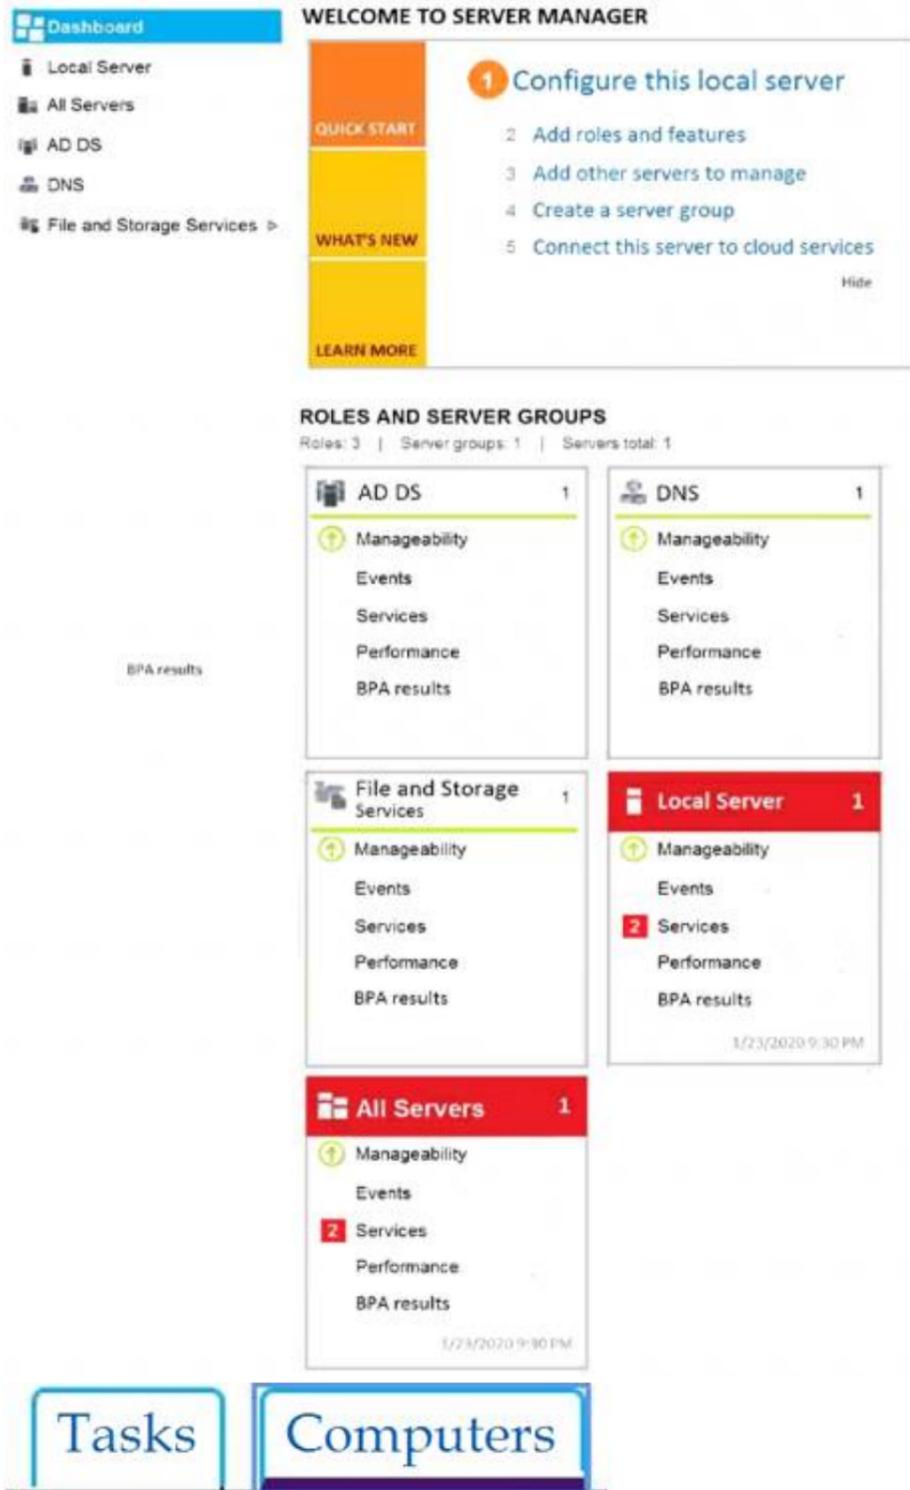

Use the following login credentials as needed:

The following information is for technical support purposes only: Lab Instance: 11145882

A web service installed on Client1 is used for testing. You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- To create an inbound port rule
- In the navigation pane, click Inbound Rules.
- Click Action, and then click New rule.
- On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- On the Program page, click All programs, and then click Next.

