Exam Questions PL-600

Microsoft Power Platform Solution Architect

About Exambible

Your Partner of IT Exam

Found in 1998

Exambible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, Exambible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1
- (Topic 1)
You need to recommend a solution for handling data entry requirements for the mobile audit teams.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Scenario:
Audit teams must have the ability to view worker information on their mobile devices. Audit teams must be able to record data during visits to locations where workers are placed.
When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.
Reference:
https://docs.microsoft.com/en-us/powerapps/user/run-app-browser

NEW QUESTION 2
- (Topic 2)
You need to provide the IT team and managers with a mobile solution. How many apps should you recommend?

A.

one app for each job role
B. one app for each user
C. one app for all employees of the team
D. one app for each team of employees

Answer: A

Explanation:
Scenario: IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.
Managers need to see all customer dashboards at the top of their menu on their mobile device.

NEW QUESTION 3
- (Topic 2)
You need to recommend a feature that erases agent workloads and resolves reported issues.
What should you recommend?

A. Dynamics 365 Customer Service default functionality
B. Microsoft AppSource
C. Microsoft Store

Answer: A

Explanation:
Scenario: Agents need a way to track reservation issues. Use Dynamics 365 Customer Service to:
? Track customer issues through cases
Reference:
https://docs.microsoft.com/en-us/dynamics365/customer-service/overview

NEW QUESTION 4
- (Topic 2)
You need to recommend an authentication solution for the planned implementation of Dynamics 365.
What should you include in the recommendation?

A. Use synchronized identities.
B. Use the Office 365 tenant for Dynamics 365 Customer Service.
C. Create a new tenant for Dynamics 365 Customer Service.
D. Use federated identities

Answer: A

Explanation:
Scenario: Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.
Synchronized identity. Synchronize on-premises directory objects with Microsoft 365 and manage your users on-premises. You can also synchronize passwords so that the users have the same password on-premises and in the cloud, but they will have to sign in again to use Microsoft 365.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/manage-user-account- synchronization

NEW QUESTION 5
- (Topic 2)
You need to recommend the field type to use for configuring meal selections during reservation.
Which field type should you recommend?

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Scenario:
? Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.
? The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.
In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it.
Example:

Country Name
Poland
USA
England
India

Reference:
https://michalguzowski.pl/how-to-work-with-option-set-in-powerapps/

NEW QUESTION 6
- (Topic 2)

You need to create an Agent security role.
Which three actions should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Add security to the seat entity and assign users to the Agents role.
B. Add security to the Core Records and assign users to the Customer Service Representative role.
C. Copy the Microsoft Dataverse Basic User role.
D. Rename the Customer Service Representative role to Agents.
E. Copy the Customer Service Representative role.
F. Name the new role Agents.

Answer: BEF

Explanation:
Scenario: The security rule for agents must contain the privileges in the default Customer Service
Representative security role.
Create a security role by Copy Role:
Step 1 (E): Copy the Customer Service Representative role. Step 2 (F): Select the New Role Name.
Step 3: (B): When Copying Role is complete, navigate to each tab, ie Core Records, Business Management, Customization, etc.
Set the privileges on each tab. Reference:
https://docs.microsoft.com/en-us/power-platform/admin/create-edit-security-role

NEW QUESTION 7
- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

A. Dynamics 365 Field Service
B. Dynamics 365 Sales
C. Dynamics 365 Project Operations
D. Dynamics 365 Customer Service

Answer: D

Explanation:
Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.
Reference:
https://docs.microsoft.com/en-us/dynamics365/customer-service/overview

NEW QUESTION 8
- (Topic 2)
You need to provide the IT specialists with design diagrams. What should you provide?

A. Business process modeler (BPM) B Al Builder
B. Entity relationship diagram (ERD)
C. Dynamics 365 Product Visualize

Answer: A

Explanation:
Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.
Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry- standard processes that are described by the American Productivity & Quality Center

(APQC)
Reference:
https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle- services/bpm-overview

NEW QUESTION 9
- (Topic 3)
You need to recommend a method for transferring machine information to Dynamics 365 Field Service.
What should you recommend?

A. Microsoft Dataverse connector
B. Dual-write
C. Lifecycle Services

Answer: A

Explanation:
Scenario: Information about each machine produced must be transferred to Dynamics 365 Field Service.
Use the Microsoft Dataverse connector when connecting to the Microsoft Dataverse used for Microsoft Dynamics 365 Sales, Microsoft Dynamics 365 Customer Service, Microsoft Dynamics 365 Field Service, Microsoft Dynamics 365 Marketing, and Microsoft Dynamics 365 Project Service Automation.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/connection-dynamics-crmonline

NEW QUESTION 10
- (Topic 3)
You need to recommend a solution to collect the information required to meet reporting requirements.
What should you recommend?

A. Business process flow
B. Business rule
C. Business event
D. Business process modeler

Answer: A

Explanation:
Business rule can create business recommendations based on business intelligence. Scenario: Analytics and reporting
The solution must:
? Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
? Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
? Provide a printed quality certificate to be included with each machine.
Reference:
https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/

NEW QUESTION 10
- (Topic 4)
A company wants to create a Power Automate flow that posts marketing events to social media.
The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII) data. The company will not post events to unauthorized social media platforms.
You need to ensure that the requirement is met.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Configure the relevant connector so that is part of the Non-Business data group category.
B. Create a security role to prevent data export.
C. Configure an Azure Active Directory (AAD) security role for the maker to the environment.
D. Create a Data Loss Protection (DLP) policy.
E. Configure the relevant connector so that it is part of the Blocked data group category.

Answer: DE

Explanation:
DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.
Reference:
https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention

NEW QUESTION 13
- (Topic 4)
A car dealership has a custom financing table.
You are working with a developer to add a button to a ribbon that displays a hidden section of a form when specific criteria are met.
You need to recommend tools and technologies for the developer
Which two tools or technologies should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point

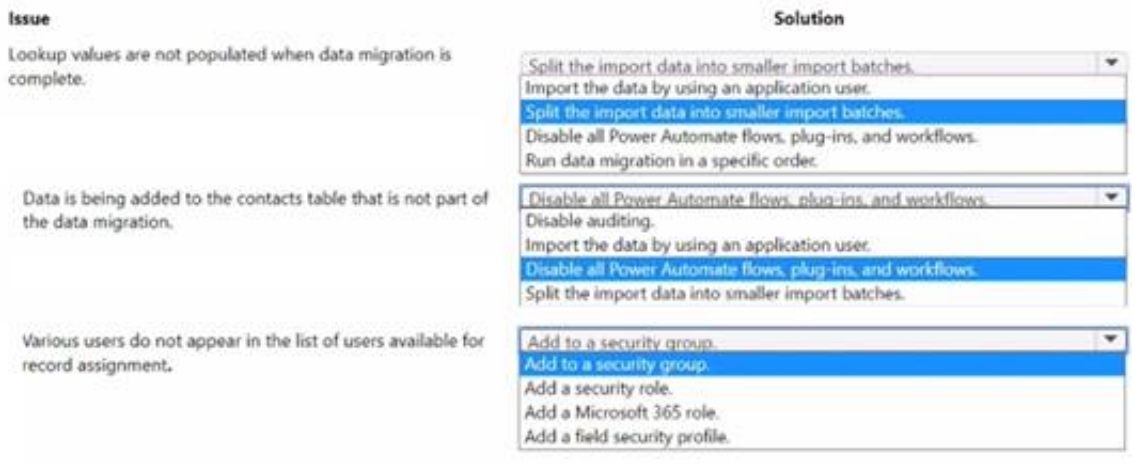
A. Write a business rule.
B. Write JavaScript code.
C. Use the Ribbon Workbench.
D. Use the form editor.

Answer: BC

Explanation:
Client-side scripting using JavaScript is one of the ways to apply custom business process logic for displaying data on a form in a model-driven app.
You can use a community tool, Ribbon Workbench, to visually edit ribbons using the UI. Reference:
https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/client-scripting
https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/customize- commands-ribbon

NEW QUESTION 17
HOTSPOT - (Topic 4)
You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.
The following issues have occurred during a go-live deployment attempt:
• Lookup values are not populated when data migration is complete.
• Data is being added to the contacts table that is not part of the data migration.
• Various users do not appear in the list of users available for record assignment. You need to resolve the go-live deployment issues.
How should you resolve the issue? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area



A. Mastered
B. Not Mastered

Answer: A

Explanation:

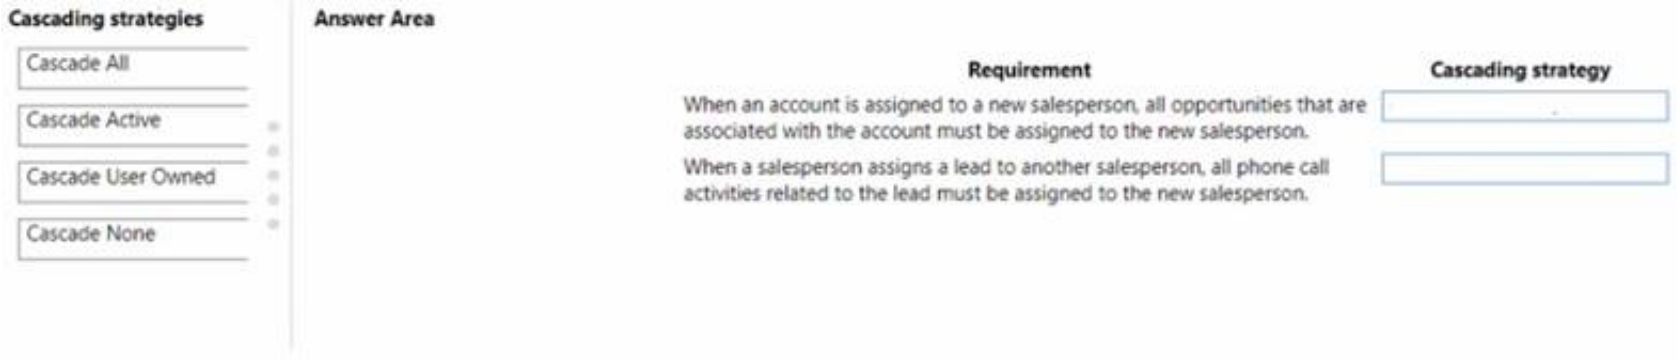
NEW QUESTION 22
- (Topic 4)
You are designing a self-service portal for a company. The portal must meet the following requirements:
? Customers must be able to submit and review cases.
? Customers must be able to chat with service representatives in near real time.
? Allow service representatives to select cases from queues and use knowledge articles to resolve customer concerns.
You need to recommend solutions for the company that do not require custom development.
Which three apps or services should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Dynamics 365 Field Service
B. Dynamics 365 Customer Service
C. Omnichannel for Customer Service
D. Customer Insights
E. Customer self-service portal

Answer: BCE

Explanation:
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates
https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal

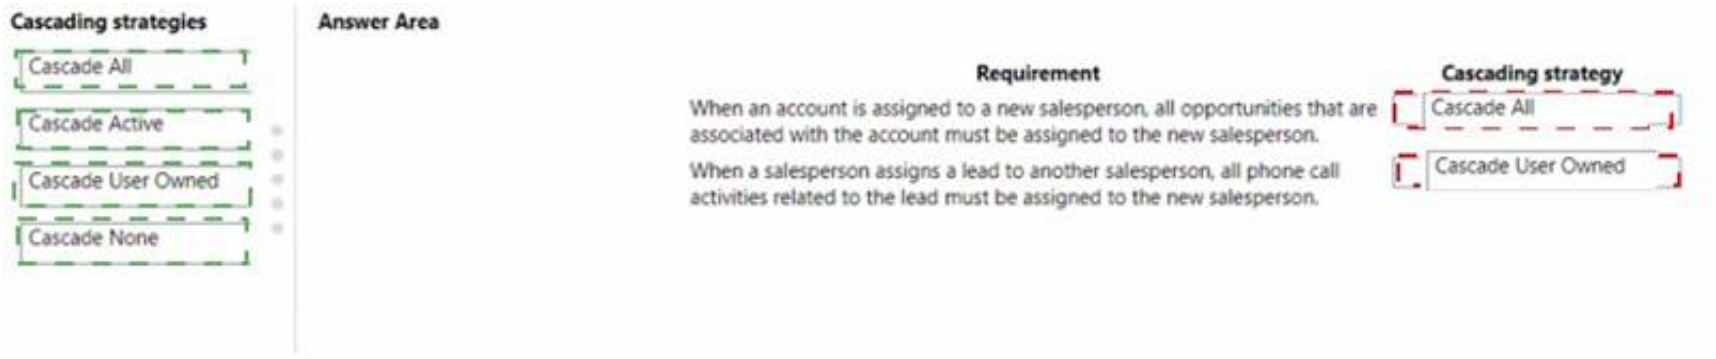
NEW QUESTION 27
DRAG DROP - (Topic 4)
You are designing a data model for a Microsoft Power Platform solution. The data model must meet the following requirements:
• When an account is assigned to a new salesperson, all opportunities that ate associated with the account must be assigned to the new salesperson.
• When a salesperson assigns a lead to another salesperson, all phone call activities related to the lead must be assigned to the new salesperson.
You need to recommend cascading strategies for the data model.
Which cascading strategy should you recommend? To answer, drag the appropriate cascading strategies to the correct requirements. Each cascading strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content
NOTE: Each correct selection is worthone point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



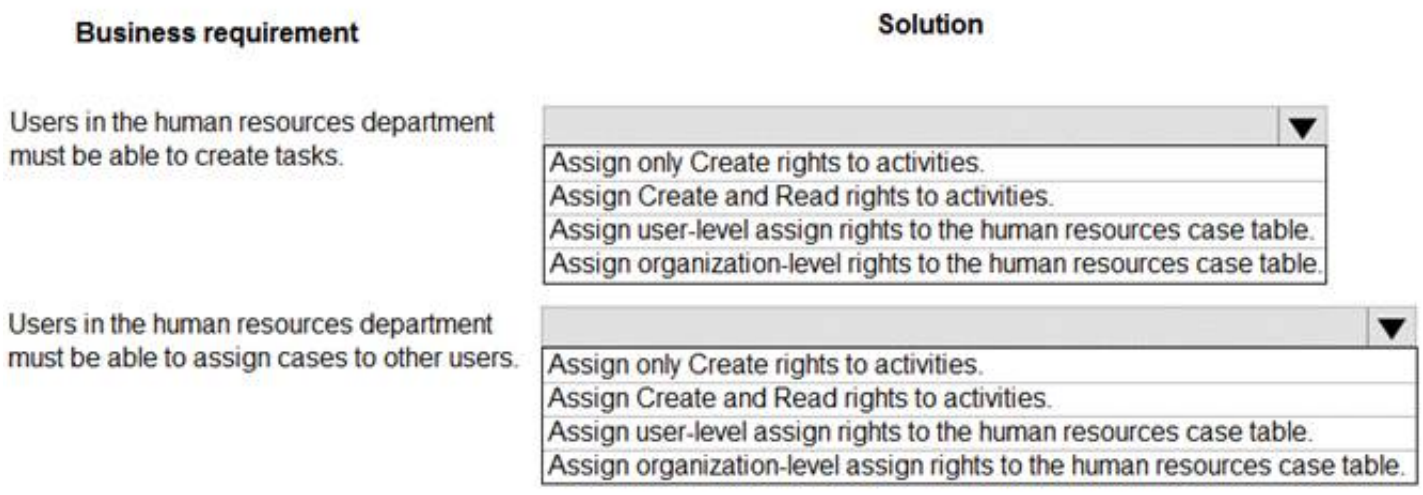
NEW QUESTION 31
- (Topic 4)
A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.
The company has the following requirements:
? Provide customers with an online portal where they can submit and review cases.
? Ensure that customers can chat online with a customer service representative at any time.
? Route chats to customer service representatives based on skill and availability.
You need to recommend a solution to the company.
Which three components should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Dynamics 365 Virtual Agents chatbots
B. Customer self-service portal
C. Dynamics 365 Field Service
D. Business process flows
E. Omnichannel for Customer Service

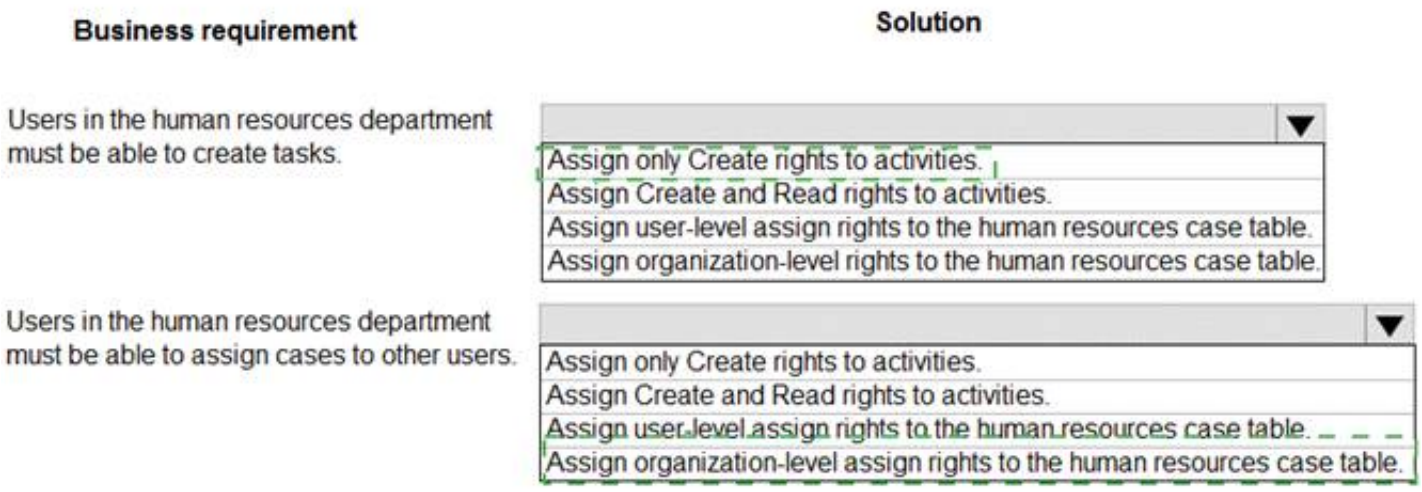
Answer: BDE

Explanation:
B: Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.
Note: Based on the selected environment in Power Apps, you can create a Dataverse starter portal or a portal in an environment containing customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, and Dynamics 365 Project Service Automation).
E: Omnichannel for Customer Service offers a suite of capabilities that extend the power of Dynamics 365 Customer Service Enterprise to enable organizations to instantly connect and engage with their customers across digital messaging channels.
Reference:
https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal

NEW QUESTION 34
HOTSPOT - (Topic 4)
You are designing a Power Platform solution for a company. You have the following requirements:
? Users in the human resources department must be able to create tasks.
? Users in the human resources department must be able to assign cases to other users.
You need to recommend security settings to the company.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Assign only Create rights to activities
You require the same set of Dataverse privileges and access rights to work with custom activities as those required to work with custom entities.
Task-based privileges, at the bottom of the form, give a user privileges to perform specific tasks, such as publish articles.
Box 2: Assign User-level assign rights to human resources case table.
Record-level privileges define which tasks a user with access to the record can do, such as Read, Create, Delete, Write, Assign, Share, Append, and Append To.
For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

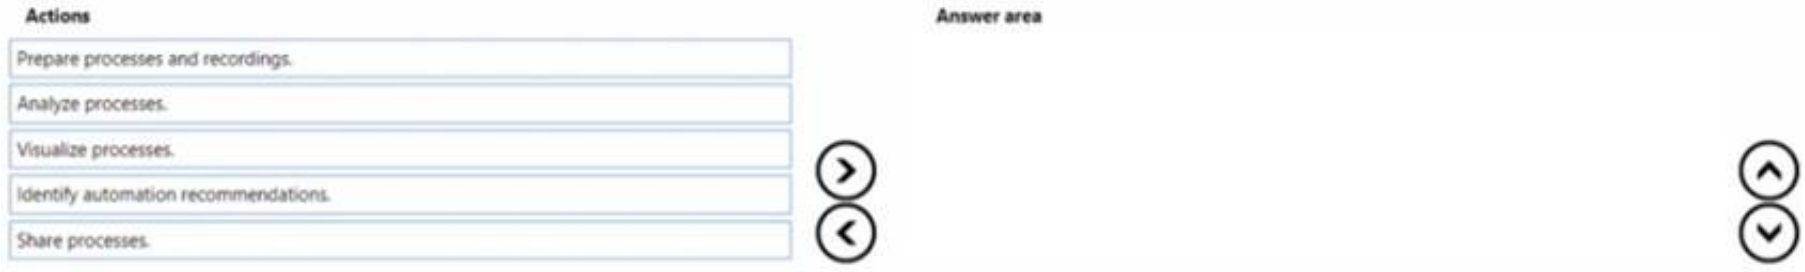
NEW QUESTION 39
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company plans to automate the expense approval process.
Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.
Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

Explanation:

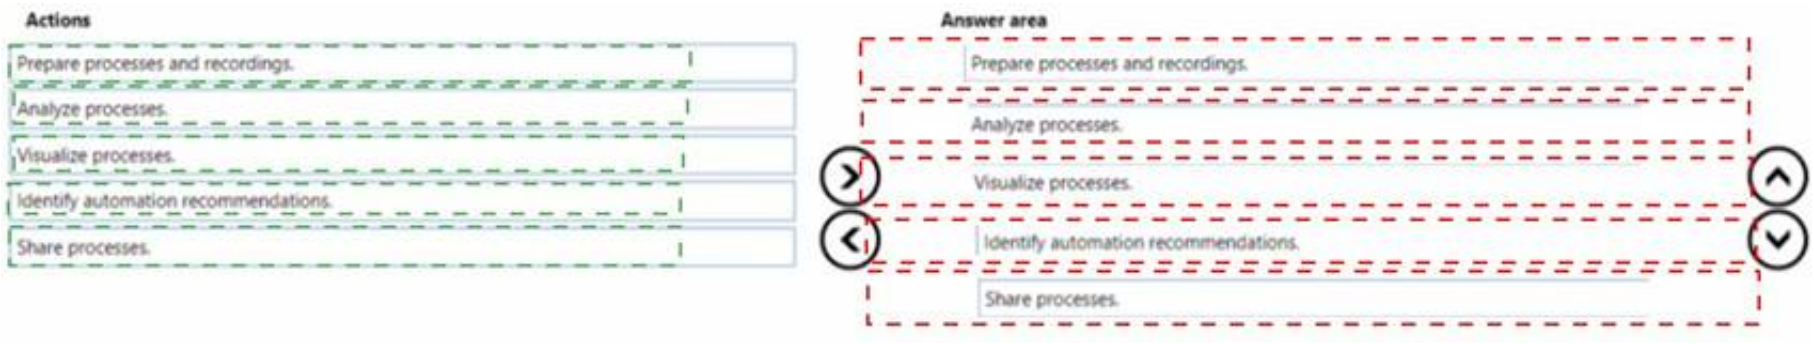
NEW QUESTION 41
DRAG DROP - (Topic 4)
You are a Microsoft Power Platform architect.
You must identify and document your organization's business processes to identify opportunities for automaton.
You need to run task mining in process advisor.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 44
- (Topic 4)
A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts.
You need to recommend a solution to automate the process.
What should you recommend?

