

# Exam Questions MD-100

Windows 10

<https://www.2passeasy.com/dumps/MD-100/>

**NEW QUESTION 1**

- (Exam Topic 4)

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

**NEW QUESTION 2**

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the internet by using Microsoft Edge.

You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
- B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations > User Mode
- C. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational
- D. Applications and Services Logs > Microsoft > Windows > DeviceGuard > Operational

**Answer:** A

**NEW QUESTION 3**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

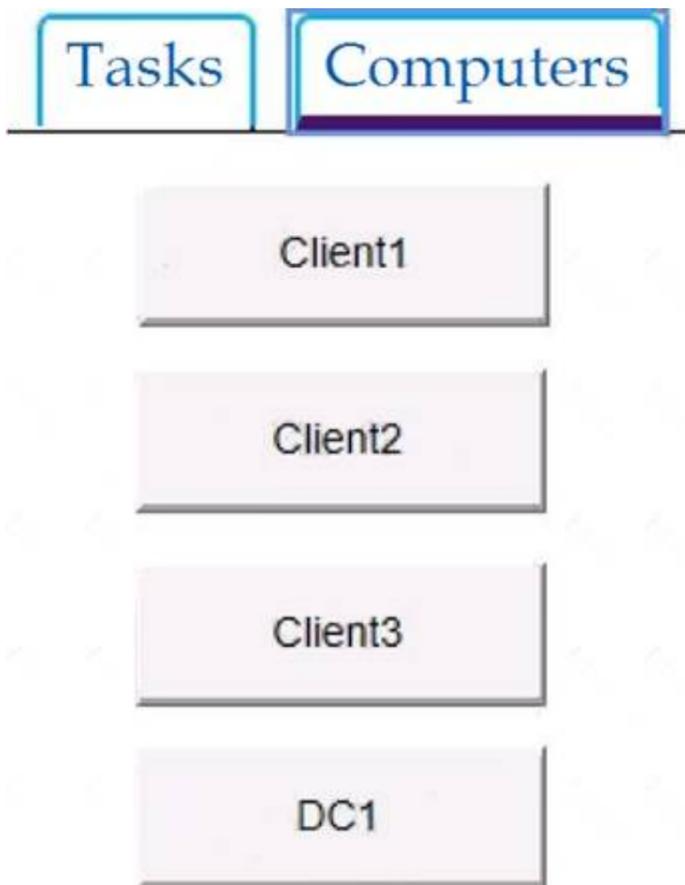

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

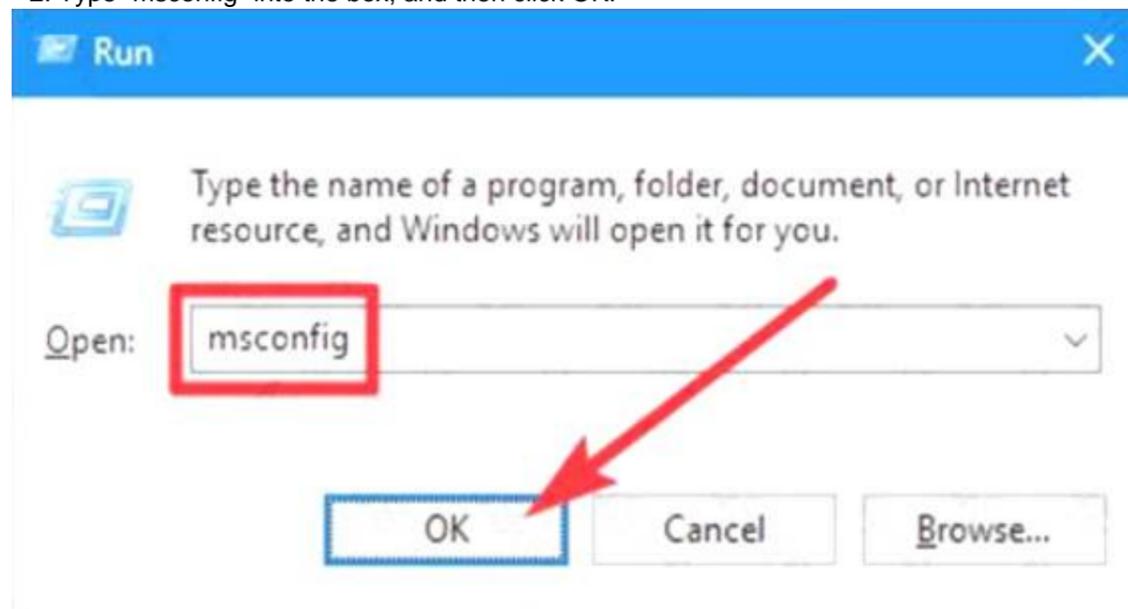

You need to ensure that Client3 starts in safe mode automatically the next time the computer restarts. After completing the task, you must NOT restart Client3. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

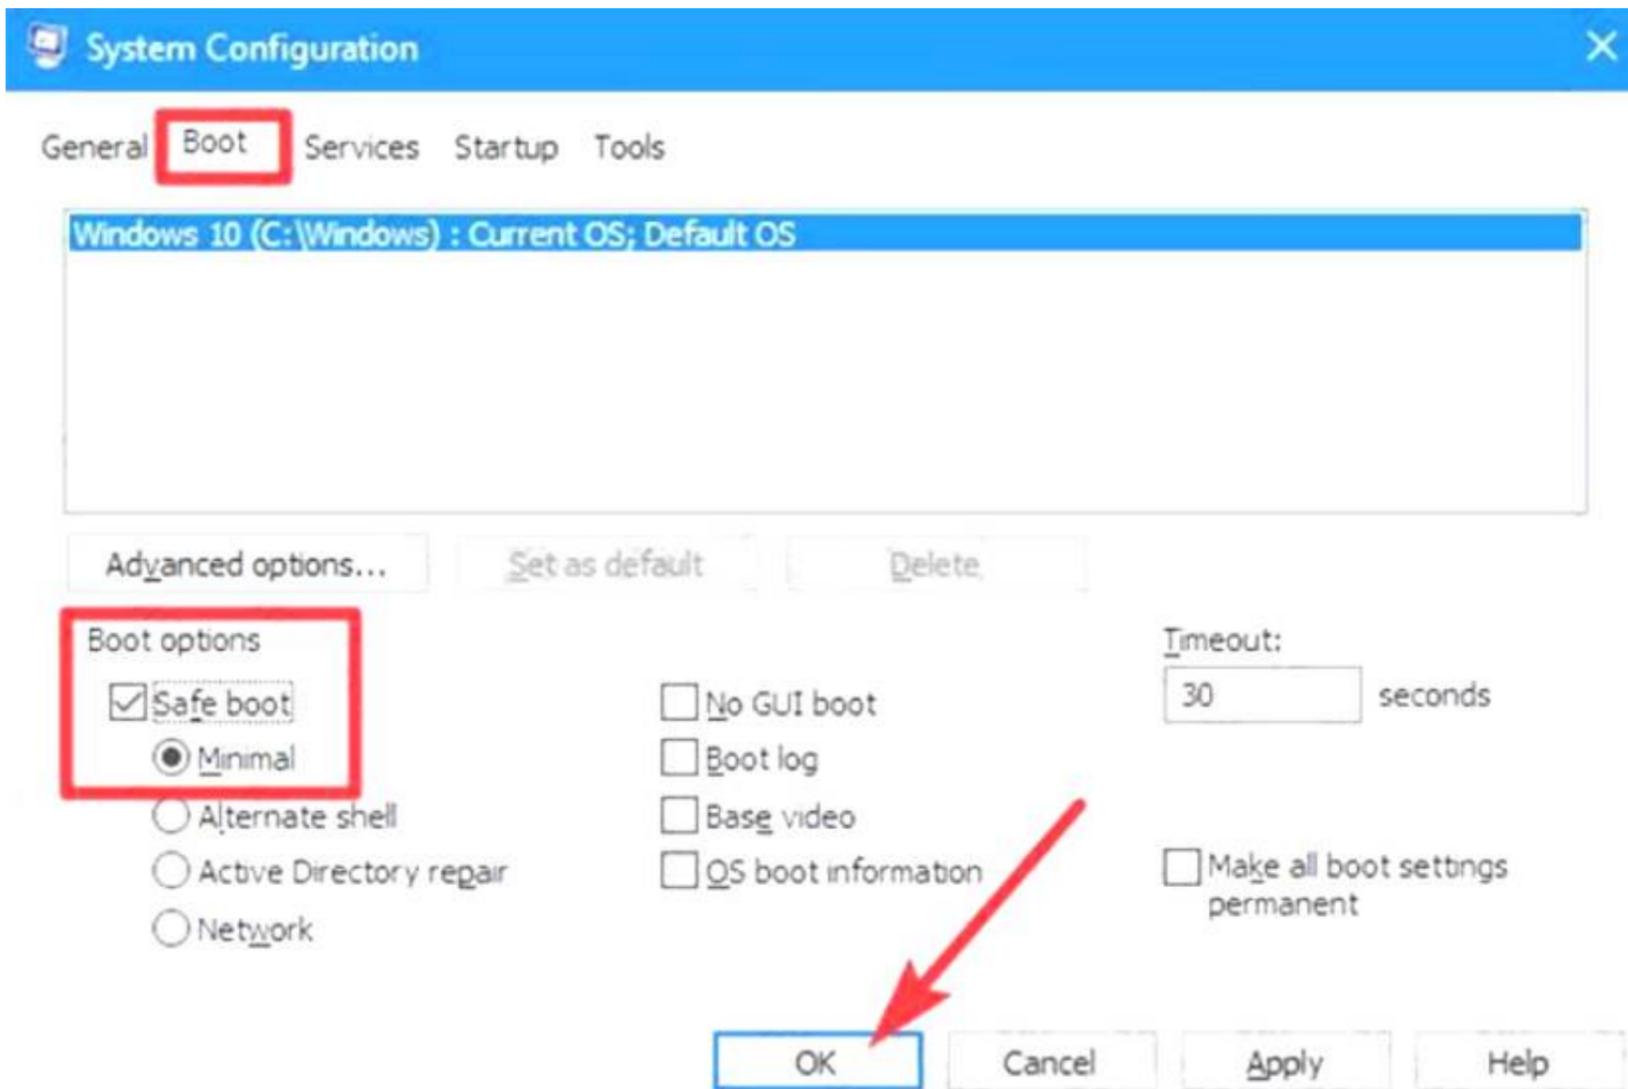

**Answer:** A

**Explanation:**

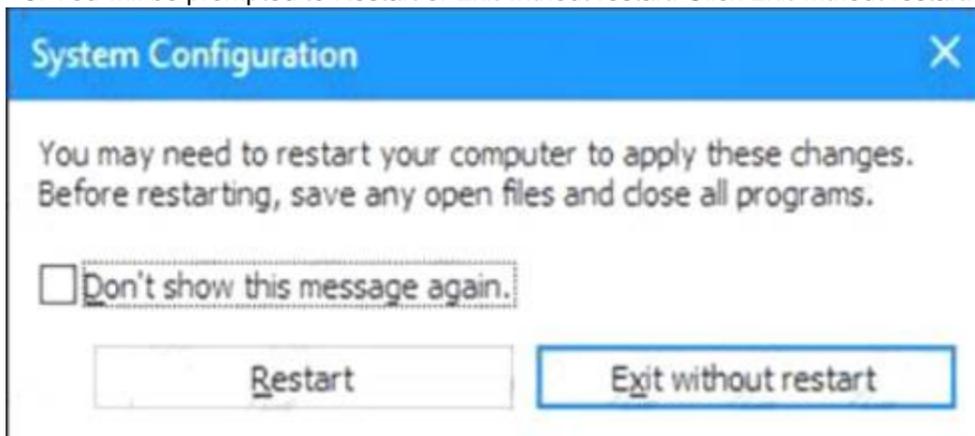

- \* 1. From Client3, open the System Configuration utility by pressing the Windows & R keys simultaneously to display the Run box .
- \* 2. Type "msconfig" into the box, and then click OK.

- \* 3. In the "System Configuration" window, switch to the "Boot" tab.
- \* 4. Enable the "Safe Boot" check box, and then make sure the "Minimal" option below that is selected. Click the "OK" button when you're done.

\* 5. You will be prompted to Restart or Exit without restart. Click Exit without restart.

**NEW QUESTION 4**

- (Exam Topic 4)

You have computers that run Windows 10. The computers are joined to an Azure Active Directory (Azure AD) tenant and enrolled in Microsoft Intune. You need to recommend a solution for help desk administrators that meets the following requirements:

- > The administrators must assist users remotely by connecting to each user's computer.
- > The remote connections must be initiated by the administrators. The users must approve the connection.
- > Both the users and the administrators must be able to see the screen of the users' computer.
- > The administrators must be able to make changes that require running applications as a member of each computer's Administrators group.

Which tool should you include in the recommendation?

- A. Remote Desktop
- B. Intune
- C. Remote Assistance
- D. Quick Assist

**Answer: B**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/mem/intune/remote-actions/remote-assist-mobile-devices>

**NEW QUESTION 5**

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant. Some users sign in to their computer by using Windows Hello for Business. A user named User1 purchases a new computer and joins the computer to Azure AD. User1 attempts to configure the sign-in options and receives the error message shown in the exhibit.

## Sign-in options

\*Some settings are hidden or managed by your organization.

Sign in to Windows, apps and services by teaching Windows to recognize you.

Windows Hello isn't available on this device.

[See how it works and find compatible devices.](#)

You open Device Manager and confirm that all the hardware works correctly.

You need to ensure that User1 can use Windows Hello for Business facial recognition to sign in to the computer.

What should you do first?

- A. Purchase an infrared (IR) camera.
- B. Upgrade the computer to Windows 10 Enterprise.
- C. Enable UEFI Secure Boot.
- D. Install a virtual TPM driver.

**Answer: B**

### Explanation:

### NEW QUESTION 6

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

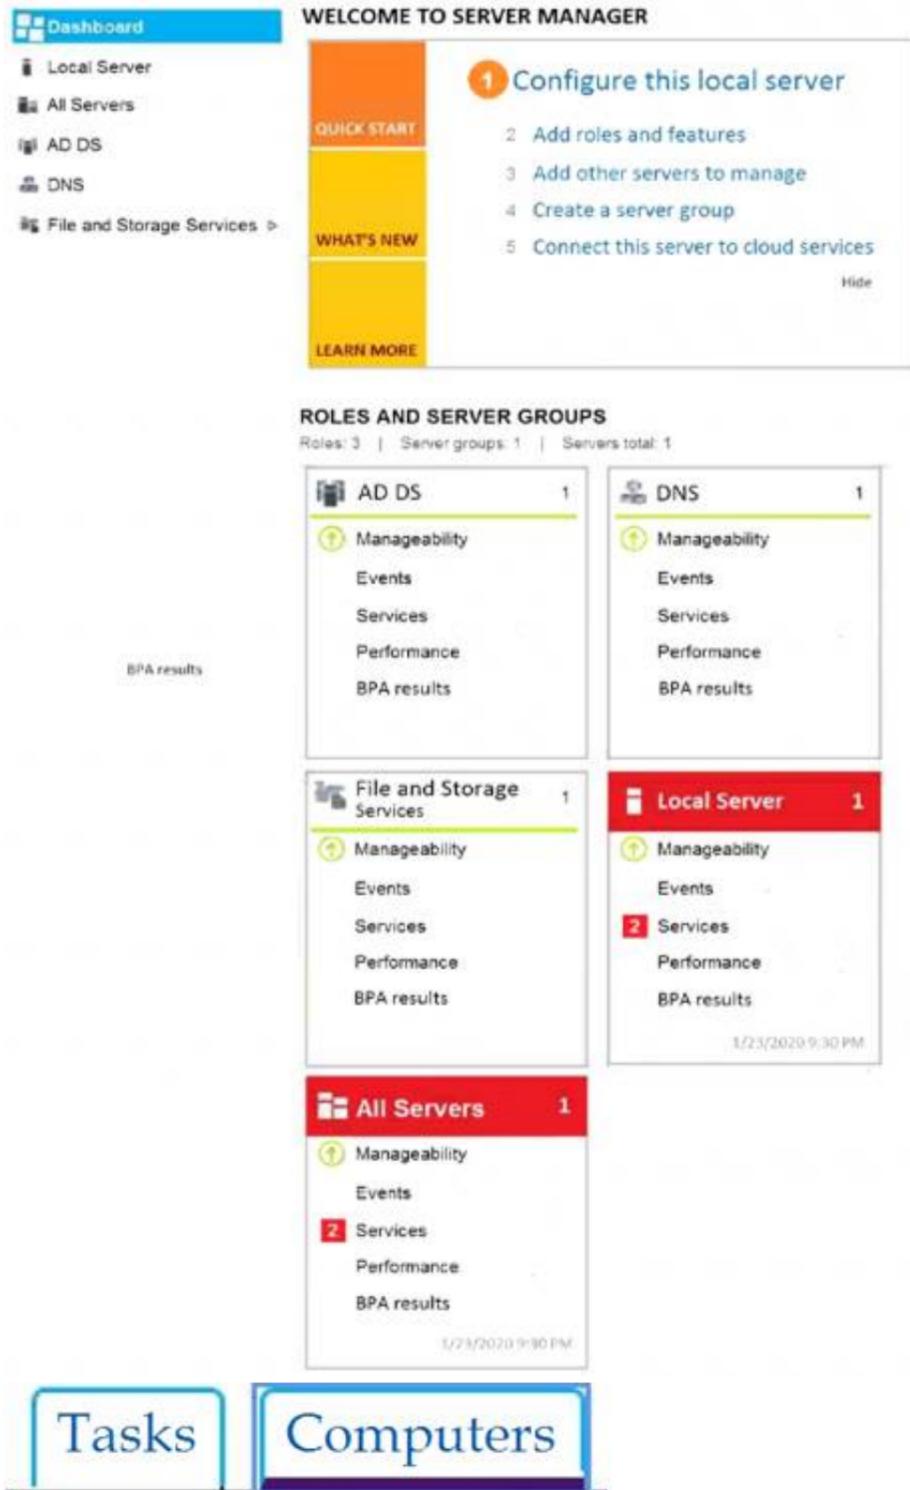

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

Users in the Finance group report that they cannot copy files to Client1\Finance. You need to resolve the issue. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

- Open File Explorer.
- Browse and find the file or folder you want to have full access.
- Right-click it, and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.