- On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- On the Action page, select Allow the connection, and then click Next.
- On the Profile page, select the network location types to which this rule applies, and then click Next.
- On the Name page, type a name and description for your rule, and then click Finish.

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-firewall/create-an-inbound-port-r>

NEW QUESTION 94

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Modify access to Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc75417>

NEW QUESTION 98

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 has a folder named C:\Folder1.

You need to meet the following requirements:

- Provide a user named Jon Ross with the ability to modify the permissions of C:\Folder1.
- Ensure that the principle of least privilege is maintained.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- In Windows Explorer, right-click the C:\Folder1 folder, and then click Properties.
- Click on the Security tab, and then click Edit.
- In the Permissions dialog box, add Jon Ross.
- Specify the Allow Modify permissions for the Jon Ross.
- Click OK twice to close the Security dialog box.
- Click OK twice to close the Properties dialog box.

Reference:

<https://docs.microsoft.com/en-us/iis/web-hosting/configuring-servers-in-the-windows-web-platform/configuring>

NEW QUESTION 102

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

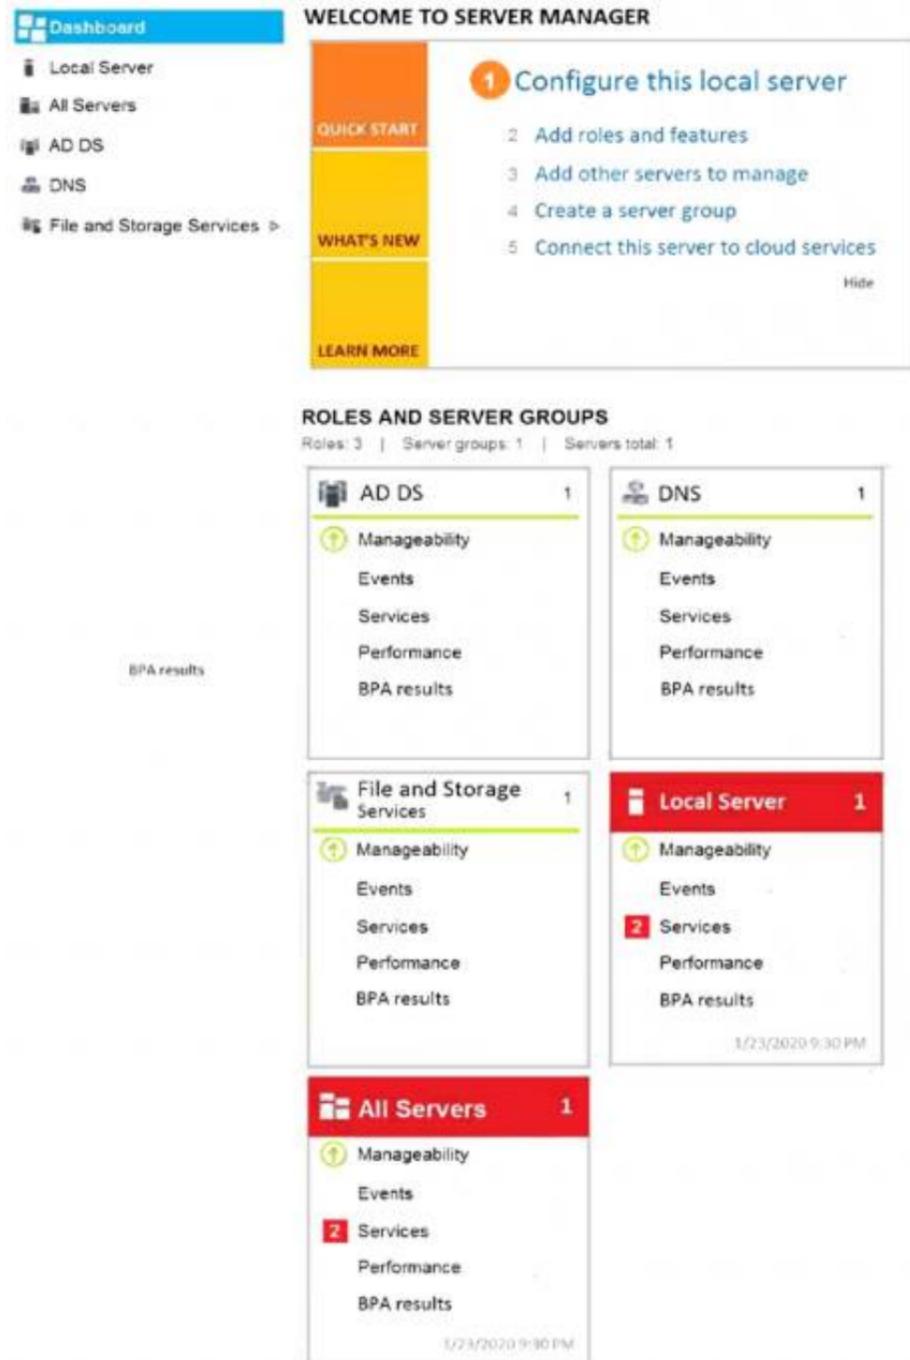

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Client1

Client2

Client3

DC1

You need to create an HTML report that shows which policies and policy settings are applied to CONTOSO\User1 on Client1. You must save the output to a file named Report.html in a folder named Folder1 on the C drive of Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

On Client1, log in as administrator. Open command prompt and type:
 gresult /h CONTOSO\User1\C:\Folder1\Report.html

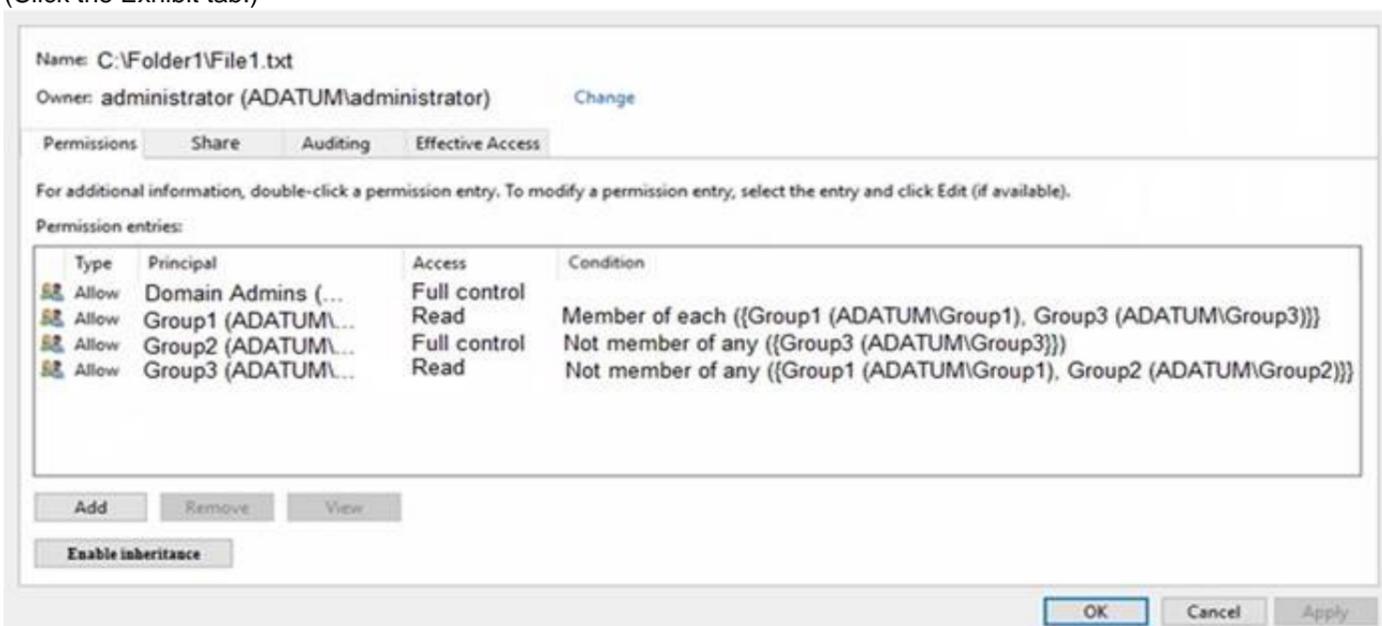

NEW QUESTION 105

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains the users shown in the following table.