A. Excel Online Connector
B. Dynamics 365 Customer Insights
C. Dynamics 365 Customer Service
D. Dynamics 365 Marketing

Answer: D

Explanation:
Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customerbased data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.
Reference:
https://msdynamicsworld.com/story/microsoft-dynamics-365-customer-insights-overview

NEW QUESTION 46
- (Topic 4)
You are designing a Power Platform solution.
The company wants its development team to adopt the construction of repeatable components for its implementation team to reuse on different entities and forms.
You need to recommend a technology that meets these requirements. Which technology would you recommend the developers adopt to assist the implementation team?

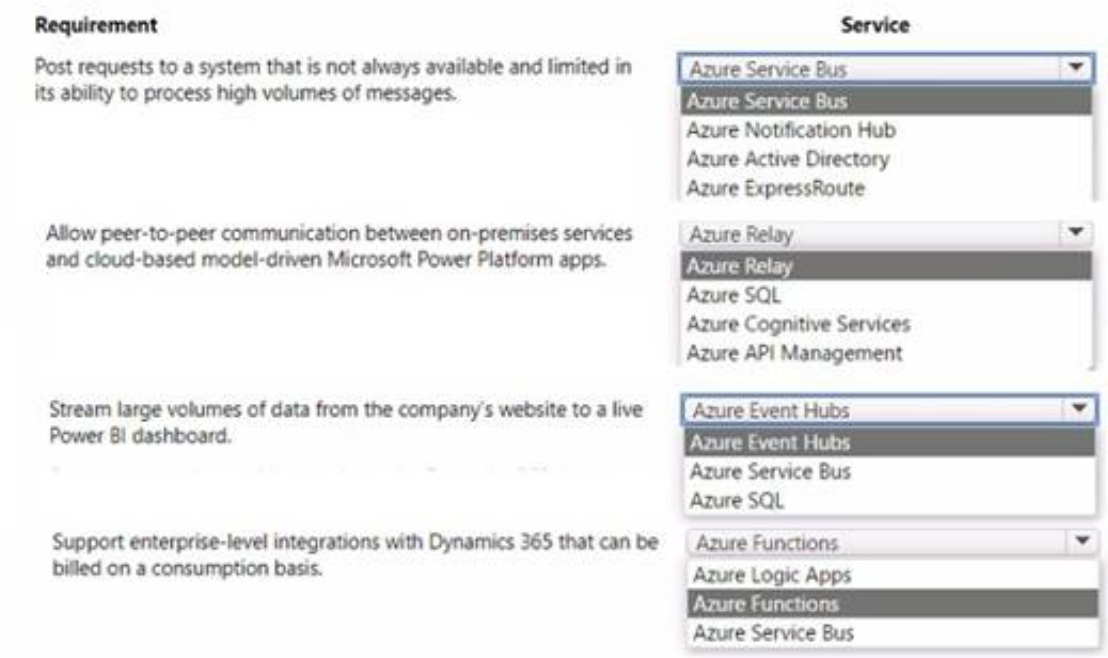
A. JavaScript
B. Power Apps Component Framework control
C. Web resource
D. Canvas app

Answer: B

Explanation:
Power Apps component framework empowers professional developers and app makers to create code components for model-driven and canvas apps (public preview) to provide enhanced user experience for the users to work with data on forms, views, and dashboards.
Reference:
https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview

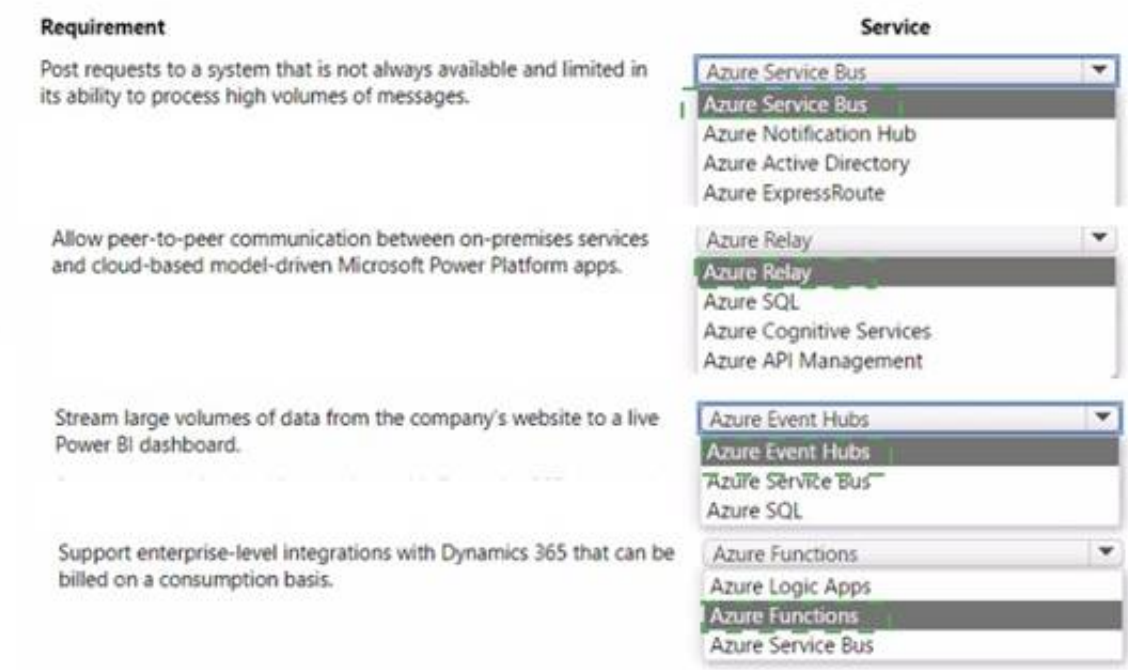
NEW QUESTION 48
HOTSPOT - (Topic 4)
You are a Microsoft Power Platform architect designing integrations for a project. You have the following integration requirements:
• Post requests to a system that is not always available and limited in its ability to process high volumes of messages.
• Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.
• Stream large volumes of data from the company's website to a live Power Bl dashboard.
• Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.
You need to use an Azure service for the integration requirements.
Which Azure services should you use? To answer, select the appropriate options in the answer area?
NOTE: Each correct selection is worth one point.

Answer Area



Answer:

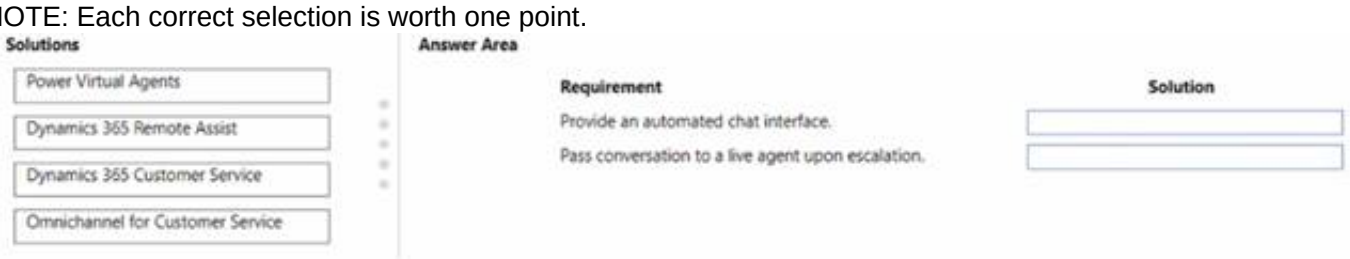
Answer Area



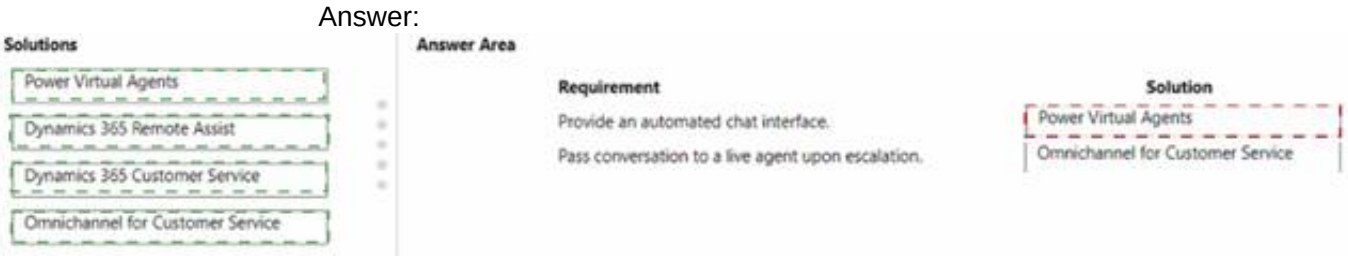
A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 50
DRAG DROP - (Topic 4)
A company has a call center that manages customer-related issues.
The company has the following customer experience improvement requirements:
• Simulate a human conversation with a customer by providing a chat interface.
• Ensure the initial conversation is passed to a live agent upon escalation. You need to recommend a solution for each requirement.
Which solutions should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:



A. Mastered
B. Not Mastered

Answer: A

NEW QUESTION 51
- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company plans to automate the expense approval process.
Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.
Solution: Create a canvas app for expense data entry. Install the Power Automate app in Microsoft Teams. Create a cloud flow for approval to add data to the SQL Server database.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

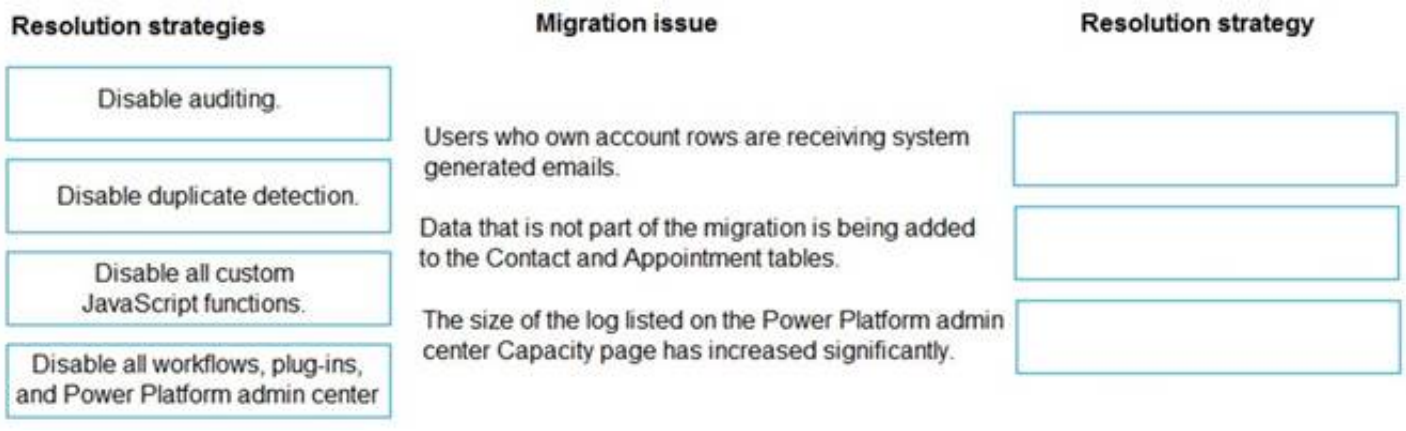
NEW QUESTION 54
- (Topic 4)
A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.
The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.
You need to design the security to avoid sensitive data from being seen.
Which two actions should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Use Microsoft Dataverse restrictions before setting up the Power BI reports.
B. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.
C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.
D. Share Power BI dashboards only with users who are supported to see this data.

