Windows 10

<https://www.certleader.com/MD-100-dumps.html>

NEW QUESTION 1

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

NEW QUESTION 2

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: From a command prompt, you run set.exe PATHEXT=d:\scripts. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 3

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 500 computers that run Windows 10. The computers are used as shown in the following table.

Usage	Update note
Manufacturing	Critical computers that must have minimal downtime: Updates must be deferred as long as possible.
Information technology (IT)	Computers for IT staff: Updates must be installed as soon as they are released.
Administration	Computers for general use: Updates must be installed two months after they are released.

You need to apply updates based on the computer usage. What should you configure?

- A. Notifications & actions from System in the Settings apps.
- B. the Windows Update for Business settings by using a Group Policy Object (GPO)
- C. the Windows Installer settings by using a Group Policy Object (GPO)
- D. Delivery Optimization from Update & Security in the Settings apps

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-group-policy>

NEW QUESTION 4

- (Exam Topic 4)

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

▼	▼
Bootrec	/FixMbr
Diskpart	/RebuildBcd
Sfc	/ScanNow
	/offbootdir

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: <https://neosmart.net/wiki/bootmgr-is-missing/>

NEW QUESTION 5

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.

- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

NEW QUESTION 6

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10.

You need to configure Windows Hello for sign-in to Computer1 by using a physical security key. What should you use?

- A. a USB 3.0 device that supports BitLocker Drive Encryption (BitLocker)
- B. a USB device that supports FIDO2
- C. a USB 3.0 device that has a certificate from a trusted certification authority (CA)
- D. a USB device that supports RSA SecurID

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/user-help/security-info-setup-security-key>

NEW QUESTION 7

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>

NEW QUESTION 8

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

Solution: From Network & Internet in the Settings app, you set the network connections as metered connections.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References:

<https://www.makeuseof.com/tag/5-ways-temporarily-turn-off-windows-update-windows-10/>

NEW QUESTION 9

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

A. Yes

B. No

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.

Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

References:

NEW QUESTION 10

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com.

User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: You create a local group on Computer1 and add the Guest account to the group. You grant the group Modify access to Share1.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 15

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

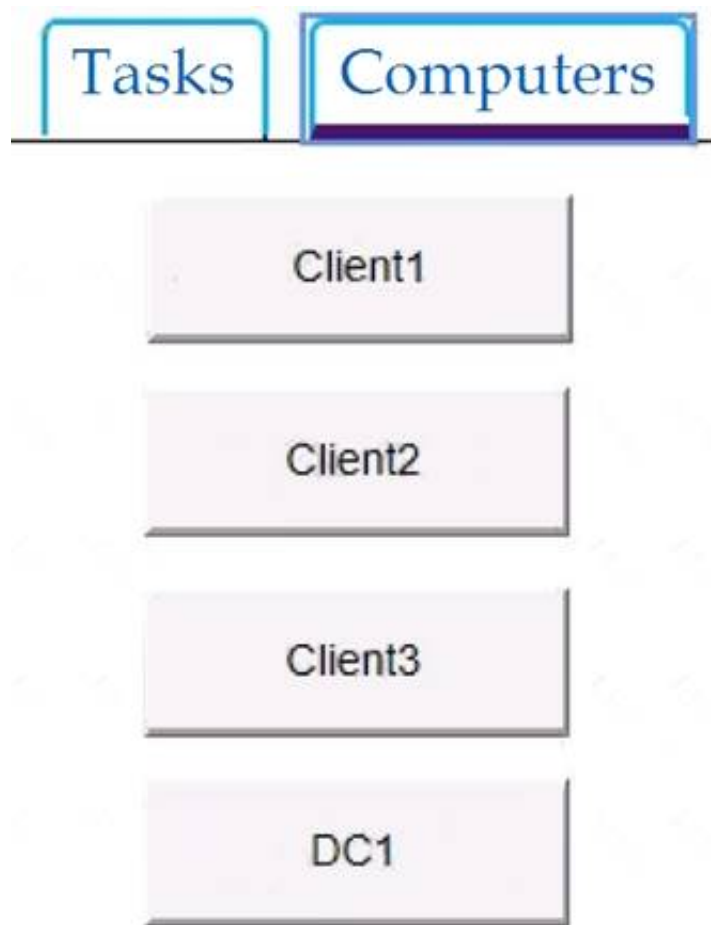

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file. To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- After creating File1.txt in Folder1, right-click the file and select Properties.
- Access the Security tab, click Disable inheritance
- Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- Click OK
- Back on the Security tab select Edit to change permissions.
- Click Add, then enter User1 in the Enter the object names to select section.
- Click Check Names, and then click OK.
- Check only the Read box in the Allow column.
- Click apply, Ok, and OK

NEW QUESTION 17

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro.

You have a mobile device. You use Bluetooth to pair the mobile device to Computer1. You want to enable dynamic lock on Computer1.

What should you do?

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- On Computer1, select the Start button > Settings > Accounts > Sign-in options.
- Under Dynamic lock, select the Allow Windows to automatically lock your device when you're away check box.

Reference:

<https://support.microsoft.com/en-za/help/4028111/windows-lock-your-windows-10-pc-automatically-when-you>

NEW QUESTION 20

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- The new computers must be upgraded to Windows 10 Enterprise automatically.
- The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- The users must not be required to accept the End User License Agreement (EULA).

You need to deploy the new computers. What should you do?

- A. Make use of the wipe and load refresh deployment method.

- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

Answer: D

Explanation:

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

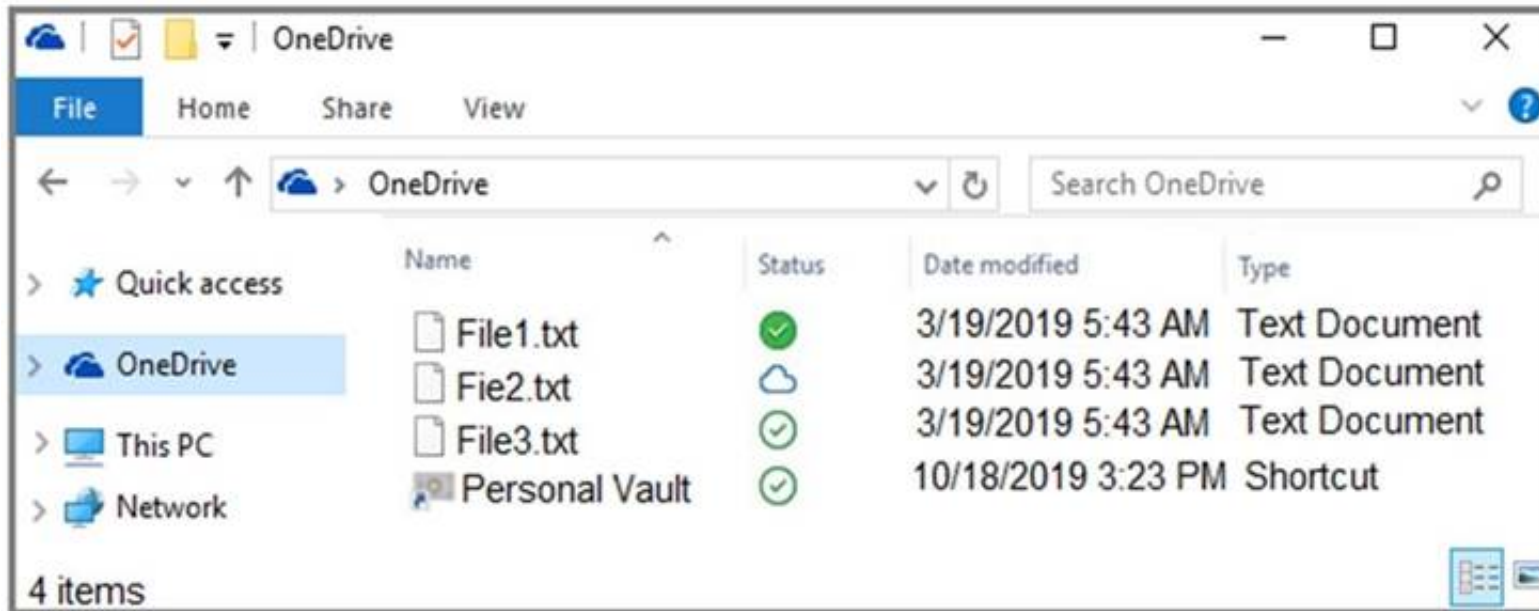

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

NEW QUESTION 21

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

▼

File2.txt only

File1.txt and File2.txt only

File2.txt and File3.txt only

File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

▼

File1.txt only

File1.txt and File2.txt only

File1.txt and File3.txt only

File1.txt, File2.txt, and File3.txt

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

▼

File2.txt only

File1.txt and File2.txt only

File2.txt and File3.txt only

File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

▼

File1.txt only

File1.txt and File2.txt only

File1.txt and File3.txt only

File1.txt, File2.txt, and File3.txt

NEW QUESTION 25

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2016 and a computer named Computer1 that runs Windows 10.

