

Microsoft

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

NEW QUESTION 1

- (Exam Topic 1)

You need to design the resort portal to meet the business requirements. Which data source should you use?

- A. Microsoft Excel
- B. Azure SQL Database
- C. SQL Server
- D. Common Data Service

Answer: A

NEW QUESTION 2

- (Exam Topic 1)

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	<ul style="list-style-type: none"> <input type="checkbox"/> Auto-populate the invitation code field on the sign-in screen from the email link. <input type="checkbox"/> Embed the invitation code in the email link URL. <input type="checkbox"/> Send the customer their username and temporary password in the email link.
Validate the user's email.	<ul style="list-style-type: none"> <input type="checkbox"/> Two-factor authentication <input type="checkbox"/> Azure Active Directory authentication <input type="checkbox"/> Social provider sign-in <input type="checkbox"/> Invitation code sign-up

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 3

- (Exam Topic 1)

You need to design the resort portal's email registration process. Which solution should you use?

- A. Default the invitation code from the email upon logging into the portal
- B. Auto-populate the invitation code field on the sign in screen from the email link
- C. Embed the invitation code in the email link URL
- D. Send the customer their username and temporary password in the email link

Answer: C

Explanation:

Scenario: Guests must receive a separate email to verify proof of ownership for their registration. Note: You can setup redeem an invitation code for power apps portal.

Reference:

<https://carldesouza.com/how-to-setup-redeem-an-invitation-code-for-power-apps-portal/>

NEW QUESTION 4

- (Exam Topic 1)

You need to design the guest check-in solution.

Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

You need to design the guest check-in solution.

Answer Area

Requirement	Technology
Develop the base check-in solution.	Xamarin app Power Apps portal Model-driven app Canvas app
Access the check-in solution on the check-in devices.	
Access the check-in solution on the check-in devices.	Traditional desktop application Web browser Power Apps mobile app Dynamics 365 for phones and tablets

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Canvas app,
 Power Apps mobile app
<https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps>

NEW QUESTION 5

- (Exam Topic 2)
 You need to set up the new service request completion process.
 Which two components should you include in the solution? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. connection reference
- B. business process flow
- C. Power Automate flow
- D. connection

Answer: AC

Explanation:

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/create-connection-reference>

NEW QUESTION 6

- (Exam Topic 2)
 You need to coordinate updates and deployment for managed solutions containing completed work without disrupting the system.
 What should you do? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Deployment option for changes to an unrelated table

Deploy a patch with the changes made from the current solution.

Deploy a full copy of the new solution with the changes using the upgrade option.

Deploy a full copy of the current solution with the changes using the upgrade option.

Deployment option for automation enhancements

Deploy the new solution and then deploy a full copy of the original solution. Use the upgrade option for both deployments.

Deploy a full copy of the original solution and then deploy the new solution. Use the upgrade option for both deployments.

Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Deploy a patch with the changes made from the current solution. Scenario:
 The Onsite Visit managed solution has a table that is not in the Verification Process Automation managed solution. This table must be upgraded prior to the go-live date without the other shared components.

Box 2: Deploy a full copy of the original solution using the upgrade option. Then, deploy the new solution by using the update option.
 Scenario: All components required for the verification process must be included in a new solution. Corporate security requires that deployments to non-development environments must be automated using service accounts.

Managed solutions are used to move customizations from the development environment to other higher-level environments. These solutions are created and maintained by the power users and provided to internal IT for deployment when they are ready.

Note:

Upgrade This is the default option and upgrades your solution to the latest version and rolls up all previous patches in one step. Any components associated to the previous solution version that are not in the newer solution version will be deleted. This is the recommended option as it will ensure that your resulting configuration state is consistent with the importing solution including removal of components that are no longer part of the solution.

Update This option replaces your solution with this version. Components that are not in the newer solution won't be deleted and will remain in the system. This option is not recommended as your destination environment will differ in configuration from your source environment and could cause issues that are difficult to reproduce and diagnose.

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/update-solutions>

NEW QUESTION 7

- (Exam Topic 2)

You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Trigger settings

▼
Set Table name to Qualification and Column filter to statecode.
Set Table name to Qualification and Column filter to statuscode.
Set Table name to Service Requests and Column filter to statuscode.

Logic to complete service requests

▼
Complete if current record is in Complete status.
Complete if current record is in Pending Verification status.
Loop through related qualification records and complete if all are in Complete status.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Set Table table to Qualification and Column filter to statuscode.

Box 2: Loop through related qualification records and complete if all are in Complete status. The new process for completing a service request must automate the following:

Set the Service Request record status to Complete when work on all Qualification records is finished.

Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

NEW QUESTION 8

- (Exam Topic 3)

You are a Dynamics 365 Customer Service system administrator.

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. Microsoft Excel template
- B. Entities component of a solution
- C. Microsoft Virtual Studio
- D. Templates area

Answer: B

Explanation:

Entity: Refers to a table in Dataverse. Table and entity are often used interchangeably for data access. Edit public views through tables

- > Expand Data, select Tables, select the table you want, and then select the Views area.
- > On the toolbar, select Add view. Add view to table
- > On the Create a view dialog, enter a name and, optionally, a description, and then select Create. Reference:

<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION 9

- (Exam Topic 3)

A company plans to implement chatbots by using Power Virtual Agents. The company has the following requirements for the bots:

- Users in the accounting department must be able to create a bot for frequently asked questions.
- The support desk users must be able to use the bot.

The users must not be able to change environment parameters in the Microsoft Power Platform environment. You need to configure the permissions for the bots. Which actions should you implement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Users can create a bot.

Support desk users can use the bot.

Action

- Assign users the Maker permissions.
- Assign users to a security role.
- Share the bot with a security group.
- Assign users the Maker permissions.
- Assign users the System Administrator role.
- Share the bot with a security group.
- Assign users to a security role.
- Share the bot with a security group.
- Assign users the Maker permissions.
- Assign users the System Administrator role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement

Users can create a bot.