- On the "Advanced Security Settings" page, you need to click the Change link, in the Owner's field.
- Click the Advanced button.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- Click Apply.
- Click OK.
- Click OK again.
- Click OK one more time to complete this task.

It's important to note that if you're taking ownership of a folder, you can check the Replace ownership on subcontainers and object option in the Advanced Security Settings page to take control of the subfolders inside of the folder.

Now you'll need to grant full access control to your account, to do this use the following steps:

- Right-click the file or folder and select Properties.
- Click the Security tab to access the NTFS permissions.
- Click the Advanced button.
- Under the Permissions tab, click Add.
- Click Select a principal to add your user account.
- On the "Select User or Group" page, click the Find Now button.
- From the search result, select your user account, and click OK.
- On the "Select User or Group" page, click OK.
- On "Permission Entry", check the Full control option.
- Click OK.
- Click OK.
- Click Apply.
- Click OK.
- Click OK to close the file or folder properties to complete the task.

You can now assign the necessary permissions to the Finance group.

If you right-click on a file or folder, choose Properties and click on the Security tab, we can now try to edit some permissions. Go ahead and click the Edit button to get started.

At this point, there are a couple of things you can do. Firstly, you'll notice that the Allow column is probably greyed out and can't be edited. This is because of the inheritance I was talking about earlier. However, you can check items on the Deny column.

When you click the Add button, you have to type in the user name or group name into the box and then click on Check Names to make sure it's correct. If you don't remember the user or group name, click on the Advanced button and then just click Find Now. It will show you all the users and groups.

Click OK and the user or group will be added to the access control list. Now you can check the Allow column or Deny column.

Tasks Computers

A web service installed on Client1 is used for testing. You discover that users cannot connect to the web service by using HTTP. You need to allow inbound HTTP connections to Client1. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

To create an inbound port rule

- > In the navigation pane, click Inbound Rules.
- > Click Action, and then click New rule.
- > On the Rule Type page of the New Inbound Rule Wizard, click Custom, and then click Next.
- > On the Program page, click All programs, and then click Next.
- > On the Protocol and Ports page, select the protocol type that you want to allow. To restrict the rule to a specified port number, you must select either TCP or UDP. Because this is an incoming rule, you typically configure only the local port number. TCP port 80. When you have configured the protocols and ports, click Next.
- > On the Scope page, you can specify that the rule applies only to network traffic to or from the IP addresses entered on this page. Configure as appropriate for your design, and then click Next.
- > On the Action page, select Allow the connection, and then click Next.
- > On the Profile page, select the network location types to which this rule applies, and then click Next.
- > On the Name page, type a name and description for your rule, and then click Finish.

**NEW QUESTION 8**

- (Exam Topic 4)

You have the computers shown in the following table.

Name	Windows 10 edition	Servicing channel
Computer1	Windows 10 Education	Semi-annual
Computer2	Windows 10 Pro	Semi-annual
Computer3	Windows 10 Enterprise	Semi-annual

You apply the 20H2 feature update as soon as the update is available.

How many months of servicing does each computer support without installing another feature update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1:

6 months  
12 months  
18 months  
30 months

Computer2:

6 months  
12 months  
18 months  
30 months

Computer3:

6 months  
12 months  
18 months  
30 months

- A. Mastered
- B. Not Mastered

**Answer:** A**Explanation:**

Table Description automatically generated with medium confidence

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2.

Solution: On Computer2, you create a Windows Defender Firewall rule that allows eventvwr.exe. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/previous-versions/windows/it-pro/windows-server-2008-R2-and-2008/cc76643>**NEW QUESTION 10**

- (Exam Topic 4)

You have a Microsoft 365 Enterprise E3 license.

You have a computer named Computer1 that runs Windows 10.

You need to ensure that you can access the files on Computer1 by using a web browser on another computer. What should you configure?

- A. Sync your settings in the Settings app
- B. the File Explorer desktop app
- C. the Microsoft OneDrive desktop app
- D. Default apps in the Settings app

**Answer:** C**NEW QUESTION 10**

- (Exam Topic 4)

You have 20 computers that run Windows 10. The computers are in a workgroup.

You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.

What should you do?

- A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.

- B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.
- C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.
- D. Create a script that runs the New-MsolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

**Answer:** A

**Explanation:**

<https://blogs.technet.microsoft.com/askpfeplat/2017/11/06/use-group-policy-preferences-to-manage-the-local-ad>

**NEW QUESTION 14**

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled. You need to create a custom Windows Sandbox configuration file. Which file extension should you use?

- A. .ps
- B. .json
- C. .wsb
- D. .xml

**Answer:** C

**NEW QUESTION 16**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

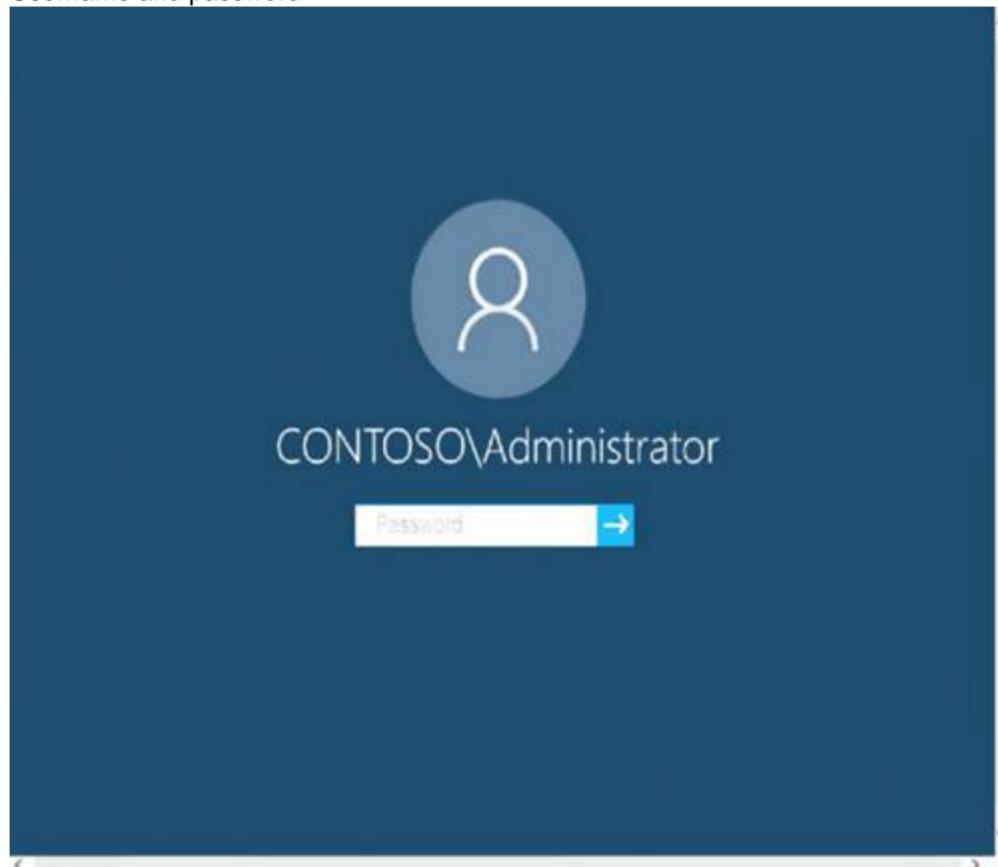

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

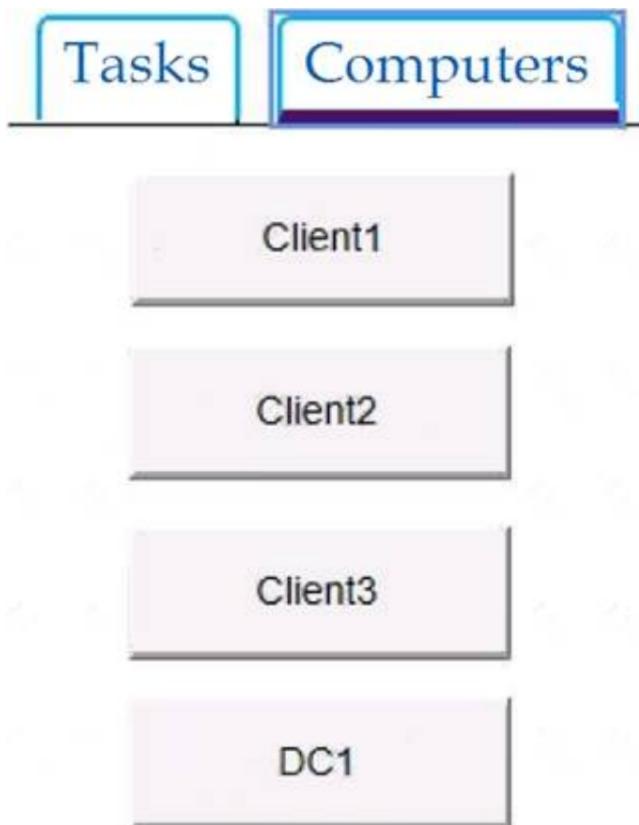

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a group named Group2 on Client2. The members of Group2 must be able to change the system time. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- > On Client2, Press Windows+R
- > Type lusrmgr.msc
- > Right click Groups and click New Group.
- > Type in the Group name and a description.
- > Click Add to add members to this group. Specify the name of the user or group or computer to be added.
- > Click Create and Close.
- > Press the Win + R keys to open Run, type secpol.msc into Run, and click/tap on OK to open Local Security Policy.
- > Expand open Local Policies in the left pane of Local Security Policy, click/tap on User Rights Assignment, and double click/tap on the Change the system time policy in the right pane.
- > Click/tap on the Add User or Group button.
- > Click/tap on the Object Types button.
- > Check all the boxes for Object types, and click/tap on the OK.
- > Click/tap on the Advanced button.
- > Click/tap on the Find Now button, select the name of the user or group
- > Click/tap on OK.
- > Click/tap on OK.
- > When finished, you can close Local Users and Groups.

**NEW QUESTION 21**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

**NEW QUESTION 24**

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 10 and has Windows Sandbox enabled.

You create a script named Script1.cmd. On Client1, you save Script1.cmd to a folder named C:\Scripts. You need to ensure that when you sign in to Windows Sandbox, Script1.cmd runs automatically.

How should you complete the configuration file? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

```
<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
    </LogonCommand>
  </Configuration>
```

The screenshot shows two dropdown menus. The first dropdown, under the path 'C:\Users\' in the XML, contains the options: Administrator, Guest, and WDAGUtilityAccount. The second dropdown, under the path '\', contains the options: C\$\Scripts, Desktop\Scripts, and Scripts. The XML code is partially filled out with these paths.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

```
<Configuration>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\Scripts</HostFolder>
      <ReadOnly>>true</ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\Users\
    </LogonCommand>
  </Configuration>
```

The screenshot is identical to the one above, but with red rectangular boxes highlighting the 'Administrator' option in the first dropdown menu and the 'C\$\Scripts' option in the second dropdown menu, indicating the correct selections for the answer.

**NEW QUESTION 29**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com.

A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----

PRIVELEGES INFORMATION
-----
Privilege Name                                     Description
=====
SeShutdownPrivilege                               Shut down the system
SeChangeNotifyPrivilege                           Bypass traverse checking
SeUndockPrivilege                                 Remove computer from docking statio
SeIncreaseWorkingSetPrivilege                     Increase a process working set
SeTimeZonePrivilege                               Change the time zone

C:\Users\admin1>
    
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

On Computer1, if Admin1 attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

On Computer1, if Admin1 attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
the command prompt will open without a prompt

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

On Computer1, if Admin attempts to open Device Manager, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

On Computer1, if Admin attempts to run the command prompt as an administrator, [answer choice].

▼
Admin1 will be prompted for credentials
Admin1 will be prompted for consent
Admin1 will be denied access
Device Manager will open without a prompt

**NEW QUESTION 32**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.  
 A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.  
 You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User3 on Computer1.  
 Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges. User3 is a domain administrator. References:  
<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 33**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a workgroup computer that runs Windows 10. The computer contains the local user accounts shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users
User3	Users

You need to configure the desktop background for User1 and User2 only.  
 Solution: You create a new local group to which you add User1 and User2. You create a local Group Policy Object (GPO) and configure the Desktop Wallpaper setting in the GPO. At a command prompt, you run the gpupdate.exe/Force command.  
 Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:  
<https://www.windowscentral.com/how-apply-local-group-policy-settings-specific-users-windows-10>

**NEW QUESTION 36**

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- > The configuration must be managed from a central location.
- > Internet traffic must be minimized.
- > Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)  
 Microsoft System Center Configuration Manager  
 Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)  
 Microsoft System Center Configuration Manager  
 Microsoft Intune

Manage the traffic by using:

Delivery Optimization  
 BranchCache  
 Peer cache

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

**NEW QUESTION 41**

- (Exam Topic 4)

You are troubleshooting an issue that prevents you from installing Windows 10 updates. You discover that the issue relates to corrupt protected system files. You need to restore the corrupt system files. Which command should you run?

- A. scanstate
- B. sfc
- C. chkdsk
- D. chknfs

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-us/topic/use-the-system-file-checker-tool-to-repair-missing-or-corrupted-syste>

**NEW QUESTION 45**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the Enable-PSRemoting cmdlet.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

The Enable-PSRemoting cmdlet configures the computer to receive PowerShell remote commands that are sent by using the WS-Management technology.

References:

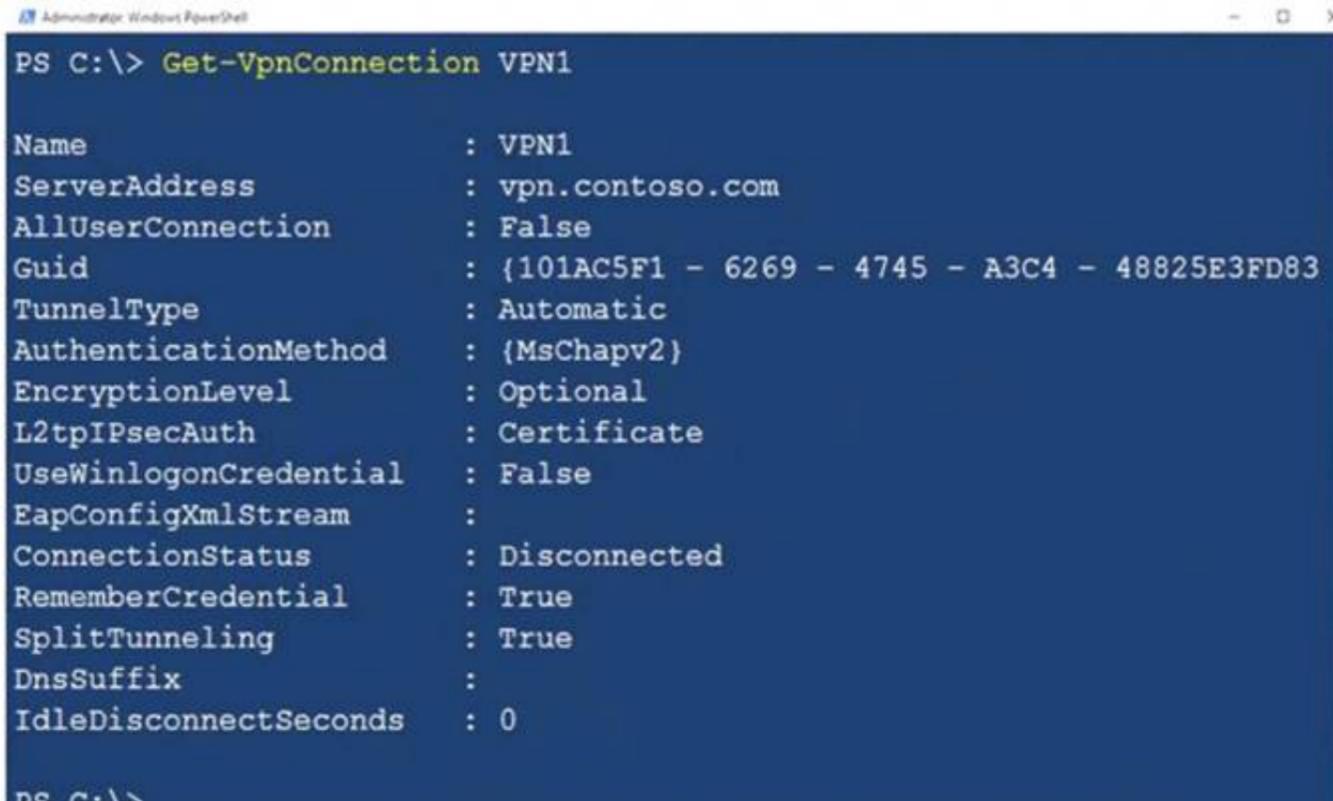

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

**NEW QUESTION 47**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

On Computer1, you create a VPN connection as shown in the following exhibit.

```
PS C:\> Get-VpnConnection VPN1

Name                : VPN1
ServerAddress       : vpn.contoso.com
AllUserConnection  : False
Guid                : {101AC5F1 - 6269 - 4745 - A3C4 - 48825E3FD83}
TunnelType         : Automatic
AuthenticationMethod : {MsChapv2}
EncryptionLevel    : Optional
L2tpIPsecAuth      : Certificate
UseWinlogonCredential : False
EapConfigXmlStream :
ConnectionStatus   : Disconnected
RememberCredential : True
SplitTunneling     : True
DnsSuffix           :
IdleDisconnectSeconds : 0

PS C:\>
```

The corporate network contains a single IP subnet.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

VPN1 can use protocols [answer choice] to establish a VPN connection.