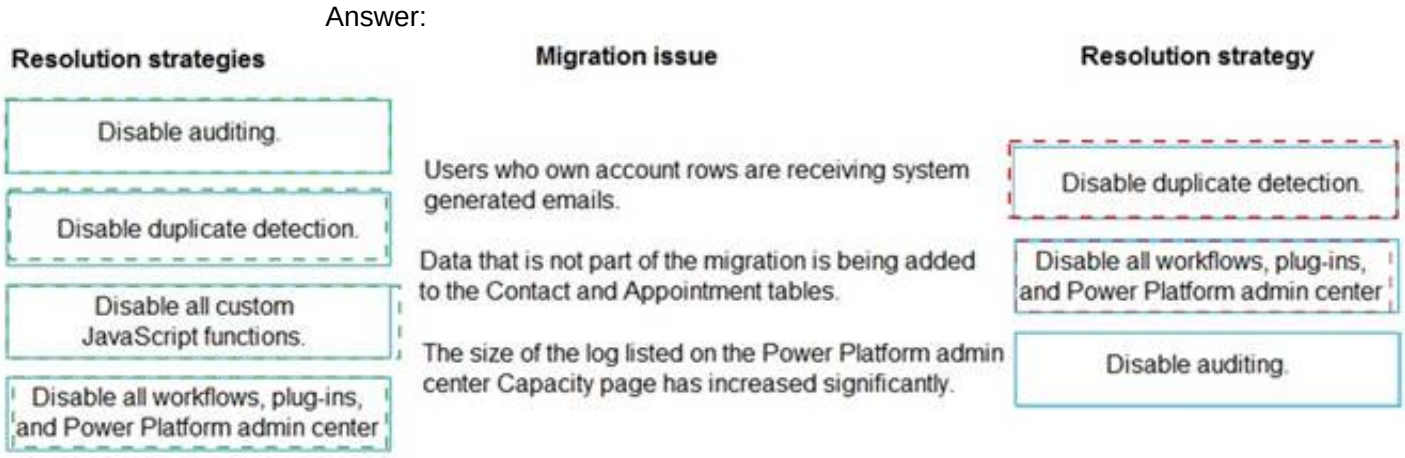
Answer: AB

Explanation:
A: When you share a dashboard or report, the people you share it with can view it and interact with it, but can't edit it. They see the same data that you see in the dashboard and reports and get access to the entire underlying dataset unless row-level security (RLS) is applied to the underlying dataset.
B: Depending on the sensitivity of an organization's data, it is often necessary to disable the ability to export or print reports.
Reference:
https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards

NEW QUESTION 56
DRAG DROP - (Topic 4)
You are overseeing the data migration for a Microsoft Power Platform solution.
The migration team is performing a test migration with a subset of data. The migration team reports the following findings:
? Users who own account rows are receiving system generated emails.
? Data that is not part of the migration is being added to the Contact and Appointment tables.
? The size of the log listed on the Power Platform admin center Capacity page has increased significantly.
You need to recommend strategies to resolve the reported issues.
What should you recommend? To answer, drag the appropriate resolution to the correct migration problem. Each resolution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



Answer:



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Disable duplicate detection
Duplicate detection has rules for sending emails.
Box 2: Disable all workflows, plug-ins, and Power Platform admin center Box 3: Disable auditing
Auditing affects the size of the log file.

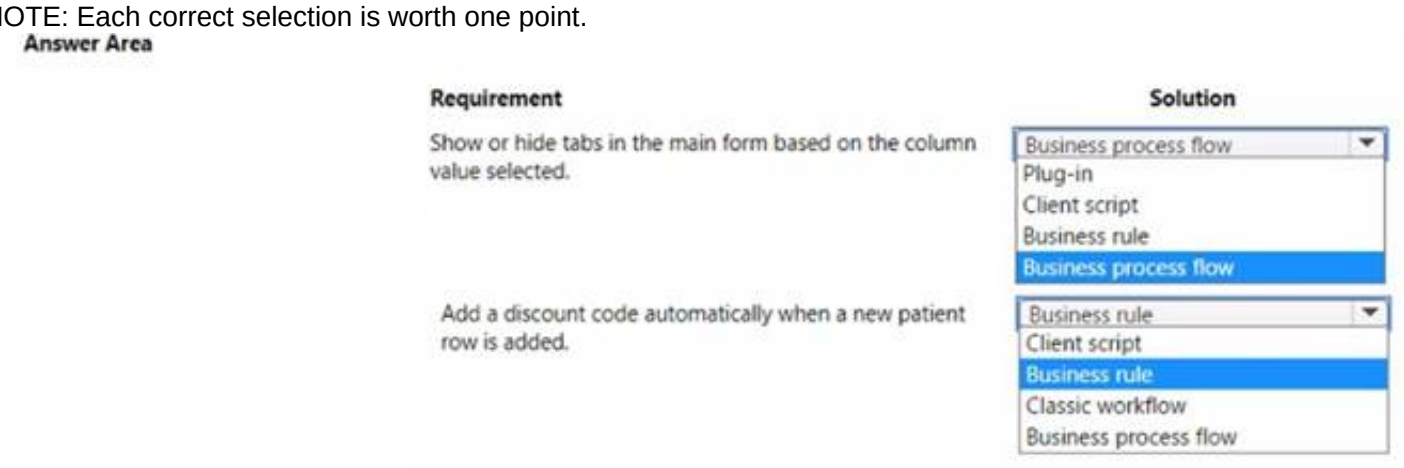
NEW QUESTION 58
DRAG DROP - (Topic 4)
You are designing data loss policies for a Microsoft Power Platform implementation. You have the following requirements:
• Solutions that use the HTTP connector must not include any other connectors.
• Prevent the use of the Microsoft Forms connector.
• Allow the use of the Azure DevOps connector.
You need to determine in which data policy group to add each connector.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Business
If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow.
Box 2: Non-business
DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business.
Box 3: Blocked
Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.
Data policy group Business blocked

NEW QUESTION 61
HOTSPOT - (Topic 4)
A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:
• Show or hide tabs in the main form based on the column value selected.
• Add a discount code automatically when a new patient row is added. You need to recommend a solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

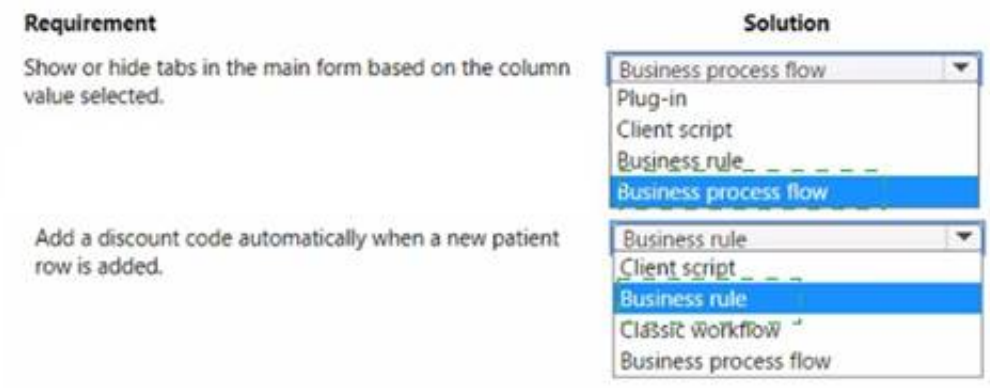


A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

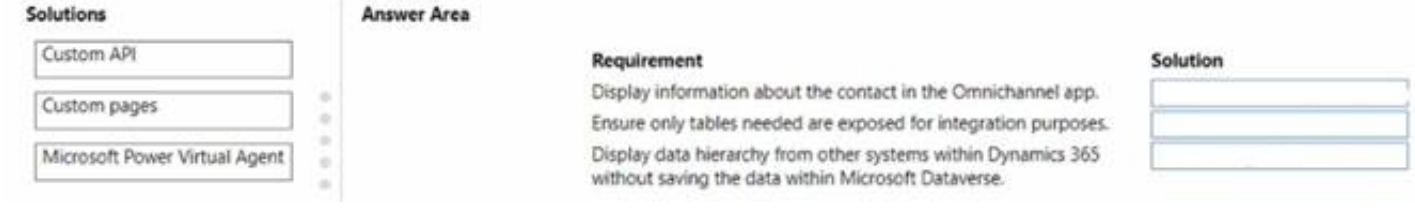


NEW QUESTION 66
- (Topic 4)
You are designing a Microsoft Power Platform solution that will include multiple applications.
You have the following requirements:
• Support agents managing cases.
• Project managers reviewing and updating their projects.
• Stock managers managing warehouses.
• New site visitors self-registering.
• Employees tracking time entries.
Which three requirements can you meet by implementing role-based applications? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. New site visitors self-resisting.
B. Project managers reviewing and updating their projects.
C. Stock managers managing warehouses.
D. Support agents managing cases.
E. Staff tracking time entries.

Answer: BCD

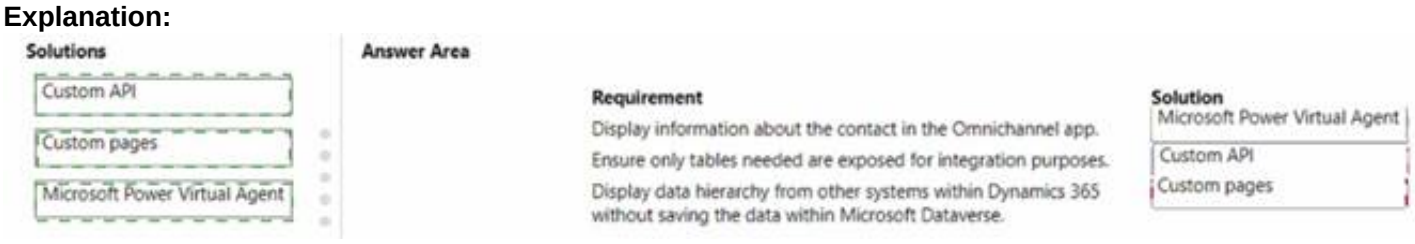
NEW QUESTION 70
DRAG DROP - (Topic 4)
A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.
You need to recommend a solution for each requirement.
Which components should you recommend for the requirements?
To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 74
- (Topic 4)
A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Power Platform solution.
You need to recommend a data-loading solution. What should you recommend?