Server1 contains a share named Backup. All users can read and write data in Backup.

On Monday at 13:00, you configure Backup and Restore (Windows 7) on Computer1 to use the following settings:

- > Backup Destination: \\Server1\Backup
- > What do you want to back up?: Local Disk (D:), Include a system image of drives: System Reserved, (C:)
- > Schedule: Daily at 23:00

You need to identify how many backups will be available on Thursday at 17:00.

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Local Disk (D:) backups:

▼
One backup that uses ZIP files
One backup that uses a VHDX file
Three backups that use ZIP files
Three backups that use VHDX files

System image backups of drive C:

▼
One backup that uses ZIP files
One backup that uses a VHDX file
Three backups that use ZIP files
Three backups that use VHDX files

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 29

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Domain Admins
User2	Backup Operators

The domain contains a computer named Computer1. Computer1 contains the users shown in the following table.

Name	Member of
User3	Administrators
User4	Users

On Computer1, you create a restore point named RP1.

Which users can restore RP1 on Computer1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Can restore RP1 on Computer1 while Windows is running:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

Can restore RP1 if Computer1 restarts by using Advanced startup:

User3 only
User1 and User3 only
User3 and User4 only
User1, User2, and User3 only
User1, User3, and User4 only

NEW QUESTION 38

- (Exam Topic 4)
Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group2

The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1 that has the following permissions:

- > User2: Deny Write
- > Group1: Allow Read
- > Group2: Allow Modify

Folder1 is shared as Share1\$. Share1\$ has the following configurations:

- > Everyone: Allow Full control
- > Access-based enumeration: Enabled

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can list files in \\Computer1\Share1\$.	<input type="radio"/>	<input type="radio"/>
User2 can list files in \\Computer1\Share1\$.	<input type="radio"/>	<input type="radio"/>
If User3 connects to \\Computer1 from File Explorer, Share1\$ will be visible.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

YES, YES, NO

NEW QUESTION 40

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

NEW QUESTION 42

- (Exam Topic 4)

You have several computers that run Windows 10. The computers are in a workgroup and have BitLocker Drive Encryption (BitLocker) enabled.

You join the computers to Microsoft Azure Active Directory (Azure AD).

You need to ensure that you can recover the BitLocker recovery key for the computers from Azure AD. What should you do first?

- A. Disable BitLocker.
- B. Add a BitLocker key protector.
- C. Suspend BitLocker.
- D. Disable the TPM chip.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/prepare-your-organization-f>

NEW QUESTION 45

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Folder1.

You plan to share Folder1. Everyone will have Read share permissions, and administrators will have Full control share permission.

You need to prevent the share from appearing when users browse the network. What should you do?

- A. Enable access-based enumeration.
- B. Deny the List NTFS permissions on Folder1.
- C. Add Folder1 to a domain-based DFS namespace.
- D. Name the share Folder1\$.

Answer: D

Explanation:

Appending a dollar sign to share name prevents a share from appearing when users browse the network.

NEW QUESTION 47

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released.

From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

Answer: A

Explanation:

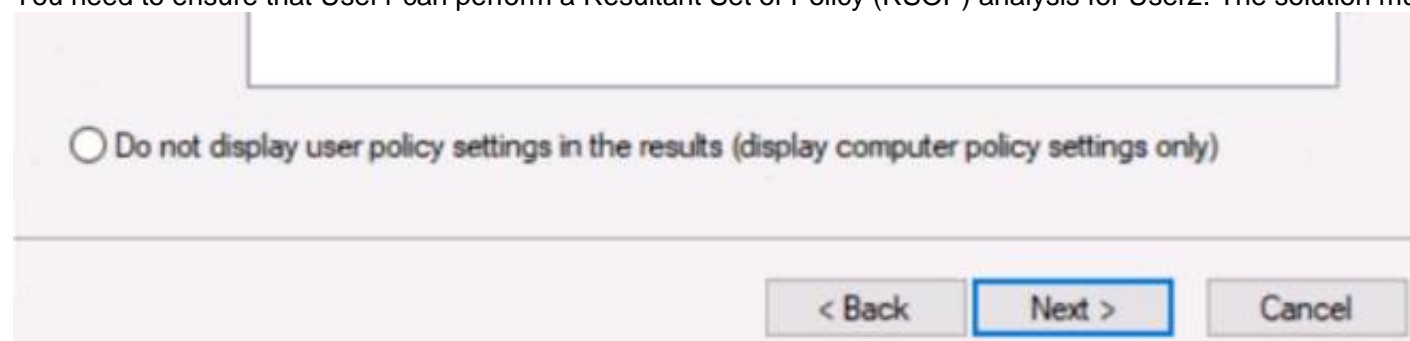

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

NEW QUESTION 52

- (Exam Topic 4)

You need to ensure that User1 can perform a Resultant Set of Policy (RSOP) analysis for User2. The solution must use the principle of least privilege.

What should you do first?

- A. Add User1 to the local Administrators group.
- B. Add User2 to the local Performance Monitor Users group.
- C. Run RSoP from an elevated-privilege account.
- D. Add User1 to the local Performance Monitor Users group.

Answer: D

NEW QUESTION 55

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts the Hyper-V virtual machines shown in the following table.

Name	Generation	Configuration version
VM1	1	9.0
VM2	1	10.0
VM3	2	8.0
VM4	2	10.0

You need to install Windows 11 on a virtual machine. On which virtual machine can you install Windows 11?

- A. VM2only
- B. VM4only
- C. VM3 and VM4 only
- D. VM2 and VM4 only
- E. VM1.VM2,VM3, andVM4

Answer: E

NEW QUESTION 59

- (Exam Topic 4)

A user has a computer that runs Windows 10.The user has access to the following storage locations:

- > A USB flash drive
- > Microsoft OneDrive
- > OneDrive for Business
- > A drive mapped to network share
- > A secondary partition on the system drive

You need to configure Back up using File History from the Settings app.

Which two storage locations can you select by using File History? Each correct answer presents complete solution.

NOTE: Each correct selection is worth one point.

- A. OneDrive for Business
- B. OneDrive
- C. the USB flash drive
- D. the secondary partition on the system drive
- E. the drive mapped to a network share

Answer: CE

NEW QUESTION 64

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled.

You need to configure a Windows Sandbox environment The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Values

- Default
- Disable
- Enable
- False
- True

Answer Area

```
<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

```
<Configuration>
  <VGpu>  </VGpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

NEW QUESTION 65

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1.