▼
PPTP and L2TP only
L2TP and SSTP only
L2TP, SSTP, and IKEv2 only
PPTP, L2TP, SSTP, and IKEv2

[Answer choice] will be routed through the VPN connection.

▼
Only traffic for the internet
Only traffic for the corporate network
Traffic the Internet and the corporate network

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

VPN1 can use protocols [answer choice] to establish a VPN connection.

▼
PPTP and L2TP only
L2TP and SSTP only
L2TP, SSTP, and IKEv2 only
PPTP, L2TP, SSTP, and IKEv2

[Answer choice] will be routed through the VPN connection.

▼
Only traffic for the internet
Only traffic for the corporate network
Traffic the Internet and the corporate network

**NEW QUESTION 50**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:

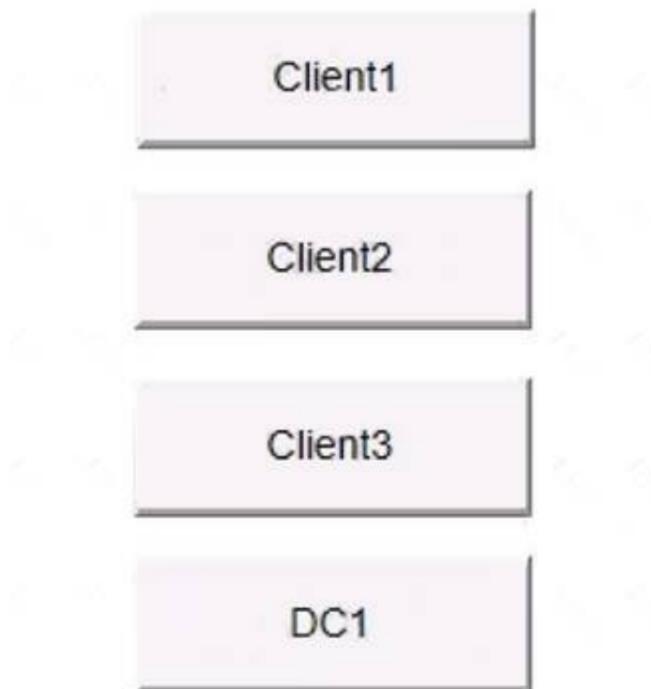

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only:

Lab Instance: 10921597

You need to create a file named File1.txt in a folder named Folder1 on the C drive of Client2. You need to ensure that a user named User1 can read the contents of File1.txt. The solution must prevent User1 from modifying the file.

To complete this task, sign in to Client2 and perform the required action.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- After creating File1.txt in Folder1, right-click the file and select Properties.
- Access the Security tab, click Disable inheritance
- Click on Remove all inherited permissions from this object, click Apply, and select Yes in the dialog box that appears.
- Click OK
- Back on the Security tab select Edit to change permissions.
- Click Add, then enter User1 in the Enter the object names to select section.
- Click Check Names, and then click OK.
- Check only the Read box in the Allow column.
- Click apply, Ok, and OK

**NEW QUESTION 53**

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant.

The company plans to purchase computers preinstalled with Windows 10 Pro for all users. The company the following requirements:

- The new computers must be upgraded to Windows 10 Enterprise automatically.
- The new computers must be joined to Azure AD automatically when the user starts the new computers for the first time.
- The users must not be required to accept the End User License Agreement (EULA).

You need to deploy the new computers. What should you do?

- A. Make use of the wipe and load refresh deployment method.
- B. Perform in-place upgrade on the new computers.
- C. Provide provisioning packages for the new computers.
- D. Make use of Windows Autopilot.

**Answer:** D

**Explanation:**

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices.

The OEM Windows 10 installation on the new computers can be transformed into a "business-ready" state, applying settings and policies, installing apps, and even changing the edition of Windows 10 being used (e.g. from Windows 10 Pro to Windows 10 Enterprise) to support advanced features.

The only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

**NEW QUESTION 56**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You restart Computer1 by using Advanced startup and select Boot log. In which folder is the boot log file stored?

- A. C:\
- B. C:\Windows
- C. C:\Windows\debug
- D. C:\Windows\System32\LogFiles

**Answer: B**

**Explanation:**

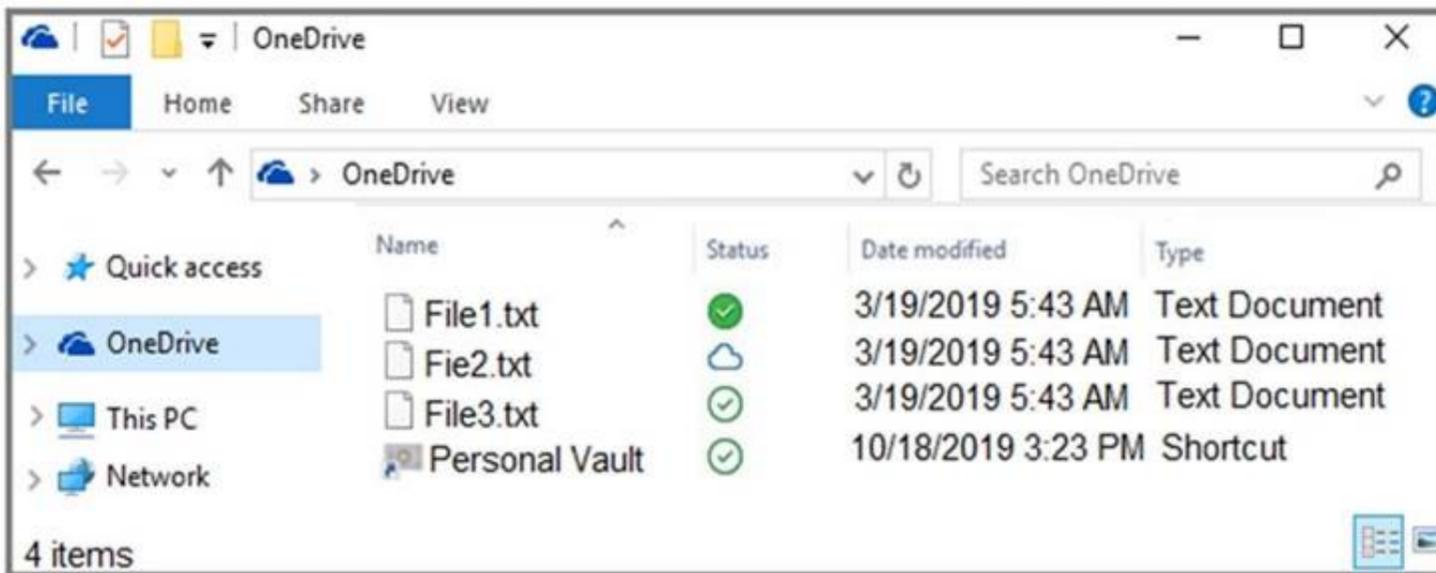

Reference:

<https://winaero.com/enable-boot-log-windows-10/>

**NEW QUESTION 59**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. From File Explorer, you open OneDrive as shown in the following exhibit.

Use the drop-down menus to select the answer choice that answers each question based on the information presented on the graphic. NOTE: Each correct selection is worth one point.

**Answer Area**

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

- File2.txt only
- File1.txt and File2.txt only
- File2.txt and File3.txt only
- File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

- File1.txt only
- File1.txt and File2.txt only
- File1.txt and File3.txt only
- File1.txt, File2.txt, and File3.txt

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

If Computer1 fails, which files will you be able to recover from Microsoft OneDrive?

- File2.txt only
- File1.txt and File2.txt only
- File2.txt and File3.txt only
- File1.txt, File2.txt, and File3.txt

If the network adapter on Computer1 fails, which files will you be able to access on Computer1?

- File1.txt only
- File1.txt and File2.txt only
- File1.txt and File3.txt only
- File1.txt, File2.txt, and File3.txt

**NEW QUESTION 61**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Several users have signed in to Computer1 and have a profile.

You create a taskbar modification file named LayoutModification.xml.

You need to ensure that LayoutModification.xml will apply to all users who sign in to Computer1. To which folder should you copy LayoutModification.xml?

- A. C:\Users\Public\Public Desktop
- B. C:\Windows\ShellExperiences
- C. C:\Users\Default\AppData\Local\Microsoft\Windows\Shell\
- D. C:\Windows\System32\Configuration

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/start-layout-xml-desktop>

**NEW QUESTION 62**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. You need to ensure that a local user named User1 can establish a Remote Desktop connection to Client2. To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Add User to Remote Desktop Users Group via Settings App

- > Open the Settings app on Client2 and go to System -> Remote Desktop. Click on the Select users that can remotely access this PC link on the right side.
- > When the Remote Desktop Users dialog opens, click on Add.
- > Click on Advanced.
- > Click on Find Now and then select any user account you want to add to the "Remote Desktop Users" group, and click OK.
- > Click OK and you're done.

**NEW QUESTION 63**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile.

On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.

Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Actions**

Run scanstate.exe and specify the C:\Users subfolder.

Run loadstate.exe and specify the C:\Users subfolder.

Run scanstate.exe and specify the C:\Windows.old subfolder.

Run loadstate.exe and specify the C:\Windows.old subfolder.

Run usmutils.exe and specify the C:\Users subfolder.

Run usmutils.exe and specify the C:\Windows.old subfolder.

**Answer Area**

First action:

Action

Second action:

Action

**NEW QUESTION 66**

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with new computers that run Windows 10 Enterprise. All users have Microsoft 365 E3 licenses.

A user named Mia Hamm has an Active Directory user account named MHammm and a computer named Computer1. Mia Hamm reports that Computer1 is not activated.

You need to ensure that Mia Hamm can activate Computer1. What should you do?

- A. Assign a Windows 10 Enterprise license to MHammm, and then activate Computer1.
- B. From the Microsoft Deployment Toolkit (MDT), redeploy Computer1.
- C. From System Properties on Computer1, enter a Volume License Key, and then activate Computer1.
- D. Instruct Mia Hamm to perform a local AutoPilot Reset on Computer1, and then activate Computer1.

**Answer: C**

**NEW QUESTION 70**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. Computer Management
- B. dsregcmd.exe
- C. the Settings app
- D. netdom.exe

**Answer: C**

**Explanation:**

You join a computer to a domain, including an Azure AD domain in the Settings panel in Windows 10, under System->About

References: <https://aadguide.azurewebsites.net/aadjoin/>

**NEW QUESTION 73**

- (Exam Topic 4)

You install Windows 10 Enterprise on a new computer. You need to force activation on the computer.

Which command should you run?

- A. slmgr /upk
- B. Sec-RDLicenseConfiguration -Force
- C. Sec-MsolLicense -AddLicense
- D. slmgr /ato

**Answer: D**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

**NEW QUESTION 78**

- (Exam Topic 4)

You are planning a recovery strategy for computers that run Windows 10.

You need to create recovery procedures to roll back feature updates and quality updates.

What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

<input type="checkbox"/> Recovery from the Settings app <input type="checkbox"/> Windows Update from the Settings app <input type="checkbox"/> Programs and Features from the Control Panel <input type="checkbox"/> Troubleshoot from the Settings app
--

To roll back quality updates:

<input type="checkbox"/> Recovery from the Settings app <input type="checkbox"/> Windows Update from the Settings app <input type="checkbox"/> Programs and Features from the Control Panel <input type="checkbox"/> Troubleshoot from the Settings app
--

- A. Mastered
- B. Not Mastered

**Answer: A**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. You need to enable boot logging on Computer1. What should you do?

- A. At a command prompt, run the bcdboot.exe command and specify the /v parameter.
- B. From the Settings app, configure the Start settings.
- C. From System Properties in Control Panel, configure the Startup and Recovery settings.
- D. From System Configuration configure the Boot settings.

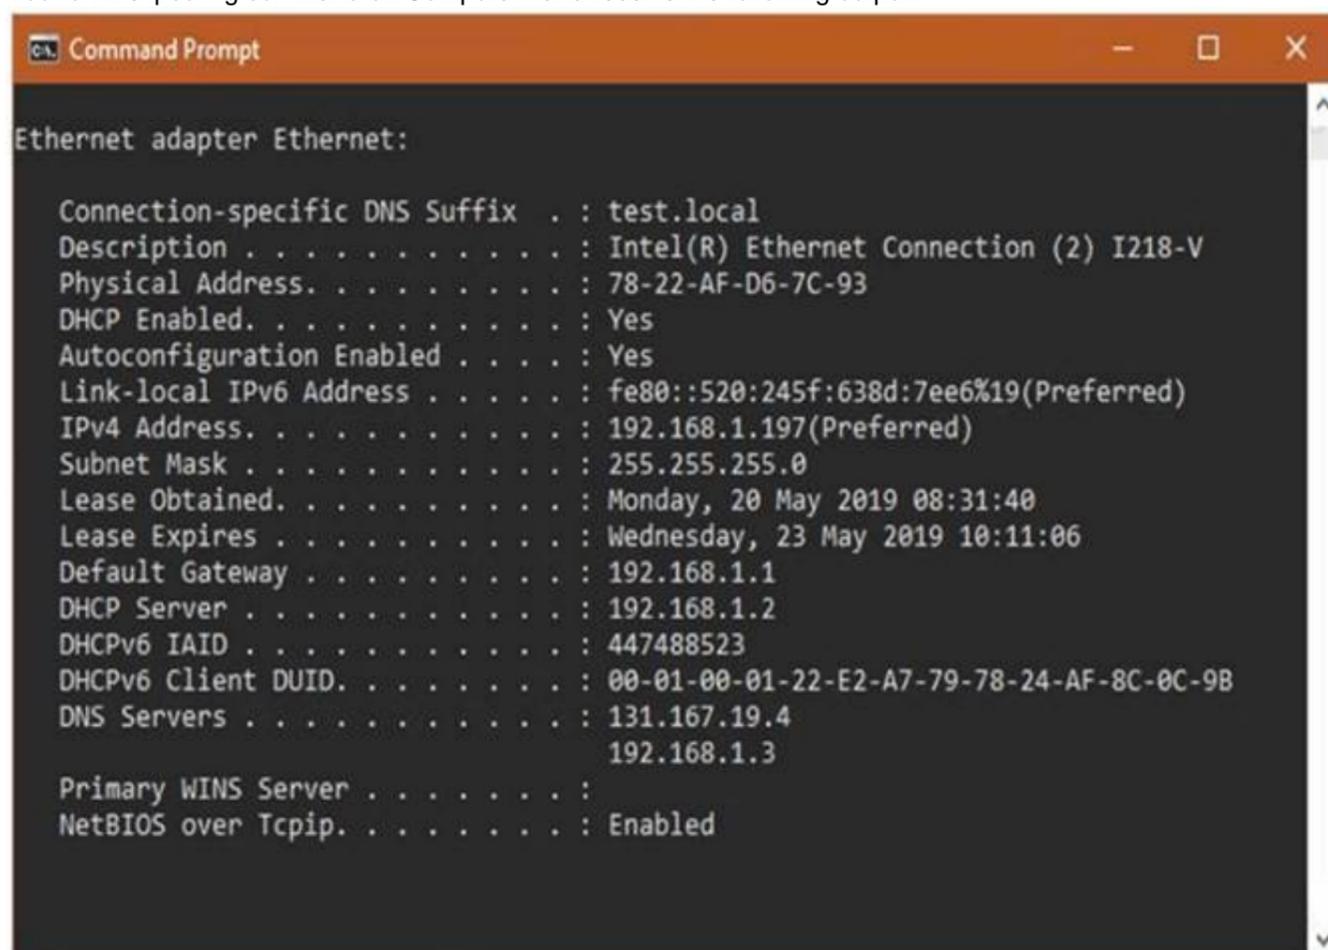

**Answer:** D**Explanation:**

Reference:

<https://www.windowscentral.com/how-enable-boot-log-windows-10>**NEW QUESTION 85**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. A user named Mia Hamm has a computer named Computer1. Mia Hamm reports that when she logs on to Computer1, she cannot access servers on the network but she can access computers on the internet. You run the ipconfig command on Computer1 and receive the following output.

```
Command Prompt

Ethernet adapter Ethernet:

    Connection-specific DNS Suffix  . : test.local
    Description . . . . . : Intel(R) Ethernet Connection (2) I218-V
    Physical Address. . . . . : 78-22-AF-D6-7C-93
    DHCP Enabled. . . . . : Yes
    Autoconfiguration Enabled . . . . : Yes
    Link-local IPv6 Address . . . . . : fe80::520:245f:638d:7ee6%19(Preferred)
    IPv4 Address. . . . . : 192.168.1.197(Preferred)
    Subnet Mask . . . . . : 255.255.255.0
    Lease Obtained. . . . . : Monday, 20 May 2019 08:31:40
    Lease Expires . . . . . : Wednesday, 23 May 2019 10:11:06
    Default Gateway . . . . . : 192.168.1.1
    DHCP Server . . . . . : 192.168.1.2
    DHCPv6 IAID . . . . . : 447488523
    DHCPv6 Client DUID. . . . . : 00-01-00-01-22-E2-A7-79-78-24-AF-8C-0C-9B
    DNS Servers . . . . . : 131.167.19.4
                           192.168.1.3
    Primary WINS Server . . . . . :
    NetBIOS over Tcpip. . . . . : Enabled
```

You successfully ping the default gateway, the DNS servers, and the DHCP server. You need to resolve the connectivity problem on Computer1. Which setting should you configure? To answer, select the appropriate options in the answer area.