Name	Member of
User1	Group1, Group3
User2	Group1, Group2
User3	Group2, Group3

The domain contains a computer named Computer1 that runs Windows10. Computer1 has a file named File1.txt that has the permissions shown in the exhibit. (Click the Exhibit tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User2 can modify File1.txt.	<input type="radio"/>	<input type="radio"/>
User3 can read File1.txt.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 only has Read access to the file.

Box 2: Yes

User2 is in Group2 which has full control. The condition states that if the user is also a member of Group3, the permission would not apply. However, User2 is not in Group3 so the full control permission does apply.

Box 3: No

User3 is in Group3 which does have Read access. However, the condition states that if the user is also in Group1 or Group2 then the permission does not apply. User3 is in Group2 so the Read permission granted to Group3 does not apply to User3.

NEW QUESTION 108

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to view the Windows Update diagnostic log. What should you do first?

- A. From File Explorer, go to the C:\Windows\Logs\WindowsUpdate folder and select Show hidden files, folders, and drives.
- B. From Windows Update in the Settings app
- C. configure Advanced options.
- D. From Event Viewer, modify the properties of the WindowsUpdateClient operational log.
- E. From Windows PowerShell, run the Get-WindowsUpdateLog cmdlet.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/windowsupdate/get-windowsupdatelog?view=windowsserv>

NEW QUESTION 111

- (Exam Topic 4)

Your company has several mobile devices that run Windows 10.

You need configure the mobile devices to meet the following requirements:

- > Windows updates may only be download when mobile devices are connect to Wi-Fi.
- > Access to email and the Internet must be possible at all times.

What should you do?

- A. Open the Setting app and select Update & Security
- B. Then select and configure Change active hours.
- C. Open the Setting app and select Network & Internet
- D. Then select Change connection properties, and set the Metered connection option for cellular network connections to On.
- E. Open the Setting app and select Network & Internet Then select Data Usage and set a data limit.
- F. Open the Setting app and select Update & Security
- G. Then select and configure Delivery Optimization.

Answer: B

Explanation:

Reference:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 116

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

Answer: C

Explanation:

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About

References: <https://aadguide.azurewebsites.net/aadjoin/>

NEW QUESTION 118

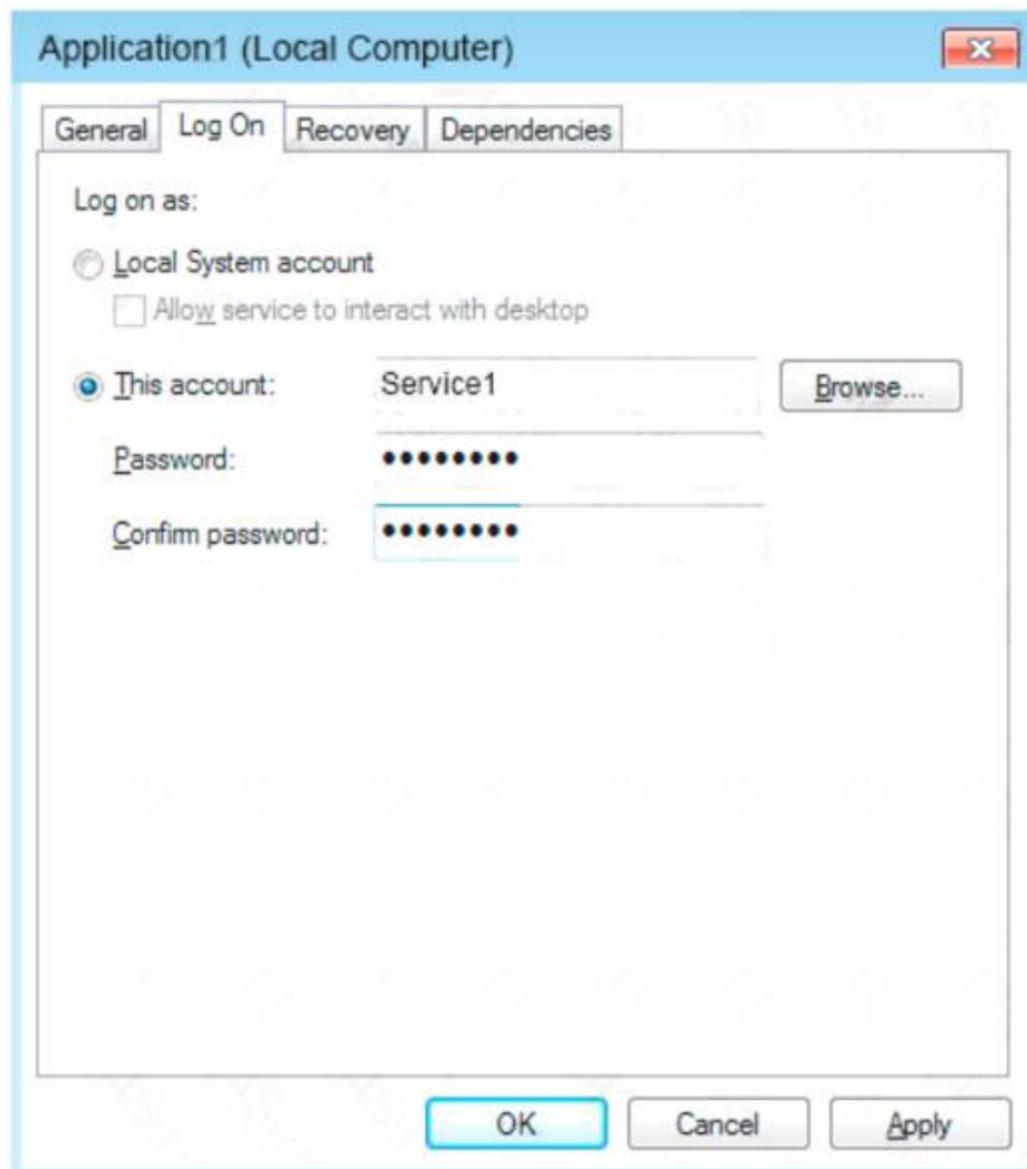

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files. You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege. Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

NEW QUESTION 119

- (Exam Topic 4)

You are troubleshooting a Windows 10 device that fails to install updates from Windows Update. You discover that some files in the component store are corrupt. You need to resolve the issue to ensure that you can install the updates. Which command should you run?

- A. `chkdsk /c c:`
- B. `Dism /Online /Cleanup-Image /RestoreHealth`
- C. `Dism /Online /Cleanup-Image /StartComponentCleanup`
- D. `chkntfs /c c:`

Answer: B

NEW QUESTION 123

- (Exam Topic 4)

You have a computer that runs Windows 10 and has the Windows Assessment and Deployment Kit (Windows ADK) installed. You need to perform the following tasks:

- Prepare a Windows PE (WinPE) working directory.
- Add scripting support to a WinPE image.
- Mount and unmount a WinPE image.

Which command should you use for each task? To answer, drag the appropriate commands to the correct tasks. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Commands

dism.exe

cotype.cmd

mount.exe

diskpart.exe

Answer Area

Prepare a WinPE working directory:

Mount and unmount a WinPE image:

Add scripting support to a WinPE image:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Cotype.cmd Dism.exe Mount.exe

NEW QUESTION 127

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From a command prompt, you run netsh wlan delete profile name="Wireless1". Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://lifelacker.com/remove-wi-fi-profiles-from-windows-8-1-from-the-command-1449954864>

NEW QUESTION 130

- (Exam Topic 4)

You have a Windows 10 image that was updated to the latest version of Windows 10. You plan to create a new WinPE bootable ISO file.

You obtain the latest WinPE source files.

You need to create the new ISO file to support PowerShell scripting.

Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Commands

makewinpemedi

cotype

drvload

dism

wpeutil

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Cotype Makewinpemedia dism

joined to an on-premises Active Directory domain

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

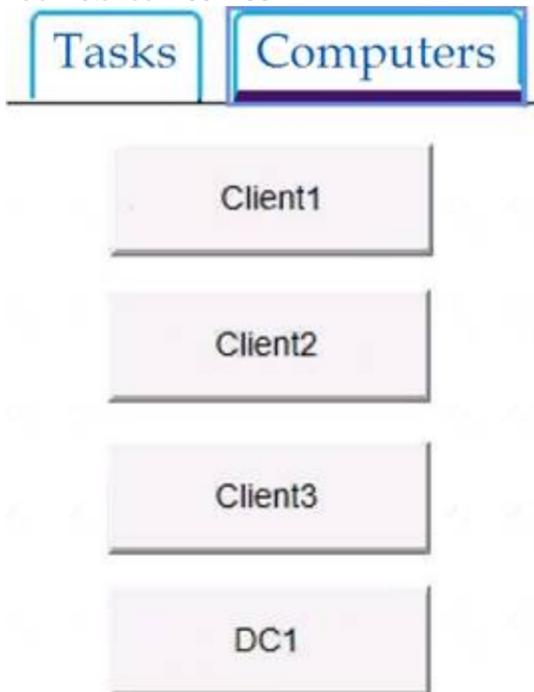

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named Private.txt in a folder named Folder1 on the C drive of Client2.

You need to encrypt Private.txt and ensure that a user named User1 can view the contents of Private.txt.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- After creating Private.txt and saving it Folder1, right-click on the Private.txt, and select Properties from the context menu.
- On the General tab, click Advanced. Next, check the box "Encrypt contents to secure data" and click OK.
- A window will pop up asking you whether or not you want to encrypt the file and its parent folder. Select the "Encrypt the file only" and click OK.
- Private.txt will now show its file name in green color.
- Right-click Private.txt and then select Properties.

- > Click Advanced on the General tab.
- > Click Details on the Advanced Attributes tab to open the User Access dialog box.
- > Click Add to open the Encrypting File System dialog box and then select User1.
- > Click OK to add User1 to the list of users who have access to the file.
- > Click OK until you've exited out of the dialog boxes. Reference:

NEW QUESTION 137

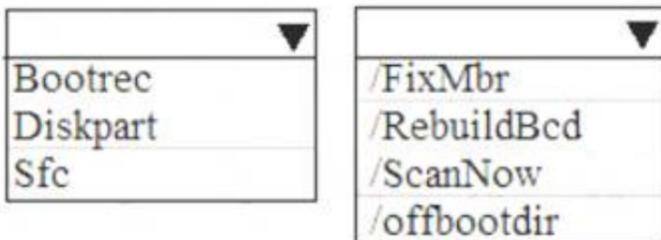

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 139

- (Exam Topic 4)

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/introduction-vamt>

NEW QUESTION 144

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10. Computer1 is used to provide guests with access to the Internet. Computer1 is a member of a workgroup.

You want to configure Computer1 to use a user account sign in automatically when the computer is started. The user must not be prompted for a user name and password.

What should you do?

- A. Configure Group Policy preferences.
- B. Run the BCDBoot command.
- C. Edit the Registry.
- D. Run the MSConfig command.

Answer: C

Explanation:

In the registry, add a default user name and a default password in the HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon\sbukey.

Reference:

<https://support.microsoft.com/en-us/help/324737/how-to-turn-on-automatic-logon-in-windows>

NEW QUESTION 145

- (Exam Topic 4)

Your company has a main office and a branch office. The offices connect to each other by using a WAN link. Access to the Internet is provided through the main office.

The branch office contains 25 computers that run Windows 10. The computers contain small hard drives that have very little free disk space.

You need to prevent the computers in the branch office from downloading updates from peers on the network. What should you do?

- A. From the Settings app, modify the Delivery Optimizations settings.
- B. Configure the network connections as metered connections.
- C. Configure the computers to use BranchCache in hosted cache mode.
- D. Configure the updates to use the Semi-Annual Channel (Targeted) channel.

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache>

NEW QUESTION 148

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup. You need to prevent users from using Microsoft Store apps on their computer.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From Security Settings in the local Group Policy, configure Security Options.
- B. From Administrative Templates in the local Group Policy, configure the Store settings.
- C. From Security Settings in the local Group Policy, configure Software Restriction Policies.
- D. From Security Settings in the local Group Policy, configure Application Control Policies.