Solution: On Computer2, you share a folder. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 68

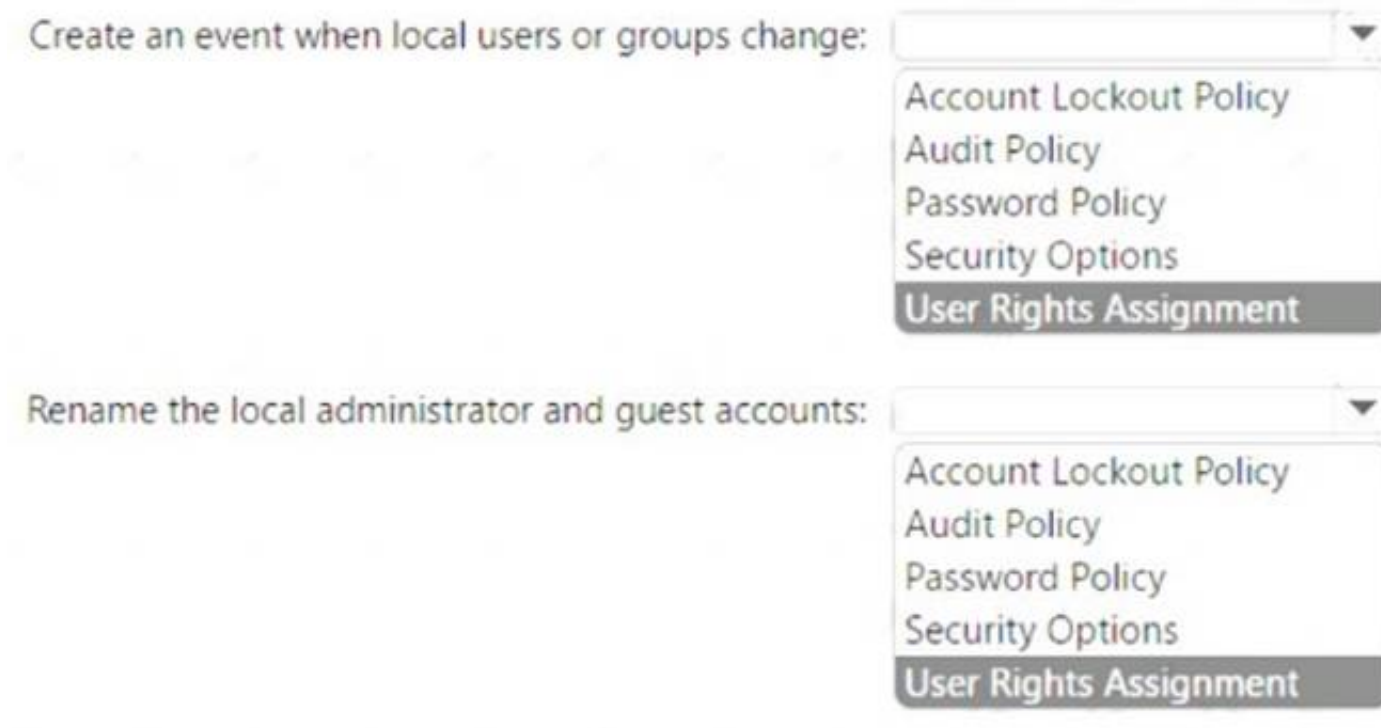

- (Exam Topic 4)

You have a computer that runs Windows 10.

You need to configure the local computer policy to meet the following requirements:

- An event must be created in the Security log when changes are made to local users or groups.
- The local administrator and guest accounts must be renamed.

Which Security Settings should you modify? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Audit Policy Box 2: Security options

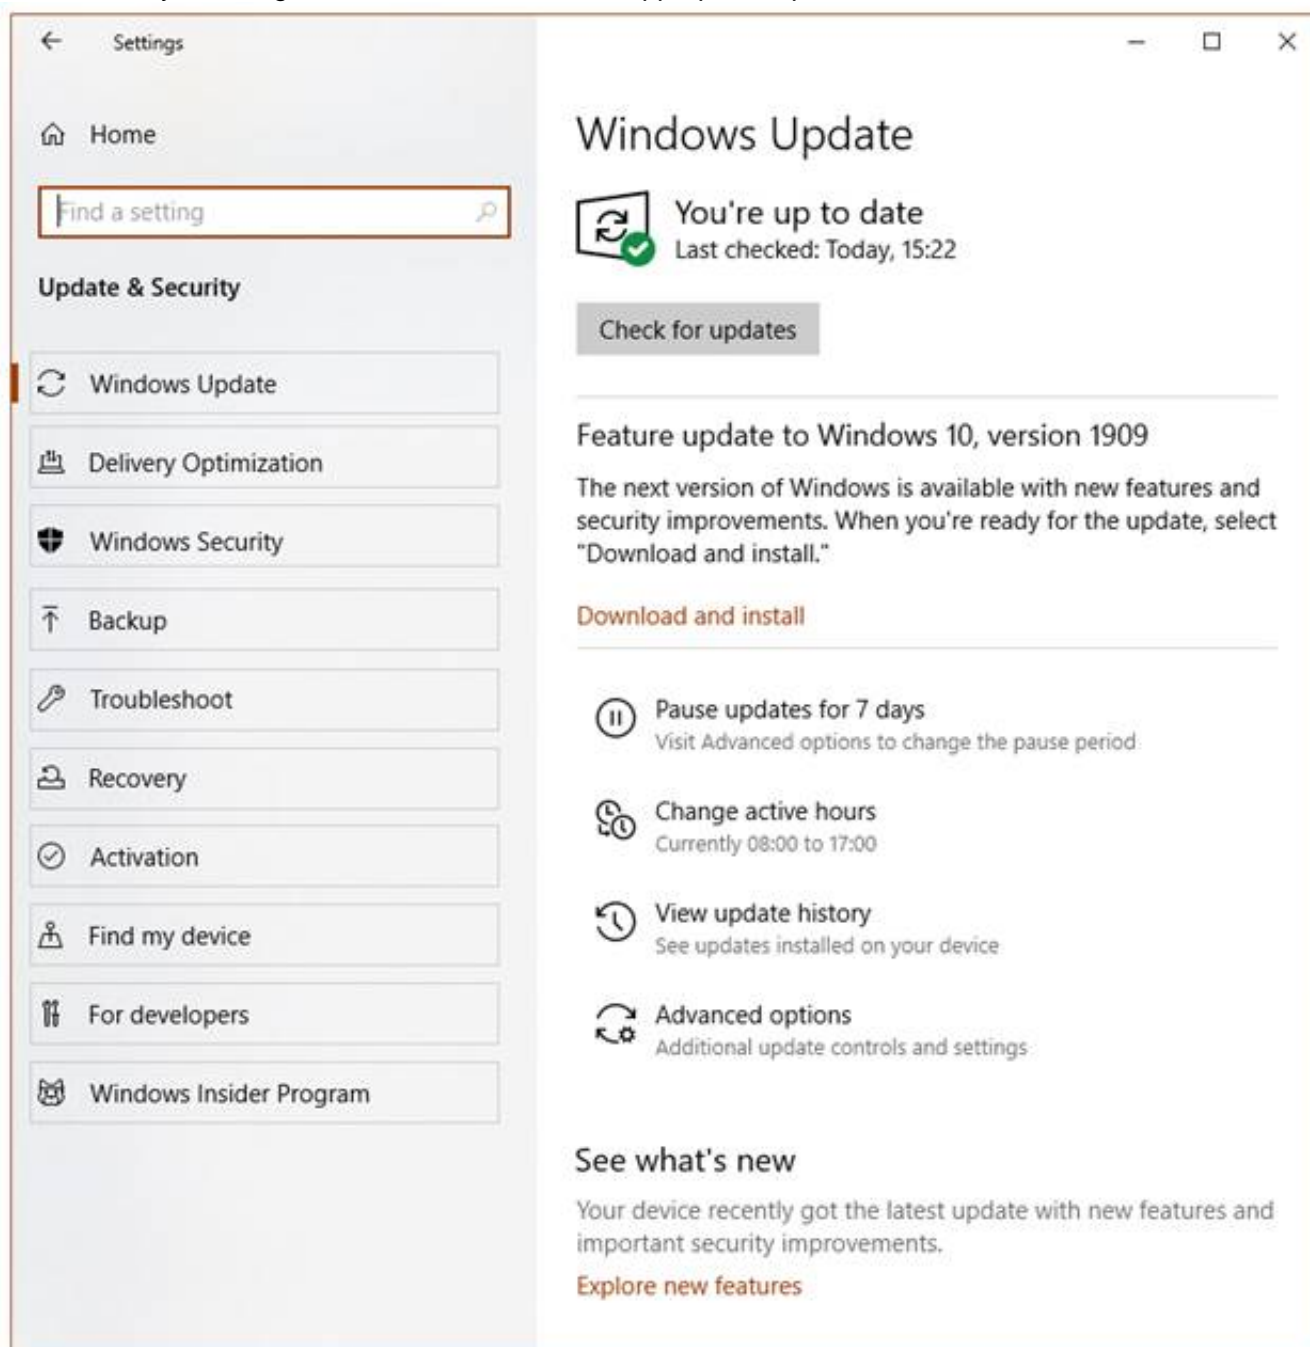

NEW QUESTION 73

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

NEW QUESTION 75

- (Exam Topic 4)

A user has a computer that runs Windows 10.