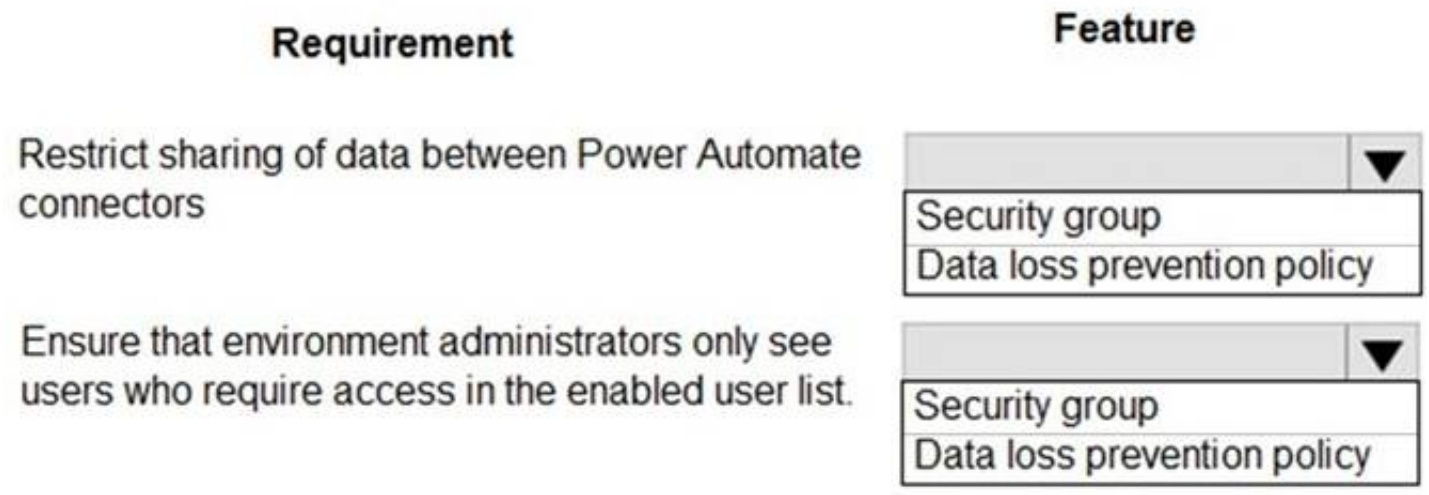
A. Use the Excel Template feature.
B. Add to an existing list of contacts in a static worksheet.
C. Use the import from Excel feature.

Answer: A

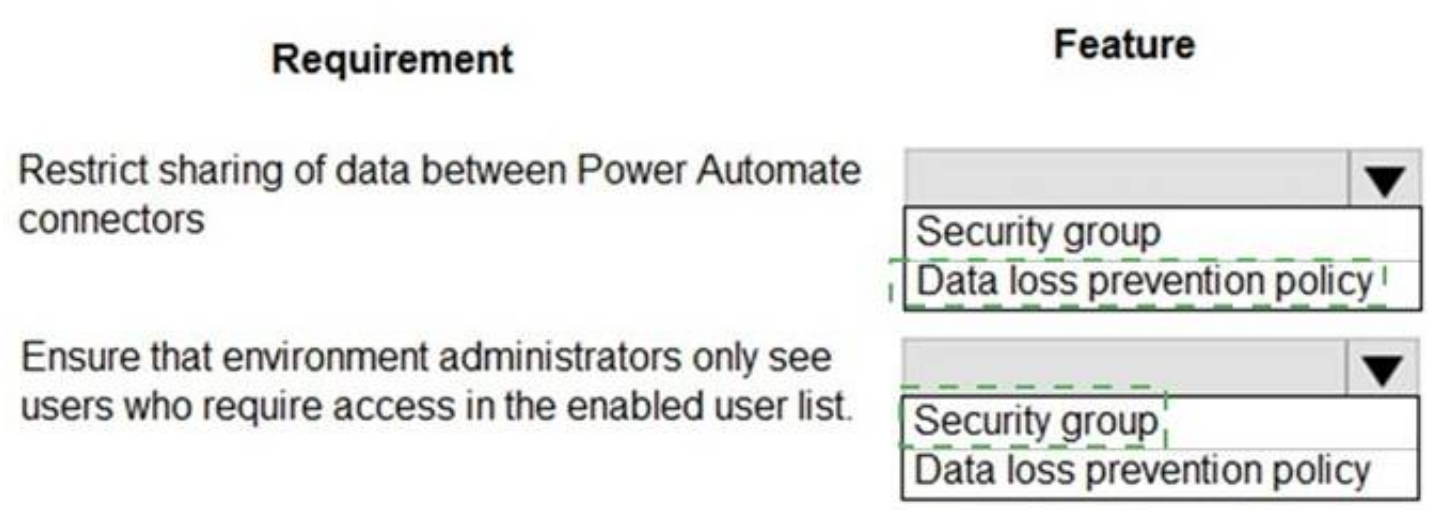
Explanation:
Import data that's stored somewhere else into your model-drvien app using the import feature in Power Apps.
Every table has required columns that must exist in your input file. It's recommended that you download an

Excel template, add your data, and then import the file to your app. The template saves time and effort. Don't add or modify columns in the template to avoid issues during the import. Note:
Step 1: Download an Excel template
To avoid mapping issue, it's recommended that you use an Excel template that you can download from your app. Once the template is downloaded add your data and then import the file back to your app. Remember don't add or modify columns in the template to avoid issues during the import process. Step 2: Import your data
Use the template that you downloaded in the previous step (modified with your data) and import the file to your app.
Reference:
https://docs.microsoft.com/en-us/powerapps/user/import-data

NEW QUESTION 77
HOTSPOT - (Topic 4)
You are designing the security model for a Power Platform solution. The security model must meet the following requirements:
? Restrict sharing of data between Power Automate connectors.
? Ensure that environment administrators only see users who require access in the enabled user list.
You need to recommend security features for the solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



Answer:

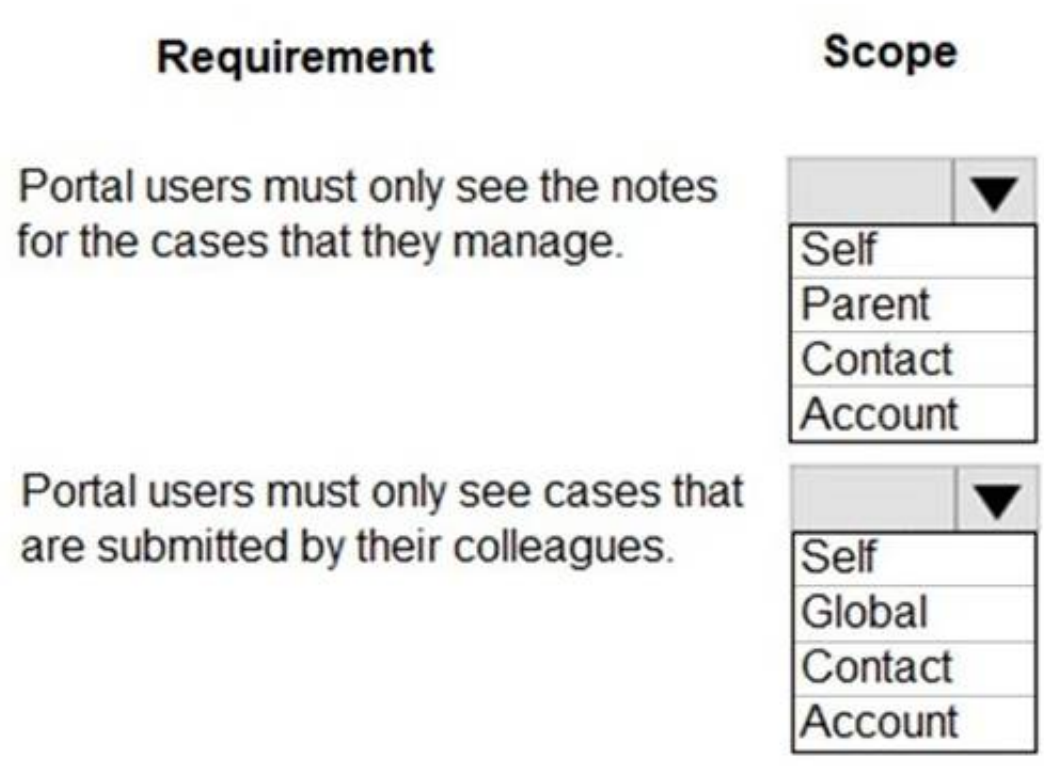


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Data loss prevention policy
Data loss prevention (DLP) policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.
Box 2: Security group
If your company has multiple Microsoft Dataverse environments, you can use security groups to control which licensed users can be a member of a particular environment.

NEW QUESTION 81
HOTSPOT - (Topic 4)
A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.
The company has the following requirements:
? Portal users must only seCe the notes for the cases that they manage.
? Portal users must only see cases that are submitted by their colleagues.
You need to design the security model for the portal.
Which entity permission scope should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



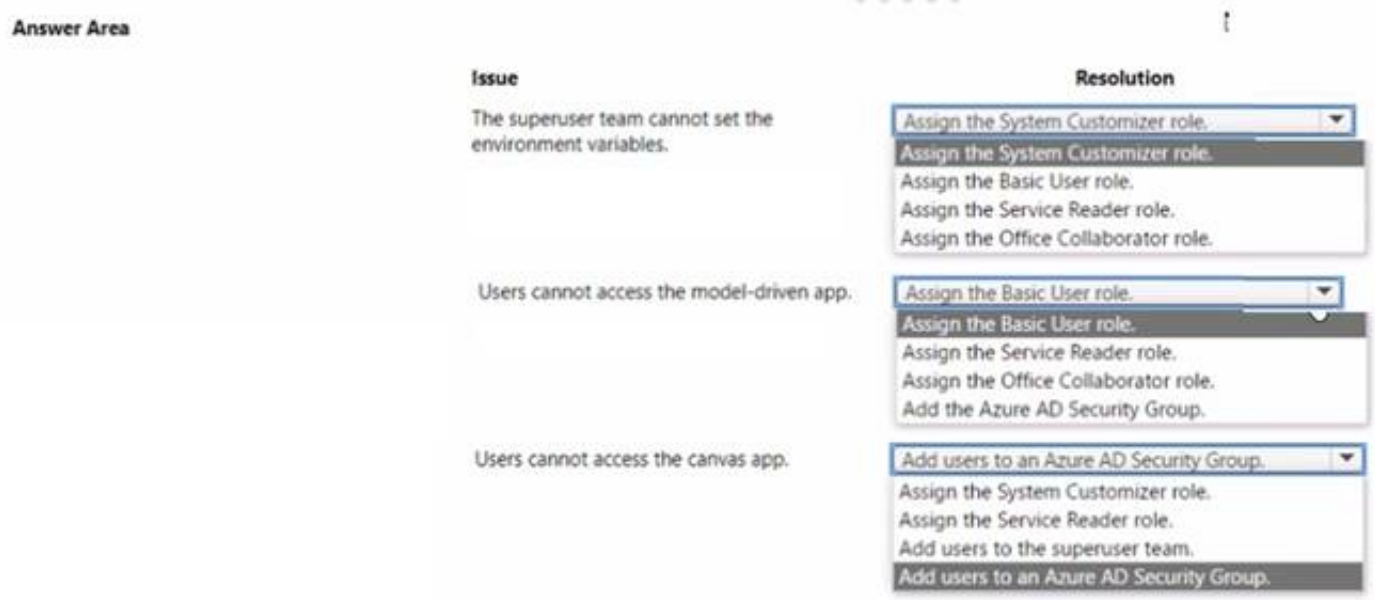
A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Contact
With Contact scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's contact record via a defined relationship.
Box 2: Account
With Account Scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's parent account record via a defined relationship.
This scope means that the entity list will only show the records of the selected entity that are associated to the user's parent account. For example, if an entity permission allows Read access to Lead entity with the Account scope, the user having this permission can view all the leads of only the parent account of the user.