Answer: BD

Explanation:

References:
<https://www.techrepublic.com/article/how-to-manage-your-organizations-microsoft-store-group-policy/>

NEW QUESTION 149

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 10. On a different computer named Computer1, you plan to create a collector-initiated subscription to gather the event logs from the Windows 10 computers.

You need to configure the environment to support the event log collection.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add Computer1 to the Event Log Readers group on the Windows 10 computers
- B. Add Computer1 to the Event Log Readers group on Computer1
- C. On the Windows 10 computers, change the Startup Type of Windows Event Collector to Automatic
- D. Enable Windows Remote Management (WinRM) on the Windows 10 computers
- E. Enable Windows Remote Management (WinRM) on Computer1

Answer: AD

Explanation:

References:
[https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890\(v=ws.11\)](https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc748890(v=ws.11))

NEW QUESTION 153

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set the network connections as metered connections.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:
<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 158

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user.

The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

Activation

Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run `slmgr /lrc`.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run `slmgr /ato`.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

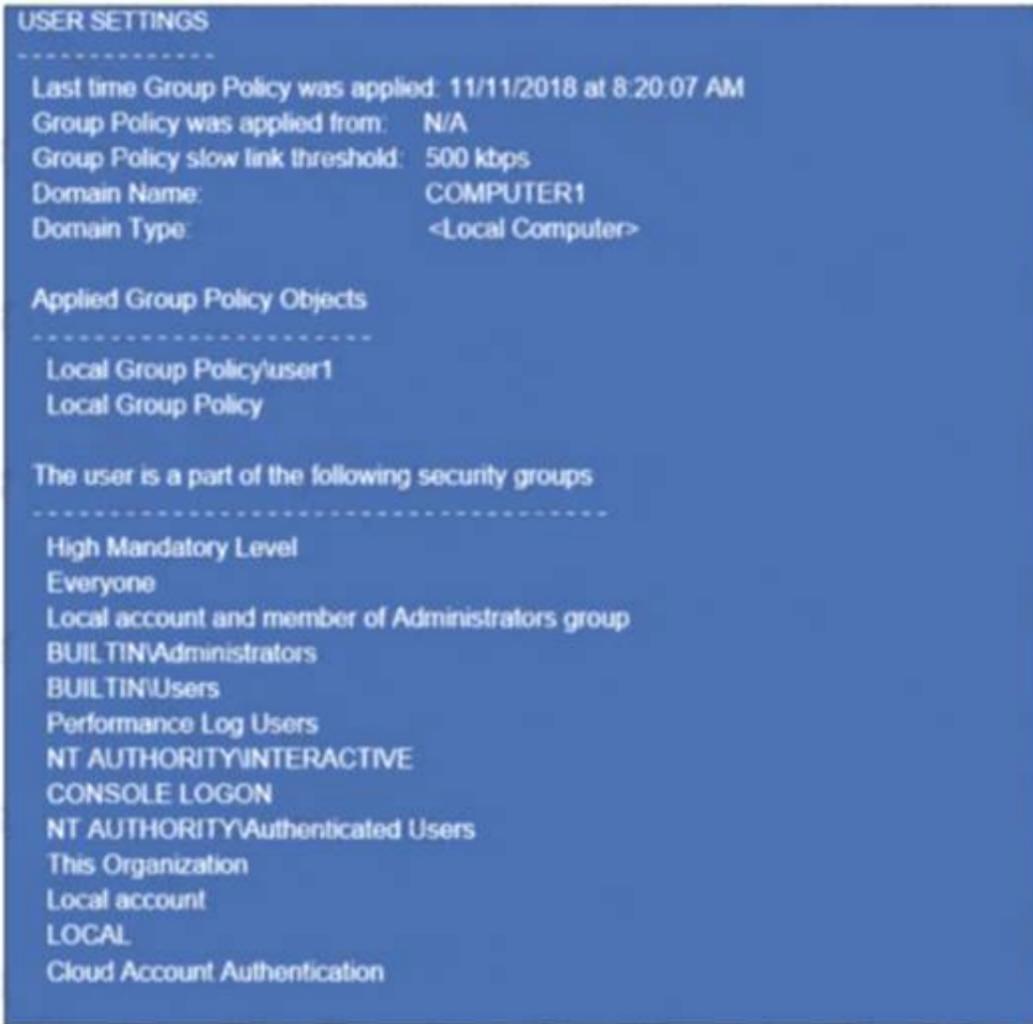

NEW QUESTION 163

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

You are troubleshooting Group Policy objects (GPOs) on Computer1.