When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.

You run the ipconfig command and receive the following output.

```
Connection-specific DNS Suffix . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpi. . . . . : Enabled
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 77

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Users
User2	Users, Administrators

Computer1 contains an image file named C:\Folder\Image.jpg.

Computer1 has the Local Computer\Administrators Policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Not configured
Desktop Wallpaper	Disabled

Computer1 has the Local Computer\Non-Administrators Policy shown in the following table.

Setting	State	Path
Remove Recycle Bin icon from desktop	Enabled	Not applicable
Desktop Wallpaper	Enabled	C:\Folder\Image.jpg

Computer1 has the local computer policy shown in the following table.

Setting	State
Remove Recycle Bin icon from desktop	Disabled
Desktop Wallpaper	Not configured

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can change the desktop wallpaper.	<input type="radio"/>	<input type="radio"/>
User2 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>
User1 has the Recycle Bin on the desktop.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

NEW QUESTION 82

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

References:

https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html

NEW QUESTION 84

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You need to provide a user with the ability to remotely create and modify shares on the computers. The solution must use the principle of least privilege.

To which group should you add the user?

- A. Power Users
- B. Remote Management Users
- C. Administrators
- D. Network Configuration Operators

Answer: C

NEW QUESTION 88

- (Exam Topic 4)

You have a computer that runs Windows 8.1.

When you attempt to perform an in-place upgrade to Windows 10, the computer fails to start after the first restart.

You need to view the setup logs on the computer. Which folder contains the logs?

- A. \Windows.\BT\Sources\Panther\
- B. \Windows\Logs
- C. \Windows\Temp
- D. \Windows.\BT\Inf

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-setup-log-files-and-eventlo>

NEW QUESTION 92

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains three computers named Computer1, Computer2, and Computer3 that run Windows 10.

The computers are on the same network and have network connectivity.

Windows Defender Firewall on Computer1 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

Windows Defender Firewall on Computer2 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Do not authenticate

Windows Defender Firewall on Computer3 has the server-to-server connection security rule shown in the following table.

Name	Endpoint 1	Endpoint 2	Authentication mode
Rule1	Any	Any	Require inbound and request outbound

All the connection security rules are enabled and configured to use only the Computer (Kerberos VS) authentication method.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
If Computer1 initiates communication to Computer2, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>
Computer2 can establish communications to Computer3.	<input type="radio"/>	<input type="radio"/>
If Computer3 initiates communication to Computer1, network traffic will be encrypted.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO NO

Traffic will not be encrypted by default. The question does not have this option configured by default. Encryption is optional, not default to authentications. Encryption needs to be enabled in the GPO. The default is data integrity which is not default to encrypt. Actually, if you encrypt you will use both integrity with encryption. Devices in the encryption zone require authentication to communicate with other devices.

NEW QUESTION 94

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user. The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

Activation

Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXXX-XXXXXX-XXXXXX-XXXXXX
Product Key	XXXXXX-XXXXXX-XXXXXX-XXXXXX-XXXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run slmgr /lrc.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run slmgr /ato.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

NEW QUESTION 98

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.

Does the meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 100

- (Exam Topic 4)

You have 10 new Windows 10 devices.

You plan to deploy a provisioning package that will configure a wireless network profile.

You need to ensure that a support technician can install the provisioning package on the devices. The solution must use the principle of least privilege.

To which group should you add the support technician?

- A. Users
- B. Power Users
- C. Network Configuration Operators
- D. Administrators

Answer: D

Explanation:

Reference:
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

NEW QUESTION 101

- (Exam Topic 3)
Which users can create a new group on Computer3?

- A. User31 only
- B. User1 and User32 only
- C. Admin1 and User31 only
- D. Admin1, User31, and User32 only

Answer: A

Explanation:

Reference:
https://ss64.com/nt/syntax-security_groups.html

NEW QUESTION 103

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 104

- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point.

Answer Area	
Statements	Yes No
When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/> <input type="radio"/>
When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/> <input type="radio"/>
When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/> <input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Statements	Yes	No
<input type="radio"/>	When User1 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
<input type="radio"/>	When User1 attempts to save changes to D:\Folder1\Report.docx, an event is created in the security event log.	<input checked="" type="radio"/>	<input type="radio"/>
<input type="radio"/>	When User2 attempts to open D:\Folder1\Report.docx, an event is created in the security event log.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 106

- (Exam Topic 1)

You need to implement a solution to configure the contractors' computers.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

Microsoft Deployment Toolkit (MDT)
Windows AutoPilot
Windows Configuration Designer
Windows Deployment Services (WDS)

File type to create:

CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 108

- (Exam Topic 1)

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

NEW QUESTION 113

- (Exam Topic 1)

You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

Answer: A

Explanation:

References:

<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

NEW QUESTION 118

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.
You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.
Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 122

- (Exam Topic 4)
You have computers that run Windows 10 as shown in the following table.

Name	IP address
CLIENT1	192.168.0.10
CLIENT2	192.168.1.10
CLIENT3	192.168.0.250
CLIENT4	192.168.0.240

CLIENT1 has the following IP configuration.

