

SC-900 Dumps

Microsoft Security. Compliance and Identity Fundamentals

<https://www.certleader.com/SC-900-dumps.html>

What do you use to provide real-time integration between Azure Sentinel and another security source?

- A. Azure AD Connect
B. a Log Analytics workspace
C. Azure Information Protection
D. a connector

Explanation:

To on-board Azure Sentinel, you first need to connect to your security sources. Azure Sentinel comes with a number of connectors for Microsoft solutions, including Microsoft 365 Defender solutions, and Microsoft 365 sources, including Office 365, Azure AD, Microsoft Defender for Identity, and Microsoft Cloud App Security, etc.

Which service includes the Attack simulation training feature?

- A. Microsoft Defender for Cloud Apps
B. Microsoft Defender for Office 365
C. Microsoft Defender for Identity
D. Microsoft Defender for SQL

Answer: B

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Compliance Manager tracks only customer-managed controls.	<input type="radio"/>	<input type="radio"/>
Compliance Manager provides predefined templates for creating assessments.	<input type="radio"/>	<input type="radio"/>
Compliance Manager can help you assess whether data adheres to specific data protection standards.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: No

Compliance Manager tracks Microsoft managed controls, customer-managed controls, and shared controls. Box 2: Yes

Box 3: Yes

Select the answer that correctly completes the sentence.

Microsoft Cloud App Security	<ul style="list-style-type: none"> is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.
Microsoft Defender for Endpoint	
Microsoft Defender for Identity	
Microsoft Defender for Office 365	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated with medium confidence

NEW QUESTION 5

Which two cards are available in the Microsoft 365 Defender portal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Users at risk
- B. Compliance Score
- C. Devices at risk
- D. Service Health
- E. User Management

Answer: BC

NEW QUESTION 6

In the Microsoft Cloud Adoption Framework for Azure, which two phases are addressed before the Ready phase? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Plan
- B. Manage
- C. Adopt
- D. Govern
- E. Define Strategy

Answer: AE

NEW QUESTION 7

Select the answer that correctly completes the sentence.

▼

Azure Application Insights

Azure Network Watcher

Log Analytics workspaces

Security baselines for Azure

provides benchmark recommendations and guidance for protecting Azure services.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated with medium confidence

NEW QUESTION 8

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
In software as a service (SaaS), applying service packs to applications is the responsibility of the organization.	<input type="radio"/>	<input type="radio"/>
In infrastructure as a service (IaaS), managing the physical network is the responsibility of the cloud provider.	<input type="radio"/>	<input type="radio"/>
In all Azure cloud deployment types, managing the security of information and data is the responsibility of the organization.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 9

Which three statements accurately describe the guiding principles of Zero Trust? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Define the perimeter by physical locations.
- B. Use identity as the primary security boundary.
- C. Always verify the permissions of a user explicitly.

- D. Always assume that the user system can be breached.
- E. Use the network as the primary security boundary.

Answer: BCD

NEW QUESTION 10

What is a use case for implementing information barrier policies in Microsoft 365?

- A. to restrict unauthenticated access to Microsoft 365
- B. to restrict Microsoft Teams chats between certain groups within an organization
- C. to restrict Microsoft Exchange Online email between certain groups within an organization
- D. to restrict data sharing to external email recipients

Answer: B

Explanation:

Information barriers are supported in Microsoft Teams, SharePoint Online, and OneDrive for Business. A compliance administrator or information barriers administrator can define policies to allow or prevent communications between groups of users in Microsoft Teams. Information barrier policies can be used for situations like these:

NEW QUESTION 10

Select the answer that correctly completes the sentence.

Answer Area

	requires additional verification, such as a verification code sent to a mobile phone.
Multi-factor authentication (MFA)	
Pass-through authentication	
Password writeback	
Single sign-on (SSO)	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Multi-factor authentication is a process where a user is prompted during the sign-in process for an additional form of identification, such as to enter a code on their cellphone or to provide a fingerprint scan.

NEW QUESTION 12

Select the answer that correctly completes the sentence.

When users sign in to the Azure portal, they are first	
	assigned permissions.
	authenticated.
	authorized.
	resolved.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 15

Select the answer that correctly completes the sentence.

Answer Area

	is a cloud-native security information and event management (SIEM) and security orchestration automated response (SOAR) solution used to provide a single solution for alert detection, threat visibility, proactive hunting, and threat response.
Azure Advisor	
Azure Bastion	
Azure Monitor	
Azure Sentinel	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Microsoft Azure Sentinel is a scalable, cloud-native, security information event management (SIEM) and security orchestration automated response (SOAR) solution.

NEW QUESTION 19

Select the answer that correctly completes the sentence.

_____ is the process of identifying whether a signed-in user can access a specific resource.

Authentication
Authorization
Federation
Single sign-on (SSO)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 24

Select the answer that correctly completes the sentence.

_____ enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

Active Directory Domain Services (AD DS)
Active Directory forest trusts
Azure Active Directory (Azure AD) business-to-business (B2B)
Azure Active Directory business-to-consumer B2C (Azure AD B2C)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

_____ enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

Active Directory Domain Services (AD DS)
Active Directory forest trusts
Azure Active Directory (Azure AD) business-to-business (B2B)
Azure Active Directory business-to-consumer B2C (Azure AD B2C)

NEW QUESTION 25

What can you use to provision Azure resources across multiple subscriptions in a consistent manner?

- A. Microsoft Defender for Cloud
- B. Azure Blueprints
- C. Microsoft Sentinel
- D. Azure Policy

Answer: B

NEW QUESTION 26

Microsoft 365 Endpoint data loss prevention (Endpoint DLP) can be used on which operating systems?

- A. Windows 10 and iOS only
- B. Windows 10 and Android only
- C. Windows 10, Android, and iOS
- D. Windows 10 only

Answer: A

NEW QUESTION 30

Which score measures an organization's progress in completing actions that help reduce risks associated to data protection and regulatory standards?

- A. Microsoft Secure Score
- B. Productivity Score
- C. Secure score in Azure Security Center
- D. Compliance score

Answer: D

NEW QUESTION 34

What can you use to view the Microsoft Secure Score for Devices?

- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Endpoint
- C. Microsoft Defender for Identity
- D. Microsoft Defender for Office 365

Answer: B

Explanation:

- Artikel
- 12.05.2022
- 3 Minuten Lesedauer

Microsoft Secure Score for DevicesApplies to:

- Microsoft Defender for Endpoint Plan 2
- Microsoft Defender Vulnerability Management
- Microsoft 365 Defender

Some information relates to pre-released product which may be substantially modified before it's commercially released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

To sign up for the Defender Vulnerability Management public preview or if you have any questions, contact us (mdvmtrial@microsoft.com).

Already have Microsoft Defender for Endpoint P2? Sign up for a free trial of the Defender Vulnerability Management Add-on.

Configuration score is now part of vulnerability management as Microsoft Secure Score for Devices.

Your score for devices is visible in the Defender Vulnerability Management dashboard of the Microsoft 365 Defender portal. A higher Microsoft Secure Score for Devices means your endpoints are more resilient from cybersecurity threat attacks. It reflects the collective security configuration state of your devices across the following categories:

- Application
- Operating system
- Network
- Accounts
- Security controls

Select a category to go to the Security recommendations page and view the relevant recommendations.

Turn on the Microsoft Secure Score connectorForward Microsoft Defender for Endpoint signals, giving Microsoft Secure Score visibility into the device security posture. Forwarded data is stored and processed in the same location as your Microsoft Secure Score data.

Changes might take up to a few hours to reflect in the dashboard.

- In the navigation pane, go to Settings > Endpoints > General > Advanced features
- Scroll down to Microsoft Secure Score and toggle the setting to On.
- Select Save preferences.

How it worksMicrosoft Secure Score for Devices currently supports configurations set via Group Policy. Due to the current partial Intune support, configurations which might have been set through Intune might show up as misconfigured. Contact your IT Administrator to verify the actual configuration status in case your organization is using Intune for secure configuration management.

The data in the Microsoft Secure Score for Devices card is the product of meticulous and ongoing vulnerability discovery process. It is aggregated with configuration discovery assessments that continuously:

- Compare collected configurations to the collected benchmarks to discover misconfigured assets
- Map configurations to vulnerabilities that can be remediated or partially remediated (risk reduction)
- Collect and maintain best practice configuration benchmarks (vendors, security feeds, internal research teams)
- Collect and monitor changes of security control configuration state from all assets

NEW QUESTION 35

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Active Directory (Azure AD) is deployed to an on-premises environment.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is an identity and access management service.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: No

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service. Box 2: Yes

Microsoft 365 uses Azure Active Directory (Azure AD). Azure Active Directory (Azure AD) is included with your Microsoft 365 subscription.

Box 3: Yes

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

NEW QUESTION 40

Which type of identity is created when you register an application with Active Directory (Azure AD)?

- A. a user account
- B. a user-assigned managed identity
- C. a system-assigned managed identity
- D. a service principal

Answer: D

Explanation:

When you register an application through the Azure portal, an application object and service principal are automatically created in your home directory or tenant.

NEW QUESTION 45

Select the answer that correctly completes the sentence.

Microsoft Sentinel

analytic rules

hunting queries

playbooks

workbooks

use Azure Logic Apps to automate and orchestrate responses to alerts.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

playbooks

<https://docs.microsoft.com/en-us/azure/sentinel/tutorial-respond-threats-playbook>

NEW QUESTION 46

Which Microsoft 365 compliance feature can you use to encrypt content automatically based on specific conditions?

- A. Content Search
- B. sensitivity labels
- C. retention policies
- D. eDiscovery

Answer: B

NEW QUESTION 47

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Policy supports automatic remediation.	<input type="radio"/>	<input type="radio"/>
Azure Policy can be used to ensure that new resources adhere to corporate standards.	<input type="radio"/>	<input type="radio"/>
Compliance evaluation in Azure Policy occurs only when a target resource is created or modified.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 51

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. phone call
- B. text message (SMS)
- C. email verification
- D. Microsoft Authenticator app
- E. security question

Answer: ABD

NEW QUESTION 53

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Applying system updates increases an organization's secure score in Azure Security Center.	<input type="radio"/>	<input type="radio"/>
The secure score in Azure Security Center can evaluate resources across multiple Azure subscriptions.	<input type="radio"/>	<input type="radio"/>
Enabling multi-factor authentication (MFA) increases an organization's secure score in Azure Security Center.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

System updates reduces security vulnerabilities, and provide a more stable environment for end users. Not applying updates leaves unpatched vulnerabilities and results in environments that are susceptible to attacks.

Box 2: Yes

Box 3: Yes

If you only use a password to authenticate a user, it leaves an attack vector open. With MFA enabled, your accounts are more secure.

NEW QUESTION 57

Select the answer that correctly completes the sentence.

Answer Area

You can use in the Microsoft 365 security center to view an aggregation of alerts that relate to the same attack.

Reports
Hunting
Attack simulator
Incidents

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 62

Match the Azure networking service to the appropriate description.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Services	Answer Area
Azure Bastion	Service Provides Network Address Translation (NAT) services
Azure Firewall	Service Provides secure and seamless Remote Desktop connectivity to Azure virtual machines
Network security group (NSG)	Service Provides traffic filtering that can be applied to specific network interfaces on a virtual network

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Azure Firewall

Azure Firewall provide Source Network Address Translation and Destination Network Address Translation. Box 2: Azure Bastion

Azure Bastion provides secure and seamless RDP/SSH connectivity to your virtual machines directly from the Azure portal over TLS.

Box 3: Network security group (NSG)

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network.

NEW QUESTION 66

What are three uses of Microsoft Cloud App Security? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. to discover and control the use of shadow IT
- B. to provide secure connections to Azure virtual machines
- C. to protect sensitive information hosted anywhere in the cloud
- D. to provide pass-through authentication to on-premises applications
- E. to prevent data leaks to noncompliant apps and limit access to regulated data

Answer: ACE

NEW QUESTION 69

You need to keep a copy of all files in a Microsoft SharePoint site for one year, even if users delete the files from the site. What should you apply to the site?

- A. a data loss prevention (DLP) policy
- B. a retention policy
- C. an insider risk policy
- D. a sensitivity label policy

Answer: B

NEW QUESTION 72

Select the answer that correctly completes the sentence.

Compliance Manager can be directly accessed from the

- Microsoft 365 admin center.
- Microsoft 365 Defender portal.
- Microsoft 365 Compliance Center
- Microsoft Support portal.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Compliance Manager can be directly accessed from the

- Microsoft 365 admin center.
- Microsoft 365 Defender portal.
- Microsoft 365 Compliance Center
- Microsoft Support portal.

NEW QUESTION 73

Select the answer that correctly completes the sentence.

A domain controller
Active Directory Domain Services (AD DS)
Azure Active Directory (Azure AD) Privilege Identity Management (PIM)
Federation

provides single sign-on (SSO) capabilities across multiple identity providers.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

A domain controller
Active Directory Domain Services (AD DS)
Azure Active Directory (Azure AD) Privilege Identity Management (PIM)
Federation

provides single sign-on (SSO) capabilities across multiple identity providers.

NEW QUESTION 74

Select the answer that correctly completes the sentence.

Answer Area

Federation is used to establish between organizations.

multi-factor authentication (MFA)
a trust relationship
user account synchronization
a VPN connection

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Federation is a collection of domains that have established trust. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/whatis-fed>

NEW QUESTION 78

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
With Advanced Audit in Microsoft 365, you can identify when email items were accessed.	<input type="radio"/>	<input type="radio"/>
Advanced Audit in Microsoft 365 supports the same retention period of audit logs as core auditing.	<input type="radio"/>	<input type="radio"/>
Advanced Audit in Microsoft 365 allocates customer-dedicated bandwidth for accessing audit data.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

The MailItemsAccessed event is a mailbox auditing action and is triggered when mail data is accessed by mail protocols and mail clients.

Box 2: No

Basic Audit retains audit records for 90 days.

Advanced Audit retains all Exchange, SharePoint, and Azure Active Directory audit records for one year. This is accomplished by a default audit log retention policy that retains any audit record that contains the value of Exchange, SharePoint, or AzureActiveDirectory for the Workload property (which indicates the service in which the activity occurred) for one year.

Box 3: yes

Advanced Audit in Microsoft 365 provides high-bandwidth access to the Office 365 Management Activity API.

NEW QUESTION 80

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can use Advanced Audit in Microsoft 365 to view billing details.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to view the contents of an email message.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to identify when a user uses the search bar in Outlook on the web to search for items in a mailbox.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

Box 1: No

Advanced Audit helps organizations to conduct forensic and compliance investigations by increasing audit log retention.

Box 2: No

Box 3: Yes

NEW QUESTION 81

What is an assessment in Compliance Manager?

- A. A grouping of controls from a specific regulation, standard or policy.
- B. Recommended guidance to help organizations align with their corporate standards.
- C. A dictionary of words that are not allowed in company documents.
- D. A policy initiative that includes multiple policies.

Answer: B

Explanation:

Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors.

Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:

Compliance Manager helps simplify compliance and reduce risk by providing:

- Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).
- Workflow capabilities to help you efficiently complete your risk assessments through a single tool.
- Detailed step-by-step guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results.
- A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.

NEW QUESTION 86

Which three authentication methods does Windows Hello for Business support? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. fingerprint
- B. facial recognition
- C. PIN
- D. email verification
- E. security question

Answer: ABC

NEW QUESTION 91

In a hybrid identity model, what can you use to sync identities between Active Directory Domain Services (AD DS) and Azure Active Directory (Azure AD)?

- A. Active Directory Federation Services (AD FS)
- B. Azure Sentinel
- C. Azure AD Connect
- D. Azure Ad Privileged Identity Management (PIM)

Answer: C

NEW QUESTION 93

Which Microsoft 365 feature can you use to restrict communication and the sharing of information between members of two departments at your organization?

- A. sensitivity label policies
- B. Customer Lockbox
- C. information Barriers
- D. Privileged Access Management (PAM)

Answer: C

NEW QUESTION 95

Select the answer that correctly completes the sentence.

Answer Area

With Windows Hello for Business, a user's biometric data used for authentication

- ☐ is stored on an external device.
- ☐ is stored on a local device only.
- ☐ is stored in Azure Active Directory (Azure AD).
- ☐ is replicated to all the devices designated by the user.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

Biometrics templates are stored locally on a device. Reference:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-overview>

NEW QUESTION 99

What is a characteristic of a sensitivity label in Microsoft 365?

- A. persistent
- B. encrypted
- C. restricted to predefined categories

Answer: B

NEW QUESTION 104

What can you use to scan email attachments and forward the attachments to recipients only if the attachments are free from malware?

- A. Microsoft Defender for Office 365
- B. Microsoft Defender Antivirus
- C. Microsoft Defender for Identity
- D. Microsoft Defender for Endpoint

Answer: A

NEW QUESTION 107

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Network security groups (NSGs) can deny inbound traffic from the internet.	<input type="radio"/>	<input type="radio"/>
Network security groups (NSGs) can deny outbound traffic to the internet.	<input type="radio"/>	<input type="radio"/>
Network security groups (NSGs) can filter traffic based on IP address, protocol, and port.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources. For each rule, you can specify source and destination, port, and protocol.

NEW QUESTION 108

Which compliance feature should you use to identify documents that are employee resumes?

- A. pre-trained classifiers
- B. Content explorer
- C. Activity explorer
- D. eDiscovery

Answer: C

NEW QUESTION 113

What are customers responsible for when evaluating security in a software as a service (SaaS) cloud services model?

- A. applications
- B. network controls
- C. operating systems
- D. accounts and identities

Answer: D

NEW QUESTION 117

What can you use to provide a user with a two-hour window to complete an administrative task in Azure?

- A. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- B. Azure Multi-Factor Authentication (MFA)
- C. Azure Active Directory (Azure AD) Identity Protection
- D. conditional access policies

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure> Privileged Identity Management provides time-based and approval-based role activation to mitigate the risks of excessive, unnecessary, or misused access permissions on resources that you care about. Here are some of the key features of Privileged Identity Management: Provide just-in-time privileged access to Azure AD and Azure resources Assign time-bound access to resources using start and end dates Require approval to activate privileged roles Enforce multi-factor authentication to activate any role Use justification to understand why users activate Get notifications when privileged roles are activated Conduct access reviews to ensure users still need roles Download audit history for internal or external audit Prevents removal of the last active Global Administrator role assignment

NEW QUESTION 122

Which Azure Active Directory (Azure AD) feature can you use to provide just-in-time (JIT) access to manage Azure resources?

- A. conditional access policies
- B. Azure AD Identity Protection
- C. Azure AD Privileged Identity Management (PIM)
- D. authentication method policies

Answer: C

Explanation:

Azure AD Privileged Identity Management (PIM) provides just-in-time privileged access to Azure AD and Azure resources

NEW QUESTION 126

Select the answer that correctly completes the sentence.

Answer Area

You can manage Microsoft Intune by using the

	▼
Azure Active Directory admin center.	
Microsoft 365 compliance center.	
Microsoft 365 security center.	
Microsoft Endpoint Manager admin center.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, Word Description automatically generated

NEW QUESTION 127

Which Microsoft portal provides information about how Microsoft manages privacy, compliance, and security?

- A. Microsoft Service Trust Portal

- B. Compliance Manager
- C. Microsoft 365 compliance center
- D. Microsoft Support

Answer: A

NEW QUESTION 130

Which Microsoft 365 compliance center feature can you use to identify all the documents on a Microsoft SharePoint Online site that contain a specific key word?

- A. Audit
- B. Compliance Manager
- C. Content Search
- D. Alerts

Answer: C

Explanation:

The Content Search tool in the Security & Compliance Center can be used to quickly find email in Exchange mailboxes, documents in SharePoint sites and OneDrive locations, and instant messaging conversations in Skype for Business.

The first step is to starting using the Content Search tool to choose content locations to search and configure a keyword query to search for specific items.