Internet Protocol Version 4 (TCP/IPv4) Properties

General Alternate Configuration

You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings.

Obtain an IP address automatically  
 Use the following IP address:

IP address: [ . . . ]  
Subnet mask: [ . . . ]  
Default gateway: [ . . . ]

Obtain DNS server address automatically  
 Use the following DNS server addresses:

Preferred DNS server: [ 131 . 167 . 19 . 4 ]  
Alternate DNS server: [ 192 . 168 . 1 . 3 ]

Validate settings upon exit

Advanced...

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface Description automatically generated

The preferred DNS server is located on the internet as it has a public IP Address. The local DNS server should be the preferred DNS server. We could manually change the preferred and alternate DNS server addresses or we could select the "Obtain DNS server address automatically" option to have the DNS servers configured through DHCP.

**NEW QUESTION 90**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have two computers named Computer1 and Computer2 that run Windows 10.

You have an Azure Active Directory (Azure AD) user account named admin@contoso.com that is in the local Administrators group on each computer.

You sign in to Computer1 by using admin@contoso.com.

You need to ensure that you can use Event Viewer on Computer1 to connect to the event logs on Computer2. Solution: On Computer2, you run the winrm quickconfig command.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Windows Remote Management is a component of the Windows Hardware Management features that manage server hardware locally and remotely.

References:

<https://docs.microsoft.com/en-us/windows/win32/winrm/about-windows-remote-management>

**NEW QUESTION 94**

- (Exam Topic 4)

You are troubleshooting the failed installation of a VPN application on a device. During the installation, the application displays a Stop error, and you must restart the device. After the restart you discover that the device can no longer connect to the network. What should you use to resolve the issue?

- A. Network reset
- B. Network Adapter troubleshooter
- C. Incoming Connections troubleshooter
- D. Remote Assistance

**Answer:** B

**NEW QUESTION 97**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. You must ensure that Windows BitLocker Drive Encryption is enabled on all client computers, even though a Trusted Platform Module (TPM) chip is installed in only some of them. You need to accomplish this goal by using one Group Policy object (GPO). What should you do?

- A. Enable the Allow enhanced PINs for startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- B. Enable the Enable use of BitLocker authentication requiring preboot keyboard input on slates policy setting, and select the Allow BitLocker without a compatible TPM check box
- C. Enable the Require additional authentication at startup policy setting, and select the Allow BitLocker without a compatible TPM check box
- D. Enable the Control use of BitLocker on removable drives policy setting, and select the Allow BitLocker without a compatible TPM check box

**Answer: C**

**Explanation:**

We need to allow Windows BitLocker Drive Encryption on all client computers (including client computers that do not have Trusted Platform Module (TPM) chip). We can do this by enabling the option to allow BitLocker without a compatible TPM in the group policy. The "Allow BitLocker without a compatible TPM" option is a checkbox in the "Require additional authentication at startup" group policy setting. To access the "Allow BitLocker without a compatible TPM" checkbox, you need to first select Enabled on the "Require additional authentication at startup" policy setting.

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/bitlocker/bitlocker-group-policy-setti>

**NEW QUESTION 99**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. The relevant services on Computer1 are shown in the following table.

Name	Startup type	Status	Dependent on
Service1	Automatic	Stopped	Service2, Service3
Service2	Automatic	Stopped	Service6
Service3	Disabled	Running	None
Service4	Disabled	Stopped	Service5
Service5	Automatic	Running	None
Service6	Manual	Stopped	None

Which service will start after you restart Computer1?

- A. Service3 and Services only
- B. Service 1, Service2, and Services
- C. Service2, Service6, and Service5
- D. Services only

**Answer: C**

**Explanation:**

Service1 cannot start because it is dependent on Service3 which is disabled.  
 Service2 will start because it is set to Automatic. Service2 starting will cause Service6 to start. Service3 will not start because it is disabled.  
 Service4 will not start because it is disabled.  
 Service5 will start because it is set to Automatic and is not dependent on any other services. Service6 will start because Service2 is dependent on Service6.

**NEW QUESTION 103**

- (Exam Topic 4)

You have a computer named Client1 that runs Windows 11 Home. You need to ensure that you can create virtual machines on Client1. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

- Restart the operating system
- Enter a Windows 11 Pro product key
- Enter a Windows 11 Enterprise product key
- From Programs and Features, enable the Hyper-V Windows feature
- From the Activation settings in the Settings app, select **Change product key**

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Graphical user interface, application Description automatically generated

**NEW QUESTION 104**

- (Exam Topic 4)

You have a computer that runs Windows 10. You view the domain services status as shown in the following exhibit.

```

-----+-----

```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

Microsoft Edge is configured by using [answer choice].

<input type="text" value="a Group Policy object (GPO)"/>
<input type="text" value="Microsoft Intune"/>
<input type="text" value="the Internet Explorer Administration Kit (IEAK)"/>

The computer is [answer choice].

<input type="text" value="enrolled in Microsoft Intune"/>
<input type="text" value="managed by using Endpoint Configuration Manager"/>
<input type="text" value="joined to an on-premises Active Directory domain"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Device is Azure AD joined; not domain joined.  
 The MDM URLs in the exhibit indicate the device is enrolled in Intune. References:  
<https://docs.microsoft.com/en-us/azure/active-directory/devices/troubleshoot-device-dsregcmd>  
<https://github.com/MicrosoftLearning/MD-101T00-ManagingModernDesktops/blob/master/Instructions/Labs/04>

**NEW QUESTION 107**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

A user reports that his computer has a compatibility issue with the latest Windows 10 feature update. You need to prevent other computers from installing the feature update for 10 days while you mitigate the issue. Which Windows Update setting should you configure by using a Group Policy Object (GPO)?

- A. Select when Preview Builds and Feature Updates are received
- B. Reschedule Automatic Updates scheduled installations
- C. Disable safeguards for Feature Updates
- D. Automatic Updates detection frequency

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-group-policy>

**NEW QUESTION 110**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

Computer1 was off for one year. During that time, two feature updates and 12 quality updates were released.

From the Microsoft Update Catalog website, you download the missing updates and save the updates to Computer1.

You need to ensure that Computer1 runs the latest version of Windows 10 and is fully updated. The solution must minimize the amount of time required to update the computer.

What should you do?

- A. Install the last feature update, and then install the last quality update.
- B. Install the last quality update, and then install both feature updates.
- C. Install the last quality update, and then install the last feature update.
- D. Install the last feature update, and then install all the quality updates released after the feature update.
- E. Install all the quality and feature updates in the order in which they were released.

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/get-started-updates-channels-tools>

**NEW QUESTION 114**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

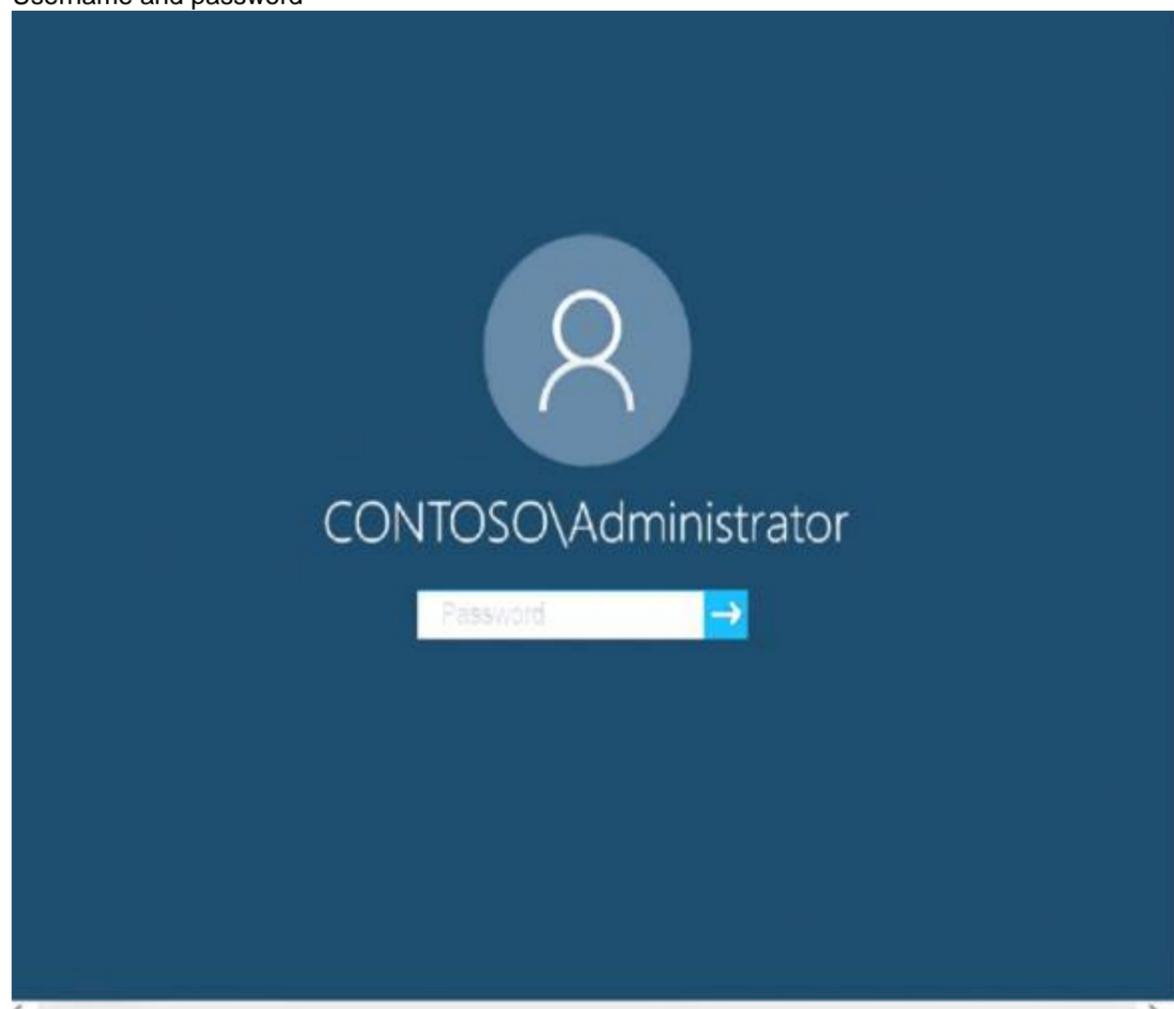

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

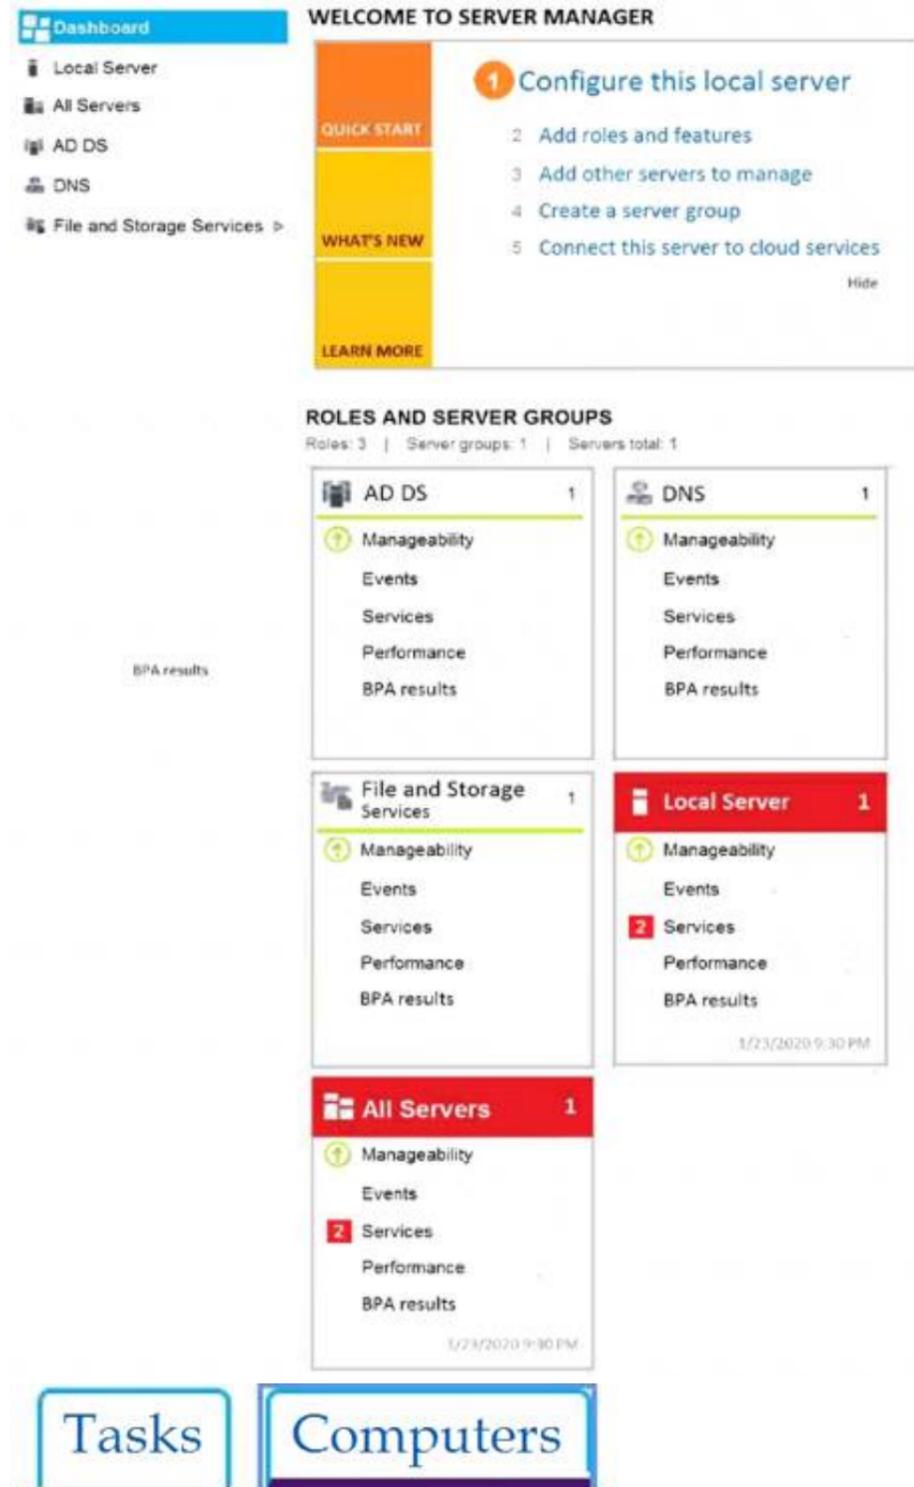

Use the following login credentials as needed:

To enter your password, place your cursor in the Enter password box and click on the password below.

Username: Contoso/Administrator

Password: Passw0rd!

The following information is for technical support purposes only: Lab Instance: 11145882

You need to ensure that all the current and future users in the Active Directory domain can establish Remote Desktop connections to Client1. The solution must use the principle of least privilege.

To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1. Add Remote Desktop Users to the Remote Desktop Users Group.

- Open Server Manager.
- From Tools menu, select Active Directory Users and Computers
- Double click at your domain on the left and then select Builtin.
- Open Remote Desktop Users on the right pane.
- At Members tab, click Add.
- Type the AD users that you want to give Remote access to the RDS Server and click OK.
- After selecting the remote desktop users, click OK again to close the window.

Step 2. Allow the log on through remote desktop Services.

- \* 1. Open Group Policy Editor. To do that:
  - \* a. Simultaneously press the Windows + R keys to open run command box. 
  - \* b. Type gpedit.msc and press Enter.
- \* 2. In Group Policy Editor navigate to: Computer Configuration > Windows Settings > Security Settings > Local Policies > User Rights Assignment.
- \* 3. At the right Pane: double click at Allow log on through Remote Desktop Services.
- \* 4. Click Add User or Group.
- \* 5. Type remote and then click Check Names.
- \* 6. Select the Remote Desktop Users and click OK.
- \* 7. Click OK at 'Select users, computers...' window.
- \* 8. Finally click OK again and close Group Policy Editor.

Reference:

<https://www.wintips.org/fix-to-sign-in-remotely-you-need-the-right-to-sign-in-through-remote-desktop-services>

### NEW QUESTION 115

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User2 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

#### Explanation:

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User2 is a domain user, not an administrator. Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

### NEW QUESTION 118

- (Exam Topic 4)

You have a computer that runs Windows 11 and has Windows Sandbox enabled.

You need to configure a Windows Sandbox environment The solution must meet the following requirements:

- Support a virtual GPU.
- Mount the C:\Temp folder as read only.
- Prevent users from copying files to the sandbox by using the clipboard.