```
Connection-specific DNS Suffix . : 
IPv4 Address. . . . . : 192.168.0.10
Subnet Mask . . . . . : 255.255.255.0
Default Gateway . . . . . : 192.168.0.1
```

From CLIENT1, you ping CLIENT2 and CLIENT3 successfully, but when you ping CLIENT4, you get a Request timed out response. From CUENT3. you ping CLIENT4 successfully. Which computer and setting are misconfigured? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Misconfigured computer:

CLIENT2

CLIENT3

CLIENT4

Misconfigured setting:

Default gateway

IP address

Subnet mask

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Misconfigured computer:

CLIENT2
CLIENT3
CLIENT4

Misconfigured setting:

Default gateway
IP address
Subnet mask

NEW QUESTION 123

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VMI. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	<i>Not applicable</i>
Base2	VHDX	Fixed size	<i>Not applicable</i>
Disk1	VHD	Dynamically expanding	<i>Not applicable</i>
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	<i>Not applicable</i>
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VMI. You need to identify the following:

Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VMI is running.

What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

Base1 and Disk2 only
Base2 and Disk4 only
Disk1 and Disk3 only
Disk3 and Disk4 only
Base2, Disk3, and Disk4 only
Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

Base1 and Disk2 only
Base2 and Disk4 only
Disk1 and Disk3 only
Disk3 and Disk4 only
Base2, Disk3, and Disk4 only
Disk1, Disk2, Disk3, and Disk4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word, website Description automatically generated

NEW QUESTION 124

- (Exam Topic 4)

You have 10 computers that run Windows 10.

You have a Windows Server Update Services (WSUS) server.

You need to configure the computers to install updates from WSUS.

Which two settings should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-manage-updates-wsus#configure-automatic>

NEW QUESTION 125

- (Exam Topic 4)

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

What should you do?

- A. From Network & Internet in the Settings app, set a data limit.
- B. From Accounts in the Settings app, turn off Sync settings.
- C. From Network & Internet in the Settings app, set the network connections as metered connections.
- D. From Update & Security in the Settings app, pause updates.

Answer: D

NEW QUESTION 130

- (Exam Topic 4)

You have 50 Windows 8.1 devices.

You plan to migrate the devices to Windows 10.

You need to install the following tools on a local computer

- Deployment Image Servicing and Management (DISM)
- Windows System Image Manager (Windows SIM)
- OEM Activation 3.0 (OA 3.0)
- Scan State
- Load State

Which two features in the Windows Assessment and Deployment Kit should you select? To answer, select the nodes in the answer area. NOTE: Each correct selection is worth one point.

Select the features you want to install

Click a feature name for more information.

- ☐ Application Compatibility Tools
- ☐ Deployment Tools
- ☐ Windows Preinstallation Environment (Windows PE)
- ☐ Imaging And Configuration Designer (ICD)
- ☐ Configuration Designer
- ☒ User State Migration Tool (USMT)
- ☐ Volume Activation Management Tool (VAMT)
- ☐ Windows Performance Toolkit
- ☐ Windows Assessment Toolkit
- ☐ Microsoft User Experience Virtualization (UE-V) Template
- ☐ Media eXperience Analyzer

User State Migration Tool (USMT)

Size: 582.1 MB

Tools to migrate user data from a previous installation of Windows to a new installation.

Includes:

- ScanState tool
- LoadState tool
- USMTUtils tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Select the features you want to install

NEW QUESTION 135

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10. Computer1 is used to provide guests with access to the Internet. Computer1 is a member of a workgroup.

You want to configure Computer1 to use a user account sign in automatically when the computer is started. The user must not be prompted for a user name and password.

What should you do?

- A. Configure Group Policy preferences.
- B. Run the BCDBoot command.
- C. Edit the Registry.
- D. Run the MSConfig command.

Answer: C

Explanation:

In the registry, add a default user name and a default password in the HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Winlogon\sbukey.

Reference:

<https://support.microsoft.com/en-us/help/324737/how-to-turn-on-automatic-logon-in-windows>

NEW QUESTION 139

- (Exam Topic 4)

You install Windows 10 Pro on a computer named CLIENT1.

You need to ensure that all per-user services are disabled on CLIENT1. The solution must minimize administrative effort.

What should you use?

- A. a Group Policy administrative template
- B. Device Manager
- C. Task Manager
- D. Group Policy preferences

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/application-management/per-user-services-in-windows>

NEW QUESTION 142

- (Exam Topic 4)

You have an isolated network segment that contains only three computers named Computer1, Computer2, and Computer3 that run Windows 10. The network settings for each computer are shown in the following table.

Name	TCP/IPv4		TCP/IPv6
	General	Alternate configuration	
Computer1	IP assignment: Automatic (DHCP)	Automatic private IP address	Obtain an IPv6 address automatically
Computer2	IP assignment: Manual IP address: 169.254.15.10 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: 2001::15 Subnet prefix length: 64
Computer3	IP assignment: Manual IP address: 192.168.15.5 Mask: 255.255.0.0	<i>Not applicable</i>	IPv6 address: FE80::5 Subnet prefix length: 64

Windows Defender Firewall is configured to allow ICMP and ICMPv6 traffic.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area	
Statements	Yes No
On Computer1, the ping Computer2 command will return a successful result.	<input type="radio"/> <input checked="" type="radio"/>
On Computer1, the ping FE80::5 command will return a successful result.	<input type="radio"/> <input checked="" type="radio"/>
On Computer1, the ping 192.168.15.5 command will return a successful result.	<input type="radio"/> <input checked="" type="radio"/>

NEW QUESTION 143

- (Exam Topic 4)

Your network contains an Active Directory domain named Contoso.com.

A user named User1 has a personal computer named Computer that runs Windows 10 Pro. User1 has a VPN connection to the corporate network.

You need to ensure that when User1 connection to the corporate network.

You need to ensure that when user1 connects to the VPN, network traffic uses a proxy located in the corporate network. The solution must ensure that User1 can access the internet when disconnected from the VPN.

What should you do?

- A. From the Settings app, modify the properties of the VPN connection.
- B. From the Setting app, modify proxy settings for the local computer.
- C. From Control panel, modify the properties of the VPN connection
- D. From Control Panel, modify the Windows Defender Firewall settings

Answer: A

NEW QUESTION 144

- (Exam Topic 4)

Your network contains an on-premises Active Directory forest named contoso.com. The forest contains a user named User1 and two computers named Computer1 and Computer2 that run Windows 10.

User1 is configured as shown in the following exhibit.

The screenshot shows the 'User1 Properties' dialog box with the 'Profile' tab selected. The 'User profile' section shows 'Profile path' as '\\Server1\Profiles\User1' and 'Logon script' as empty. The 'Home folder' section shows 'Local path' selected with an empty text box, and 'Connect' with a dropdown arrow and 'To:' followed by an empty text box. At the bottom are 'OK', 'Cancel', 'Apply', and 'Help' buttons.

You rename file \\Server1\Profiles\User1.V6\NTUSER.DAT as NTUSER.MAN.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
On Computer1, if User1 adds a shortcut to the desktop, the shortcut will appear when the user signs in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing back in to Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer1, if User1 modifies the background, and then signs out, the user will see the modified background when signing in to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 149

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
B. Request a passphrase.
C. Request and install a certificate.
D. Create a Connection Manager Administration Kit (CMAK) package.

Answer: B

Explanation:

References:

<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

NEW QUESTION 153

- (Exam Topic 4)

You plan to deploy Windows 10 to 100 secure computers.

You need to select a version of Windows 10 that meets the following requirements:

- Uses Microsoft Edge as the default browser
- Minimizes the attack surface on the computer
- Supports joining Microsoft Azure Active Directory (Azure AD)
- Only allows the installation of applications from the Microsoft Store

What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode
B. Windows 10 Home in S mode
C. Windows 10 Pro
D. Windows 10 Enterprise

Answer: A

Explanation:

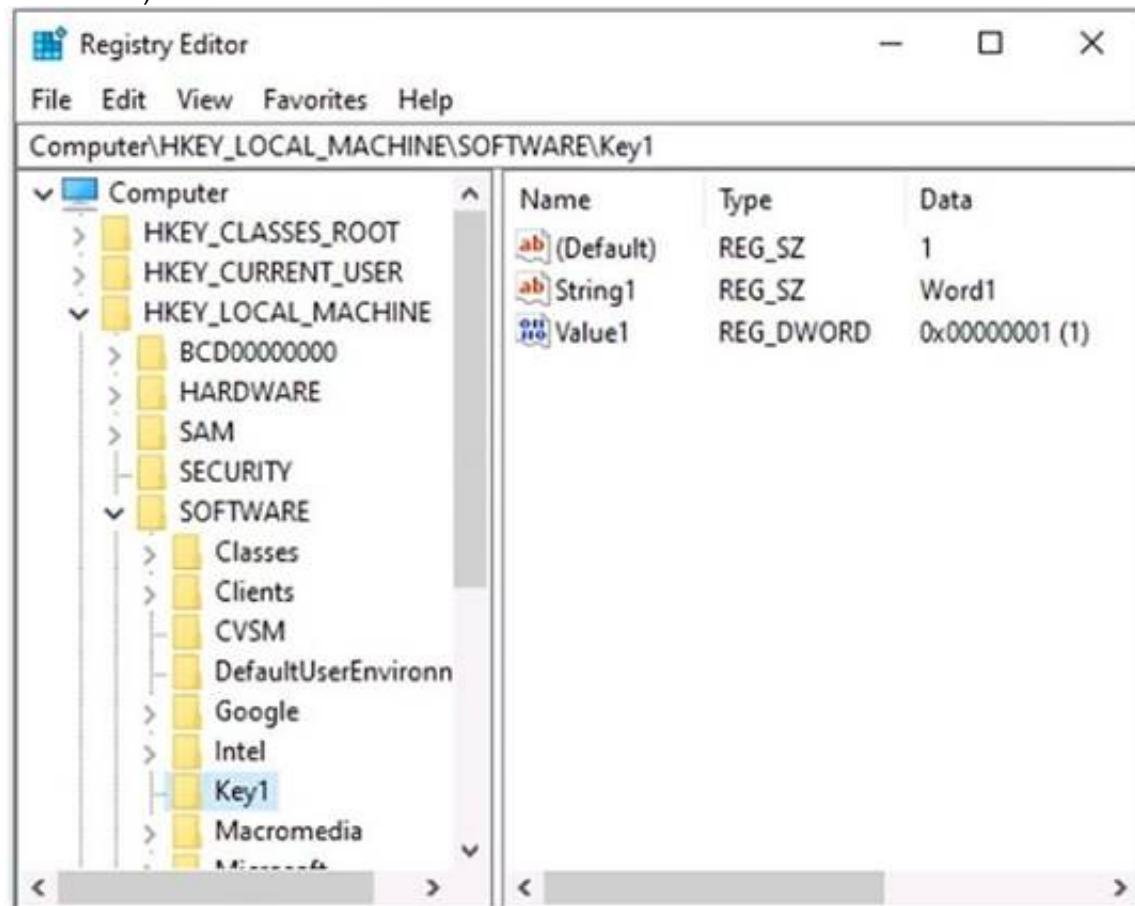

References:

Uses Microsoft Edge as the default browser Minimizes the attack surface on the computer Supports joining Microsoft Azure Active Directory (Azure AD) Only allows the installation of applications from the Microsoft Store <https://docs.microsoft.com/es-es/windows/deployment/s-mode>

NEW QUESTION 156

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 contains a registry key named Key1 that has the values shown in the exhibit. (Click the Exhibit tab.).

You have a Registration Entries (.reg) file named File1.reg that contains the following text.

Windows Registry Editor Version 5.00 [HKEY_LOCAL_MACHINE\SOFTWARE\Key1]

"String1"=

@="2"

You need to identify the effect of importing File1.reg to Computer1.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

String1 will:	<div><div></div><div>be deleted</div><div>have a value of –</div><div>have a value of Word1</div><div>have no value</div></div>
Value1 will:	<div><div></div><div>be deleted</div><div>have a value of 1</div><div>have a value of 2</div><div>have no value</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: String1 will be deleted.

To delete a value, append equals and then minus to the value. For example: "String1"=

Box 2: Value1 will have a value of 1

@="2" sets the default value to 1 but Value1 already has a DWORD value.

A DWORD (32-bit) value is a hexadecimal value. Value1 is 0x00000001 which is 1. References:

<https://www.computerhope.com/issues/ch000848.htm> <https://www.computerperformance.co.uk/vista/reg-create/>

NEW QUESTION 159

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

On Computer1, you need to run the Invoke-Command cmdlet to execute several PowerShell commands on Computer2.

What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet
- B. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2
- C. On Computer1, run the New-PSSession cmdlet
- D. On Computer2, add Computer1 to the Remote Management Users group

Answer: A

Explanation:

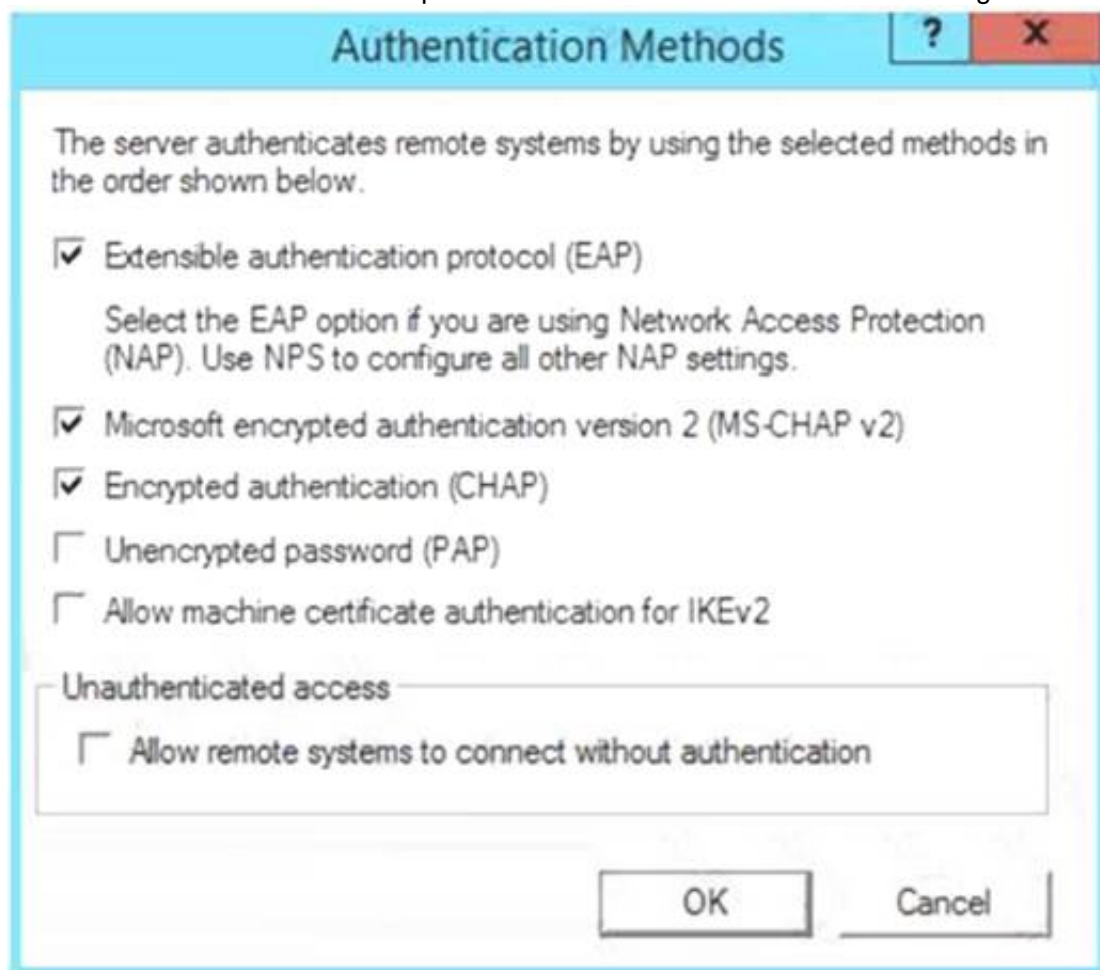

Reference:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

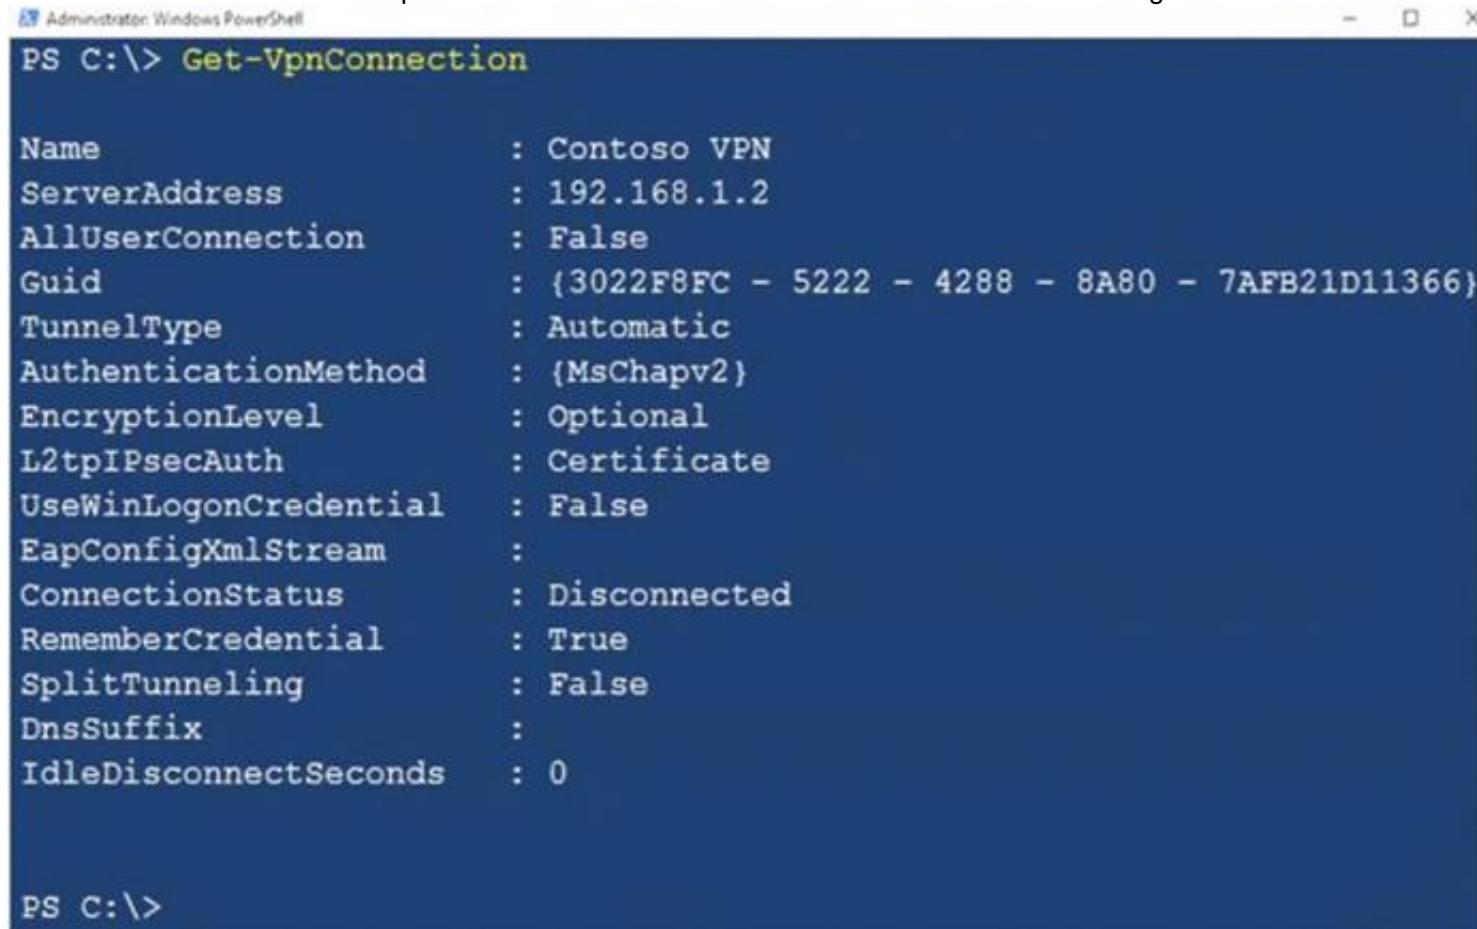

NEW QUESTION 160

- (Exam Topic 4)

You have a VPN server that accepts PPTP and L2TP connections and is configured as shown in the following exhibit.

A user named User1 has a computer that runs Windows 10 and has a VPN connection configured as shown in the following exhibit.

User1 fails to establish a VPN connection when connected to a home network. You need to identify which VPN client setting must be modified. What should you identify?

- A. ServerAd dress
- B. TunnelType
- C. AuthenticationMethod
- D. L2tpIPsecAuth
- E. EncryptionLevel

Answer: A

Explanation:

The server address is a private IP address. This needs to be the public IP address of the VPN server.

NEW QUESTION 162

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

GroupA: 

User1 only
User1 and User2 only
User1 and GroupB only
User1, User2, GroupB, and GroupC

GroupC: 

User2 only
User1 and User2 only
User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

NEW QUESTION 167

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Power Users
- C. Remote Desktop Users
- D. Remote Management Users

Answer: D

Explanation:

References:

<https://4sysops.com/wiki/enable-powershell-remoting/>

NEW QUESTION 172