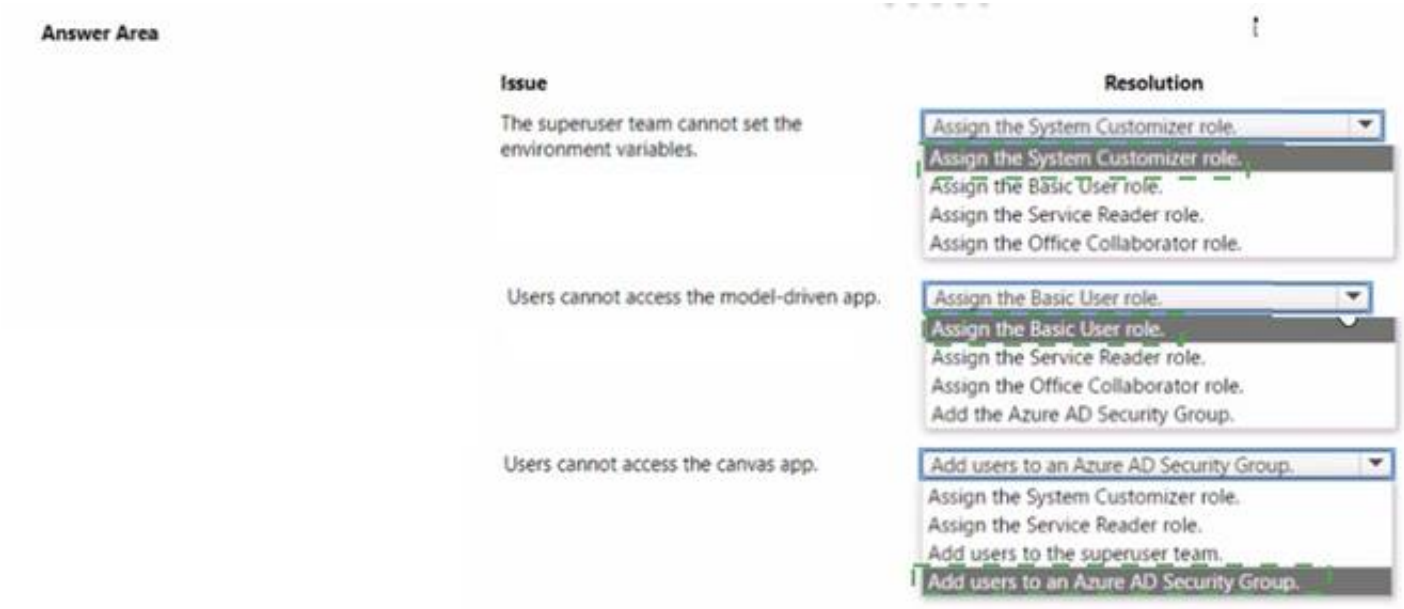
NEW QUESTION 85
HOTSPOT - (Topic 4)
You are working with a customer to plan a go-live deployment to their production environment. The solution includes several apps and environment variables. The superuser team manages the production environment that is secured by using a specific environment Azure AD security group.
The following issues have been identified:
• The super user team cannot access make.powerapps.com to open and set the environment variables.
• Users are added to the environment Azure AD security group and are not able to access the model-driven app.
• Users are added to the environment Azure AD security group and are not able to access the canvas app.
You need to resolve the issues.
What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.



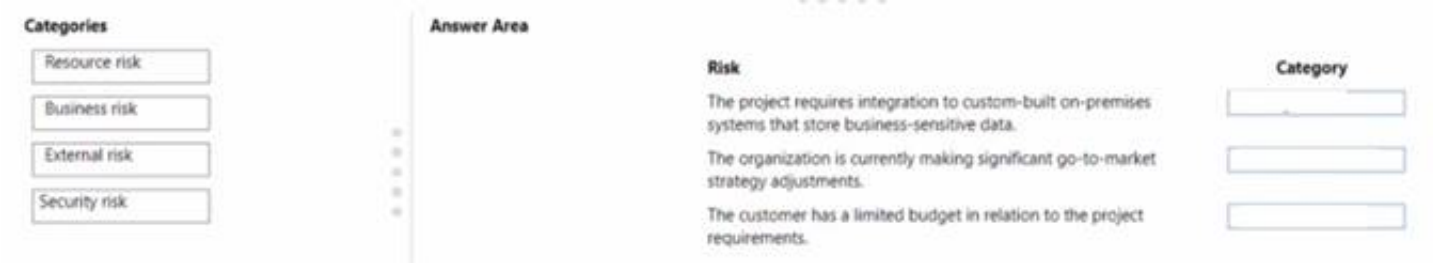
A. Mastered
B. Not Mastered

Answer: A

Explanation:



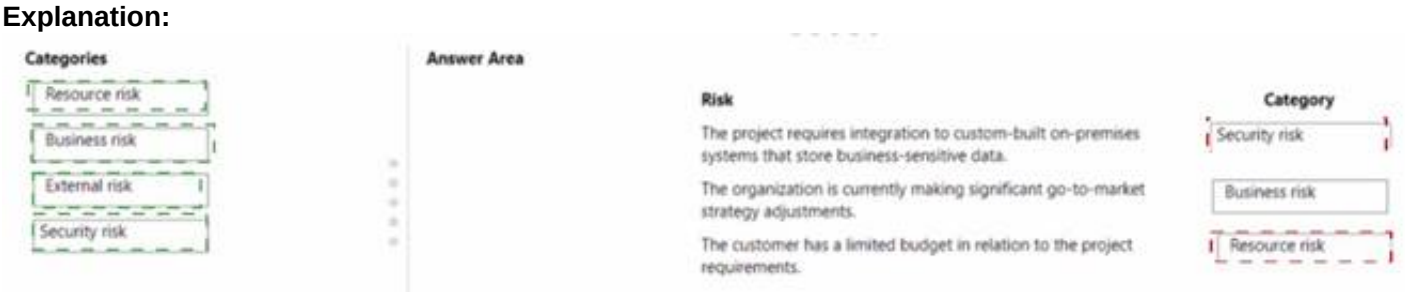
NEW QUESTION 86
DRAG DROP - (Topic 4)
You are a Microsoft Power Platform architect. You have identified several project risks.
You need to categorize potential risks that are specific to your customer.
How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.



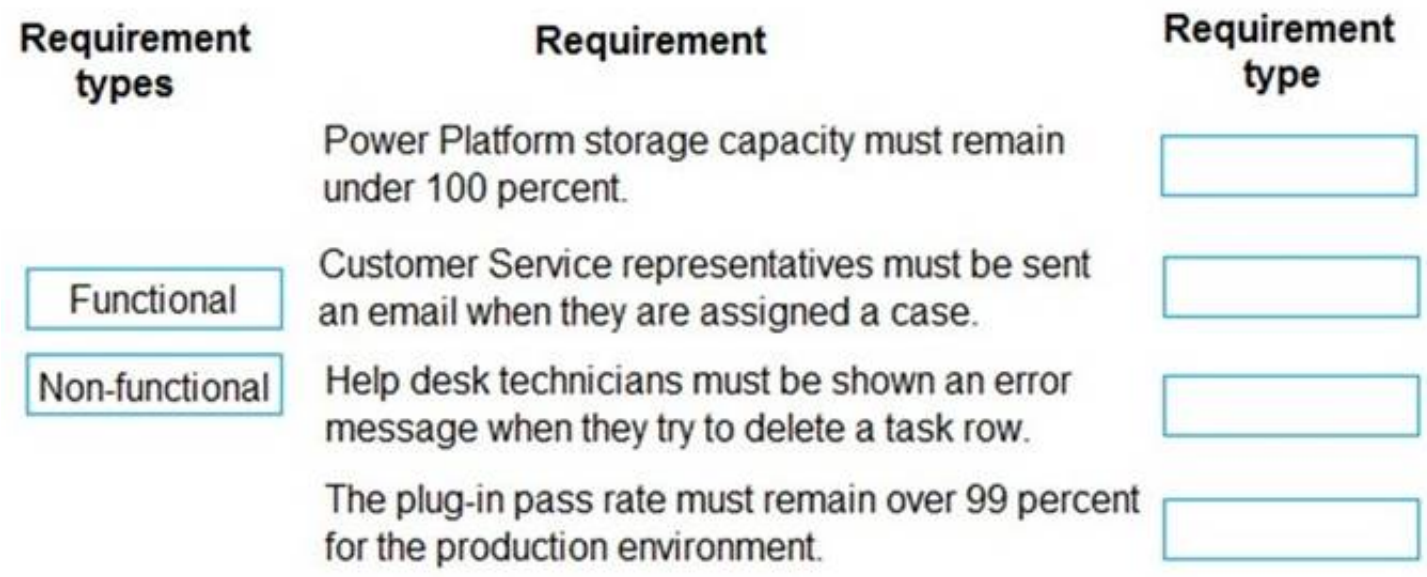
A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 88
DRAG DROP - (Topic 4)
You are performing a requirements analysis for a customer. The customer provides the following requirements:
? Power Platform storage capacity must remain under 100 percent.
? Customer service representatives must be sent an email when they are assigned a case.
? Help desk technicians must be shown an error message when they try to delete a task row.
? The plug-in pass rate must remain over 99 percent for the production environment.
You need determine if the requirements are functional or non-functional.
Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