How should you complete the configuration file? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Values**

- 
- 
- 
- 
- 

**Answer Area**

```
<Configuration>
  <Vgpu>  </Vgpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

**Answer Area**

```
<Configuration>
  <Vgpu>  </Vgpu>
  <Networking>Disable</Networking>
  <MappedFolders>
    <MappedFolder>
      <HostFolder>C:\temp</HostFolder>
      <ReadOnly>  </ReadOnly>
    </MappedFolder>
  </MappedFolders>
  <LogonCommand>
    <Command>C:\users\WDAGUtilityAccount\Desktop\Temp\startup.cmd</Command>
  </LogonCommand>
  <ProtectedClient>  </ProtectedClient>
  <ClipboardRedirection>Default</ClipboardRedirection>
  <MemoryInMB>6144</MemoryInMB>
</Configuration>
```

**NEW QUESTION 123**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Users

You have a file named File1.reg that contains the following content.

Windows Registry Editor Version 5.00

[HKEY\_CURRENT\_USER\System\Key1]

[HKEY\_LOCAL\_MACHINE\System\Key2]

You need to identify what occurs when User1 and User2 double-click File1.reg.  
 What should you identify? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

When User1 double-clicks **File1.reg**:

No change is made to registry.
Only Key1 is added to the registry.
Only Key2 is added to the registry.
Key1 and Key2 are added to the registry.

When User2 double-clicks **File1.reg**:

No change is made to registry.
Only Key1 is added to the registry.
Only Key2 is added to the registry.
Key1 and Key2 are added to the registry.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1:  
 User1 is a member of the Administrators group so has permission to add keys to both registry hives. Box 2:  
 User2 is a standard user so does not have permission to add a key to the HKEY\_LOCAL\_MACHINE registry hive so Key2 will not be imported.

**NEW QUESTION 125**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A user named User1 has a computer named Computer1 that runs Windows 10. Computer1 is joined to an Azure Active Directory (Azure AD) tenant named contoso.com. User1 joins Computer1 to contoso.com by using user1@contoso.com.

Computer1 contains a folder named Folder1. Folder1 is in drive C and is shared as Share1. Share1 has the permission shown in the following table.

Group	Share permission
Everyone	Full control
AzureAD\user1@contoso.com	Owner

A user named User2 has a computer named Computer2 that runs Windows 10. User2 joins Computer2 to contoso.com by using user2@contoso.com. User2 attempts to access Share1 and receives the following error message: "The username or password is incorrect."

You need to ensure that User2 can connect to Share1.

Solution: In Azure AD, you create a group named Group1 that contains User1 and User2. You grant Group1 Change access to Share1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-active-directory-enable#assign-access-permiss>

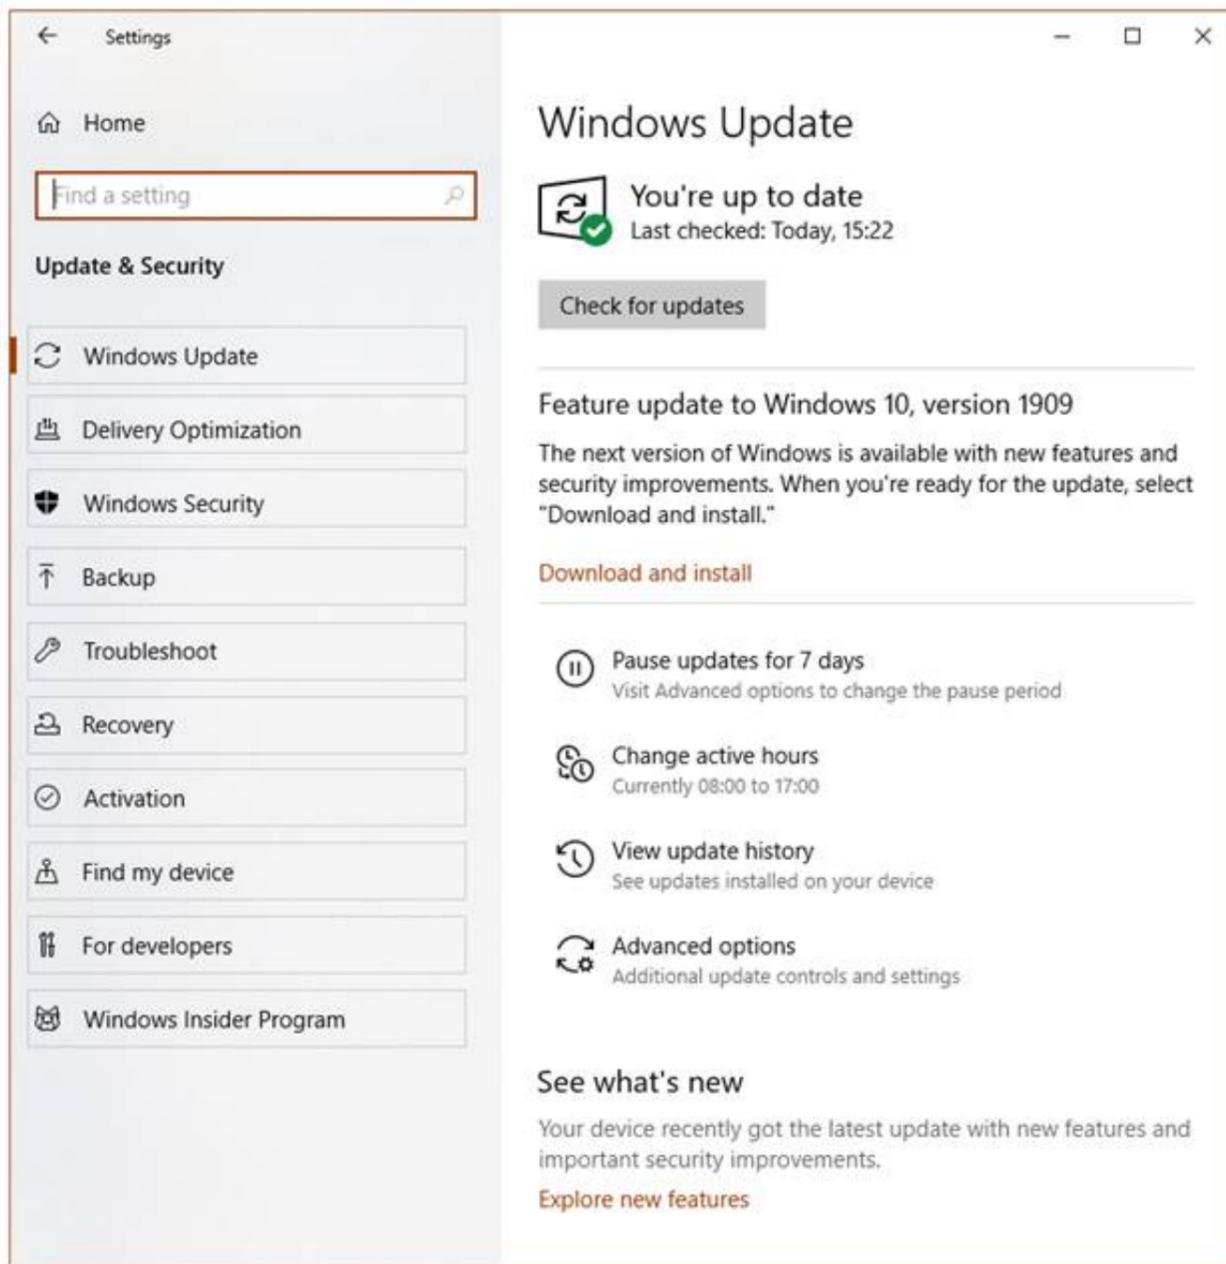

**NEW QUESTION 128**

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. You want to use Computer1 to test new Windows features.

You need to configure Computer1 to receive preview builds of Windows 10 as soon as they are available. You open the Update & Security section in the Settings app.

What should you configure? To answer, select the appropriate options in the answer area.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://insider.windows.com/en-us/getting-started/>

**NEW QUESTION 131**

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. You need to log which user reads the contents of the folder and modifies and deletes files in the folder.

Solution: from the properties of the folder, you configure the Auditing settings and from the Audit Policy in the local Group Policy, you configure Audit system events.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Files and folders are objects and are audited through object access, not through system events. References:

[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

**NEW QUESTION 136**

- (Exam Topic 4)

You plan to install Windows 10 on a new computer by using an answer file. You need to create the answer file.

Which tool should you use to create the answer file, and which file is required by the tool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to create the answer file:

- Windows PE (WinPE)
- Windows Configuration Designer
- Microsoft Deployment Toolkit (MDT)
- Windows System Image Manager (Windows SIM)

File required by the tool:

- Boot.wim
- Setup.exe
- Install.wim
- Autorun.inf

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

**NEW QUESTION 137**

- (Exam Topic 4)

You have a computer that runs Windows 10 and has File History enabled. File History is configured to save copies of files every 15 minutes.

At 07:55, you create a file named D:\Folder1\File1.docx.

You add D:\Folder1 to File History and manually run File History at 08:00. You modify File1.docx at the following times:

- > 08:05
- > 08:12
- > 08:20
- > 08:24
- > 08:50

At 08:55, you attempt to restore File1.docx.

How many previous versions of File1.docx will be available to restore?

- A. 2
- B. 3
- C. 4
- D. 5

**Answer:** C

**NEW QUESTION 138**

- (Exam Topic 4)

You have 100 computers that run Windows 10 and are members of an Active Directory domain.

Two support technicians named Tech1 and Tech2 will be responsible for monitoring the performance of the computers.

You need to configure the computers to meet the following requirements:

- > Ensure that Tech1 can create and manage Data Collector Sets (DCSs).
- > Ensure that Tech2 can start and stop the DCSs.
- > Use the principle of least privilege.

To which group should you add each technician? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

Tech1: 

▼
Event Log Readers
Performance Log Users
Performance Monitor Users
Remote Management Users

Tech2: 

▼
Event Log Readers
Performance Log Users
Performance Monitor Users
Remote Management Users

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 143**

- (Exam Topic 4)

Your network contains an Active Directory domain. All users have been issued with computers that run Windows 8.1.

A user named Mia Hamm has a computer named Computer1. You upgrade Computer1 to Windows 10 by performing a clean installation of Windows 10 without formatting the drives.

You need to migrate the settings for Mia Hamm from Windows 8.1 to Windows 10. Which two actions should you perform?

NOTE: Each correct selection is worth one point.

- A. Run scanstate.exe and specify the C:\Users folder
- B. Run loadstate.exe and specify the C:\Windows.old folder
- C. Run usmultils.exe and specify the C:\Users folder
- D. Run scanstate.exe and specify the C:\Windows.old folder
- E. Run loadstate.exe and specify the C:\Users folder
- F. Run usmultils.exe and specify the C:\Windows.old folder

**Answer:** DE

**Explanation:**

D: As we have performed a clean installation of Windows 10 without formatting the drives, User1's Windows 8.1 user profile will be located in the \Windows.old folder. Therefore, we need to run scanstate.exe on the \Windows.old folder.

E: User1's Windows 10 profile will be in the C:\Users folder so we need to run loadstate.exe to apply the changes in the C:\Users folder.

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-common-migration-scenarios#bkmk-fourpcre>

**NEW QUESTION 144**

- (Exam Topic 4)

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.

You run several commands on the computer as shown in the following exhibit.

```

Administrator: Windows PowerShell
PS C:\> Get-SMBShareAccess -Name ISOs

Name ScopeName Account Name AccessControlType AccessRight
-----
ISOs * DESKTOP-A0TN8Q4\User1 Allow Full
ISOs * DESKTOP-A0TN8Q4\User2 Allow Read
ISOs * DESKTOP-A0TN8Q4\User3 Allow Read

PS C:\> Get-Item Isos | Get-ACL | Select -ExpandProperty Access

FileSystemRights : FullControl
AccessControlType : Allow
IdentityReference : NT AUTHORITY\SYSTEM
IsInherited : False
InheritanceFlags : ContainerInherit, ObjectInherit
PropagationFlags : None

FileSystemRights : FullControl
AccessControlType : Allow
IdentityReference : BUILTIN\Administrators
IsInherited : False
InheritanceFlags : ContainerInherit, ObjectInherit
PropagationFlags : None

FileSystemRights : ReadAndExecute, Synchronize
AccessControlType : Allow
IdentityReference : BUILTIN\Users
IsInherited : False
InheritanceFlags : ContainerInherit, ObjectInherit
PropagationFlags : None

FileSystemRights : FullControl
AccessControlType : Allow
IdentityReference : DESKTOP-A0TN8Q4\User2
IsInherited : False
InheritanceFlags : ContainerInherit, ObjectInherit
PropagationFlags : None
    
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

▼

None of the users

Only User1

Only User2

Only User3

Only User1 and User2

Only User1 and User3

Only User2 and User3

User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼

None of the users

Only User1

Only User2

Only User3

Only User1 and User2

Only User1 and User3

Only User2 and User3

User1, User2, and User3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

[answer choice] can delete files in the ISOs share.

- None of the users
- Only User1
- Only User2
- Only User3
- Only User1 and User2
- Only User1 and User3
- Only User2 and User3
- User1, User2, and User3

[answer choice] can read the files in the ISOs share.

- None of the users
- Only User1
- Only User2
- Only User3
- Only User1 and User2
- Only User1 and User3
- Only User2 and User3
- User1, User2, and User3

**NEW QUESTION 148**

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. Your company purchases a Microsoft 365 subscription.

You need to migrate the Documents folder of users to Microsoft OneDrive for Business. What should you configure?

- A. One Drive Group Policy settings
- B. roaming user profiles
- C. Enterprise State Roaming
- D. Folder Redirection Group Policy settings

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders?redirectSourcePath=%252fen-us%252farticle%252fredirect-windows-known-folders-to-onedrive-e1b3963c-7c6c-4694-9f2f-fb8005d9ef12>

**NEW QUESTION 150**

- (Exam Topic 4)

Your company deploys Windows 10 Enterprise to all computers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The company purchases a new computer for a new user and creates an Azure AD account for the user. The user signs in to the computer by using the Azure AD account. The user discovers the activation error shown in the following exhibit.

# Activation

## Windows

Edition	Windows 10 Pro
Activation	Windows is not activated
Product ID	XXXXX-XXXXX-XXXXX-XXXXX
Product Key	XXXXX-XXXXX-XXXXX-XXXXX-XXXXX

Windows can't activate at this time. Try activating again later. If that doesn't work, contact your system administrator. Error code: 0x800705B4

If you're having problems with activation, select Troubleshoot to try to fix the problem.

## Activate Windows now

Running a non-genuine copy of Windows can put you at greater risk from viruses and other security threats.

Go to the Store to buy genuine Windows or enter a product key.

You need to activate Windows 10 Enterprise on the computer. What should you do?

- A. In Azure A
- B. assign a Windows 10 Enterprise license to the user.
- C. At the command prompt, run `slmgr /lrc`.
- D. Reinstall Windows as Windows 10 Enterprise.
- E. At the command prompt, run `slmgr /ato`.

**Answer:** A

### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-subscription-activation>

### NEW QUESTION 152

- (Exam Topic 4)

You have a computer that runs Windows 10 and hosts four Hyper-V virtual machines that run Windows 10. You upgrade the computer to Windows 11. You need to ensure that the virtual machines support hibernation. What should you do?

- A. Update the configuration version of the virtual machines.
- B. Enable integration services.
- C. Rebuild the virtual machines as generation 2 virtual machines.
- D. Delete any virtual machine checkpoints.

**Answer:** A

### NEW QUESTION 154

- (Exam Topic 4)

Your network an Active Directory domain named `adatum.com`. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution: You use Microsoft Deployment Toolkit (MDT) and create a task sequence. One each compute, you run the task sequence.

Does the meet the goal?

- A. Yes
- B. No

**Answer:** B

### NEW QUESTION 155

- (Exam Topic 4)

You have 10 new Windows 10 devices.

You plan to deploy a provisioning package that will configure a wireless network profile. You need to ensure that a support technician can install the provisioning package on the devices. The solution must use the principle of least privilege. To which group should you add the support technician?

- A. Users
- B. Power Users
- C. Network Configuration Operators
- D. Administrators

**Answer:** D

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

**NEW QUESTION 160**

- (Exam Topic 3)  
 Which users can sign in to Computer2 by using Remote Desktop?

- A. Admin1 only
- B. User 1 only
- C. Admin1 and User2 only
- D. Admin1, User1, User2, and User3
- E. User2 only

**Answer:** C

**Explanation:**

Reference:  
<https://4sysops.com/archives/user-rights-assignment-in-windows-server-2016/>

**NEW QUESTION 161**

- (Exam Topic 3)  
 Which Windows 10 computers can you ping successfully from Computer1 and Computer2? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Computer1:  Computer2 only  
 Computer3 only  
 Computer2 and Computer3  
 No Windows 10 computers

Computer2:  Computer1 only  
 Computer3 only  
 Computer1 and Computer3  
 No Windows 10 computers

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated  
 Box 1: Computer3 only.  
 Computer1 and Computer2 are domain joined so both will be using the Domain profile. The firewall rules on Computer1 allow outbound ICMP on all profiles so outbound ICMP will be allowed on the Domain profile.  
 The firewall rules on Computer2 allow inbound ICMP on the Public profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot be pinged.  
 The firewall rules on Computer3 allow inbound ICMP on all profiles. Therefore, Computer3 will not block the inbound pings.  
 Box 2: No Windows 10 computers.  
 The firewall rules on Computer2 allow outbound ICMP on the Private profile only, so it will be blocked on the domain profile. Therefore, Computer2 cannot ping any computers.

**NEW QUESTION 163**

- (Exam Topic 2)  
 You need to meet the technical requirements for the San Diego office computers. Which Windows 10 deployment method should you use?

- A. wipe and load refresh
- B. Windows Autopilot
- C. provisioning Packages
- D. in-place upgrade

**Answer:** B

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot>

**NEW QUESTION 164**

- (Exam Topic 1)  
 You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

**Answer:** A

**Explanation:**

<https://technet.microsoft.com/en-us/mt227395.aspx>

**NEW QUESTION 168**

- (Exam Topic 1)  
 You need to implement a solution to configure the contractors' computers.  
 What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Tool to use:

<ul style="list-style-type: none"> <li>Microsoft Deployment Toolkit (MDT)</li> <li>Windows AutoPilot</li> <li>Windows Configuration Designer</li> <li>Windows Deployment Services (WDS)</li> </ul>
--

File type to create:

<ul style="list-style-type: none"> <li>CAB</li> <li>PPKG</li> <li>WIM</li> <li>XML</li> </ul>
---

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

**NEW QUESTION 170**

- (Exam Topic 1)  
 You need to take remote control of an employee's computer to troubleshoot an issue. What should you send to the employee to initiate a remote session?

- A. a numeric security code
- B. a connection file
- C. an Easy Connect request
- D. a password

**Answer:** A

**Explanation:**

References:  
<https://support.microsoft.com/en-us/help/4027243/windows-10-solve-pc-problems-with-quick-assist>

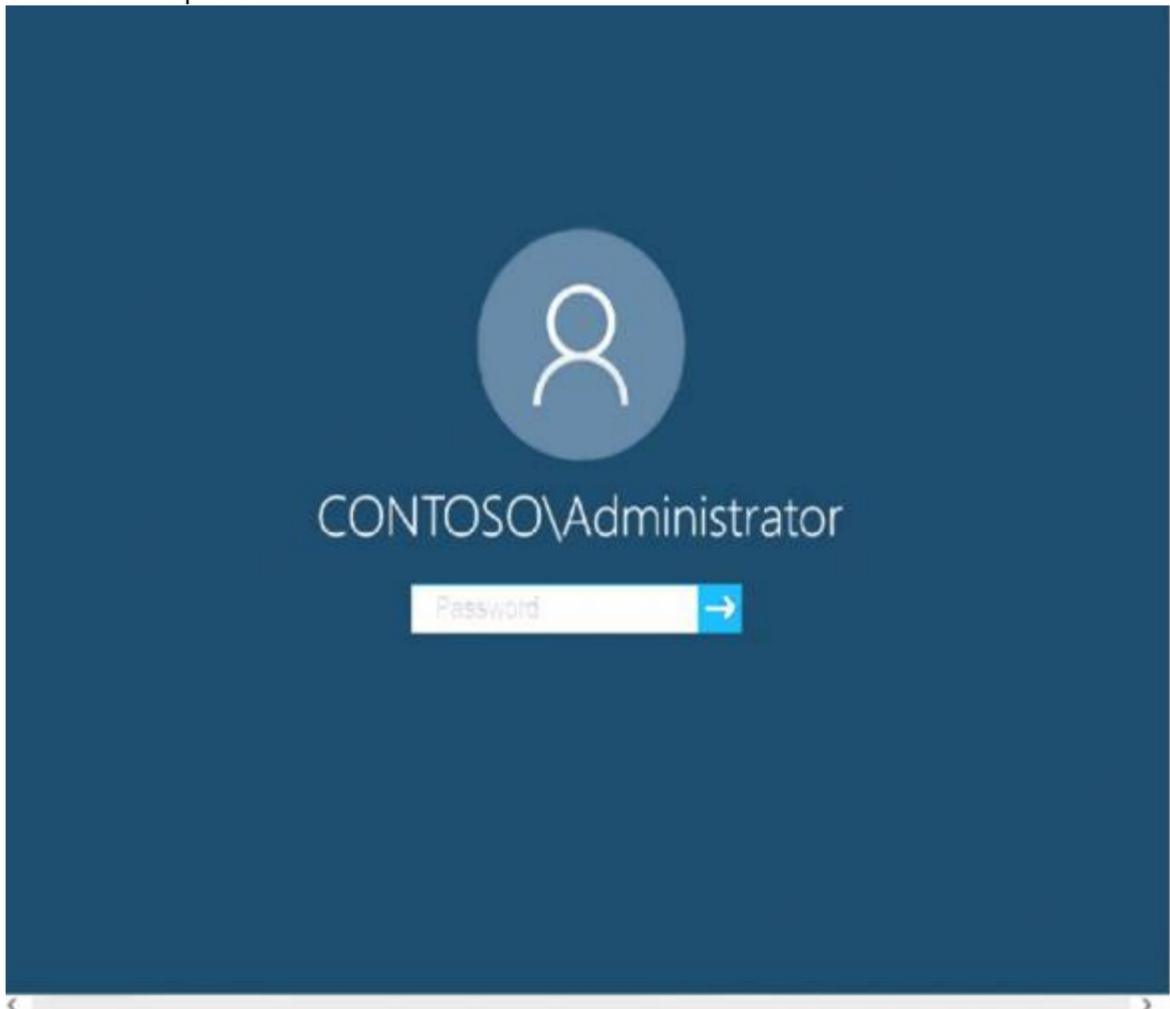

**NEW QUESTION 175**

- (Exam Topic 4)  
 Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.  
 When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Username and password

Use the following login credentials as needed:  
To enter your password, place your cursor in the Enter password box and click on the password below.  
Username: Contoso/Administrator  
Password: Passw0rd!  
The following information is for technical support purposes only:  
Lab Instance: 10921597

You need to identify the total number of events that have Event ID 63 in the Application event log. You must type the number of identified events into C:\Folder1\FileA.txt.  
To complete this task, sign in to the required computer or computers and perform the required action.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- Open Event Viewer.
- Click the log that you want to filter, then click Filter Current Log from the Action pane or right-click menu. This will open the Filter Current Log dialog box.
- You can specify a time period if you know approximately when the relevant events occurred. You can specify the event level, choosing between Critical,

Warning, Verbose, Error and Information. If you select none of these, all event levels will be returned. You can't modify which event log is being checked as filters apply only to a single log.

> You can choose the event sources which have generated the log entries, and search for key words, users, or computers. You can also search using specific event IDs.

Reference:

<https://www.manageengine.com/products/active-directory-audit/kb/how-to/how-to-search-the-event-viewer.htm>

**NEW QUESTION 177**

- (Exam Topic 4)

You have a computer named Computer1. Computer1 runs Windows 10 Pro. Computer1 is experiencing connectivity issues. You need to view the IP addresses of any remote computer that Computer1 has an active TCP connection to. Should you do?

- A. In Windows Administrative Tools, open Performance Monitor
- B. In the Control Panel, open Network and Internet Then select Network and Sharing Center
- C. In Windows Administrative Tools, open Resource Monitor
- D. In the Setting ap
- E. open Update and Security Then open Windows Security and select Firewall and Network protection

**Answer: C**

**NEW QUESTION 180**

- (Exam Topic 4)

Your network an Active Directory domain named adatum.com. The domain contains 50 computers that runs Windows 8.1. The computer has locally installed desktop application that are compatible with Windows 10.

You need to upgrade the computers to windows 10, The solution must preserver the locally installed desktop applications.

Solution. You use System image manager (Windows SIM) to create an answer file. You use Windows Deployment Service (WDS) to add an install image. You start each computer by using PXE, and then install the image.

Does this meet the goal?

- A. Yes
- B. No

**Answer: A**

**NEW QUESTION 185**

- (Exam Topic 4)

Your office has a dedicated wireless network for guests.

You plan to provide access cards that will have a QR code for guests. The QR code will link to a network configuration file stored on a publicly accessible website and provide the wireless network settings for Windows 10 devices.

Which tool should you use to create the configuration file and which file type should you use for the configuration file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Tool:  ▼

Connection Manager Administration Kit (CMAK)
Local Group Policy Editor Microsoft Deployment
Microsoft Deployment Toolkit (MDT)
Windows Autopilot
Windows Configuration Designer

File type:  ▼

ADMX
CAB
PPKG
WIM
XML

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

**NEW QUESTION 187**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10 and has an application named App1. You need to use Performance Monitor to collect data about the processor utilization of App1. Which performance object should you monitor?

- A. Process
- B. Processor Performance
- C. Processor Information
- D. Processor

**Answer:** A

**Explanation:**

References:  
[https://www.cse.wustl.edu/~jain/cse567-06/ftp/os\\_monitors/index.html](https://www.cse.wustl.edu/~jain/cse567-06/ftp/os_monitors/index.html)

**NEW QUESTION 189**

- (Exam Topic 4)

You have a computer that runs Windows 10 and has BitLocker Drive Encryption (BitLocker) enabled on all volumes. You start the computer from Windows Recovery Environment (WinRE). You need to read the data on the system drive. What should you do?

- A. Run cipher.exe and specify the /rekey parameter
- B. Run cipher.exe and specify the /adduser parameter
- C. Run manage-bde.exe and specify the -off parameter
- D. Run manage-bde.exe and specify the -unlock parameter

**Answer:** D

**Explanation:**

<https://www.repairwin.com/how-to-disable-bitlocker-in-windows-recovery-environment-winre/>

**NEW QUESTION 192**

- (Exam Topic 4)

You have a computer that runs Windows 11 and hosts a Hyper-V virtual machine named VM1. You create the disks shown in the following table.

Name	Format	Type	Parent
Base1	VHD	Fixed size	Not applicable
Base2	VHDX	Fixed size	Not applicable
Disk1	VHD	Dynamically expanding	Not applicable
Disk2	VHD	Differencing	Base1.vhd
Disk3	VHDX	Dynamically expanding	Not applicable
Disk4	VHDX	Differencing	Base2.vhdx

You add Disk1, Disk2, Disk3, and Disk4 to a SCSI controller attached to VM1. You need to identify the following: Which disks will increase in size automatically when files are copied to the disks. Which disks can be manually increased in size while VM1 is running. What should you identify? To answer, select the appropriate options in the answer area.

Disks that will increase in size automatically:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only**
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4

Disks that can be manually increased in size while VM1 is running:

- Base1 and Disk2 only
- Base2 and Disk4 only
- Disk1 and Disk3 only
- Disk3 and Disk4 only
- Base2, Disk3, and Disk4 only
- Disk1, Disk2, Disk3, and Disk4**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, Word, website Description automatically generated

**NEW QUESTION 196**

- (Exam Topic 4)

Your network contains an Active Directory domain that contains the objects shown in the following table.

Name	Type	Member of
User1	User	Group1
User2	User	Group2
Group1	Global group	None
Group2	Domain local group	None
Computer1	Computer	Group1
Computer2	Computer	Group1

Computer1 contains the shared folders shown in the following table.

Name	NTFS permission	Share permission	Folder enumeration mode
Share1	Group1: Write	Group1: Full control	Access-based
Share2\$	Group2: Full control	Group2: Read	Unrestricted

The computers have the network configurations shown in the following table.

Name	Network Discovery	Windows Defender Firewall
Computer1	On	Incoming connections: Block all connections to apps that are not on the list of allowed apps
Computer2	Off	Incoming connections: Block all connections to apps that are not on the list of allowed apps

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Share1 is listed if User1 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share1 is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>
Share2\$ is listed if User2 connects to \\Computer1 from Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Yes

User1 is in Group1 which has permission to access the share so the share will be visible. Box 2: No

User2 is in Group2 which does not have permission to access Share1. Access-based enumeration is enabled so Share1 will not be listed as User2 does not have permission to access it.

Box 3: No

Share2\$ is a hidden share (dollar sign appended) so the share will never be listed.

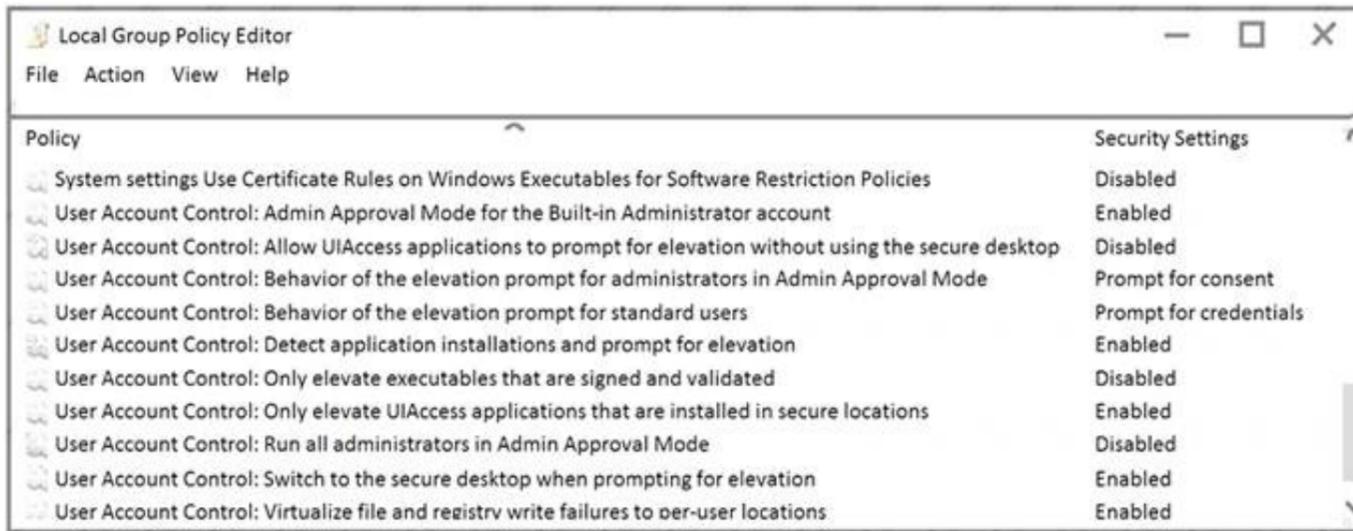

**NEW QUESTION 200**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
Administrator	Administrators
User1	Administrators
User2	Users

User Account Control (UAC) on Computer1 is configured as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
When Administrator opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User1 opens a command prompt by using the Run as administrator option, the user will be prompted for consent.	<input type="radio"/>	<input type="radio"/>
When User2 opens a command prompt by using the Run as administrator option, the user will be prompted for credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Yes

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 2: Yes

User1 is a member of Administrators group.

User Account Control: Behavior of the elevation prompt for administrators in Admin Approval Mode is set to Prompt for consent When an operation requires elevation of privilege, the user is prompted to select either Permit or Deny. If the user selects Permit, the operation continues with the user's highest available privilege.

Box 3: Yes

User Account Control: Behavior of the elevation prompt for standard users is set to Prompt for credentials (Default) When an operation requires elevation of privilege, the user is prompted to enter an administrative user name and password. If the user enters valid credentials, the operation continues with the applicable privilege.

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/user-account-control/user-account-control>

**NEW QUESTION 204**

- (Exam Topic 4)

You manage devices that run Windows 10.

Ten sales users will travel to a location that has limited bandwidth that is expensive. The sales users will be at the location for three weeks.

You need to prevent all Windows updates from downloading for the duration of the trip. The solution must not prevent access to email and the Internet.

What should you do?

- A. From Network & Internet in the Settings app, set a data limit.
- B. From Accounts in the Settings app, turn off Sync settings.
- C. From Network & Internet in the Settings app, set the network connections as metered connections.
- D. From Update & Security in the Settings app, pause updates.

Answer: D

**NEW QUESTION 207**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to an Active Directory domain named adatum.com. The domain contains two groups named Group1 and Group2.

Computer1 contains a folder named C:\Folder1 that has the file permissions shown in the following table.

Group	Permission
Administrators	Full control
Group1	Read

You need to share C:\Folder1. The solution must ensure that the members of Group2 can access all the files in the share. What should you do?

- A. From File Explorer, use Network File and Folder Sharin
- B. Assign the Read permission to Group2.
- C. From File Explorer, use Advanced Sharin
- D. Assign the Read share permission to Group2.
- E. From Control Panel, use Advanced sharing setting
- F. Configure file and printer sharing for the network profile of the domain.
- G. At a command prompt, run the net share Share=C:\Folder1 /granc:adacum\group2, read command.

**Answer:** D

**Explanation:**

Reference:

<https://techgenix.com/net-share-command-30/>

**NEW QUESTION 209**

- (Exam Topic 4)

You have computers that run Windows 11 as shown in the following table.

Name	IP address	Joined to
Computer1	192.168.10.10	Active Directory
Computer2	192.168.10.15	Workgroup

You ping 192.168.10.15 from Computer1 and discover that the request timed out. You need to ensure that you can successfully ping 192.168.10.15 from Computer1. Solution: On Computer1, you turn off Windows Defender Firewall-Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 214**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You deploy Windows 10 to a computer named Computer1.

Computer1 contains a folder named C:\Folder1. Folder1 contains multiple documents.

You need to ensure that you can recover the files in Folder1 by using the Previous Versions tab. Solution: You enable File History and add Folder1 to File History. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

adding c:\Folder1 to File History WILL allow you to use the Previous Versions on that folder. Assuming you are able to turn File History on in the first place.

Reference:

<https://support.microsoft.com/en-za/help/17128/windows-8-file-history>

**NEW QUESTION 218**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. On Computer1, you turn on File History.

You need to protect a folder named D:\Folder1 by using File History. What should you do?

- A. From File Explorer, modify the General settings of D:\Folder1
- B. From File Settings app, configure the Backup settings
- C. From the Settings app, configure the Recovery settings
- D. From File History in Control Panel, configure the Select drive settings

**Answer:** B

**Explanation:**

To configure File History, click More options on the Backup screen. The Backup options screen allows you to set how often File History backs up your files and how long versions are saved.

References:

<https://www.groovypost.com/howto/configure-windows-10-file-history/>

**NEW QUESTION 221**

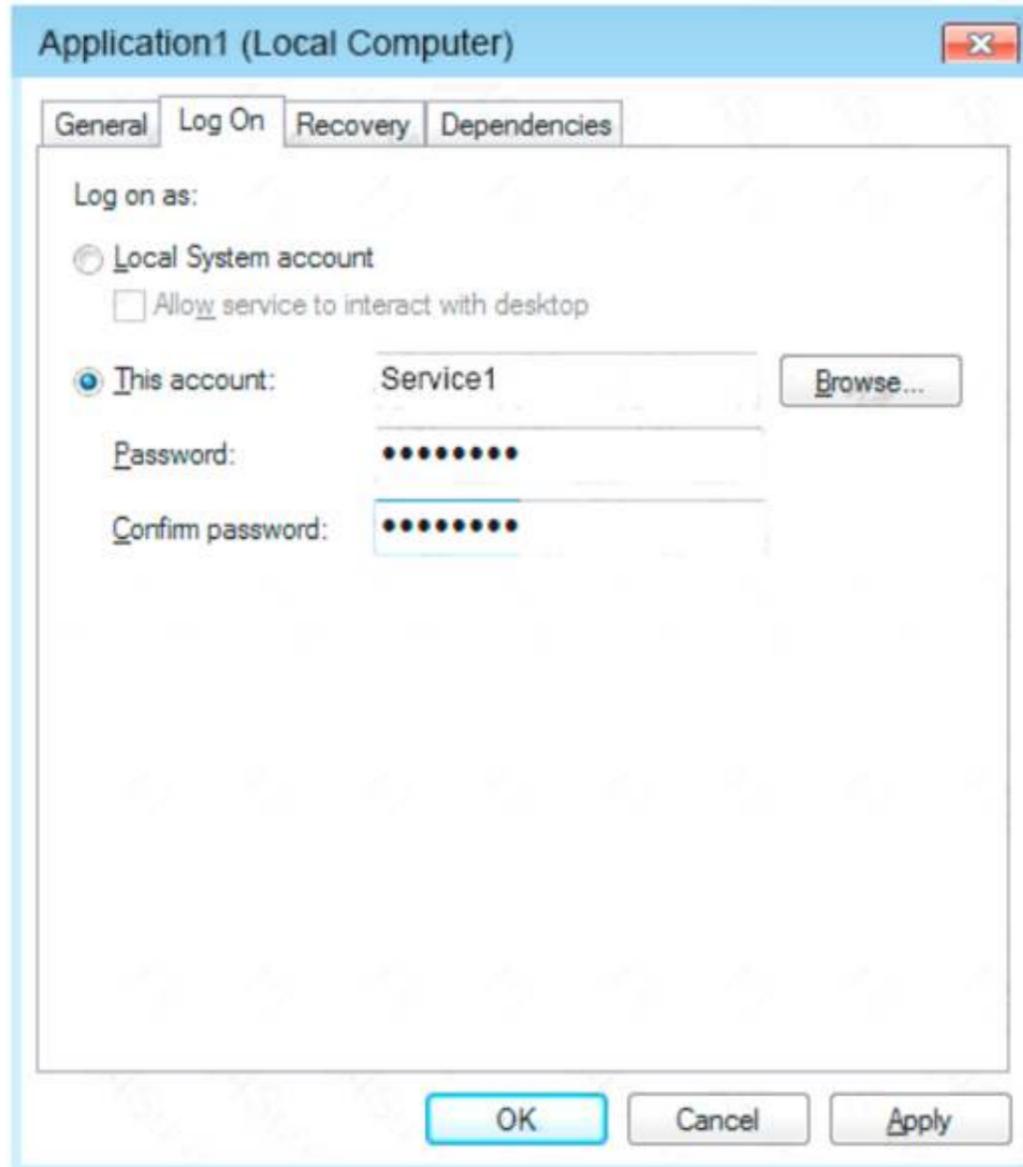

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

A service named Application1 is configured as shown in the exhibit.

You discover that a user used the Service1 account to sign in to Computer1 and deleted some files.

You need to ensure that the identity used by Application1 cannot be used by a user to sign in to the desktop on Computer1. The solution must use the principle of least privilege.

Solution: On Computer1, you assign Service1 the deny log on locally user right. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/security-policy-settings/deny-log-on-locall>

**NEW QUESTION 224**

- (Exam Topic 4)

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

**Answer:** B

**Explanation:**

References:

<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

**NEW QUESTION 228**

- (Exam Topic 4)

Your network contains 500 computers that run Windows 11 and have Delivery Optimization enabled. All the computers contain the following:

- Microsoft 365 apps
- A Microsoft Store app named App1
- A Windows 11 driver named Driver1

What can use Delivery Optimization to download updates?

- A. Driver1 only
- B. Microsoft 365 apps only
- C. Microsoft 365 apps and Driver1 only
- D. Microsoft 365 apps, Driver1, and App1

**Answer:** D

**NEW QUESTION 230**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.

On Computer1, you need to run the Invoke-Command cmdlet to execute several PowerShell commands on Computer2.

What should you do first?

- A. On Computer2, run the Enable-PSRemoting cmdlet
- B. From Active Directory, configure the Trusted for Delegation setting for the computer account of Computer2
- C. On Computer1, run the New-PSSession cmdlet
- D. On Computer2, add Computer1 to the Remote Management Users group

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.core/enable-psremoting?view=power>

**NEW QUESTION 235**

- (Exam Topic 4)

You have Windows 10 devices that use custom device drivers.

You need to test new builds of Windows before the builds are made available to the general public. The solution must ensure that the builds are installed as soon as possible.

Which Windows readiness level should you configure?

- A. Preview Build - Slow
- B. Semi-Annual Channel
- C. Release Preview
- D. Preview Build - Fast

**Answer:** D

**NEW QUESTION 237**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	Member of
User2	Domain Users
User3	Domain Admins
User4	Server Operators

You have a computer named Computer1 that runs Windows 10 and is in a workgroup.

A local standard user on Computer1 named User1 joins the computer to the domain and uses the credentials of User2 when prompted.

You need to ensure that you can rename Computer1 as Computer33. Solution: You use the credentials of User1 on Computer1.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Renaming a domain-joined computer will also rename the computer account in the domain. To do this, you need domain administrator privileges.

User4 is a server operator, not an administrator. Members of the Server Operators group can sign in to a server interactively, create and delete network shared resources, start and stop services, back up and restore files, format the hard disk drive of the computer, and shut down the computer.

Use User3's credentials instead. References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/access-control/active-directory-security-g>

**NEW QUESTION 238**

- (Exam Topic 4)

You have two workgroup computers named Computer1 and Computer2 that run Windows 10. The computers contain the local security principals shown in the following table.

Name	Type	Computer
User1	User	Computer1
GroupA	Group	Computer1
GroupB	Group	Computer1
User2	User	Computer2
GroupC	Group	Computer2

Which security principals can be members of GroupA and GroupC? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

GroupA:

- User1 only
- User1 and User2 only
- User1 and GroupB only
- User1, User2, GroupB, and GroupC

GroupC:

- User2 only
- User1 and User2 only
- User1, User2, GroupA, and GroupB

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

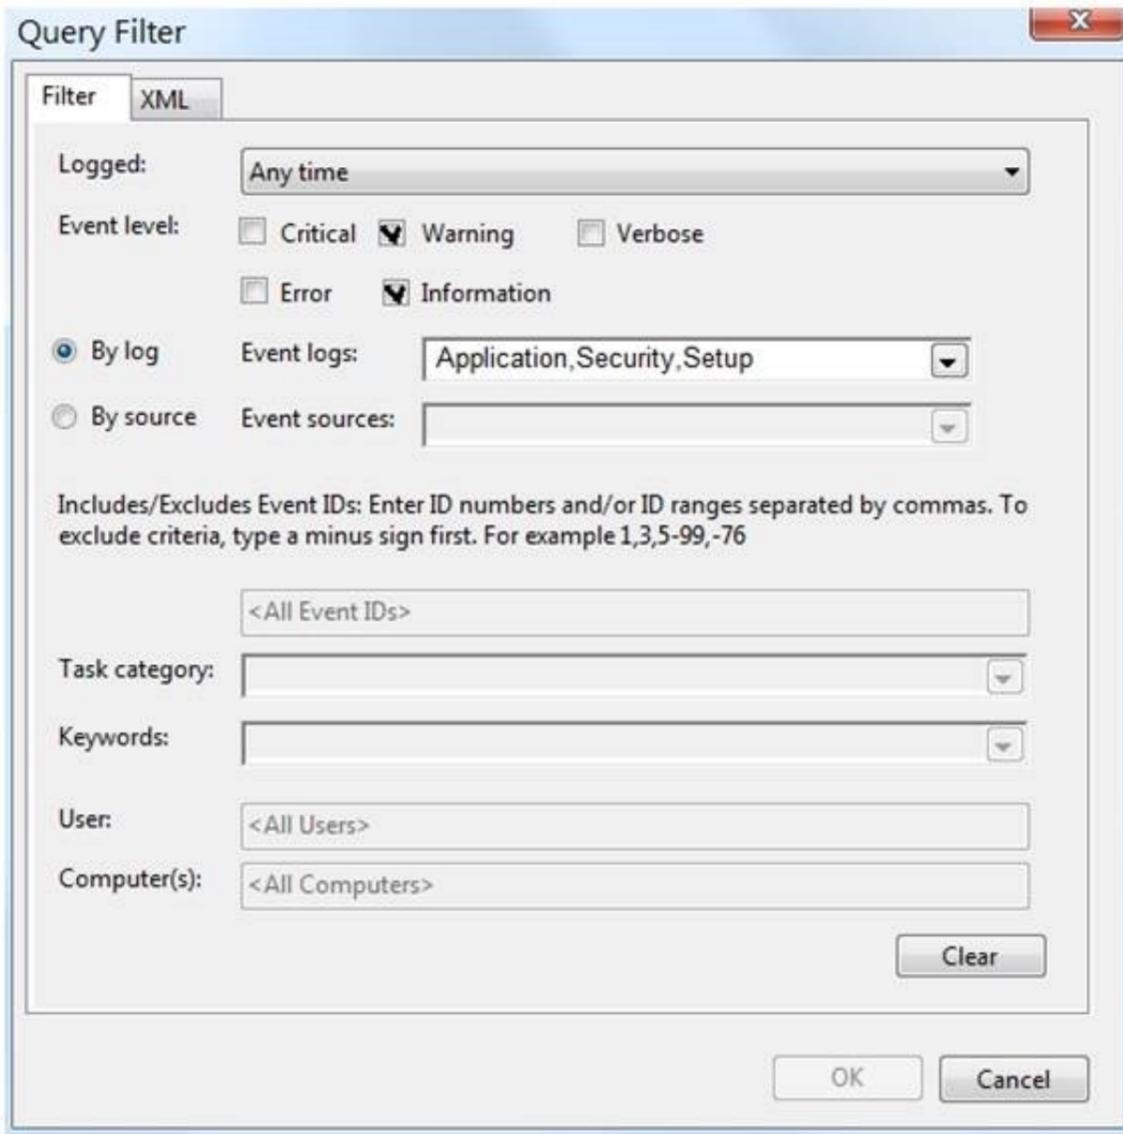

Graphical user interface, text, application, chat or text message Description automatically generated

**NEW QUESTION 240**

- (Exam Topic 4)

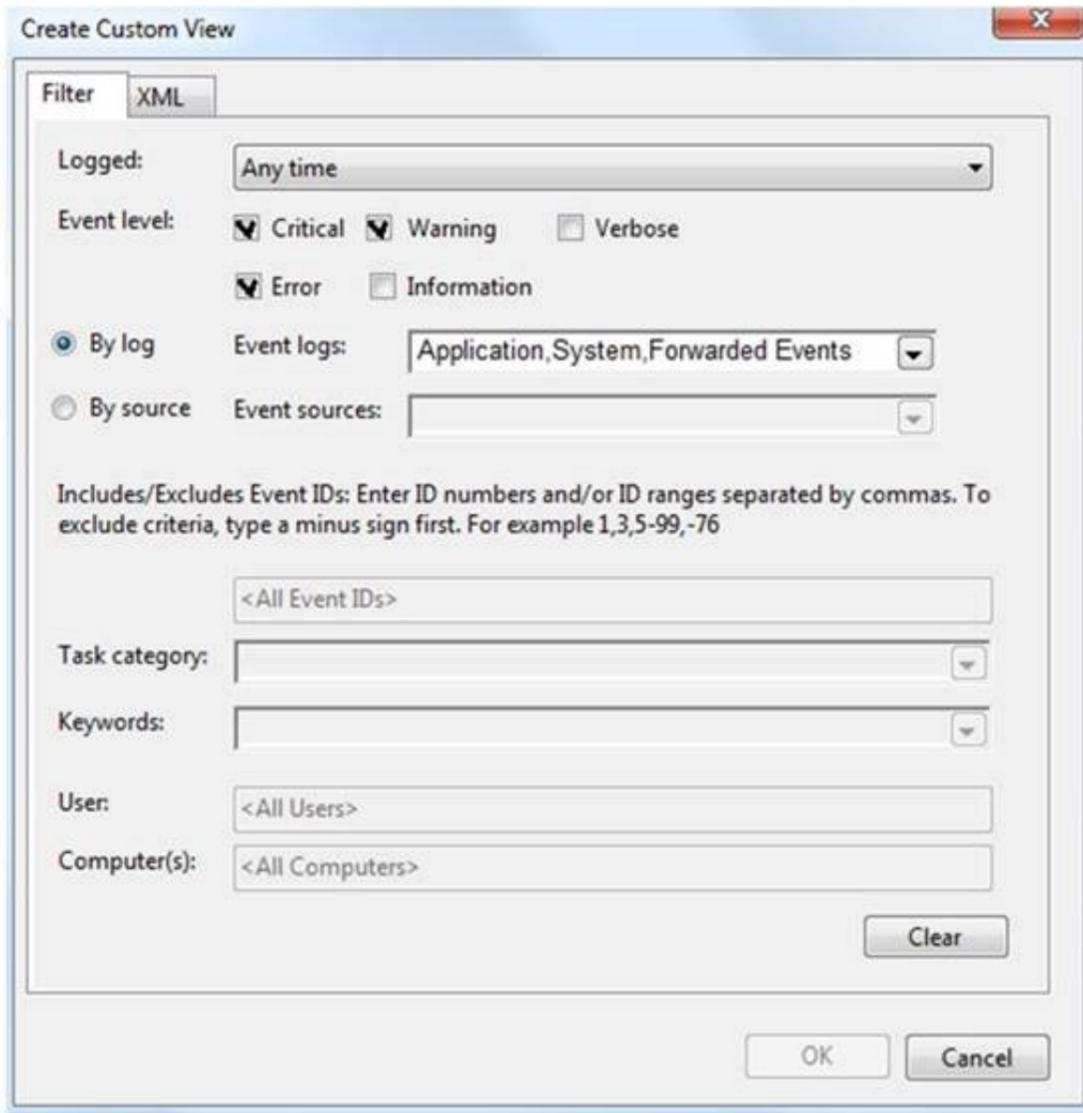

Your network contains an Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10 and are joined to the domain.

On Computer1, you create an event subscription named Subscription1 for Computer2 as shown in the Subscription1 exhibit. (Click the Subscription1 tab.)

Subscription1 is configured to use forwarded events as the destination log.

On Computer1, you create a custom view named View1 as shown in the View1 exhibit. (Click the View1 tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	<input type="radio"/>	<input type="radio"/>
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	<input type="radio"/>	<input type="radio"/>
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If a critical event is added to the system log on Computer2, the event will be visible in View1.	<input type="radio"/>	<input checked="" type="radio"/>
If a warning event is added to the setup log on Computer1, the event will be visible in View1.	<input type="radio"/>	<input checked="" type="radio"/>
If an information event is added to the application log on Computer2, the event will be forwarded to Computer1	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION 241**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other computers. You install a quality update that conflicts with a customer device driver.

You need to remove the update from Computer1.

Solution: From an elevated command prompt, you run the vmic qfe delete command. Does this meet the goal?

- A. Yes
- B. No

Answer: B

**NEW QUESTION 245**

- (Exam Topic 4)

You have a workgroup computer that runs Windows 10.

You need to set the minimum password length to 12 characters. What should you use?

- A. Local Group Policy Editor
- B. User Accounts in Control Panel
- C. System Protection in System Properties
- D. Sign-in options in the Settings app

Answer: A

**NEW QUESTION 250**

- (Exam Topic 4)

You have a computer that runs Windows 10. A feature update is installed automatically. You need to roll back the feature update.

Up to how many days after the feature update is installed can you roll back the installation, and what should you use to perform the roll back? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To roll back the feature update, use:

Go back to the previous version of Windows 10
Reset this PC option
Uninstall an update in Control Panel

The rollback can be performed up to:

7 days after
10 days after
35 days after

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Table Description automatically generated

Reference:

<https://www.howtogeek.com/235474/how-to-roll-back-builds-and-uninstall-updates-on-windows-10/>

**NEW QUESTION 251**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 has the user accounts shown in the following table.

Name	Member of
User1	Users
User2	Users, Event Log Readers
User3	Users, Backup Operators

In Event Viewer, you create two custom views named View1 and View2. View1 shows errors and warnings from the Security event log. View2 shows errors and warnings from the System event log. Which users can use the views? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

**Answer Area**

View1: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

View2: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

View1: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

View2: 

	▼
User2 only	
User2 and User3 only	
User1, User2, and User3	

**NEW QUESTION 256**

- (Exam Topic 4)

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

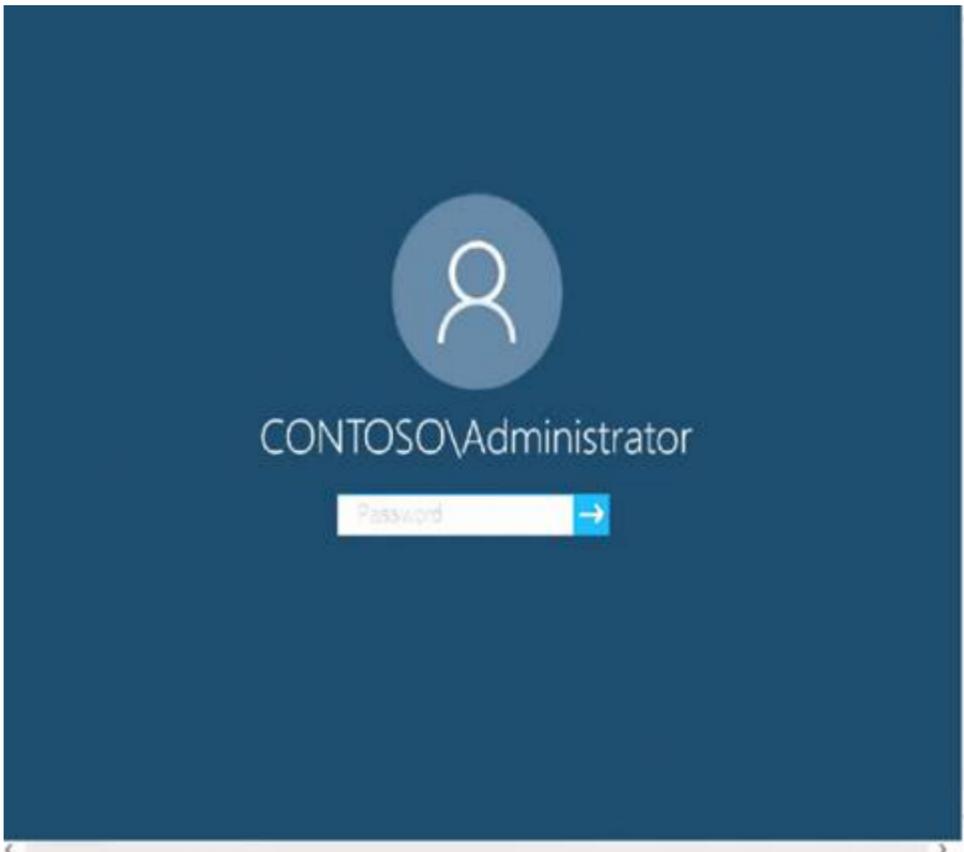

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab.

But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Tasks Computers

You have already prepared Client1 for remote management.  
 You need to forward all events from the Application event log on Client1 to DC1.  
 To complete this task, sign in to the required computer or computers.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Configuring the event source computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

\* 2. Start group policy by running the following command:

```
%SYSTEMROOT%\System32\gpedit.msc
```

\* 3. Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node.

\* 4. Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.

\* 5. After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied:

```
gpupdate /force
```

Configuring the event collector computer

\* 1. Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management:

```
winrm qc -q
```

\* 2. Run the following command to configure the Event Collector service:

```
wecutil qc /q
```

\* 3. Create a source initiated subscription. This can either be done programmatically, by using the Event Viewer, or by using Wecutil.exe. If you use Wecutil.exe, you must create an event subscription XML file and use the following command:

```
wecutil cs configurationFile.xml
```

**NEW QUESTION 260**

- (Exam Topic 4)

Your network contains an Active Directory forest. The forest contains a root domain named contoso.com and a child domain named corp.contoso.com.

You have a computer named Computer1 that runs Windows 10. Computer1 is joined to the corp.contoso.com domain.

Computer1 contains a folder named Folder1. In the Security settings of Folder1, Everyone is assigned the Full control permissions.

On Computer1, you share Folder1 as Share1 and assign the Read permissions for Share1 to the Users group. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
All the local users on Computer1 have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the corp.contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>
All the users in the contoso.com domain have Read access to \\Computer1\Share1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

References:

**NEW QUESTION 263**

- (Exam Topic 4)

You have a computer that is configured as shown in the following exhibit.

```
C:\Users\user-a>ipconfig /all

Windows IP Configuration

Host Name . . . . . : DESKTOP-8FF1SK7
Primary Dns Suffix . . . . . :
Node Type . . . . . : Hybrid
IP Routing Enabled . . . . . : No
WINS Proxy Enabled . . . . . : No

Ethernet adapter Ethernet:

Connection-specific DNS Suffix . . . . . :
Description . . . . . : Microsoft Hyper-V Network Adapter
Physical Address . . . . . : 00-15-5D-00-04-56
DHCP Enabled . . . . . : Yes
Autoconfiguration Enabled . . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5c1c:443f:c050:1e14%4(Preferred)
Autoconfiguration IPv4 Address . . . . . : 169.254.30.20(Preferred)
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . :
DHCPv6 IAID . . . . . : 50337117
DHCPv6 Client DUID . . . . . : 00-01-00-01-23-62-12-AF-00-15-5D-00-04-56
DNS Servers . . . . . : fec0:0:0:ffff::1%1
                       fec0:0:0:ffff::2%1
                       fec0:0:0:ffff::3%1
NetBIOS over Tcpi . . . . . : Enabled
```

What can the computer connect to?

- A. all the local computers and the remote computers within your corporate network only
- B. all the local computers and the remote computers, including Internet hosts
- C. only other computers on the same network segment that have automatic private IP addressing (APIPA)
- D. only other computers on the same network segment that have an address from a class A network ID

**Answer:** B

**NEW QUESTION 264**

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10. Computer1 belongs to a workgroup. You run the following commands on Computer1.  
 New-LocalUser -Name User1 -NoPassword Add-LocalGroupMember User -Member User1 What is the effect of the configurations?

- A. User1 is prevented from signing in until the user is assigned additional user rights.
- B. User1 appears on the sign-in screen and can sign in without a password.
- C. User1 is prevented from signing in until an administrator manually sets a password for the user.
- D. User1 appears on the sign-in screen and must set a new password on the first sign-in attempts.

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powershell/module/microsoft.powershell.localaccounts/new-localuser?view=powershell-5.1>

**NEW QUESTION 269**

- (Exam Topic 4)

You have a computer that runs Windows 10 Pro. The computer contains the users shown in the following table.

Name	Description
User1	Member of the local Administrators group
User2	Standard user
User3	Standard user

You need to use a local Group Policy Object (GPO) to configure one group of settings for all the members of the local Administrators group and another group of settings for all non-administrators. What should you do?

- A. Use the runas command to open Gpedit.msc as each user.
- B. Run mmc as User1 and add the Group Policy Object Editor snap-in twice.
- C. Open Gpedit.msc as User1 and add two Administrative Templates.
- D. Run mmc as User1 and add the Security Templates snap-in twice.

**Answer:** B

**Explanation:**

Add the Group Policy Object Editor snap-in twice. Select Browse > Users > Administrators when you add the first snap-in and select Browse > Users > Non-Administrators when you add the second snap-in.

**NEW QUESTION 270**

- (Exam Topic 4)

You have a workgroup computer named Computer1 that runs Windows 10. Computer1 contains five local user accounts. You need to ensure that all users who sign in to Computer1 see a picture named image1.jpg as the desktop background.

What should you do?

- A. Desktop.jpg and copy the picture to the C:\Users\Default\Desktop folder
- B. From the Settings app, modify the Background settings.
- C. From the local Group Policy Editor, modify the Desktop Background settings.
- D. modify the Desktop settings.
- E. Rename Image1.jpg as Desktop.jpg and copy the picture to the C:\Windows\system32\ folder.

**Answer:** B

**NEW QUESTION 273**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer 1 that runs Windows 10. You need to be able to reset computer accounts from Computer1. What should you do first?

- A. From Windows Defender Firewall, allow Windows Remote Management
- B. Add the RSAT: Active Directory Domain Services and Lightweight Directory Services Tools optional feature.
- C. From Windows Defender Firewall, allow Remote Service Management
- D. Add the RSAT: Server Manager optional feature.

**Answer:** B

**NEW QUESTION 278**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 100 computers that run Windows 10.

You need to create a Start menu layout file. The solution must meet the following requirements:

- > Contain an app group named Contoso Apps that has several pinned items. Contoso Apps must be locked from user modification.
- > Ensure that users can customize other parts of the Start screen.
- > Minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

**Actions**

Deploy the start layout.

Modify the StartLayoutCollection XML element.

Modify the DefaultLayoutOverride XML element.

Export the start layout to a file.

On a reference computer, customize the Start menu.

**Answer Area**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- \* 1. On a reference computer, customize the Start menu
- \* 2. Export the start layout to a file
- \* 3. Modify the Defaultlayoutoverride XML element
- \* 4. Deploy the start layout References:  
<https://docs.microsoft.com/en-us/windows/configuration/customize-and-export-start-layout>

**NEW QUESTION 282**

- (Exam Topic 4)  
 You have 20 computers that run Windows 11.  
 You need to enable Windows Sandbox on the computers.  
 How should you complete the command? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

-FeatureName
Add-AppxPackage
Add-WindowsCapability
Add-WindowsPackage
Enable-WindowsOptionalFeature

-All -Online
"Containers-DisposableClientVM"
"HostGuardian"
"HypervisorPlatform"
"VirtualMachinePlatform"

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Enable-WindowsOptionalFeature  
 To Enable Windows 10 Sandbox with PowerShell,  
 \* 1. Open PowerShell as Administrator.  
 \* 2. Type or copy-paste the following command:  
 Enable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -All -Online  
 \* 3. When prompted to restart the computer, type Y, and press Enter.  
 \* 4. The change can be undone with the following command:  
 \* 5. Disable-WindowsOptionalFeature -FeatureName "Containers-DisposableClientVM" -Online  
 Box 2: "Containers-DisposableClientVM"  
<https://learn.microsoft.com/en-us/windows/security/threat-protection/windows-sandbox/windows-sandbox-over>

**NEW QUESTION 283**

- (Exam Topic 4)  
 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
 You have a laptop named Computer1 that runs Windows 10.  
 When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.  
 Solution: From the Services console, you disable the Link-Layer Topology Discovery Mapper service. Does this meet the goal?

- A. Yes
- B. No

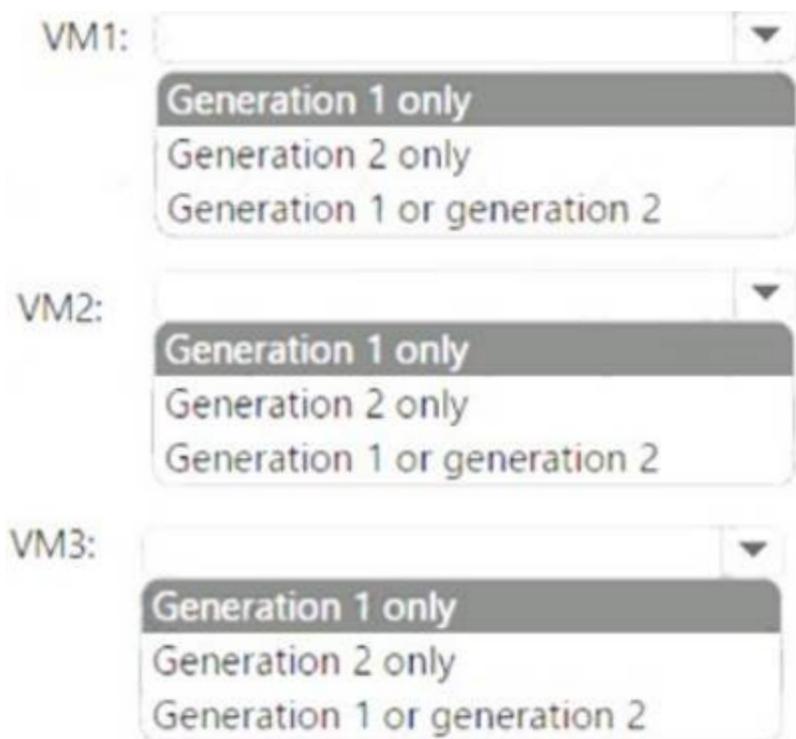

**Answer:** B

**NEW QUESTION 287**

- (Exam Topic 4)  
 You need to create a virtual machines shown in the following table:

Name	Operating system	Requirement
VM1	64-bit version of Windows 8.1 Pro	Start from a floppy disk.
VM2	32-bit version of Windows 10 Pro	Start from the network.
VM3	64-bit version of Windows 10 Pro	Start from an SCSI VHD.

Which generations should you use for each virtual machine? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

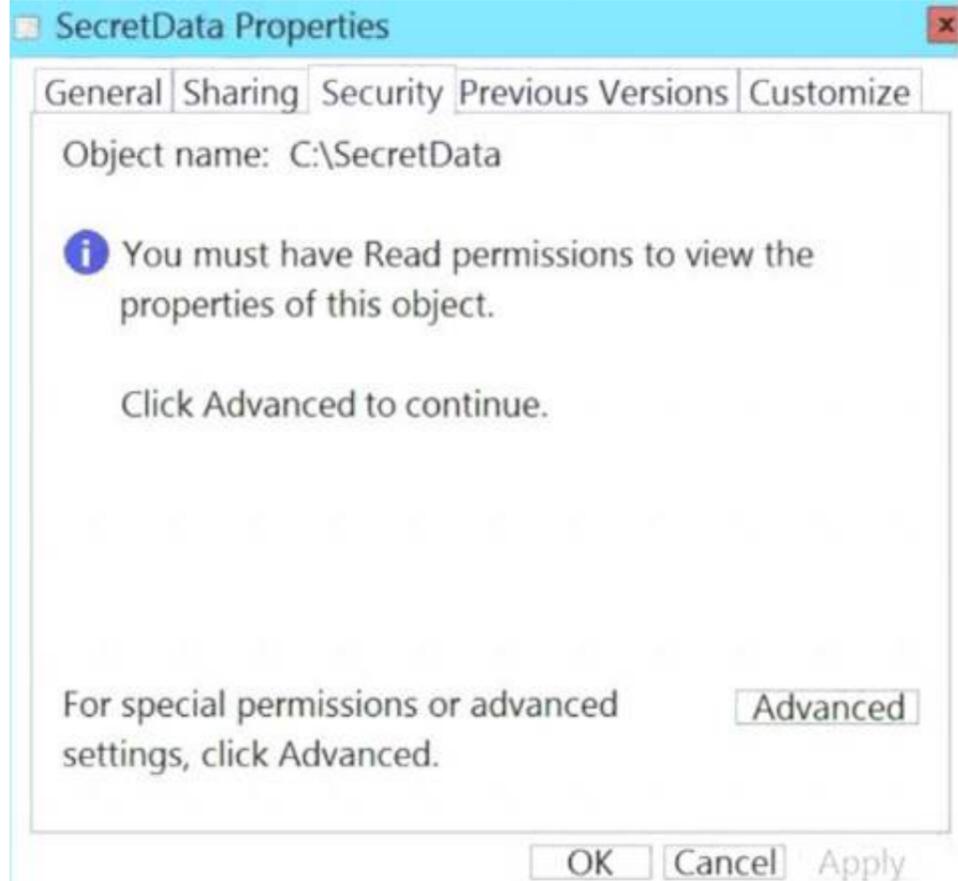

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 290**

- (Exam Topic 4)

User1 is a member of the Administrators group on a computer that runs Windows 10.

When User1 attempts to view the security settings of a folder named C:\SecretData, the user receives the message in the Security exhibit.

On the computer, you sign in as a member of the Administrators group and view the permissions to C:\SecretData as shown in the Permissions exhibit.

You need to restore User1's access to C:\SecretData. What should you do first?

- A. From the Permissions tab of Advanced Security Settings for SecretData, select Change to take ownership of the folder.
- B. From the Permissions tab of Advanced Security Settings for SecretData, select Continue to attempt the operation by using administrative privileges.
- C. Assign User1 Full control permissions to the C folder and set the inheritance to This folder, subfolders and files.
- D. From an elevated command prompt, run `cacls.exe c:\secretdata /g user1:F`.

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/troubleshoot/windows-server/windows-security/dont-have-permission-access-f>

#### NEW QUESTION 291

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a laptop named Computer1 that runs Windows 10.

When in range, Computer1 connects automatically to a Wi-Fi network named Wireless1. You need to prevent Computer1 from automatically connecting to Wireless1.

Solution: From a command prompt, you run `netsh wlan delete profile name="Wireless1"`. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://lifelacker.com/remove-wi-fi-profiles-from-windows-8-1-from-the-command-1449954864>

#### NEW QUESTION 292

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 10.

You need to view the settings to Computer1 by Group Policy objects (GPOs) in the domain and local Group Policies.

Which command should you run?

- A. `gpresult`
- B. `secedit`
- C. `gpupdate`
- D. `gpfixup`

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows-server/administration/windows-commands/gpresult>

#### NEW QUESTION 297

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server1 that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

**Answer Area**

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS)	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated
