Flows Power Automate includes several types of processes, each designed for a different purpose:
? Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.
? Button flows. Perform repetitive tasks simply by tapping a button on your mobile
device.
? Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
? Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

Box 3: Common Data Model
Model-driven app design is a component-focused approach to app development. Model- driven app design doesn't require code and the apps you make can be simple or very complex. aggregated level, using a fraction of the resources required at the detail level. Unlock big data in a way that would otherwise be impossible.
Box 2: No
You can connect to model-driven apps in Dynamics 365 with Power BI Desktop to create custom reports and dashboards for use with the Power BI service.
You can use similar steps to connect to model-driven apps in Dynamics 365 using Office Excel Power Query by selecting From Other Sources on the Power Query tab in Excel.