You run `gpresult /user user1 /v` and receive the output shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

[Answer choice] applied to User1

▼

- One local GPO is
- One domain GPO and one local GPO are
- Two local GPOs are
- Two domain GPOs are

To configure GPO settings that affect only User1, you must first [answer choice]

▼

- open the Local Group Policy Editor console
- open the Group Policy Management console
- add the Group Policy Object Editor snap-in to a console

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

NEW QUESTION 168

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named C:\Folder1. You want to use File History to protect C:\Folder1.

Solution: You enable File History on Computer1. You then encrypt the contents of Folder1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

File History only backs up copies of files that are in Libraries, and Desktop folders and the OneDrive files available offline on your PC. If you have files or folders elsewhere that you want backed up, you can add them to one of these folders.

Reference:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

NEW QUESTION 171

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover a known compatibility issue between a feature update and a device driver on the computers. You need to test the installation of the feature update on a test computer.

Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Automatic Updates detection frequency
- B. Disable safeguards for Feature Updates
- C. Select the target Feature Update version
- D. Reschedule Automatic Updates scheduled installations

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/safeguard-opt-out>

NEW QUESTION 173

- (Exam Topic 4)

You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files.

You need to restore the corrupt system files. Which command should you run?

- A. scanstate
- B. sfc
- C. chkdsk
- D. chknfs

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-system-files>

NEW QUESTION 177

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10.

The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

If Computer1 initiates communication to Computer2, network traffic will be encrypted.

Computer2 can establish communications to Computer3.

If Computer3 initiates communication to Computer1, network traffic will be encrypted.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications. Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

NEW QUESTION 181

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition
Computer1	Windows 10 Pro
Computer2	Windows 10 Pro Workstations
Computer3	Windows 10 Enterprise

You need to identify which computers support the features.

- > BitLocker Drive Encryption (BitLocker)
- > Microsoft Application Virtualization (App-V)

Which computers support the features? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

BitLocker:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

App-V:

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

References:

<https://www.microsoft.com/en-us/windowsforbusiness/compare>

NEW QUESTION 182

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 185

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You set up Backup and Restore (Windows 7) and include Folder1 in the backup. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

NEW QUESTION 190

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes No

User1 can establish a Remote Desktop session to Computer2.

User2 can establish a Remote Desktop session to Computer2.

User3 can establish a Remote Desktop session to Computer2.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

User1 is an administrator and has the Allow log on through Remote Desktop Services. Box 2: No

User2 is a member of Group2 which has the Deny log on through Remote Desktop Services. Box 3: Yes

User3 is a member of the administrators group and has the Allow log on through Remote Desktop Services.

Note: Deny permissions take precedence over Allow permissions. If a user belongs to two groups, and one of them has a specific permission set to Deny, that user is not able to perform tasks that require that permission even if they belong to a group that has that permission set to Allow.

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/security/about-permissions?view=azure-devops&ta>

NEW QUESTION 191

- (Exam Topic 4)

Your company has an on-premises network that contains an Active Directory domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). All computers in the domain run Windows 10 Enterprise.

You have a computer named Computer1 that has a folder named Folder1.

You must provide users in group named Group1 with the ability to view the list of files in Folder1. Your solution must ensure that the principle of least privilege is maintained.

What should you do?

- A. Assign the Full control permissions for the Folder1 folder to Group1.
- B. Assign the Read permissions for the Folder1 folder to Group1.
- C. Assign the List folder permissions for the Folder1 folder to Group1.
- D. Assign the Take ownership permissions for the Folder1 folder to Group1.

Answer: C

Explanation:

Reference:

<https://www.online-tech-tips.com/computer-tips/set-file-folder-permissions-windows/>

NEW QUESTION 194

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Windows Autopilot and create a deployment profile. You generalize each computer, and the you restart the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B