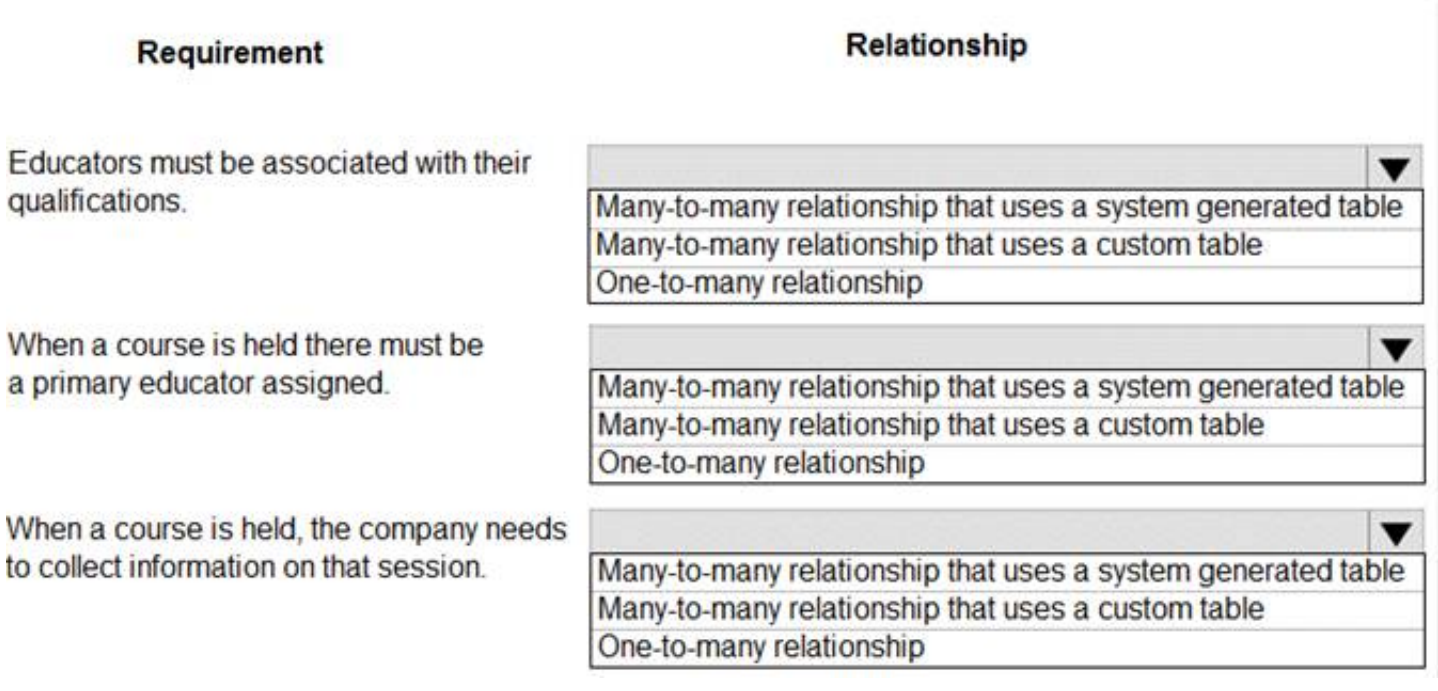


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Non-functional
Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.
Box 2: Functional
Functional requirements describe what the solution needs to do or its behaviors. Box 3: Functional
Box 4: Non-functional
Examples of common non-functional requirement types include:
? Availability
? Compliance/regulatory
? Data retention/residency
? Performance (response time, and so on)
? Privacy
? Recovery time
? Security
? Scalability

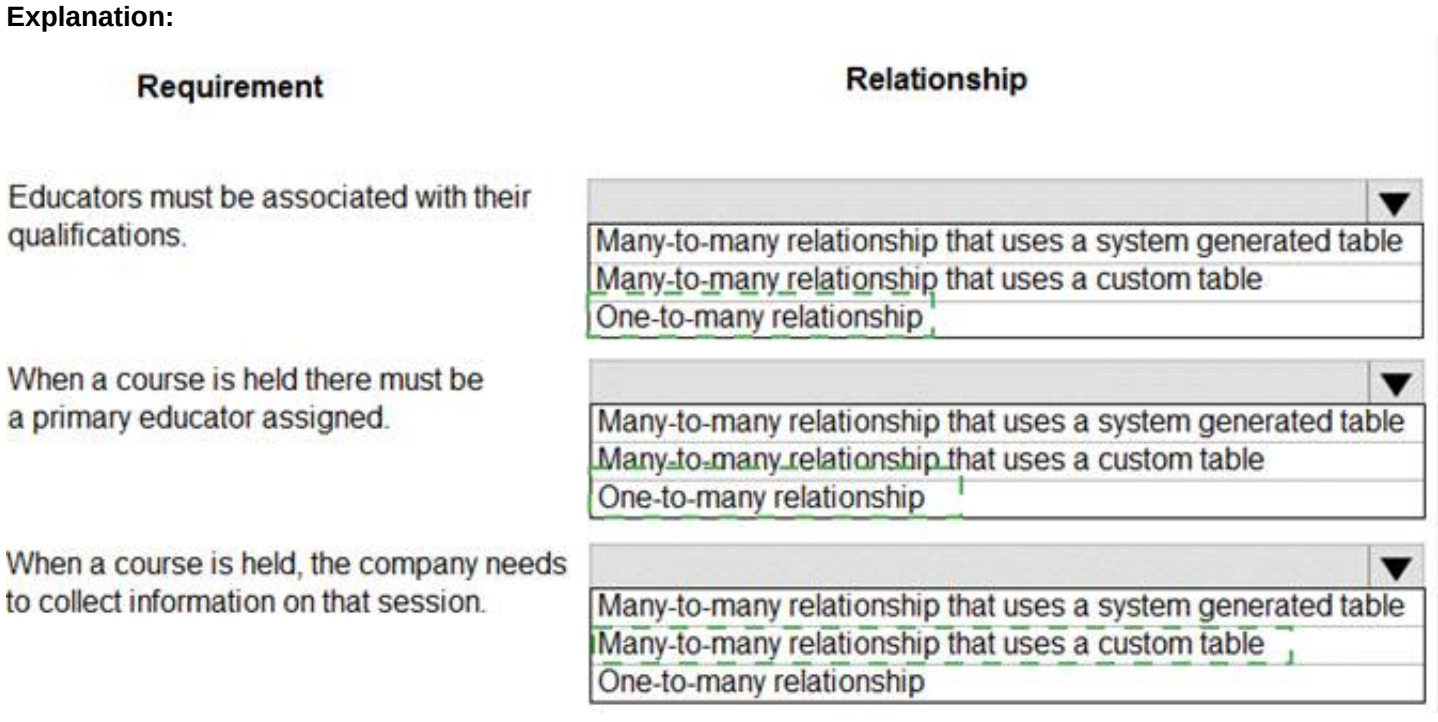
NEW QUESTION 92
HOTSPOT - (Topic 4)
A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.
The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.
The company needs the following custom table relationships defined:
? Associate educators with a list of their professional qualifications.
? Assign a primary educator to each course that is held.
? Collect information about every course that is held.
You need to determine the type of relationship that best fits the requirement.
Which type of table relationship should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

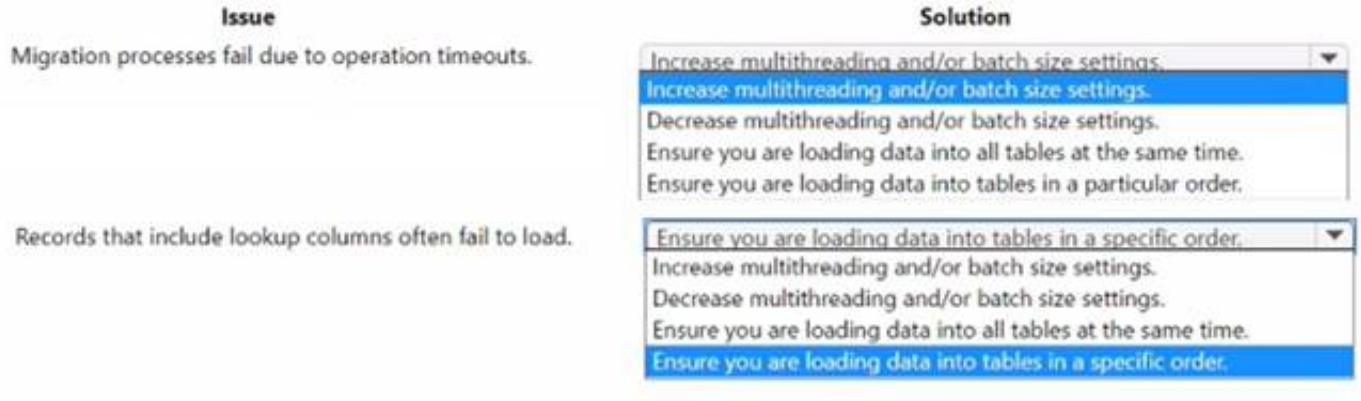
Answer: A

Explanation:



NEW QUESTION 95
HOTSPOT - (Topic 4)
You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution.
The company reports the following issues:
• Migration processes fail due to operation timeouts.
• Records that include lookup columns often fail to load. You need to recommend a solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

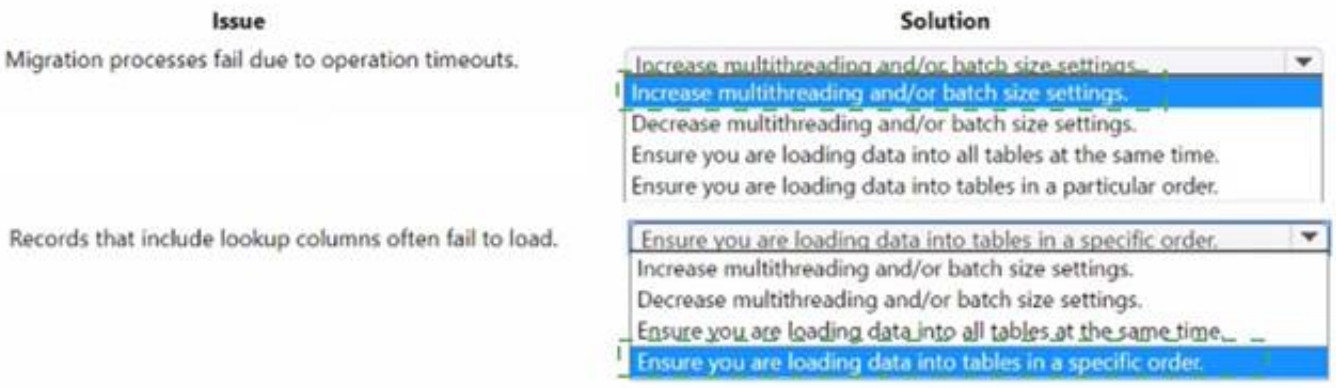


A. Mastered
B. Not Mastered

Answer: A

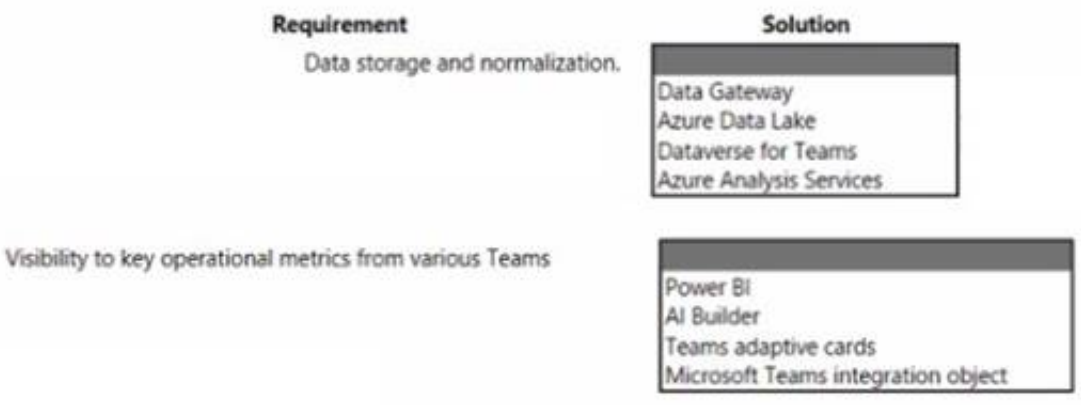
Explanation:

Answer Area



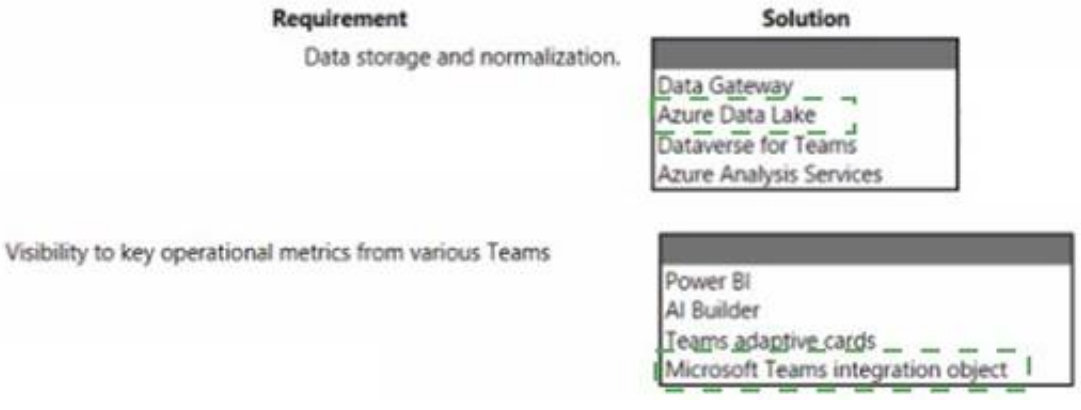
NEW QUESTION 100
HOTSPOT - (Topic 4)
A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.
The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.
The new solution must meet these requirements: Support the current data warehouse.
The solution must support drill-through capabilities into the data. You need to recommend a solution.
What should you recommend? To answer, select the appropriate options m the answer area. NOTE: Each correct selection is worth one point.

Answer Area



Answer:

Answer Area

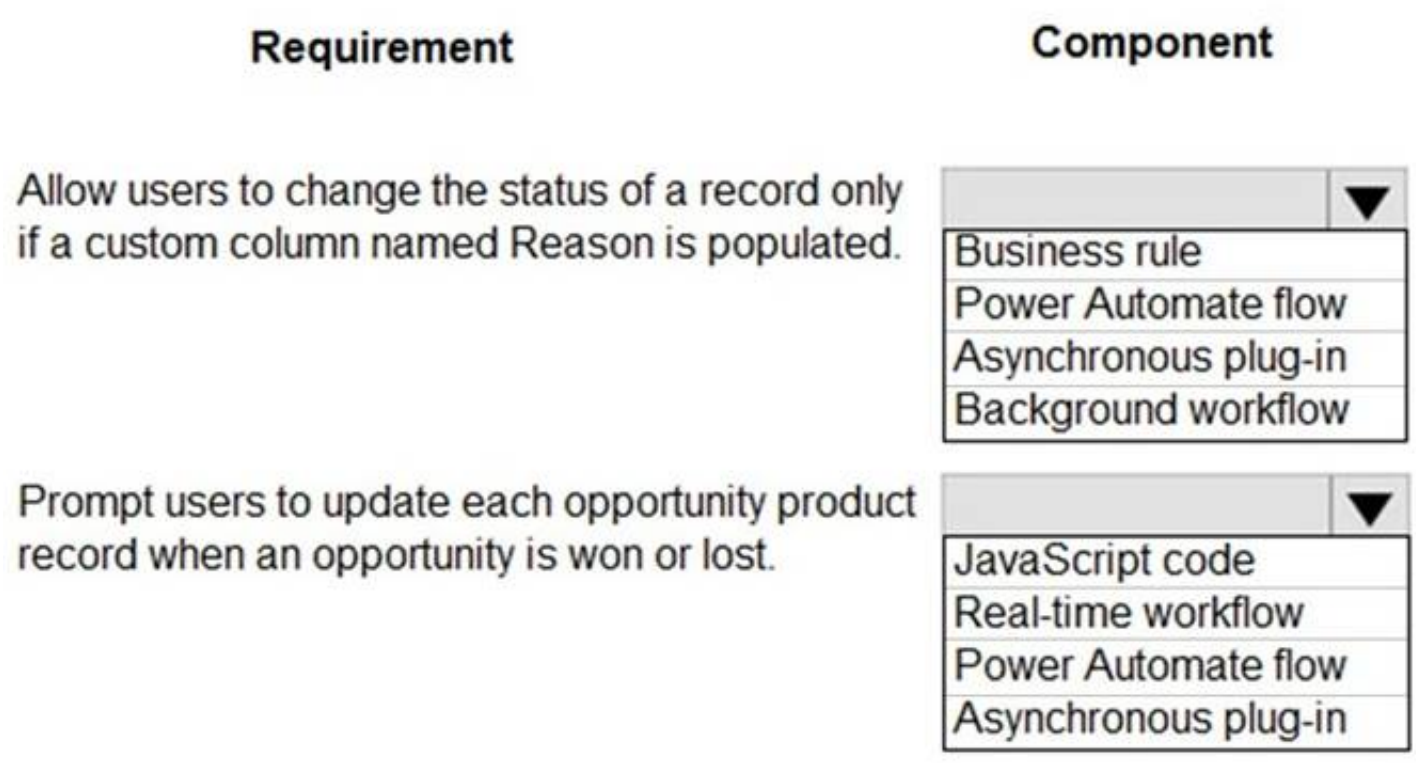


A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Azure Data Lake
A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

NEW QUESTION 105
HOTSPOT - (Topic 4)
You are designing a Microsoft Power Platform solution for a company.
Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.



A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Business rule
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Box 2: Power Automate flow
Trigger the Power Automate flow with “When a record is updated”, then add a Condition in the flow and configure it with Status Label equals to Won.

NEW QUESTION 110
- (Topic 4)
A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms In the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

A. Manage the business logic with a Power Apps Component Framework (PCF) control.
B. Evaluate whether complex pans of the logic can be solved by using Power Apps Component Framework (PCF) contro
C. Use Business Rules for the remaining functionality.
D. Remove the Business Rules and use only JavaScript.
E. Update logic to ensure Business Rules are optimize
F. Use JavaScript for the remaining functionality.

Answer: B

Explanation:
PCF controls are reusable. Reference:
https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview

NEW QUESTION 115
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.
A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.
You need to discover inefficiencies in the process.
Solution: Record the actions required to complete the loan application process in the process advisor feature. Use task mining to discover inefficiencies in the

process.
Does the solution meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 119
HOTSPOT - (Topic 4)
You need to design a Power Platform solution that meets the following requirements:
? Capture data from a row during deletion to be used in an automated process.
? Use AI to process forms and automate data entry from paper-based forms.
Which requirements can be met by using out-of-the box Power Platform components?
Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

	Yes	No
Capture data from a row during deletion to be used in an automated process.	○	○
Use AI to process forms and automate data entry from paper-based forms.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.
Box 2: Yes
AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

NEW QUESTION 123
- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company plans to automate the expense approval process.
Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.
Solution: Create a canvas app for expense data entry. Install an on-premises gateway. Create a cloud flow for approval and to add data to the SQL Server database.
Does the solution meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 128
HOTSPOT - (Topic 4)
You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.
The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.
You need to recommend the data type for the captured information.
Which data type should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Data type
Capture information about the technician assigned to each service appointment.	Choice / Choices / Customer / Lookup
Select the tools that the technician must bring to an appointment.	Choices / Customer / Lookup / Text

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Choice
Like Choices below, but can only select one of the option.
Box 2: Choices
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 133
- (Topic 4)
You are designing a solution for a national vehicle repair company. You have the following requirements:
• Customers must search for vehicle issues by using natural language expressions.
• Customers must contact a customer service agent as required. You need to recommend a solution.
Which two features should you include? Each correct answer presents part of the solution.

A. Power Virtual Agents
B. Business process flow
C. Power Apps portal
D. Customer Insights

Answer: BC

NEW QUESTION 135
HOTSPOT - (Topic 4)
A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.
The company reports the following data quality issues with the existing solution:
? Users often encounter a character limit when entering data.
? The database includes multiple instances of duplicate records.
You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	Define a data mask. / Define and implement duplicate detection rules. / Define the data type and format for each column.
The database includes multiple instances of some records.	Define requirements for data entry. / Define and implement duplicate detection rules. / Define the data type and format for each column.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Define the data type and format for each column Increase the data type size of the column.
Box 2: Define and implement duplicate detection rules

NEW QUESTION 140
- (Topic 4)
You are a Microsoft Power Platform architect supporting the go-live phase of a canvas app. The canvas app accesses data on-premises and in the cloud.
Users are reporting the app is very slow to respond, especially upon initial launch. You need to optimize the performance of the app.
Which three actions should you complete? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Move data calls from the OnStart event to the Onload event.
B. Reduce data row limits.
C. Increase data row limits.
D. Move data calls from the Onload event to the OnStart event.
E. Review the settings of the data gateway for on-premises data sources.

Answer: ABE

NEW QUESTION 141
- (Topic 4)
You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	• Use only a browser-based app. • Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	• Use either a mobile or browser-based app. • Include fields for contact name, product, and order date.
Field sales	• Use only a mobile app. • Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

A. Create one form for each department Add only columns needed on the form for each departmen
B. Assign the appropriate security role to each form.
C. Create a shared form for all department
D. Add all the column
E. Add column-level security to columns not needed for each department
F. Create one form for each departmen
G. Add all columns needed for all department
H. Use business rules to hide columns.
I. Add new columns to an existing for
J. Grant all departments security roles for that form.

Answer: A

NEW QUESTION 146
- (Topic 4)
A company uses a third-party cloud-based app to make real-time business decisions. The app has a RESTful API.
You must design a Microsoft Power Platform solution that interacts with the third-party app. Changes made in the Microsoft Power Platform solution must be reflected in the cloud app.
You need to recommend technologies to integrate the Microsoft Power Platform solution with the cloud app.
Which two technologies should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Scheduled Power Automate cloud flow with a custom connector to the cloud app
B. Power Virtual Agents
C. Custom plug-on registered with Microsoft Dataverse
D. Model-driven app

Answer: AC

Explanation:
A: To enable Logic Apps, Power Automate, or Power Apps to communicate with the REST or SOAP API, use a custom connector, which is a wrapper around a REST API (Logic Apps also supports SOAP APIs).
C: Custom APIs are a powerful way to connect to any existing API, hosted anywhere, from PowerApps. You do not need a PowerApps Enterprise subscription to register or use a Custom API.
Custom APIs are RESTful endpoints that you can connect to and use from PowerApps. All you'll need is a Swagger definition file for your endpoint.