Support desk users can use the bot.

Action

- Assign users the Maker permissions.
- Assign users to a security role.
- Share the bot with a security group.
- Assign users the Maker permissions.
- Assign users the System Administrator role.
- Share the bot with a security group.
- Assign users to a security role.
- Share the bot with a security group.
- Assign users the Maker permissions.
- Assign users the System Administrator role.

NEW QUESTION 10

- (Exam Topic 3)

You create a parent entity and a child entity. The parent entity has a 1:N relationship with the child entity.

You need to ensure that when the owner changes on the parent record that all child records are assigned to the new owner.

You need to configure the relationship behavior type. What should you use?

- A. Parental
- B. Referential, Restrict Delete
- C. Referential
- D. Restrict

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/create-and-edit-1n-relationship> A parental table relationship is any 1:N table relationship where one of the cascading options in the Parental column of the following table is true.

Graphical user interface, application Description automatically generated

Action	Parental	Not Parental
Assign	Cascade All Cascade User-owned Cascade Active	Cascade None
Delete	Cascade All	RemoveLink Restrict
Reparent	Cascade All Cascade User-owned Cascade Active	Cascade None
Share	Cascade All Cascade User-owned Cascade Active	Cascade None
Unshare	Cascade All Cascade User-owned Cascade Active	Cascade None

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION 10

- (Exam Topic 3)

You are a Dynamics Sales administrator for a car dealership. The dealership uses only out-of-the-box functionality. When a new car is sold, the salesperson uses a Word template to generate a letter from the quote to thank the customer.

You need to determine if you can revise the template. Which Word template change can you make?

- A. Add the Discount field conditionally.
- B. Format the table to have alternating color rows.
- C. Format the Created On field to a long date format.
- D. Add the address of the customer.D18912E1457D5D1DDCBD40AB3BF70D5D

Answer: D

NEW QUESTION 14

- (Exam Topic 3)

A company plans to implement a voice-enabled Power Virtual Agents bot. The company has the following requirements for the bot:

- Recognize when a caller states Tennis or any variation of the word.
- Provide options when a caller states the name of a sport. You need to configure the bot.

Answer Area

Requirement

Recognize when caller states **Tennis**.

Provide options when caller states name of sport.

Provide options when caller states name of sport.

NEW QUESTION 18

- (Exam Topic 3)

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution:

Enable Outlook integration

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead enable server-based SharePoint integration. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-dynamics-365-online-to-use-sharepoint-online>

NEW QUESTION 21

- (Exam Topic 3)

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Action

Prevent unauthorized access to devices.

▼
 Set an inactivity limit in the user's group policy.
 Set a timeout in the Power Platform admin center.
 Configure access controls in Azure Active Directory.
 Configure a Power Automate flow to poll for user inactivity on the devices.

Prevent users from uploading a specific type of file.

▼
 Enter the restricted file types in the SharePoint admin center.
 Enter the allowed file types in the Power Platform admin center.
 Enter the restricted file types in the Power Platform admin center.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Set a timeout in the Power Platform admin center.

To enforce users to reauthenticate after a pre-determined period of time, admins can set a session timeout for their individual environments. Users can only remain signed in the application for the duration of session. The application signs out the user when the session expires. Users need to sign in with their credentials to return to customer engagement apps.

Note: Configure session timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users.

Incorrect:

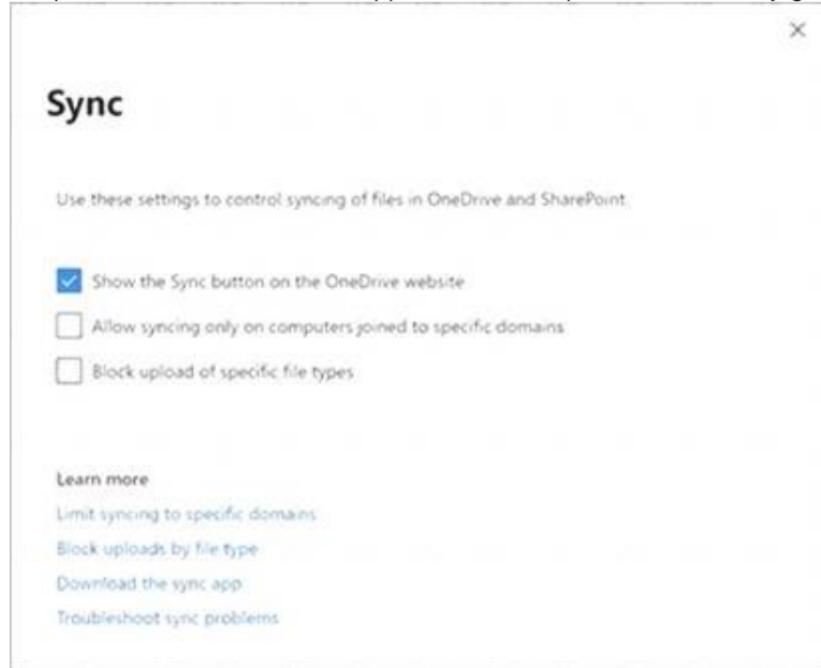

Configure inactivity timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users. Box 2: Enter the restricted file types in the SharePoint admin center.

To block uploading of specific file types

- > Go to the Settings page of the new SharePoint admin center,
- > Select Sync.

Graphical user interface, text, application Description automatically generated

- > Select the Block upload of specific file types check box.
- > Enter the file name extensions you want to block, for example: exe or mp3.
- > Select Save.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/user-session-management> <https://docs.microsoft.com/en-us/onedrive/block-file-types>

NEW QUESTION 22

- (Exam Topic 3)

A company collaborates by using Microsoft Teams.

You must create a Power Apps app directly from within a Teams channel. The app will be used by members of the channel to manage sales orders.

You need to create the app by using Dataverse for Teams. How should you create the app?

- A. Create a canvas app by using a Power Apps personal app in Teams.
- B. Create a canvas app by using the App Studio app.
- C. Use the Power Apps web designer.
- D. Create a model-driven app by using the App Studio app

Answer: B

Explanation:

You can create, edit, and delete canvas apps in Teams.

Note: With Power Apps Studio embedded in the Power Apps app in Teams and the new built-in data platform providing an easy-to-use, editable data table, you can quickly build apps based on custom data tables that are Teams-specific and scenario-specific.

Reference: <https://docs.microsoft.com/en-us/power-apps/teams/create-first-app> <https://docs.microsoft.com/en-us/power-apps/teams/create-apps-overview>

NEW QUESTION 25

- (Exam Topic 3)

You are examining several processes to determine if you can automate the processes by using Power Automate.

The processes must run without human intervention when possible.

You need to determine which flow type should be used for each process.

Which flow type should you use? To answer, drag the appropriate processes to the correct flow types. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow types	Answer Area	Process	Flow type
Scheduled cloud flow		Employees enter leave requests into a web page. Use web automation to collect data from the web browser and send the information to a supervisor so that the supervisor can approve or reject the leave request.	<input type="text"/>
Attended desktop flow		Read data from a text file and populate the data into a third-party desktop application by using saved credentials.	<input type="text"/>
Unattended desktop flow			

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Box 1: Attended desktop flow

Desktop flows are used to automate tasks on the Web or the desktop.

To run an attended desktop flow, you need to have an active Windows user session that matches the name of the user configured for your connection.

Note: Web applications are critical components of most organizations, and they are commonly used to access data from servers.

Most CRM and ERP platforms run through web browsers, while the most popular business productivity tools are web services. Web applications are unquestionably an integral part of the technological infrastructure of most companies.

To provide automation solutions for these applications, Power Automate Desktop supports all major browsers through its web automation actions.

Box 2: Unattended desktop flow.

Unattended desktop flows are best for applications that do not need human supervision. References:

<https://docs.microsoft.com/en-us/learn/modules/pad-web/1-introduction>

<https://docs.microsoft.com/en-us/power-automate/desktop-flows/run-pad-flow>

NEW QUESTION 27

- (Exam Topic 3)

A company is training an AI model using a custom table to determine the amount of time it takes to deliver a package based on several key fields.

The testing data used to train the model is used for all training and regression testing scenarios and is considered complete data.

The trained model predicts a 2 percent variance between the estimated delivery time and the actual delivery time of packages.

The executive sponsors reject the model because the actual variance is at 15 percent. You need to address the sponsors' concern

What should you do?

- A. Reduce the size of the data used within the model.
- B. increase the size of the data used with the model.
- C. Use sample training data from Microsoft
- D. Replace the training data with real-world data.

Answer: D

Explanation:

Note: Start using AI Builder with sample data

Don't have any data of your own to create a model? No problem! We've got you covered.

Sample data is available for several AI Builder model types, together with instructions for working with the sample data.

Reference: <https://docs.microsoft.com/en-us/ai-builder/samples>

NEW QUESTION 32

- (Exam Topic 3)

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- It must be in the local language.
- Only fulltime employees may access the chatbot. You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Chatbot in local language	<ul style="list-style-type: none"> Create one chatbot that manages all three languages. Create one chatbot that manages all three languages. Create one chatbot and add it to three Teams channels that are configured for the local language. Create three chatbots, one for each language.
Employee access	<ul style="list-style-type: none"> Publish the chatbot in Teams. Share the chatbot with the fulltime employees. Publish the chatbot to the mobile app channel. Add the chatbot to Appsource. Publish the chatbot in Teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Chatbot in local language	<ul style="list-style-type: none"> Create one chatbot that manages all three languages. Create one chatbot that manages all three languages. Create one chatbot and add it to three Teams channels that are configured for the local language. Create three chatbots, one for each language.
Employee access	<ul style="list-style-type: none"> Publish the chatbot in Teams. Share the chatbot with the fulltime employees. Publish the chatbot to the mobile app channel. Add the chatbot to Appsource. Publish the chatbot in Teams.

NEW QUESTION 34

- (Exam Topic 3)

A company uses a model driven app.

The company needs to automatically update the Status column in real time. You need to configure this feature.

Solution: Create a workflow that has a Change Status step. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 37

- (Exam Topic 3)

A company has a Power Apps app.

The app must meet the following requirements:

- Managers assign lead records to the sales department. A new phone call record must be created if a lead record has no activities.
- An email must be sent to the manager if the phone call record created is not completed after one day. A classic workflow must run when a lead record is assigned.

You need to configure the check conditions for the workflow. NOTE: Each correct selection is worth one point.

Answer Area

Condition	Value
Number of activities for new phone call record.	0 0 1 Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day 1 Day Lead Created On + 1 Day Lead Modified On + 1 Day

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Condition	Value
Number of activities for new phone call record.	0 0 1 Process Activity Count
Duration for email sent to manager.	Lead Created On + 1 Day 1 Day Lead Created On + 1 Day Lead Modified On + 1 Day

NEW QUESTION 42

- (Exam Topic 3)

You are using a development environment to add a new column to a system table. You plan to move the changes to a test environment they are complete.

The changes must meet the following requirements:

- Must be clearly identified so that they are not confused with system components and components from other solutions.
- Must not affect any existing components in the test environment. You need to prepare a solution for deployment to the test environment.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a new unmanaged solution and select the correct publisher.	
Create a new publisher.	
Select a managed solution and add the correct publisher.	
Add the table with all components to the solution.	
Choose an existing publisher.	
Add the table to the solution and add the new column.	
Run the solution checker on the solution.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Create a new publisher Solution publisher

Every app and other solution components such as entities you create or any customization you make is part of a solution. Because every solution has a publisher, you should create your own publisher rather than use the default. You specify the publisher when you create a solution.

Step 2: Create a new unmanaged solution and select the correct publisher unmanaged solution

Unmanaged solutions are used in development environments while you make changes to your application. Unmanaged solutions can be exported either as unmanaged or managed. Exported unmanaged versions of your solutions should be checked into your source control system. Unmanaged solutions should be considered your source for Microsoft Power Platform assets. When an unmanaged solution is deleted, only the solution container of any customizations included in it is deleted. All the unmanaged customizations remain in effect and belong to the default solution.

Step 3: Add the table top the solution and add the new column. Step 4: Run the solution checker on the solution

Use solution checker to validate your model-driven apps in Power Apps.

Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm> <https://docs.microsoft.com/en-us/power-apps/maker/data-platform/use-powerapps-checker>

NEW QUESTION 43

- (Exam Topic 3)

A company uses a Power Apps app with Microsoft Dataverse.

The company requires the import of records into Dataverse. Duplicate records in the data must be deleted without user intervention.

You create a duplicate detection rule.

You need to configure the rule for the data import. Which option should you configure?

- A. Enable the Templates for Data Import option.
- B. Enable the When a record is created or updated option.
- C. Disable the Allow Duplicates option.
- D. Enable the During data import option.

Answer: D

Explanation:

When configuring a duplicate detection rule in Power Apps with Microsoft Dataverse, to automatically delete duplicate records during a data import, you should enable the "During data import" option. This option allows the detection rule to automatically delete duplicates as they are imported into the system, without requiring user intervention.

References:

- > <https://docs.microsoft.com/en-us/power-platform/admin/create-duplicate-detection-rule>
- > <https://docs.microsoft.com/en-us/power-platform/admin/data-integration-duplicate-detection>

NEW QUESTION 45

- (Exam Topic 3)

A company plans to create an app by using Power Apps. The company has the following requirements:

- The app must be able to enter data into Microsoft SharePoint
- Users must be able to add the app into Microsoft Teams.

You need to recommend which app to create. Which type of app should you recommend?

- A. model-driven app as a personal app
- B. canvas app as a personal app
- C. canvas app as a tab app
- D. model-driven app as a tab app

Answer: B

NEW QUESTION 46

- (Exam Topic 3)

You plan to create a canvas app.

The app must meet the following requirements:

- Send an email after a record is saved.
- Display the expiration column on a form if the creation date of the record is older than 90 days. You need to configure the app.

Which features should you use? To answer, select the appropriate options in the answer area.

Answer Area

Requirement	Feature
Send an email.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Power Automate flow</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Connection</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Collection</div> <div style="border-bottom: 1px solid gray; padding: 2px; background-color: #0070c0; color: white;">Power Automate flow</div> <div style="padding: 2px;">Formula</div> </div>
Display the expiration column.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">Formula</div> <div style="border-bottom: 1px solid gray; padding: 2px; background-color: #0070c0; color: white;">Formula</div> <div style="border-bottom: 1px solid gray; padding: 2px;">Collection</div> <div style="padding: 2px;">Connection</div> </div>

Display the expiration column.	<div style="border: 1px solid gray; padding: 5px;"> Formula Formula Collection Connection </div>

NEW QUESTION 48

- (Exam Topic 3)

You have a canvas app.

The canvas app must store data in a variable that is available only to the current screen. You need to create the variable.

Which two functions should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Navigate
- B. UpdateContext
- C. Set
- D. Collect
- E. SaveData

Answer: BC

Explanation:

* B. UpdateContext function can be used to create a variable that is only available to the current screen. This function takes in an object that defines the variable and its initial value, and updates the context of the current screen with that variable. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

* C. Set function can be used to assign a value to a variable. The Set function sets a variable to a specified value, which is useful when you need to update the value of a variable. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-set>

NEW QUESTION 51

- (Exam Topic 3)

A customer uses Power Apps to view and maintain their contacts that are stored in Microsoft Dataverse. Several columns must be configured to ensure the security settings for sales associates are view only. You need to configure the access restrictions.

Which component for field-level security should you use? TO answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Action	Component
Enable the fields for record-level security.	<div style="border: 1px solid gray; padding: 5px;"> Azure Data Lake Gen2 Azure SQL Power Apps app designer Microsoft Power Platform admin center </div>
Set the security settings for the sales associates to view only.	<div style="border: 1px solid gray; padding: 5px;"> Azure Active Directory group team Dataverse table Field Security Profiles User </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 52

- (Exam Topic 3)

You are configuring a new Power Apps portal. You have two web roles, one for authenticated users and one for anonymous users. You grant the Anonymous Users role to users.

A test user reports that they can access the home page but cannot view a page linked from the home page. You need to determine why the test user cannot view the portal page.

What is the cause of the issue?

- A. Maintenance mode is enabled on the portal.
- B. The setting to make the page available to everyone is disabled.
- C. The Authenticated Users Web role does not have permission to view the page.
- D. Inherited permissions are not enabled for the linked page.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/webpage-access-control>

NEW QUESTION 53

- (Exam Topic 3)

A customer has a support website that includes FAQ pages, knowledge articles, and support content. You plan to leverage an existing Power Virtual Agents bot to enhance and streamline existing support functionality for the existing support portal.

You need to create topics from existing website content. The process must minimize human errors during topic creation.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Hover over the topic and select the Automate icon.	
Capture suggested topics.	
Add selected topics to the chatbot.	⬆
Enable the topics.	⬇
Identify the pre-filled trigger phrases.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Select Suggest topics on the Topics page to extract content from FAQ/support pages or online files.
- Add the suggested topics to your bot.
- Enable the topics.

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-create-topics-from-web>

NEW QUESTION 57

- (Exam Topic 3)

A company creates a model-driven app.

Users require access to a Power BI report that is embedded in the app. You need to configure the app.

Where should you add the report?

- A. XML report
- B. Dashboard
- C. Business rule
- D. Power Automate cloud flow

Answer: B

Explanation:

To add a Power BI report to a model-driven app, you should add it to a dashboard. Dashboards in model-driven apps provide a way to organize and display information, such as charts, tables, and reports. You can add a Power BI report to a dashboard by creating a new dashboard and then adding a Power BI report component to it. This component allows you to specify the report you want to add and configure its properties, such as size and layout. Users will then have access to the embedded report when they view the dashboard in the app. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-model-driven-app-dashboards>

NEW QUESTION 62

- (Exam Topic 3)

You use Power BI Desktop to configure Power BI reports.

You need to create a canvas app that displays user account information and include the app in a Power BI report.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From the Power Apps Insert menu, add a Power BI tile
- B. From the Power BI Desktop menu, insert a Power Apps visual and include the required fields in the Power Apps data
- C. Publish the report to the Power BI service
- D. Connect to Common Data Service from Power BI Desktop

Answer: BCD

Explanation:

Step 1 (B): Here's how we embed PowerApps into a Power BI report:

- > Download and login to the Power BI desktop application
- > Click on (...) and select "Import from the marketplace."

Step 2: Open Power BI desktop and use "Get data" to connect with the Common Data Service data source. Step 3: Publish the report to Power BI service.

Reference:

<https://purple.telstra.com/blog/powerbi-integration-with-powerapps>

NEW QUESTION 66

- (Exam Topic 3)

You plan to automate several different processes by using Power Automate. Each process has unique characteristics.

You need to recommend components for each process.

Which components should you recommend? To answer, drag the appropriate components to the correct processes. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area	Component
Attended UI flow	Process	
Unattended UI flow	Access data from an internally created web application with basic REST API functionality as part of a nightly batch job.	Component
Flow that uses a custom connector	Access data from a public web site with no API functionality for emails processed through an unmonitored queue.	Component
Flow that uses a prebuilt connector		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

1: Custom connector (REST API access) 2: Unattended UI flow

NEW QUESTION 69

- (Exam Topic 3)

You are a Dynamics 365 Customer Service administrator.

You need to configure the following automation for the sales team:

- * Send an email when the status changes on an Opportunity.
- * Text the sales manager when an Opportunity is created.
- * Create a Wunderlist task when an Opportunity is open for 30 days.

Which tool should you use for each requirement? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

Automation	Tool
Email when the status changes.	<div style="border: 1px solid black; padding: 5px;"> <input type="checkbox"/> Dynamics 365 workflow <input checked="" type="checkbox"/> Microsoft Flow <input type="checkbox"/> Business Process Flow </div>
Text when the Opportunity is created.	<div style="border: 1px solid black; padding: 5px;"> <input type="checkbox"/> Dynamics 365 workflow <input checked="" type="checkbox"/> Microsoft Flow <input type="checkbox"/> Business Process Flow </div>
Create a Wunderlist task.	<div style="border: 1px solid black; padding: 5px;"> <input type="checkbox"/> Dynamics 365 workflow <input checked="" type="checkbox"/> Microsoft Flow <input type="checkbox"/> Business Process Flow </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Automation	Tool
Email when the status changes.	<input type="text" value="Dynamics 365 workflow"/> <input type="text" value="Microsoft Flow"/> <input type="text" value="Business Process Flow"/>
Text when the Opportunity is created.	<input type="text" value="Dynamics 365 workflow"/> <input type="text" value="Microsoft Flow"/> <input type="text" value="Business Process Flow"/>
Create a Wunderlist task.	<input type="text" value="Dynamics 365 workflow"/> <input type="text" value="Microsoft Flow"/> <input type="text" value="Business Process Flow"/>

NEW QUESTION 71

- (Exam Topic 3)

You implement an editable grid for the Account entity.

The business team provides the following list of features that they would like you to implement:

- > Group by or sort columns in the current view.
- > Configure a business rule to show an error message.
- > Edit values in calculated fields.
- > Edit the Address composite field.
- > Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	<input type="text" value="Yes"/> <input type="text" value="No"/>
Configure a business rule to show an error message.	<input type="text" value="Yes"/> <input type="text" value="No"/>
Edit values in calculated fields.	<input type="text" value="Yes"/> <input type="text" value="No"/>
Edit the Address composite field.	<input type="text" value="Yes"/> <input type="text" value="No"/>
Use the editable grid on mobile phones.	<input type="text" value="Yes"/> <input type="text" value="No"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Configure a business rule to show an error message.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit values in calculated fields.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Edit the Address composite field.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Use the editable grid on mobile phones.	<input type="checkbox"/> Yes <input type="checkbox"/> No

NEW QUESTION 72

- (Exam Topic 3)

A company uses a model-driven app with Microsoft Dataverse in a single environment

The company requires a canvas app that includes the same data as the model-driven app. You need to create the canvas app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Select the **Excel** option.
- Sign into the Microsoft Power Platform admin portal.
- Sign into the Power Apps Maker portal.
- Select the **Dataverse** option.
- Select the data source and tables to include in the canvas app and then save the app.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

- Select the **Excel** option.
- Sign into the Microsoft Power Platform admin portal.
- Sign into the Power Apps Maker portal.
- Select the **Dataverse** option.
- Select the data source and tables to include in the canvas app and then save the app.

Answer area

- Sign into the Power Apps Maker portal.
- Select the **Dataverse** option.

Select the data source and tables to include in the canvas app and then save the app.

NEW QUESTION 73

- (Exam Topic 3)

A company uses Dataverse to store the names of contacts. The company uses a shared Microsoft Excel file to collect the data. The company requires that the contacts be added to Dataverse automatically every day

You need to identify which tools are required to create and perform the import. What should you use? To answer, select the appropriate options in the answer area.

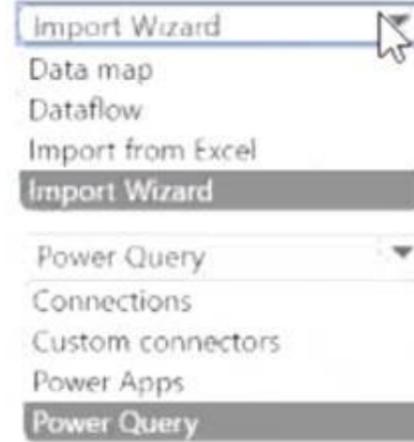

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Create the import.

Tool

Perform the import.

- A. Mastered
- B. Not Mastered

Answer: A

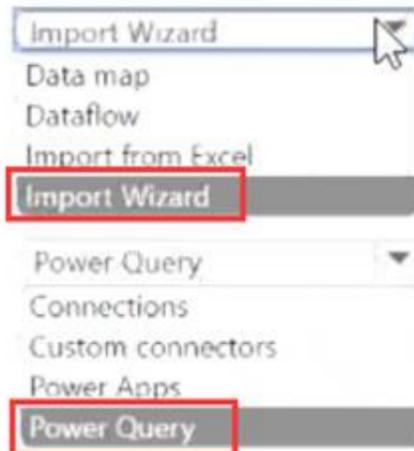

Explanation:

Answer Area

Requirement

Create the import.

Tool

Perform the import.

NEW QUESTION 75

- (Exam Topic 3)

You create a Power Apps app.

The app must be able to display a list of records that are sorted by category. The app must also expand or hide the list by subtopics.

You need to configure the app. Which tool should you use?

- A. card
- B. expression
- C. Power BI dashboard
- D. gallery

Answer: D

Explanation:

A gallery control in Power Apps allows you to display a list of records, and can be configured to sort the records by a specific field, such as category. Additionally, the gallery control has built-in functionality for expanding or hiding a list of subtopics. This can be done by adding a toggle control within the gallery template to show or hide the subtopics based on user interaction. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-gallery>

NEW QUESTION 78

- (Exam Topic 3)

You need to create a Power Automate desktop flow.

What are two possible ways to create the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Record mouse and keyboard events.
- B. Configure a pre-built template.
- C. Use pre-built actions.
- D. Create models by using Microsoft Visio.

Answer: AC

Explanation:

C: Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate you can automate tasks on the desktop as well as the Web.

A: Alternatively, you can use the two legacy methods of creating desktop flows: Windows recorder (V1) and Selenium ID. With these you record mouse and

keyboard events.

Reference:

<https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-flow> <https://docs.microsoft.com/en-us/power-automate/desktop-flows/create-web>

NEW QUESTION 83

- (Exam Topic 3)

A company uses a model-driven Power Apps app in a new environment. The base language is English. You need to configure French and Spanish.

Which configuration component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration component
Allow a language to be used within an organization.	<ul style="list-style-type: none"> Default language Language collation Language packs LCID
Enable the languages.	<ul style="list-style-type: none"> Browser Environment Power Apps app Tenant

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Language packs

Before users can start using a Language Pack to display a language, the Language Pack must be enabled in your organization.

Box 2: Environment Enable the language

These settings can be found in the Microsoft Power Platform admin center by going to Environments > [select an environment] > Settings > Product > Languages.

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/enable-languages>

NEW QUESTION 88

- (Exam Topic 3)

You are designing a Power Virtual Agents chatbot.

The chatbot must be able to maintain customer information if the conversation topic changes during a dialog.

You need to configure variables to store customer name and email address. Which type of variable should you create?

- A. session
- B. topic
- C. bot
- D. slot

Answer: C

Explanation:

By default, a variable's value can only be used in the topic where this variable gets created. However, you might want the bot to use the same value across topics. This means the bot can remember the necessary context when a conversation spans multiple topics. In some systems, these types of variables are known as global variables. In Power Virtual Agents, these variables are called bot variables, because they apply across the entire bot.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION 91

- (Exam Topic 3)

You create a Power Virtual Agents bot.

You observe that the bot is not able to recognize input from some users. You need to configure the bot response for unrecognized input from users.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Transfer to an agent.
- B. Use a fallback topic.
- C. Display a system-defined error message.
- D. Connect to a different channel.

Answer: BC

Explanation:

* B. Use a fallback topic: Power Virtual Agents provides the capability to handle unrecognized inputs by using fallback topics. A fallback topic is a topic that is triggered when the bot is unable to recognize the user input. You can configure fallback topics by going to the Power Virtual Agents portal, and then select the bot you want to configure. Then select the "Topics" tab and create a new topic with a fallback trigger. Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/topics-triggers#fallback-triggers>

* C. Display a system-defined error message: This is another option to handle unrecognized inputs by displaying a predefined message that inform the user that the bot was unable to understand their input.

NEW QUESTION 95

- (Exam Topic 3)

You are a Dynamics 365 Customer Engagement administrator. You create workflows to automate business processes. You need to configure a workflow to meet the following requirements:

- Be triggered when a condition is met.
- Run immediately.
- Perform an action when a condition is met.

How should you configure the workflow? To answer, select the appropriate configuration in the answer area. NOTE: Each correct selection is worth one point.

Answer Area	Workflow Requirement	Configuration Option
	Be triggered when a condition is met.	<input type="checkbox"/> Publish workflow. <input type="checkbox"/> Subject contains data. <input type="checkbox"/> Trigger when a Microsoft Flow button is pressed.
	Run immediately.	<input type="checkbox"/> Approve the workflow. <input type="checkbox"/> Configure the workflow to run now. <input type="checkbox"/> Configure child workflow to run now.
	Perform an action when a condition is met.	<input type="checkbox"/> Send an email. <input type="checkbox"/> View chart. <input type="checkbox"/> Update a security role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- 1) Be triggered when a condition is met - Subject contains data
- 2) Run Immediately - Configure the workflow to run now
- 3) Perform an action when a condition is met - send an email

NEW QUESTION 98

- (Exam Topic 3)

A company plans to create a Power Virtual Agents chatbot. The bot has the following requirements:

- Prompt for a location of the customer and the call must be routed to a support agent for the location.
- Transfer support calls at each location to a support bot that uses the Bot Framework. You need to configure the bot.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct select is worth one point.

Components	Requirement	Component
<input type="checkbox"/> Variables <input type="checkbox"/> Skills <input type="checkbox"/> Topics <input type="checkbox"/> Entities	Route to location.	<input type="text"/>
	Route to support bot.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Components	Requirement	Component
<input checked="" type="checkbox"/> Variables <input checked="" type="checkbox"/> Skills <input checked="" type="checkbox"/> Topics <input checked="" type="checkbox"/> Entities	Route to location.	<input checked="" type="text" value="Topics"/>
	Route to support bot.	<input checked="" type="text" value="Variables"/>

NEW QUESTION 100

- (Exam Topic 3)

You need to embed the FAQbot into the communication solution.

Which actions should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement

Action

Add the new FAQ solution to the communication solution for the first time.

- Import an existing app.
- Create a new app.
- Import a new page.
- Import bot.

Configure the FAQ solution in Microsoft Teams.

- Configure the FAQbot.
- Import a chatbot.
- Create a new chatbot.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement

Action

Add the new FAQ solution to the communication solution for the first time.

- Import an existing app.
- Create a new app.
- Import a new page.
- Import bot.

Configure the FAQ solution in Microsoft Teams.

- Configure the FAQbot.
- Import a chatbot.
- Create a new chatbot.

NEW QUESTION 104

- (Exam Topic 3)

You plan to create a Power BI dataflow.

The Power BI dataflow has the following requirements:

- Be able to create a copy of the dataflow to separate Power BI workspaces
- Schedule the dataflow to update every day at 11:00 AW. You need to configure the dataflow.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Action

Copy Power BI dataflow.

Schedule updates.

Schedule updates.

- Export the JSON file.
- Export the JSON file.
- Change the settings.
- Change the properties.
- Add Streaming dataset.
- Configure the Power BI service.
- Refresh the history.
- Configure the Power BI service.
- Share the dashboards with other users.
- Refresh automatically.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Action
Copy Power BI dataflow.	Export the JSON file.
Schedule updates.	Export the JSON file.
	Change the settings.
	Change the properties.
	Add Streaming dataset.
Schedule updates.	Configure the Power BI service.
	Refresh the history.
	Configure the Power BI service.
	Share the dashboards with other users.
	Refresh automatically.

NEW QUESTION 109

- (Exam Topic 3)

A company has a sales application that is supported by an Azure SQL database. You are developing a Power Apps app for use by customer service agents. The app must reference customer data from the sales application. Data in the sales application is constantly changing and must not be replicated in Microsoft Dataverse

Some customer data is considered sensitive. You must protect data for specific fields when users view data in the app.

You need to configure table creation for the app.

How should you configure the app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Requirement

Action

Dataverse table type to create for the referenced customer data.

- Create a virtual table.
- Create an activity table.
- Create a user-owned table.
- Create an organization-owned table.

Protect sensitive customer data for specific fields.

- Create an alternate key.
- Create a secured column.
- Implement input method editor (IME) mode.
- Set the value of the visible property of the fields to false.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement

Action

Dataverse table type to create for the referenced customer data.

- Create a virtual table.
- Create an activity table.
- Create a user-owned table.
- Create an organization-owned table.

Protect sensitive customer data for specific fields.

- Create an alternate key.
- Create a secured column.
- Implement input method editor (IME) mode.
- Set the value of the visible property of the fields to false.

NEW QUESTION 110

- (Exam Topic 3)

You are designing an app for a bank.

You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Relationship types	Requirement	Relationship type
<input type="text" value="1 : N"/> <input type="text" value="N : N"/> <input type="text" value="N : 1"/>	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email. Loan applicants can apply for one type of loan per application. Applicants can have more than one application. Loans must be applied for for a single property.	<input type="text"/> <input type="text"/> <input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated
 Box 1: N:1
 You add a lookup column with a many-to-one relationship. Box 2: N:N
 Box 3: N:1
 Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-entity-lookup>

NEW QUESTION 112

- (Exam Topic 3)
 A company creates a bot by using Power Virtual Agents. The company requires the bot to transfer callers to an agent if the bot is unable to recognize a customer's request. You need to configure the bot for the unrecognized information from the customer. Which feature should you use?

- A. Fallback workstream
- B. Fallback topic
- C. Fallback skill
- D. Fallback queue
- E. Fallback entity

Answer: B

Explanation:

A Fallback topic is a type of topic in Power Virtual Agents that is used when the bot is unable to understand the customer's request. When a Fallback topic is triggered, it takes over the conversation and presents the customer with a set of options or a message that allows them to get the help they need. This can include options such as requesting to speak with an agent, providing feedback, or getting more information about the bot's capabilities. Fallback topic can be configured to automatically transfer the customer to an agent.

- References:
- > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/fallback>
 - > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/bot-topics>

NEW QUESTION 116

- (Exam Topic 3)
 You must create a new entity to support a new feature for an app. Entity data will be transactional and will be associated with business units. You need to configure entity ownership. Which entity ownership type should you use?

- A. user or team owned
- B. organization-owned
- C. none
- D. business-owned

Answer: A

NEW QUESTION 117

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history.

Solution: Delete the user account in the Power Platform admin portal and recreate the account by using the new name.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 122

- (Exam Topic 3)

A car dealership has a Dynamics 365 Sales environment for its sales company and another environment for its leasing company. Users in one environment must not be able to see the other environment. You need to grant salespeople access to the sales company environment. What should you do?

- A. Add salespeople to a security role.
- B. Set privileges.
- C. Add salespeople to an Office 365 security group.
- D. Set app security

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/control-user-access>

NEW QUESTION 123

- (Exam Topic 3)

A company creates a canvas app.

The app requires near real-time data from an accounting system that resides in a customer's data center. You need to implement a solution for the app.

What should you create?

- A. Azure DevOps pipeline
- B. On-premises data gateway
- C. Power Pages
- D. Data integration project

Answer: B

Explanation:

When a company creates a canvas app that requires near real-time data from an accounting system that resides in a customer's data center, one solution that can be implemented is to create an On-premises data gateway.

An On-premises data gateway is a service that allows Power Apps to connect to and access data sources that are located on-premises, such as the accounting system in the customer's data center. The gateway acts as a bridge between the cloud-based Power Apps and the on-premises data sources, enabling real-time data transfer and integration.

References:

- > <https://docs.microsoft.com/en-us/power-platform/admin/gateway-reference>
- > <https://docs.microsoft.com/en-us/power-platform/admin/gateway-onprem>
- > <https://docs.microsoft.com/en-us/power-platform/admin/real-time-data-integration>

NEW QUESTION 124

- (Exam Topic 3)

You create and publish a Power BI report that contains an embedded canvas app. The report will be used by multiple people.

The canvas app has an issue that must be corrected. You update the canvas app.

You need to ensure that the updated canvas app is available in the published Power BI report. What should you do?

- A. Publish the Power BI report from Power BI Desktop.
- B. Manually refresh the data source on the published Power BI report.
- C. Publish the Power BI report from Power BI Desktop and reshare to any users.
- D. Publish the canvas app.

Answer: B

Explanation:

> If you change the data fields associated with the visual, you must edit the app from within the Power BI service by selecting the ellipsis (...) and then selecting Edit. Otherwise, the changes won't be propagated to Power Apps, and the app will behave in unexpected ways.

> The Power Apps visual can't trigger a refresh of Power BI reports and Power BI data sources from within Power BI Desktop. If you write back data from the app to the same data source as the report, your changes won't be reflected immediately in Power BI Desktop. Changes are reflected on the next scheduled refresh.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual#limitations-of-the-po>

NEW QUESTION 128

- (Exam Topic 3)

A company has a model-driven app.

The app must meet the following requirements:

- Prevent users from saving a record if validation from a custom action fails.
- Query and update a list of records.

You need to configure processes for the app without using code.

Which processes should you use? To answer, drag the appropriate processes to the correct requirements. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Processes	Answer Area	Requirement	Process
Cloud flow		Prevent users from saving a record.	
Classic workflow		Query and update records.	
Business process flow			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Processes	Answer Area	Requirement	Process
Cloud flow		Prevent users from saving a record.	Business process flow
Classic workflow		Query and update records.	Cloud flow
Business process flow			

NEW QUESTION 132

- (Exam Topic 3)

A company plans to implement AI Builder to add intelligence to several business processes. Each business process uses different sources and produces different outputs.

You need to determine which AI Builder model types to use.

Which model types should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Recognition requirement

Model type

Identify a person's age in a paragraph when written using the pattern **twenty years old**.

- Entity extraction
- Text recognition
- Key phrase

Identify items and prices from an invoice.

- Form processing
- Text recognition
- Object detection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/ai-builder/form-processing-model-overview> <https://docs.microsoft.com/en-us/ai-builder/entity-extraction-overview>

NEW QUESTION 135

- (Exam Topic 3)

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new JavaScript web resource by using the code from the third-party librar

- B. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- C. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.
- D. Add the code from the third-party JavaScript library to MyBusinessLogi
- E. Add MyBusinessLogic to the solution.
- F. Add only the third-party JavaScript web resource to the solution.

Answer: AC

Explanation:

Web resources in model-driven apps.

Web resources are virtual files that are stored in the Microsoft Dataverse database and that you can retrieve by using a unique URL address.

Capabilities of web resources.

Web resources represent files that can be used to extend the Dataverse web application such as html files, JavaScript, and CSS, and several image formats.

Reference: <https://docs.microsoft.com/en-us/power-apps/developer/model-driven-apps/web-resources>

NEW QUESTION 139

- (Exam Topic 3)

You create a canvas app.

The app requires access to data that is stored in collections. The app must provide the following actions:

- Create a new collection variable.
- Remove table values from a collection. You need to configure functions for the app.

Which functions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Action	Function
Create a new collection variable.	<ul style="list-style-type: none"> Collect Set Select Collect AddColumns
Remove table values from a collection.	<ul style="list-style-type: none"> Clear Clear Reset Revert DropColumns

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Function
Create a new collection variable.	<ul style="list-style-type: none"> Collect Set Select Collect AddColumns
Remove table values from a collection.	<ul style="list-style-type: none"> Clear Clear Reset Revert DropColumns

NEW QUESTION 144

- (Exam Topic 3)

You have a canvas app with an embedded Power BI tile.

You share the canvas app. Users report that they are unable to access the Power BI content. You need to determine why users are unable to access the content

What is the cause of the user s problems?

- A. The Power BI dashboard is not shared.
- B. The Power BI interactions property on the Power BI tiles is set to Off.
- C. The Power BI connection is not shared.
- D. The Power BI Display mode property on the Power BI tiles is set to Disabled

Answer: A

Explanation:

When embedding a Power BI tile in a Canvas app, there are several factors that must be considered in order to ensure that users have access to the content. One of the most important is sharing the Power BI dashboard that the tile is embedded in. If the dashboard is not shared with the users, they will not be able to view the content in the tile.

To share a Power BI dashboard, you must have the "Edit" permission for the dashboard. Once you have this permission, you can share the dashboard with other

users by following these steps:

- Click the "Share" button in the top-right corner of the dashboard.
- In the "Share" pane that appears, enter the email addresses of the users that you want to share the dashboard with.
- Select the level of access that you want to grant to the users. You can choose to give them "View" access, which allows them to view the dashboard but not make changes, or "Edit" access, which allows them to view and make changes to the dashboard.
- Click the "Share" button to share the dashboard with the users. Additionally, there are other factors that could cause user's problems:
 - B. The Power BI interactions property on the Power BI tiles is set to Off. In that case, the user's won't be able to interact with the visuals.
 - C. The Power BI connection is not shared. In that case, the user's won't have the access to the data source
 - D. The Power BI Display mode property on the Power BI tiles is set to Disabled, in that case the user's won't see the tile

It is important to check all of these factors and ensure that they are properly configured in order to ensure that users have access to the content.