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover that when users are on their lock screen, they see a different background image every day, along with tips for using different features in Windows 10.

You need to disable the tips and the daily background image for all the Windows 10 computers. Which Group Policy settings should you modify?

- A. Turn off the Windows Welcome Experience
- B. Turn off Windows Spotlight on Settings
- C. Do not suggest third-party content in Windows spotlight
- D. Turn off all Windows spotlight features

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/configuration/windows-spotlight>

NEW QUESTION 176

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted

from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

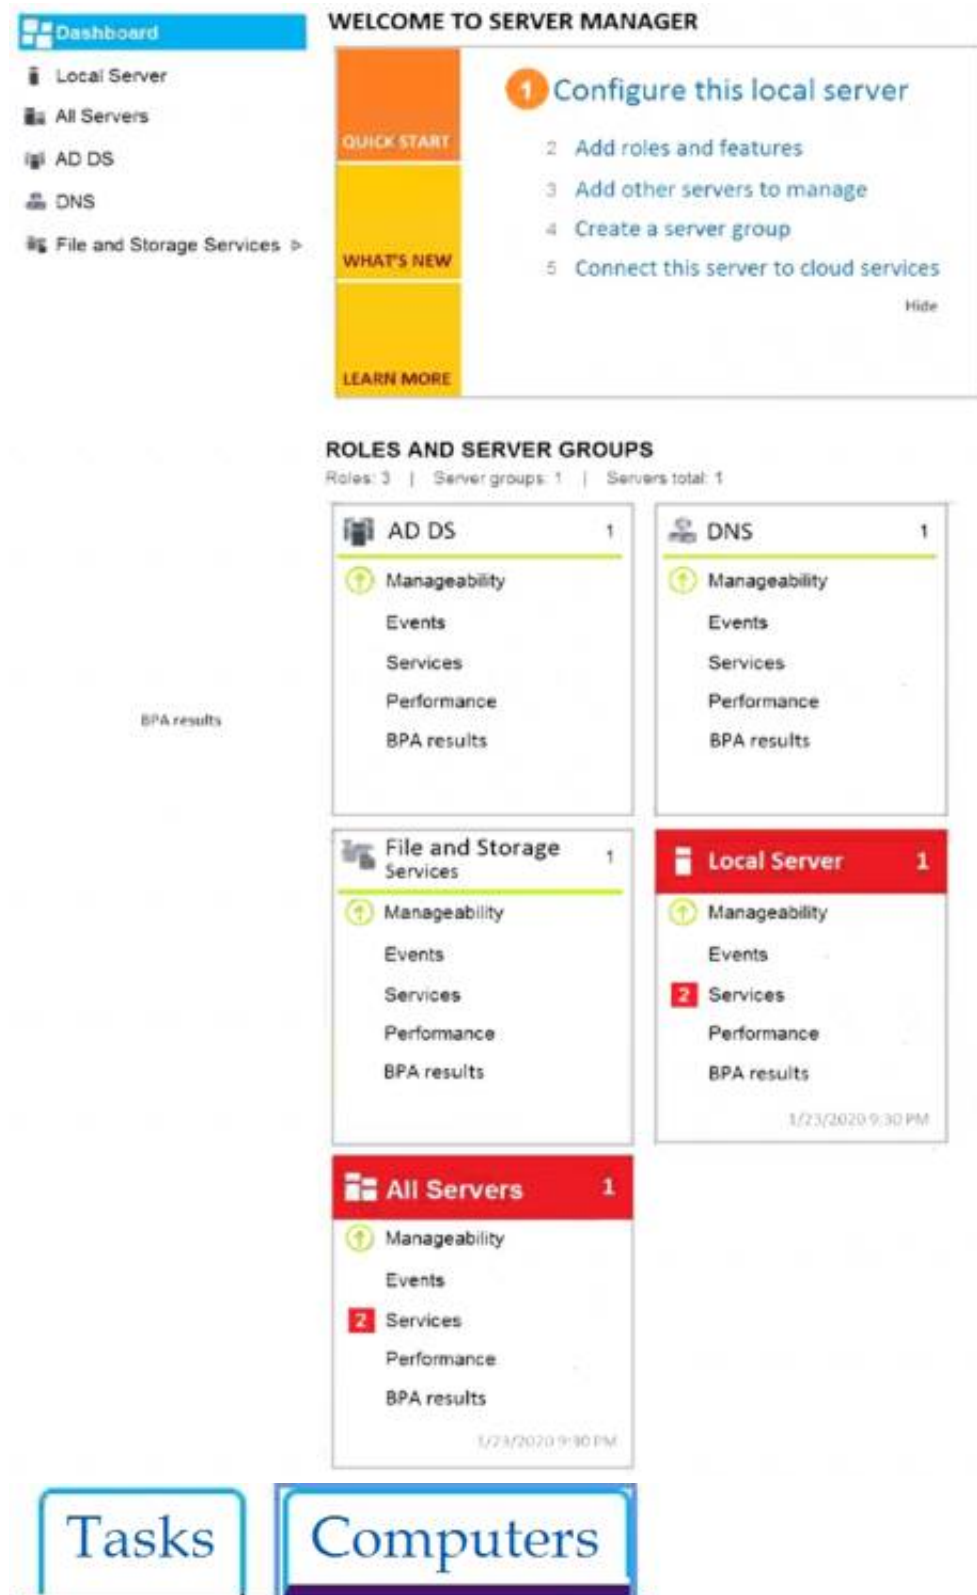

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that Windows feature updates on Client1 are deferred for 15 days when the updates become generally available. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select the Start button, then select Settings > Update & Security > Windows Update.
- Under Update settings, select Advanced options.
- From the boxes under Choose when updates are installed, select the number of days you would like to defer a feature update or a quality update. Reference:
<https://support.microsoft.com/en-us/help/4026834/windows-10-defer-feature-updates>

NEW QUESTION 177

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 10. The computer contains a folder named D:\Scripts. D:\Scripts contains several PowerShell scripts.

You need to ensure that you can run the PowerShell scripts without specifying the full path to the scripts. The solution must persist between PowerShell sessions.

Solution: At a command prompt, you run set.exe path=d:\scripts. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 180

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live

environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

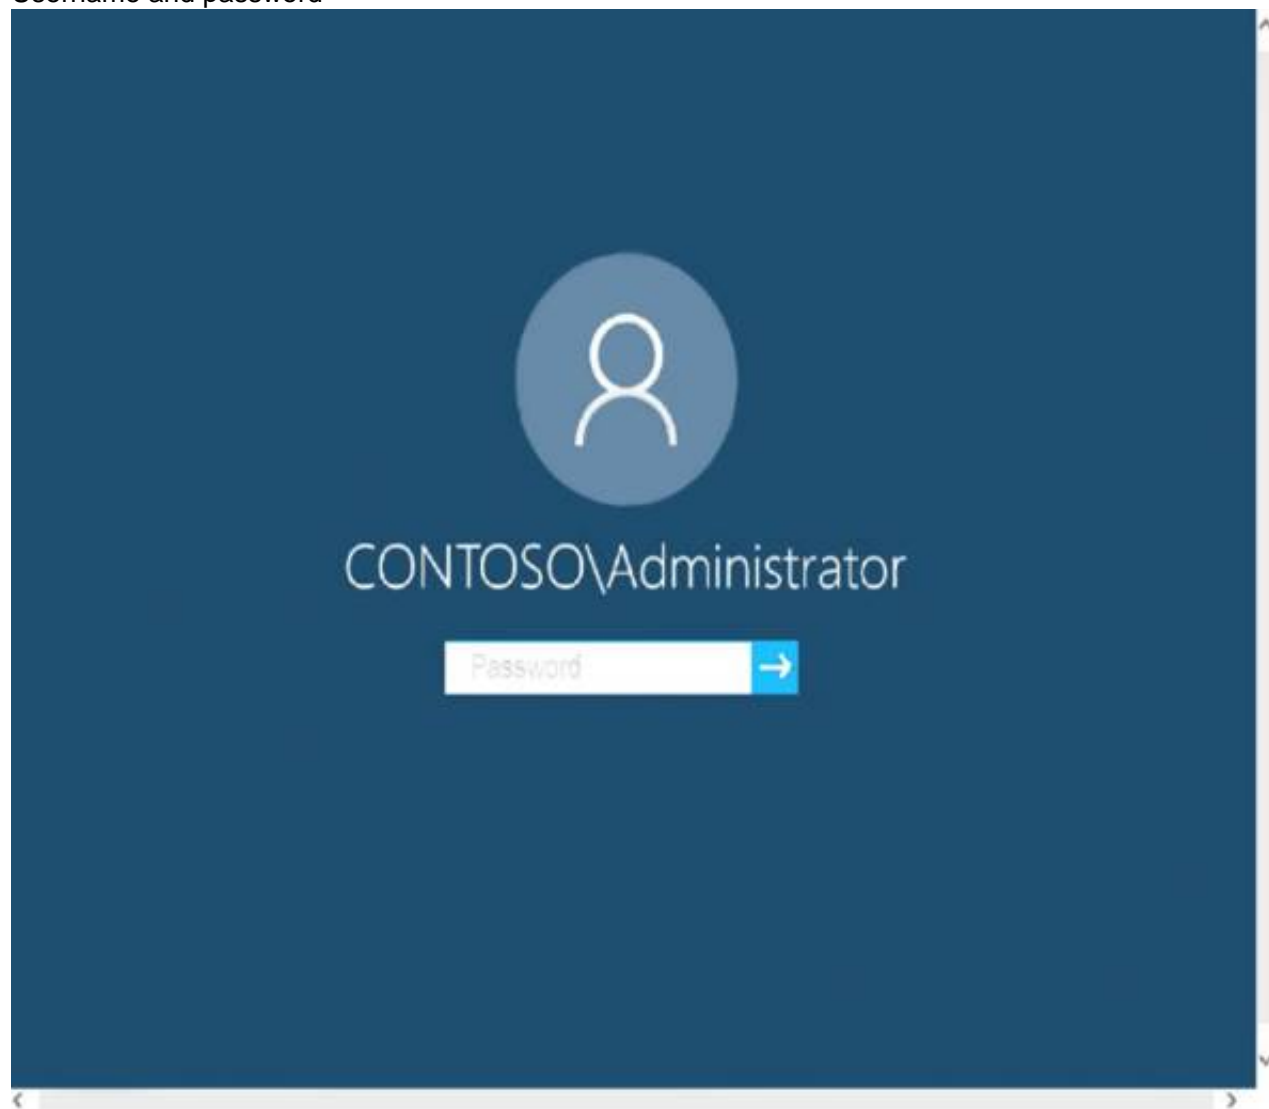

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

NEW QUESTION 183

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
- B. From the Settings app, modify the Background settings.
- C. From the local Group Policy Editor, modify the Desktop Background policy.
- D. modify the Desktop settings.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

Answer: B

NEW QUESTION 185

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer 1 that runs Windows 10. You need to be able to reset computer accounts from Computer1. What should you do first?

- A. From Windows Defender Firewall, allow Windows Remote Management
- B. Add the RSAT: Active Directory Domain Services and Lightweight Directory Services Tools optional feature.
- C. From Windows Defender Firewall, allow Remote Service Management
- D. Add the RSAT: Server Manager optional feature.

Answer: B

NEW QUESTION 188

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to create a Start menu layout file. The solution must meet the following requirements:

- Contain an app group named Contoso Apps that has several pinned items. Contoso Apps must be locked from user modification.
- Ensure that users can customize other parts of the Start screen.
- Minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

Actions	Answer Area
Deploy the start layout.	
Modify the StartLayoutCollection XML element.	
Modify the DefaultLayoutOverride XML element.	
Export the start layout to a file.	
On a reference computer, customize the Start menu.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. On a reference computer, customize the Start menu
- * 2. Export the start layout to a file
- * 3. Modify the DefaultLayoutOverride XML element
- * 4. Deploy the start layout

References:
<https://docs.microsoft.com/en-us/windows/configuration/customize-and-export-start-layout>

NEW QUESTION 193

- (Exam Topic 4)

You have a Windows 10 image that was updated to the latest version of Windows 10. You plan to create a new WinPE bootable ISO file.

You obtain the latest WinPE source files.

You need to create the new ISO file to support PowerShell scripting.

Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

A. Mastered
B. Not Mastered

Explanation:
