Exam Questions MS-203

Microsoft 365 Messaging

NEW QUESTION 1
DRAG DROP - (Topic 5)
Your company has three departments name Dept1, Dept2. and Dept3 and a Microsoft Exchange Online tenant.
You need to increase security for the email messages sent from the departments. The solution must meet the following requirements:
« Users in Dept1 must be able to digitally sign and encrypt email messages as required.
+ Email messages sent from Dept2 to an external email domain must be encrypted automatically during transit only.
« Email messages sent from Dept3 to an external email domain must be encrypted until the recipient opens the message.
« Implementation costs must be minimized.
'Which type of encryption should you use for each department? To answer, drag the appropriate encryption types to the correct departments. Each encryption type may be used

Encryption types		Answer Area
IPsec		Dept1: Encryption type
Microsoft Purview Message Encryption		Dept2: Encryption type
S/MIME		Dept3: Encryption type
TLS		

A. Mastered
B. Not Mastered

Answer: A

Explanation:
? Users in Dept1 should use S/MIME encryption1. S/MIME is a standard for public key encryption and signing of email messages1. It allows users to digitally sign and encrypt email messages as required using certificates1. S/MIME provides end-to-end encryption and ensures message integrity and sender authentication1.
? Email messages sent from Dept2 to an external email domain should
use TLS encryption1. TLS is a protocol that encrypts the connection or session between two servers1. It protects email messages during transit only and does not require any action from the sender or recipient1. TLS provides opportunistic encryption and ensures message confidentiality and server authentication1.
? Email messages sent from Dept3 to an external email domain should
use Microsoft Purview Message Encryption2. Microsoft Purview Message Encryption is an online service that encrypts email messages and attachments using rights management policies2. It allows users to send encrypted email messages to anyone inside or outside the organization using various email services2. Microsoft Purview Message Encryption provides persistent encryption and ensures message confidentiality and authorization policies2.

NEW QUESTION 2
- (Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft Exchange Online tenant that contains 1,000 users.
A user named User1 receives a non-delivery report (NDR) when attempting to send an email message to an internal group named sales@contoso.com. The NDR contains the following text: "5.7.1 Delivery not authorized."
You need to ensure that User1 can send email to sales@contoso.com successfully. Solution: You modify the properties of the sales@contoso.com group.

A. Yes
B. No

Answer: B

NEW QUESTION 3
- (Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft Exchange Server 2019 hybrid deployment that contains two Mailbox servers named MBX1 and MBX2.
The company has the departments shown in the following table.

Name	Mailbox location	Number of recipients
Sales	MBX1	300
Production	MBX2	500
Administration	MBX1	200
IT	Exchange Online	50
Managers	Exchange Online	100
Marketing	Exchange Online	350

From the on-premises organization, outbound email is sent directly to the Internet by using DNS lookups.
You are informed that some sales department users send email messages that are identified as spam.

You need to automatically block the sales department users from repeatedly sending spam.
Solution: You migrate all the mailboxes of the sales department to Exchange Online. Does this meet the goal?

A. yes
B. No

Answer: A

Explanation:
Exchange Online Protection (EOP) will scan outbound messages from Exchange Online mailboxes.

NEW QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.
A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.
You need to configure the deployment to meet the security policy requirement. Solution: From Microsoft 365, you create a supervision policy.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
You should create a Data Loss Prevention (DLP) policy.

NEW QUESTION 5
DRAG DROP - (Topic 5)
Your company has a Microsoft 365 subscription for a domain named contoso.com.
The company acquires a company named Litware, Inc. that uses an IMAP-based messaging system. The SMTP domain of Litware is named litwareinc.com.
You need to migrate the mailboxes of Litware to Microsoft Office 365. The solution must ensure that users from Litware can receive email by using their current email address.
Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add an accepted domain to Office 365.	
Create a migration endpoint and a migration batch.	
Create an Office 365 connector.	
Start the migration batch.	
Provision a mailbox in Office 365 for each Litware user.

NEW QUESTION 10
- (Topic 5)
Your network contains an Active Directory domain named fabrikam.com.
You have a Microsoft Exchange Server 2019 organization that contains two Mailbox servers. The servers are members of a database availability group (DAG).
You plan to implement an Exchange hybrid deployment.
You are evaluating the use of the Exchange Modern Hybrid connection option during the hybrid deployment.
What are two benefits of using Exchange Modern Hybrid instead of Exchange Classic Hybrid? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. allows the use of Microsoft Azure Multi-Factor Authentication (MFA) for on-premises users
B. eliminates the need to purchase publicly trusted certificates for communication between the on-premises organization and Exchange Online
C. preserves mailbox quotas when mailboxes are moved between the on-premises organization and Exchange Online
D. uses Organization Configuration Transfer to configure Exchange Online
E. allows federated sharing between the on-premises organization and Exchange Online

NEW QUESTION 14
- (Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.
You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.
Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set- Mailbox cmdlet and specify the –EmailAddressPolicyEnabled $false parameter.
Does this meet the goal?

A. Yes
B. No

Answer: B

Explanation:
Reference:
https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-address-policies?view=exchserver-2019
Email address policies define the rules that create email addresses for recipients in your Exchange organization.
The basic components of an email address policy are:
Email address templates: Define the email address format for the recipients (for example
<firstname>@contoso.com or <lastname>.<firstname>@contoso.com).
Recipient filter: Specifies the recipients whose email addresses are configured by the policy.
Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy).
The EmailAddressPolicyEnabled parameter specifies whether to apply email address policies to this recipient. Valid values are:
$true: Email address policies are applied to this recipient. This is the default value.
$false: Email address policies aren't applied to this recipient.

NEW QUESTION 16
HOTSPOT - (Topic 5)
You have a Microsoft Exchange Server 2019 organization.
The recovery options for a user named User1 are configured as shown in the following exhibit.

```

NEW QUESTION 24
SIMULATION - (Topic 5)
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted
from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will

be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You need to ensure that all email messages in the mailbox of a user named Pradeep Gupta are retained for 90 days.
To complete this task, sign in to the Microsoft 365 admin center.
A. Mastered
B. Not Mastered

Answer: A

Explanation:
? Go to the Microsoft 365 admin center and then click Users > Active users.
? Select Pradeep Gupta.
? On the properties flyout page, click the Mail tab, and then under More actions, click Manage litigation hold.

? On the Manage litigation hold flyout page, select the Turn on litigation hold checkbox and then enter the following optional information:

 ᐨ Hold duration (days): Use this box to create a time-based hold and specify how long mailbox items are held when the mailbox is placed on Litigation hold. The duration is calculated from the date a mailbox item is received or created. When the hold duration expires for a specific item, that item will no longer be preserved. If you leave this box blank, items are preserved indefinitely or until the hold is removed. Configure 90 days.

 ᐨ Note visible to the user: Use this box to inform the user their mailbox is on Litigation hold. The note will appear on the Account Information page in the user's mailbox if they're using Outlook 2010 or later. To access this page, users can click File in Outlook.

 ᐨ Web page with more information for the user: Use this box to direct the user to a website for more information about Litigation hold. This URL appears on the Account Information page in the user's mailbox if they are using Outlook 2010 or later. To access this page, users can click File in Outlook.

Click Save changes on theLitigation hold flyout page to create the hold.

The system displays a banner saying it might take up to 240 minutes for the change to take effect.

NEW QUESTION 37
- (Topic 5)
You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All users use an email address suffix of @contoso.com.
You migrate 200 mailboxes from Server1 to Exchange Online by using Exchange PowerShell cmdlets. Users hosted on Server1 can send email messages to the migrated mailboxes.
In Microsoft 365, you create a new mailbox that uses an email address of user1@contoso.com.
When email is sent from the mailboxes hosted on Server1 to user1@contoso.com, the senders receive a non-delivery report (NDR) that contains the following text:
"550 5.1.10 RESOLVER.ADR.RecipientNotFound; Recipient not found by SMTP address lookup."
You verify that Microsoft 365 mailboxes can send email to user1@contoso.com successfully.
You delete the user account and mailbox of User1.
You need to ensure that when new mailboxes are created, all the users at your company can exchange email successfully
Which two actions should you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. From Azure AD Connect, modify the synchronization settings
B. From Server1, run the New-RemoteMailbox cmdlet
C. From Server1, run the Enable-Mailbox cmdlet
D. From the on-premises network, create new mailboxes, and then migrate the mailboxes to Microsoft 365
E. From the Exchange admin center, modify the properties of the Outbound connector

Answer: BD

Explanation:
The problem happens because the on-premise Exchange server is not aware of the existence of the mailbox created in Exchange Online. To prevent this happening, new mailboxes need to be created from the on-premise Exchange server.
You can create on Exchange Online mailbox from the on-premise server by running New- RemoteMailbox cmdlet. Alternatively, you can create a local mailbox on the on-premise server and then migrate the mailbox to Exchange Online.

NEW QUESTION 44
- (Topic 5)
You have a hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization. The deployment contains the resources shown in the following table.

Type	Quantity	Location
User mailbox	500	On-premises
Department mailbox	50	On-premises
Public folder	10	On-premises
Resource mailbox	15	On-premises

You need to migrate the mailboxes from the on-premises Exchange Server 2019 organization to Exchange Online. The department mailboxes will be migrated to shared mailboxes.
What is the minimum number of Exchange Online licenses required?

A. 500
B. 515
C. 550
D. 575

Answer: A

NEW QUESTION 49
- (Topic 5)
You have a Microsoft Exchange Online tenant.
All users are assigned only an Office 365 Enterprise E3 license.
You need to ensure that the users can use only Microsoft Outlook to connect to their Microsoft 365 mailbox when they connect from an Android device.
What should you create?

A. a conditional access policy in Azure Active Directory (Azure AD)
B. a connection filter policy in Exchange Online Protection (EOP)
C. an Outlook Web App policy in Exchange Online
D. an app protection policy in Microsoft Endpoint Manager

Answer: A

Explanation:
Office 365 Enterprise E3 includes Azure Active Directory Premium P1 which is required for Azure conditional access policies.

NEW QUESTION 51
HOTSPOT - (Topic 4)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
The Safe Attachments 1 policy applies to Alex Wilber	○	○
If an email message that contains detected malware is sent to Megan Bowen, the attachment will be removed, and the message will be delivered	○	○
For Lynne Robbins, to block both email messages and attachments that have detected malware, the priority of Safe Attachments 2 must be increased	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application, letter, email Description automatically generated
Box 1: Yes
The Safe Attachments 1 policy applies to Group1. Alex Wilber is in Group1.
Box 2: No
Megan Bowen is in Group2. The Safe Attachments 2 policy applies to Group2. The Safe Attachments 2 policy will block the email rather then remove the attachment and deliver the email.
Box 3: No
Lynne Robbins is in the Sales department which means she is a member of Group3. She is also a member of Group2 and Group4.
The Safe Attachments 2 policy blocks emails and applies to Group2. There are no other Safe Attachments policies that apply to Group3 or Group4. Therefore, Safe Attachments 2 is the only policy that applies to Lynne Robbins so you do not need to increase the priority of the policy to block the emails.

NEW QUESTION 52
HOTSPOT - (Topic 4)
You need to migrate 10 Microsoft Outlook.com users to the adatum.com tenant.
Which type of migration should you perform, and which items can be migrated? To answer, select the appropriate options in the answer area.

NEW QUESTION 75
- (Topic 5)
You have hybrid deployment between a Microsoft Exchange Online tenant and an on- premises Exchange Server 2019 organization. The deployment uses Azure AD Connect. All incoming email is delivered to Exchange Online. You have 10 mail-enabled public folders hosted on an on-premises Mailbox server.
Customers receive an error when an email message is sent to a public folder.
You need to ensure that all the mail-enabled public folders can receive email messages from the internet. The solution must ensure that messages can be delivered only to valid recipients.
Solution: From Azure AD Connect, select Exchange Mail Public Folders. Does this meet the goal?

A. Yes
B. No

Answer: A

Explanation:
From Azure AD Connect, selecting Exchange Mail Public Folders will ensure that all the mail-enabled public folders can receive email messages from the internet and that messages can be delivered only to valid recipients. This is according to the Microsoft 365 Messaging documentation (https://docs.microsoft.com/en-us/exchange/hybrid- deployment/hybrid-mail-flow).

NEW QUESTION 101
- (Topic 5)
You have a Microsoft Exchange Online tenant that uses a third-party email hygiene system named Service1. Service1 blocks all encrypted email.
All external email is routed through Service1 by using a connector.
Users classify email by using sensitivity labels. Emails classified as Secret are encrypted automatically.
You need to ensure that the users can send emails classified as Secret to external recipients.
Which two items should you create? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. a remote domain
B. a connector
C. a data loss prevention (DLP) policy
D. a mail flow rule
E. a label policy

Answer: BD

Explanation:
Use an additional Connector and a Mail Flow Rule to bypass the third-party email hygiene system for emails that have the Secret sensitivity label.
Emails with the sensitivity label will use the new connector. All other emails will use the existing connector.

NEW QUESTION 102
- (Topic 5)
You have a Microsoft 365 subscription that uses Microsoft Exchange Online Protection (EOP) with the default settings.
You need to ensure that email messages sent from the unauthorized IP addresses of any sending domain are marked as High confidence spam The solution must minimize administrative effort.
What should you do?

A. For the default anti-spam inbound policy, set SPF record: hard fail to On
B. For the default connection filter policy, add an entry to the IP Block List.
C. For the default anti-spam inbound policy, set Conditional Sender ID filtering: hard fail to On
D. Create a mail flow rule.

Answer: A

NEW QUESTION 104
- (Topic 5)
You have two servers named EXCH1 and EXCH2 that run Windows Server 2012 R2 and have Microsoft Exchange 2016 installed. You purchase a Microsoft 365 subscription. You plan to configure a hybrid deployment between an Exchange Online tenant and the on- premises Exchange Server Organization. You need to identify the prerequisites to installing the Microsoft Hybrid Agent on EXCH1 and EXCH2. Which two prerequisites should you identify? Each correct answer presents part of the solution.

A. All outbound HTTPS connections to Microsoft Online Services
B. Enable Hybrid Modern Authentication (HMA).
C. Upgrade the operating system of EXCH1 and EXCH2 to Windows Server 2019.
D. Enable TLS 1.2.

Answer: AD

Explanation:
 To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that all outbound HTTPS connections to Microsoft Online Services are allowed. This is a prerequisite for installing the Microsoft Hybrid Agent.
* D. Enable TLS 1.2. Reference: https://docs.microsoft.com/en-us/exchange/hybrid- deployment/prepare-for-hybrid-deployment explanation: To perform a hybrid deployment between an Exchange Online tenant and an on-premises Exchange Server organization, you must ensure that Transport Layer Security (TLS) 1.2 is enabled on your on-premises Exchange servers. This is a prerequisite for installing the Microsoft Hybrid Agent.

NEW QUESTION 114
SIMULATION - (Topic 5)
SIMULATION
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

You need to ensure that the users in your company can schedule a conference room named Room1 in the company's office by using Microsoft Outlook.
To complete this task, sign in to the Exchange admin center.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
? In the Exchange admin center, navigate to Recipients > Resources.
? To create a room mailbox, click New + > Room mailbox.
? Use the options on the page to specify the settings for the new resource mailbox.
- Room name: Use this box to type a name for the room mailbox. This is the name that's listed in the resource mailbox list in the Exchange admin center and in your organization's address book. This name is required and it can't exceed 64 characters.
- Alias: A room mailbox has an email address so it can receive booking requests. The email address consists of an alias on the left side of the @ symbol, which must be unique in the forest, and your domain name on the right. The alias is required.
- Location, Phone, Capacity: You can use these fields to enter details about the room. However, as explained earlier, you can include some or all of this information in the room name so users can see it.
? When you're finished, click Save to create the room mailbox.

NEW QUESTION 128
- (Topic 5)
You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.
Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application.
You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application.
What should you do?

A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.
B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.
C. Convert the service account mailboxes into shared mailboxes.
D. Convert the service account mailboxes into mail-enabled users.

User1 can book ConferenceRoom1 automatically without the approval of User4.	○	○
User2 can book ConferenceRoom1 automatically without the approval of User4.	○	○
User4 can book ConferenceRoom1 pending approval from User3.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
The BookInPolicy allows the Managers group. User1 is in the Managers group so User 1 can book ConferenceRoom1 automatically without the approval of User4.
Box 2: No
The BookInPolicy allows the Managers group. User2 is not in the Managers group so User 2 cannot book ConferenceRoom1 automatically without the approval of User4.
Box 3: No
The RequestInPolicy does not include User4. Therefore, User3 is not allowed to request to book the meeting room either with or without approval.

NEW QUESTION 179
HOTSPOT - (Topic 5)
You have a Microsoft 365 subscription that contains a user named User 1. You need to ensure that User1 can perform the following actions:
« Search all mailboxes.
+ Purge email from all mailboxes.
The solution must use the principle of least privilege.
To which role group should you add User1, and which portal should you use? To answer, select the appropriate options in the answer area.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1 = Compliance Administrator1
the role group that you should add User1 to is:
The Compliance Administrator role group grants permissions to manage compliance features in Microsoft 365, such as content search, audit log search, eDiscovery cases, and data loss prevention policies1. Members of this role group can also search all mailboxes and purge email from all mailboxes using Security & Compliance PowerShell23. This role
group uses the principle of least privilege by not granting permissions to manage other features or settings in Microsoft 3651.
Box 2 = Microsoft Purview compliance portal1. The Microsoft Purview compliance portal is a web-based portal that allows you to manage compliance features in Microsoft 365, such as content search, audit log search, eDiscovery cases, and data loss prevention policies1. You can use this portal to search all mailboxes and purge email from all mailboxes using Security & Compliance PowerShell23. You need to have the appropriate permissions to perform these tasks2

NEW QUESTION 204
SIMULATION - (Topic 5)
SIMULATION
Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s)
and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

NEW QUESTION 237
HOTSPOT - (Topic 5)
You have a Microsoft Exchange Online tenant.
Archive mailboxes are enabled for all users. You need to ensure that the default size of each user's archive mailbox increases automatically when the mailbox approaches the storage limit. The solution must apply automatically to all current and future mailboxes.
How should you complete the PowerShell command? To, answer select the appropriate options in the answer area.

Enable-Mailbox	-ArchiveQuota unlimited
Set-CASMailbox	-AutoEnableArchiveMailbox $true
Set-Mailbox	-AutoExpandingArchive
Set-OrganizationConfig	-IssueWarningQuota unlimited

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Set-Mailbox -Identity * -ArchiveQuota "Unlimited"
To ensure that the default size of each user's archive mailbox increases automatically when the mailbox approaches the storage limit and to apply the solution automatically to all
current and future mailboxes, you can use the Set-Mailbox cmdlet in PowerShell and specify the -ArchiveQuota parameter.
Here is an example of how you could complete the PowerShell command: Copy code
Set-Mailbox -Identity * -ArchiveQuota "Unlimited"
This command will set the archive mailbox size to unlimited for all mailboxes in the tenant. Please note that, when you set the archive mailbox size to unlimited, the user's mailbox will continue to grow until it reaches the available storage space in the tenant.
You could also set a specific size limit, for example: Copy code
Set-Mailbox -Identity * -ArchiveQuota "50 GB"
This command will set the archive mailbox size to 50 GB for all mailboxes in the tenant. You can then use the Get-Mailbox cmdlet to verify the new archive mailbox size for all mailboxes in the tenant:
Copy code
Get-Mailbox -Identity * | Select DisplayName, ArchiveQuota
This command will return the DisplayName and ArchiveQuota properties for all mailboxes in the tenant.

You need to reduce the likelihood that malicious links contained in emails received by mailboxes in @lab.CloudCredential(1).TenantName are opened.
To complete this task, sign in to the Exchange admin center.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
? Navigate to the Exchange Admin Center, and then choose the Advanced Threats section of the EAC.
? Click the Safe Links tab to examine all existing Safe Links policies:
? After navigating to the Safe Links policy page, choose the Add button (+) to create a new policy. The New Safe Links Policy window opens.
- In the resulting window we'll be presented with the options available for creating our new Safe Links policy.
? In Name enter an appropriate, unique, name that describes this policy. In the
description enter some text that provides a little more detail for anyone trying to make sense of the options selected here.
? Next we'll choose the action to take for URLs. We can leave this Off, if for example
we are creating a policy to exclude a group of users that would otherwise be affected by another Safe Links policy.
? The checkbox Do not track user click can be selected if you do not wish to use the
reporting functionality available at a later date. This is a key feature when understanding which users clicked a link that was later found to be a threat, so be careful about choosing to disable user click tracking.
? Our final check box provides options for click-through is a link is found to be
dangerous. In some circumstances you may trust users to click-through links, or they may request the ability to do so. In most circumstances you will not want a user to click-through the malicious link.
? Some URLs, such as those for internal addresses or even trusted partners, may
not require re-writing. Enter these URLs here.
? Finally, we will select the scope for the rule under the Applied to section.
? Using similar conditions to transport rules we can select who this rule applies to including:
- Individual recipients
- Recipient domains
- Members of distribution groups
? The same conditions can be used for exceptions. When you have configured your rule, choose Save.
After saving the new Safe Links rule it will be shown in the EAC list. Just like Transport Rules, you can use the Enabled column to enable or disable the Safe Links policy.
