

## Exam Questions PL-100

Microsoft Power Platform App Maker

<https://www.2passeasy.com/dumps/PL-100/>

### NEW QUESTION 1

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity.

Does the solution meet the goal?

A. Yes

B. No

**Answer: A**

#### Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

### NEW QUESTION 2

DRAG DROP - (Topic 4)

You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.

You need to pick the appropriate solution type for each requirement.

Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Requirement	Solution type
Edit existing components of the solution.	Unmanaged
Add new components to the solution.	Unmanaged
Export the solution.	Managed

Box 1: Unmanaged

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Box 2: Unmanaged

Box 3: Managed

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

NEW QUESTION 3

DRAG DROP - (Topic 4)  
DRAG DROP

You are designing a new model-driven app for salespeople at a company. The company requires that all new line-of-business apps must use as much native functionality as possible to avoid having developers maintain code. You need to determine how to implement the app's business logic. Which method should you use? To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may NOTE: Each correct selection is worth one point.

Methods	Requirement	Method
Business rules	Validate the postal code format based on the state or province entered by a user.	
Power Automate flows	Ensure that the app can communicate with other business applications by using existing connectors.	
Business process flows		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Methods	Requirement	Method
Business rules	Validate the postal code format based on the state or province entered by a user.	Business rules
Power Automate flows	Ensure that the app can communicate with other business applications by using existing connectors.	Power Automate flows
Business process flows		

NEW QUESTION 4

DRAG DROP - (Topic 4)  
A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products. The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings. Only two new tables should be created in Microsoft Dataverse: ? Products: Holds the products that can be requested. ? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category. You need to identify the data types to use when building the table columns in Dataverse. Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Data types	Scenario	Data types
Lookup	Create a column in the Products table that displays the category of the product	Data type
Choice	Create a column in the Products table for the product ID of the product	Data type
Text	Create a column in the Requests table that allows the user to select from a list of available products	Data type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text  
Text columns can contain text characters. This column type has several format options that will change the presentation of the text.  
Box 2: Lookup  
When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.  
Box 3: Choice  
You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 5

HOTSPOT - (Topic 4)  
You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼

Name\_DataCard1.Default

Name\_DataCardKey1.Default

Name\_DataCardValue1.Default

Which action should you perform on the People icon?

▼

In the On Select property, set the Activity form to Edit mode.

In the On Select property, set the Activity form to View mode.

Move the icon to the Activity form and set the On Select property to the Activity screen.

Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Name\_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

## NEW QUESTION 6

- (Topic 4)

You are an app designer for a hotel.

The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.

Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

**Answer:** A

**Explanation:**

Manage environment in the Power Platform admin center. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

## NEW QUESTION 7

HOTSPOT - (Topic 4)

HOTSPOT

A company is creating an app to manage project status reports. Users will update a series of controls and click a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms. You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Action	Formula component
Assign the scope for the variable.	<div>Global variable Collection Context variable Global variable Lookups</div>
Separate the calculate action from the previous screen.	<div>: . :   -</div>
Go to the next page.	<div>Navigate() Navigate() Revert() NewForm() SetFocus()</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Formula component
Assign the scope for the variable.	<div>Global variable</div>
Separate the calculate action from the previous screen.	<div>:</div>
Go to the next page.	<div>Navigate()</div>

NEW QUESTION 8

- (Topic 4)  
You create a canvas app.  
You need to make the app available to other people in your company.  
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Grant access to individual users in your company.
- B. Share the app with a Microsoft Exchange distribution list.
- C. Grant access to a Microsoft Teams team.
- D. Share the app with a Microsoft Azure Active Directory security group.

Answer: AD

Explanation:

After you build a canvas app that addresses a business need, specify which users in your organization can run the app and which can modify and even reshare it. Specify each user by name, or specify a security group in Azure Active Directory.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/share-app>

NEW QUESTION 9

DRAG DROP - (Topic 4)  
You ate designing an app to track time off for employees. Employee data, including employee ID number, is stored in an existing data source used by other apps. Employees must be able to look up their employee ID number and enter time-off start and end dates in the app. You need to configure the elements of the data source. Which data elements should you use? To answer, drag the appropriate data elements to the correct data. Each data element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Data elements	Answer Area	Data	Data element
Table		Time-off dates for all employees	
View		Employee ID number	
Record reference			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Data elements

Table

View

Record reference

Answer Area

Data

Time-off dates for all employees

Employee ID number

Data element

Record reference

View

NEW QUESTION 10

DRAG DROP - (Topic 4)

A company has the following divisions: wholesale and retail.  
The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.  
You need to ensure that each user sees data only for the team to which the user is assigned.  
How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Options

Power BI Service

Power BI Desktop

Common Data Service

Power Platform Admin center

Answer Area

Action

Option

Create the team as a role.

Option

Add members to the role.

Option

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power BI Desktop  
You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.  
To define security roles, follow these steps.  
? Import data into your Power BI Desktop report, or configure a DirectQuery connection.  
? From the Modeling tab, select Manage Roles.  
? From the Manage roles window, select Create.  
? Etc.

Box 2: Power BI Service  
After you save your report in Power BI Report Server, you manage security and add or remove members on the server.  
\* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.  
\* 2. In Power BI Report Service, select the ellipsis (...) next to the report.  
\* 3. Select Manage > Row-level security.

Properties

Data sources

Scheduled refresh

Row-level security

Security

+ Add Member

Delete

Search...

Edit

Group or user ^

On the Row-level security page, you add members to a role you created in Power BI Desktop.

NEW QUESTION 10

- (Topic 4)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

**Answer:** D

**Explanation:**

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

**NEW QUESTION 11**

DRAG DROP - (Topic 4)

You are an app and report maker. You provide visualizations for two departments in an organization.

Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.

Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Chart types	Requirement	Chart type
Multi-series	Unstructured answers to free text survey questions.	
Tag	Real-time column chart that groups complaints by category, urgency, and status.	
Stacked column		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Tag

Box 2: Multi-series

Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

**NEW QUESTION 12**

- (Topic 4)

You create a weekly report app as a canvas app. The data source for the app is a Microsoft SharePoint list.

The file that contains the weekly report must be attached to each submission made in the app. Employees must modify the report through the canvas app after the initial submission.

The manager must be notified by email when an employee updates the report. You need to create cloud flows.

Which SharePoint trigger should you use?

- A. When an item is created
- B. When an item or file is modified
- C. When a file is created (properties only)
- D. When a file is created in a folder

**Answer:** B

**NEW QUESTION 14**

- (Topic 4)

You create a model-driven app for salespeople.

Users must interact with a business process flow that invokes multiple tables. You need to instruct users where to find the business process flow, which component should you use?

- A. form
- B. command bar
- C. dashboard
- D. site map

**Answer:** D

### NEW QUESTION 18

HOTSPOT - (Topic 4)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model- driven app.

You need to ensure all users can see the tiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div>▼</div> <div>Power Platform Environment settings</div> <div>Power Apps settings</div> <div>Power BI Service settings</div> <div>Power BI Desktop settings</div>
Add tiles to a dashboard.	<div>▼</div> <div>Create a personal dashboard</div> <div>Create a Power BI dashboard.</div> <div>Create a system dashboard.</div>
Allow users to view tiles.	<div>▼</div> <div>Share tile and share dashboard.</div> <div>Share report and share dashboard.</div> <div>Share tile and publish dashboard.</div> <div>Share report and publish dashboard.</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

? In the Power Platform admin center, select an environment.

? Select Settings > Product > Features.

? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.

? Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

? Open your app and go to Dashboards.

? Select an existing personal dashboard or select New to create one.

? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.

? Add new Power BI tile.

? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.

? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.

? Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must

same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

### NEW QUESTION 23

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Model-driven application using native charts. Does the solution meet the goal?

- A. Yes

**Answer:** B

### NEW QUESTION 26

DRAG DROP - (Topic 4)

You create an expense claim app for a manufacturing company. Employees use the app to enter details of their expenses and upload receipts.

The company has an on-premises finance system with no APIs.

The company requires an automation to enable the manager to approve employee claim requests when they are submitted.

After a claim request is approved, the expense details must be entered in the on-premises finance system.

You need to create the flow.

Which flow type should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Flow types

Requirement

Approve employee claim requests when they are submitted.

Enter the expense details in the on-premises finance system.

Flow type

Automated flow

Automated flow

Scheduled flow

Instant flow

Cloud flow

Cloud flow

Desktop flow

Business process flow

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Flow types

Requirement

Approve employee claim requests when they are submitted.

Enter the expense details in the on-premises finance system.

Flow type

Automated flow

Cloud flow

NEW QUESTION 31

- (Topic 4)

A company uses Power Apps and Microsoft Dataverse. The company has a managed solution in the production environment. You make changes to the solution in the development environment. Some components are unused. The changes to the solution must be reflected in the production environment. You need to ensure that all unused components are removed. What should you do?

- A. Create a new solution
- B. Upgrade the solution.
- C. Update the solution.
- D. Patch the solution.

Answer: B

NEW QUESTION 35

DRAG DROP - (Topic 4)

DRAG DROP

A company uses data from a publicly available web service. You plan to create a tabular report by using Power BI Desktop to visualize data from the web service. The data returned in one column is numeric and must be converted to a corresponding text. You need to create the report and make it available only to co-workers.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Create a connection to the web service.

Publish to the Power BI service.

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

Answer area

Create a table and input the data from the web service.

Perform data transformation.

Create the visualization.

Publish to AppSource.

NEW QUESTION 37

- (Topic 4)  
You design a canvas app that has multiple screens. Each screen will have multiple button controls. The button controls must all have the same background color. You must be able to change  
You need to configure the button fill property. What should you do?

- A. Update the Fill property to a variable created by using the Navigate function.
- B. Update the Fill property to a variable created by using the Set function.
- C. Select all the buttons while holding the Ctrl key, and then change the color property.
- D. Use a background image property in place of setting a color property.

Answer: A

NEW QUESTION 41

- (Topic 3)  
You need to resolve the instructor's issue and ensure that the same issue does not occur again. What should you use?

- A. Gallery
- B. Combo box
- C. Custom component
- D. Choices

Answer: D

NEW QUESTION 45

- (Topic 3)  
You need to design the data model for the cooking classes.  
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Data	Component
Dish	<div><div>Microsoft SharePoint document</div><div>Custom table</div><div>Microsoft SharePoint document</div><div>Global choice</div></div>
Student type	<div><div>Connection role</div><div>Connection role</div><div>Custom column</div><div>Lookup column</div></div>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Data	Component
Dish	<div><div>Microsoft SharePoint document</div><div>Custom table</div><div>Microsoft SharePoint document</div><div>Global choice</div></div>
Student type	<div><div>Connection role</div><div>Connection role</div><div>Custom column</div><div>Lookup column</div></div>

NEW QUESTION 46

DRAG DROP - (Topic 3)

You need to create the food bank notification.

Which four actions should you perform in sequence? To answer, move the appropriate

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

NEW QUESTION 50

DRAG DROP - (Topic 3)

You need to select a design approach for the required features.

Which app type should you use? To answer, drag the appropriate app types to the correct requirements. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

App types

Microsoft Power Platform portal page

Power Apps canvas app

Power Virtual Agents chatbot

Answer Area

Requirement

Record student attendance start and end times.

Ensure that instructors can upload menus.

App type

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

App types

Microsoft Power Platform portal page

Power Apps canvas app

Power Virtual Agents chatbot

Answer Area

Requirement

Record student attendance start and end times.

Ensure that instructors can upload menus.

App type

Microsoft Power Platform portal page

Power Apps canvas app

NEW QUESTION 52

HOTSPOT - (Topic 2)

You need to resolve the issues found during testing.

Which option should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Option
Testers see all time entries.	<div><div></div><div>Hierarchical security</div><div>Security group</div><div>Security role</div></div>
Testers are able to edit existing time entries.	<div><div></div><div>Control property</div><div>Field-level security</div><div>Security role</div></div>
Managers cannot see required information.	<div><div></div><div>Access team template</div><div>Field-level security</div><div>Hierarchical security</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated  
Box 1: Security role  
Scenario: Employees must only be able to access their own time tracking records from the app.  
Testers report that they can see time entries in the Time Tracker app, not just their own.  
Box 2: Field-level security  
Scenario: Employees must only be able to modify time records for the current and previous day.  
Testers report that they can edit any existing time entries.  
Box 3: Hierarchical security  
You use field security tables to apply field-level security, which restricts field access to specified users and teams.

NEW QUESTION 56

HOTSPOT - (Topic 2)  
You need to configure the system to meet the sales requirements.  
What should you do? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Action
Ensure that work estimates are complete before entering estimated sales values into the Sales Log.	<div><div></div><div>Use a Business Process flow</div><div>Use a UI flow</div></div>
Prevent modification of timesheet entries by an employee.	<div><div></div><div>Add a custom control to the Business Process flow</div><div>Use a formula to set the DisplayMode property</div><div>Use a business rule</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Business Process flow  
Scenario: The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.  
Box 2: Use a formula to set the DisplayMode property  
DisplayMode - The mode to use for data cards and controls within the form control. Derived from the Mode property based and cannot be set independently:

Mode	DisplayMode	Description
FormMode.Edit	DisplayMode.Edit	Data cards and controls are editable, ready to accept changes to a record.
FormMode.New	DisplayMode.Edit	Data cards and controls are editable, ready to accept a new record.
FormMode.View	DisplayMode.View	Data cards and controls are not editable and optimized for viewing.

NEW QUESTION 57

HOTSPOT - (Topic 2)

If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.

You need to configure the system to meet the requirements.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Feature	Setting
Create the relationship between the Job Setup and Time Tracking entities.	<div>▼</div> <div>1:N</div> <div>N:N</div> <div>Self-referential</div>
Configure ownership for the Time Tracking entity.	<div>▼</div> <div>Business-owned</div> <div>Organization-owned</div> <div>User or Team owned</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: 1:N

Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.

Box 2: User or Team owned

Scenario: Employees must only be able to access their own time tracking records from the app.

User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

**NEW QUESTION 60**

HOTSPOT - (Topic 2)

You need to meet the requirement for the time tracking app.

Which controls should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	<div>▼</div> <div>Card</div> <div>Rating</div> <div>Slider</div> <div>Timer</div>
Read the employee's number into the app.	<div>▼</div> <div>Barcode-scanner</div> <div>Card</div> <div>Image</div> <div>Shape</div>
Display a photo of an employee when the employee badge is read.	<div>▼</div> <div>Camera</div> <div>Card</div> <div>Icon</div> <div>Image</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Timer

A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.

Box 2: Barcode scanner

The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.

Box 3: Image

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

**NEW QUESTION 63**

- (Topic 1)

You need to meet the requirements for sales representative that submit status reports. How should you configure the flow?

- A. Add a parallel branch that uses the value of a dynamic content variable
- B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
- C. Add a condition that evaluates the risk value by using a dynamic content variable
- D. Add a data operation action that evaluates a dynamic content variable

**Answer:** C

**Explanation:**

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received. Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

#### NEW QUESTION 67

- (Topic 1)

You need to configure functionality for submitting status reports. What should you do?

- A. Determine whether the application is offline when a user selects submit button and call the Sec () function.
- B. Determine whether the application is offline when the app load
- C. Use the SaveDaca () function in the OnSelect property.
- D. Determine whether the application is offline when a user selects the submit button and call the SaveDaca () function.
- E. Determine whether the application is offline when the app load
- F. Use the LoadDaca () function in the Submit button.

**Answer:** C

#### Explanation:

Scenario: The app must be able to run both online and offline. If the mobile device on which the app runs is connected to the internet, the app must immediately submit the status report.

When data is submitted offline, the data must be stored in the app until the app is back online.

Mobile users often need to be productive even when they have limited or no connectivity. LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

The SaveData function stores a collection for later use under a name.

The LoadData function reloads a collection by name that was previously saved with SaveData. You can't use this function to load a collection from another source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function->

#### NEW QUESTION 68

- (Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to tru
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to fals
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to fals
- G. Export the app as an unmanaged solution.

**Answer:** C

#### Explanation:

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

#### NEW QUESTION 72

- (Topic 4)

An automobile company uses Power Apps. The company uses a model-driven app to manage customers and repairs.

The Customer table has a custom column of type text named Best time to call. On the Repair form, employees require the Best time to call column to be displayed next to the customer name.

You need to modify the model-driven app to display the Best time to call column.

Which two steps should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add The Best time to call column to the quick view Repair form.
- B. Create a quick view form for the Repair table.
- C. Create a quick view form for the Customer table.

**Answer:** CD

#### NEW QUESTION 74

HOTSPOT - (Topic 4)

You are creating a Power Automate flow.

You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow:

@or(equals(item()['color'], 'red'),contains(item()['color'],'blue')) The filter returns results only when the expression resolves to true.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color orange	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color red	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color sky blue	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: No  
Box 2: Yes  
The item color must be red, or item color contains blue. Box 3: Yes

NEW QUESTION 78

- (Topic 4)  
You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen. Which formula should you use?

- A. UpdateContext( { RunningTotal: 5 } ); Navigate( MainScreen, ScreenTransition.Cover, RunningTotal );  
B. If( Value(TextBox1.Text) >= 0, (Set( RunningTotal, 5); Back();), Color.Green )  
C. UpdateContext( { RunningTotal:5 } ); Back()  
D. Set( RunningTotal, 5 ); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set( MyVar, 1 ) sets the global variable MyVar to a value of 1. Use the Back and Navigate function to change which screen is displayed. Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables>  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function- navigate>

NEW QUESTION 81

DRAG DROP - (Topic 4)  
You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app. Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
<div>Business rule</div>	Guide a user through the set of steps needed for onboarding a new employee.	<div></div>
<div>Power Automate</div>	Make date of birth mandatory when creating a new employee record.	<div></div>
<div>Business process flow</div>	Implement an approval flow for expense reports submitted by employees.	<div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Business process flow  
A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.  
Box 2: Business rule Box 3: Power Automate  
A Power Automate flow does not have any visual components like a business process flow. Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

NEW QUESTION 82

- (Topic 4)  
A company uses Microsoft Power Platform. You create a solution with components You deploy the solution in the production environment Users report issues with a process. You open the last imported solution. You need to troubleshoot the issue. What should you view?

- A. Solution dependencies
- B. Solution classic view
- C. History

Answer: D

NEW QUESTION 86

HOTSPOT - (Topic 4)

A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.

Service representatives use the app to perform the following activities:

- ? View their scheduled visits for the day.
- ? Record notes from service visits.
- ? Schedule service technicians for issues uncovered during site visits.
- ? Scan and upload service quote forms to a folder named Service Quote folder on Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval.

Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.

You need to create flows to meet the requirements.

Which type of flows should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	<div> <div></div> <div> Scheduled flow Automated flow Adaptive card flow Team flow </div> </div>
Approve service quote.	<div> <div></div> <div> Automated flow Button flow Scheduled flow Team flow </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Adaptive card flow

Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.

Directing content to Teams channels:

Post your own adaptive card as the Flow bot to a channel

This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.

Box 2: Button flow

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

NEW QUESTION 87

DRAG DROP - (Topic 4)

A company stores sales orders in a Microsoft Excel workbook. The company stores customer data in a SQL Server database.

You must import the data into a Microsoft Dataverse instance. You need to define the mapping for the migration.

Which component should you use? To answer, drag the appropriate components to the correct data type. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area	
Column	Data	Component
Table	Excel data	Component
Row	Customer data	Component
Data source	Customer identifier	Component
	Product data	Component

- A. Mastered
- B. Not Mastered

Answer: A

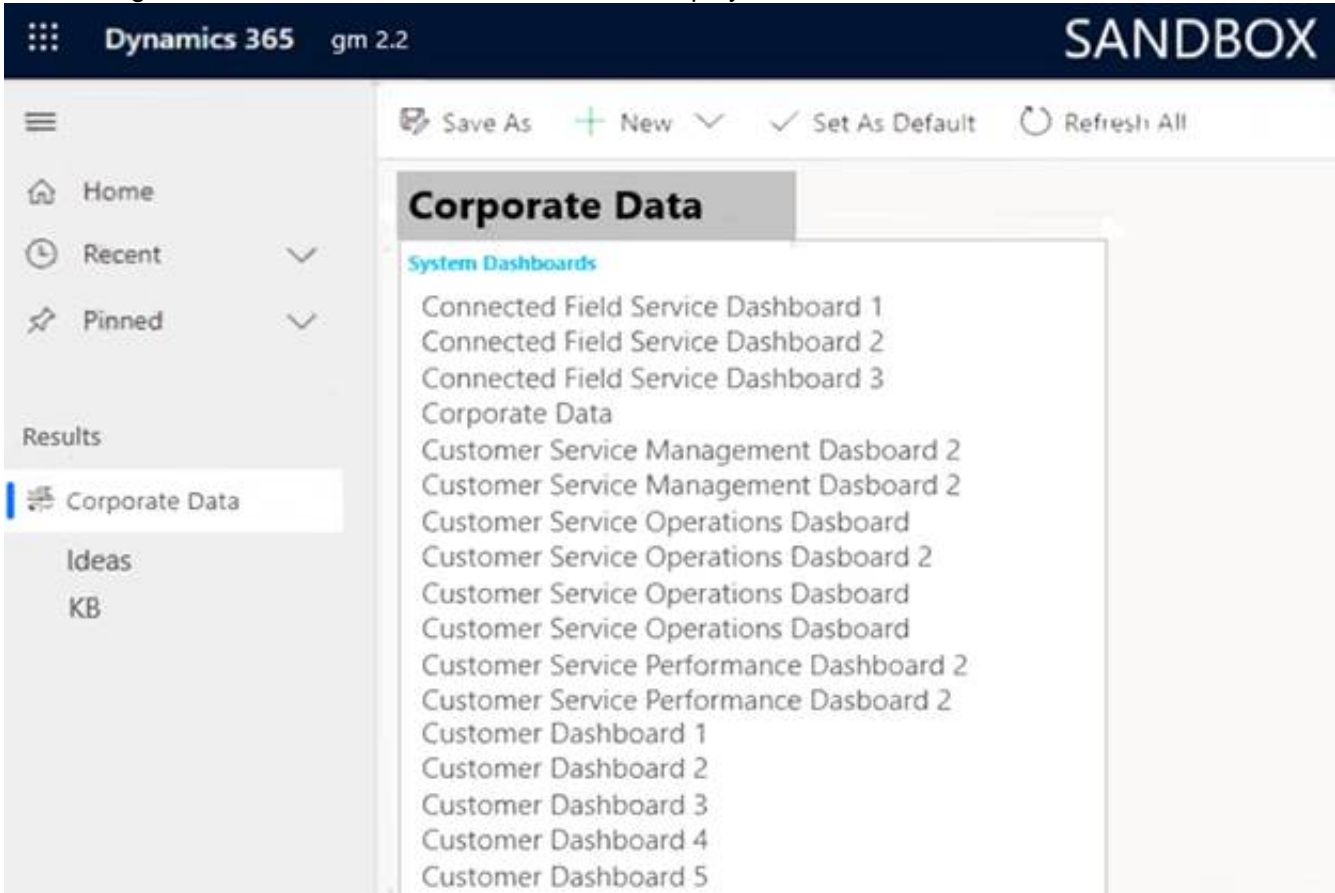

Explanation:

Box 1: Table  
Box 2: Data source  
Box 3: Column  
Box 4: Row

NEW QUESTION 88

HOTSPOT - (Topic 4)

The managers in an organization use a model-driven app. The app should display only one dashboard named Corporate Data. The managers observe that several dashboards are displayed.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

How do you remove all the dashboards from the list of dashboards displayed?

Open the model-driven app in the app designer and clear all dashboard check boxes except the Corporate Data dashboard.  
Open the site map in the sitemap designer and clear all dashboard check boxes except the Corporate Data subarea except for the Corporate Data dashboard.  
Open the solution and delete all dashboards from the solution except for the Corporate Data dashboard.

You need to remove the Ideas dashboard from the navigation bar. What should you do?

Open the model-driven app in the app designer and clear the check box for the ideas dashboard  
Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group  
Open the solutions and delete all the Ideas dashboards from the solution

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table  
Description automatically generated  
Box 1: Open the model-driven app in the app designer.  
\* 1. On the app designer canvas, select the Dashboards tile.

On the app designer canvas, the right pane shows dashboards that are available in the default solution.  
\* 2. Clearing the corresponding check box.  
Box 2: Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group  
Site maps define the manner by which users move between tables in a model-driven app.

NEW QUESTION 91

- (Topic 4)  
A company uses Microsoft Power Apps.  
You need to create a canvas app to display a Microsoft Power BI report. The report must use the context of a selected record in the app. Data in a Power BI control must be filtered to display the context of the selected record.  
You need to propose the right solution.  
Solution: Add Power Apps to Power BI using Power Apps for Power BI visualization. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 94

- (Topic 4)  
DRAG DROP  
A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.  
You need to package the components you create.  
Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Solution types	Answer Area	Component	Solution type
Managed		Canvas app created in production and used only in production.	
Unmanaged		Tables created in prototype to allow only new views added in production.	
Segmented			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Solution types	Answer Area	Component	Solution type
Managed		Canvas app created in production and used only in production.	Managed
Unmanaged		Tables created in prototype to allow only new views added in production.	Segmented
Segmented			

NEW QUESTION 98

DRAG DROP - (Topic 4)  
You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional  
Users must be able to filter the dashboard. You need to determine how to apply the filters.  
Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Dashboard types	Answer Area	Requirement	Dashboard type
Standard		Filter all dashboard elements using a timeframe.	
Interactive		Display data from multiple tables and views.	
Power BI embedded			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Dashboard types	Answer Area	Requirement	Dashboard type
Standard		Filter all dashboard elements using a timeframe.	Interactive
Interactive		Display data from multiple tables and views.	Standard
Power BI embedded			

NEW QUESTION 100

- (Topic 4)  
You have a Power Platform solution that uses Common Data Service.  
You need to secure all fields that support field-level security. Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. description

**Answer:** D

**Explanation:**

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

**NEW QUESTION 104**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

**NEW QUESTION 109**

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the production environment. Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 113**

- (Topic 4)

You create a new solution publisher and include a publisher prefix value.

Which two actions can you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can change contact details of a publisher after you create the publisher
- B. When you change a solution publisher prefix, you can change the schema name for existing components
- C. You can change the schema name of a publisher after creating the publisher

D. You can add a component from one solution to another solution that has a different publisher

**Answer:** AD

**Explanation:**

Once you introduce a publisher for a component in a managed solution, you can't change the publisher for the component.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm#solution-publisher>

**NEW QUESTION 117**

DRAG DROP - (Topic 4)

You are creating a Power Automate cloud flow.

The data in the flow must perform the following actions:

- Return the first character of a string of text.
- Convert an array to a single string. You need to manipulate the data.

Which data operations should you use? To answer, drag the appropriate data operations to the correct changes. Each data operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

**NEW QUESTION 120**

- (Topic 4)

You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel. Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

- A. approval request in the Teams channel that requires a response from all approvers
- B. approval request in a chat with the three managers that requires a response from all approvers
- C. approval template that requires responses to be completed in order
- D. approval template that requires a response from all approvers

**Answer:** B

**NEW QUESTION 122**

- (Topic 4)

An inside sales staff uses three model-driven apps for their sales process. Each app includes the same custom specialized component.

You must standardize the inside and outside sales process by creating a canvas app that has the same functionality as the three model-driven apps. You do not have administrator permissions.

You need to incorporate the logic of the custom component in the outside sales canvas app.

Where should you build the custom component?

- A. Custom control
- B. Component library
- C. Any of the three apps
- D. Solution

**Answer:** B

**NEW QUESTION 123**

HOTSPOT - (Topic 4)

You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.

The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:

- Update the Microsoft Dataverse record.
- Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.

Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Update the Microsoft Dataverse record.

Evaluate whether the Microsoft Dataverse record should be updated.

NEW QUESTION 126

HOTSPOT - (Topic 4)

A production line app maker at a manufacturing company creates a canvas app that looks for available inventory in a SQL database. The production line workers use the inventory app across all work centers.

The production line workers report the following app issues from the shop floor:

? The app reports a delegation warning.

? Voice command functionality is unreliable.

You have minimal information about the issues. You are not allowed to enter the production facility.

You need to troubleshoot the issues.

How should you troubleshoot the issues? To answer, select the appropriate options in the answer area.

Issue	Action
The app reports a delegation warning.	<div><div></div><div>Use the LookUp function</div><div>Check the number of items in the collection</div><div>Check the number of dataset items</div></div>
Voice command functionality is unreliable.	<div><div></div><div>Use the App checker/Runtime feature</div><div>Use the Advanced Tools/Monitor feature</div><div>Use the App checker/Accessibility feature</div><div>Use Advanced Tools/Performance feature</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Check the number of items in the collection

If the data in your data source exceeds 500 records and a function can't be delegated, Power Apps might not be able to retrieve all of the data, and your app may have wrong results.

Note: Delegation is where the expressiveness of Power Apps formulas meets the need to minimize data moving over the network. In short, Power Apps will delegate the processing of data to the data source, rather than moving the data to the app for processing locally.

Box 2: Use the Advanced Tools/Monitor feature

Monitor is available by default for all canvas apps. Using Monitor, you can trace events as they occur in a canvas app during the authoring experience in Power Apps Studio, or you can use Monitor to debug the published version of a canvas app.

Example: Consider the scenario where an app has been deployed, and the initial version of the app experiences performance degradation. The app also intermittently generates errors with no clear pattern. Loading data in the app succeeds most of the time, but fails sometimes.

When you check Monitor, you see data operations as expected. However, you also see several responses that have HTTP status code 429, indicating that there have been too many requests in a specific timeframe.

NEW QUESTION 131

DRAG DROP - (Topic 4)

DRAG DROP

You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.

You need to make the chatbot available to all users in your organization.

Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them m the correct

order.

Actions

Access the chatbot in the Teams app store in the Built by your colleagues category.

Publish the chatbot.

Access the chatbot in the Teams app store in the Built for Contoso category.

Submit the chatbot for admin approval.

Answer area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Access the chatbot in the Teams app store in the Built by your colleagues category.

Publish the chatbot.

Access the chatbot in the Teams app store in the Built for Contoso category.

Submit the chatbot for admin approval.

Answer area

NEW QUESTION 133

DRAG DROP - (Topic 4)

You are designing a canvas app.

You need to select user interface controls to include in the app.

Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	
Radio	Allow users to select multiple items from a list of options by typing in a phrase.	
Combo box		
Drop-down list		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: List box

A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).

Box 2: Combo box

A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.

Single or multi-select mode is configured via the SelectMultiple property.

When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

NEW QUESTION 137

DRAG DROP - (Topic 4)

You store data about products in two Microsoft Excel worksheets. The data contains duplicate rows.

You need to consolidate data from the two worksheets into a Microsoft Dataverse custom table.

In which order should you perform the actions? To answer, move all actions from the list of

Actions

Upload the worksheets to OneDrive

Add conditional columns to perform checks on the data

Create queries for the worksheets

Append the output from the queries

Create a dataflow

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Upload the worksheets to OneDrive  
A data source needs to be specified. The data needs to be available. Step 2: Create a dataflow  
Step 3: Create queries for the worksheets  
You can shape your data selection into a form that works best for your table using a Power Query editing experience, similar to the Power Query Editor in Power BI Desktop.  
Step 4: Add conditional columns to perform checks on the data Step 5: Append the output of the queries

NEW QUESTION 141

HOTSPOT - (Topic 4)  
A company is using Power Automate to send an email with all active projects that are at risk. Projects that are stored in a table in Microsoft Dataverse are deemed at risk if the column for a risk score is greater than 70 or has a zero value. The flow will loop over all the records in the Dataverse Projects table and update the risk status field based on the risk score. You need to create a single evaluation expression to update the risk status field. Which expression component should you use? To answer, select the appropriate options in NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Return a true value if a value in the risk column meets one of the two conditions.

Return a true value if a value in the risk column is 0.

Return a true value if the value in the risk column is above 70.

Expression component

NEW QUESTION 149

- (Topic 4)  
The postal service uses a system based on the Microsoft Database to manage the delivery of packages.  
To improve the delivery service, the management requires the delivery staff to use personal cell phones to communicate the location and the exact time of each delivery.  
You need to design a solution. What should you do?

- A. Create a button flow with user input for the delivery time and location
- B. Create a UI flow that sends the delivery time and location
- C. Create a button flow with full address and timestamp trigger tokens

Answer: B

Explanation:

Button trigger tokens are data points that are known and available to the device on which a button flow is running. These tokens change based on factors such as the current time or the geographic location of the device at a given moment.  
Note: For example, if you are running a button flow on a smart phone, it is likely that the phone knows the time at your current location as well as the date and your current address. In this context, the time, date and address where the phone is located are all determined at the time the button flow runs. They are automatically available for use in any button flows that are executed on the device. You can use these trigger tokens to build useful flows that will minimize repetitive tasks such as providing your location to someone or tracking how much time you spent on a particular job/service call.  
Reference:  
<https://docs.microsoft.com/en-us/power-automate/introduction-to-button-trigger-tokens>

NEW QUESTION 154

DRAG DROP - (Topic 4)  
You have an existing Power Apps environment.  
You need to create a Common Data Service database for the environment.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select Create my database

Configure currency and language settings

Configure database collation settings

Set the environment type to Production

Select an existing environment

>

<

Answer Area

>

<

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Select an existing environment Add a database in the admin center:

- \* 1. In the admin center, in the left navigation pane, select Environments.
- \* 2. Select the environment to which you want to add the database.

Step 2: Select Create my database

- \* 3. Select + Add database

Step 3: Configure currency and language settings

- \* 4. Enter the following, and then select Add.

Setting	Description
Language	The default language for this environment.
Currency	The base currency used for reporting.
Enable Dynamics 365 apps	Select <b>Yes</b> and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service.
Deploy sample apps and data	Select <b>Yes</b> to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select <b>No</b> for <b>Enable Dynamics 365 apps</b> for this setting to appear.
Security group	Select a security group to restrict access to this environment.

**NEW QUESTION 159**

- (Topic 4)

A company is onboarding new workers to the Microsoft Power Platform.

A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.

You need to troubleshoot the app and data security configurations for the user. Which tool should you use?

- A. Azure AD Security review
- B. User information page
- C. Accessibility checker
- D. Run diagnostics

**Answer:** D

**Explanation:**

User access diagnostic tool in the Power Platform admin center:

Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new "Run diagnostics" feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/troubleshooting-user-needs-read-write-access-organization>

**NEW QUESTION 164**

- (Topic 4)

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list.

You are not able to activate the flow. You need to troubleshoot the issue.

What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

**Answer:** BD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

**NEW QUESTION 165**

- (Topic 4)

You are creating an app for a company. You need to evaluate the default solution.

Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can change the prefix of the publisher of the default solution
- B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher in the publisher
- C. You can change the version number of the default solution

**Answer:** AC

**Explanation:**

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1>

#### NEW QUESTION 169

DRAG DROP - (Topic 4)

DRAG DROP

A company is migrating to a new Microsoft 365 tenant. You create an expense

You need to move the latest version of the canvas app and cloud flow to the new tenant. Which three actions should you perform in sequence? To answer, move the appropriate

actions from the list of actions to the answer area and arrange them in the correct order.

The screenshot shows a 'DRAG DROP' interface. On the left, under the heading 'Actions', there is a list of five actions: 'Import the app.', 'Publish all changes.', 'Create a copy of the app in the cloud.', 'Export the app as a package.', and 'Share the app with a user in the new tenant.' Each action is in a light blue box. To the right of this list are two circular arrows, one pointing right and one pointing left. On the right side, under the heading 'Answer Area', there is a vertical stack of three empty light blue boxes. To the right of these boxes are two circular arrows, one pointing up and one pointing down.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

The screenshot shows the same 'DRAG DROP' interface as before, but with the actions in the 'Answer Area' arranged in a specific sequence. The 'Answer Area' has three boxes, each containing a red dashed border. The first box contains 'Create a copy of the app in the cloud.', the second box contains 'Export the app as a package.', and the third box contains 'Share the app with a user in the new tenant.' The 'Actions' list on the left remains the same. The circular arrows are still present.

#### NEW QUESTION 174

- (Topic 4)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b\_accountid

**Answer:** D

**Explanation:**

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

#### NEW QUESTION 176

HOTSPOT - (Topic 4)

HOTSPOT

You are designing edit forms to dismay individual records selected from a list m a canvas app.

The control layout must respond to a variety of screen sizes and orientations that demonstrate the following behaviors:

- Automatically resize and arrange controls from top to bottom
- Maintain the original position of the controls.
- Require no additional property changes. You need to select the layout type.

Which layouts should you use? To answer, select the appropriate options in the answer area.

Answer Area

Behavior

Automatically resize and arrange controls from top to bottom.

Maintain the original position of the controls.

NEW QUESTION 177

HOTSPOT - (Topic 4)

Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.

You need to design the app.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Enter notes related to wildlife records.	<div><div>Enable the Wildlife entity and annotation entity for mobile offline.</div><div>Enable the attachments entity and the annotation entity for mobile offline.</div><div>Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity.</div><div>Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.</div></div>
Enter wildlife details as related records.	<div><div>Allow feedback on the Wildlife Details entity.</div><div>Enable the Wildlife Details entity for mobile offline.</div><div>Enable change tracking on the Wildlife Details entity.</div><div>Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.</div></div>
Indicate that an animal requires medical attention.	<div><div>Create a business rule.</div><div>Create a business process.</div><div>Create a Power Automate flow.</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Enable the Wildlife entity and the annotation entity for mobile offline

Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user's device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users' changes are seamlessly synchronized back to the cloud.

Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline.

Box 3: Create a business process.

Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

Note: Power Automate includes several types of processes, each designed for a different purpose:

? Automated flows. Create a flow that performs one or more tasks automatically

? Button flows.

? Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.

? Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

? Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions.

#### NEW QUESTION 179

- (Topic 4)

You create a model-driven app for a company. The app will be used to manage events that the company organizes.

The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.

All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.

You need to configure the MarketingTeam and OtherEmployees security roles.

Which three actions should you perform? Each correct selection presents a part of the

NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.
- B. Set the access level for the MarketingTeam security role to Organization for the Read permission.
- C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.
- D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.
- E. Set the access level for the MarketingTeam security role to None Selected for the Create and Write permission.
- F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

**Answer:** ABE

#### NEW QUESTION 181

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Microsoft Power BI report querying Excel file using its path. Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** A

#### NEW QUESTION 185

- (Topic 4)

You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

- A. Power BI dashboard on a model-driven form.
- B. Power BI tile on a model-driven form.
- C. Power BI dashboard on a model-driven dashboard.
- D. Power BI tile on a model-driven dashboard.

**Answer:** D

#### NEW QUESTION 186

- (Topic 4)

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services.

You need to configure the data sources. What should you do?

- A. Create a data gateway.
- B. Use a content pack.
- C. Create a custom data connector.
- D. Add metadata to standard entities.

**Answer:** B

#### Explanation:

Common Data Model is built upon a rich and extensible metadata definition system that enables you to describe and share your own semantically enhanced data types and structured tags, capturing valuable business insight which can be integrated and enriched with heterogeneous data to deliver actionable intelligence. Common Data Model can be used by various applications and services including Microsoft Dataverse, Dynamics 365, Microsoft Power Platform, and Azure ensuring that all of your services can access the same data.

Note: A wide variety of applications and services can easily access data in a data lake, however, each consumer must understand the format and meaning of the data before it can provide value. The Common Data Model simplifies this process by providing a metadata system that describes the data and standard entities to which producers can map.

Reference:

<https://docs.microsoft.com/en-us/common-data-model/use>

#### NEW QUESTION 188

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners. The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

- \* Return results for the exact word that was searched.
- \* View the latest records at the top of the gallery.
- \* Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.

You need to create the gallery screen in a canvas app.

Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Functions	Answer Area	Activity	Function
Match		Return results for the exact word that was searched.	
Sort		View latest entry at the top	
Distinct		Display duplicate countries/regions only once.	
IsMatch			

- A. Mastered  
B. Not Mastered

**NEW QUESTION 191**

- (Topic 4)

You are creating a canvas app.

A small amount of tabular data must be available only to the app. The data must be available before user inter action.

You need to create the data source for this data. What should you do?

- A. Use a formula to populate a table when the app starts.
- B. Use the Excel Online connector to retrieve the data.
- C. Create a Microsoft Dataverse table and use the Microsoft Dataverse connector.
- D. Read the data from a file on the device.

**Answer: B**

### NEW QUESTION 196

- (Topic 4)

A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.

Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- Ask the coworker to assign you to the owner role for the team.
- In Advanced tools, select Monitor.
- Ask the coworker to add you to their team.
- Select the chatbot and then select the Share button.

**Answer: AB**

**NEW QUESTION 198**

## DRAG DROP - (Topic 4)

You are configuring a new Common Data Service environment by using the Power Apps Maker portal.

You need to create an entity that uses the prefix xyz.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create an entity in the new solution.	
Enter the entity Display Name and use the existing prefix.	
Add a new solution.	
Enter the entity Display Name and modify the prefix to <b>xyz</b> .	
Add a new publisher with the prefix <b>xyz</b> .	

- A. Mastered  
B. Not Mastered

**Answer: A**

**Explanation:**

<b>Actions</b>	<b>Answer Area</b>
Create an entity in the new solution.	Add a new publisher with the prefix <b>xyz</b> .
Enter the entity Display Name and use the existing prefix.	Add a new solution.
Add a new solution.	Create an entity in the new solution.
Enter the entity Display Name and modify the prefix to <b>xyz</b> .	Enter the entity Display Name and modify the prefix to <b>xyz</b> .
Add a new publisher with the prefix <b>xyz</b> .	

**NEW QUESTION 200**

HOTSPOT - (Topic 4)

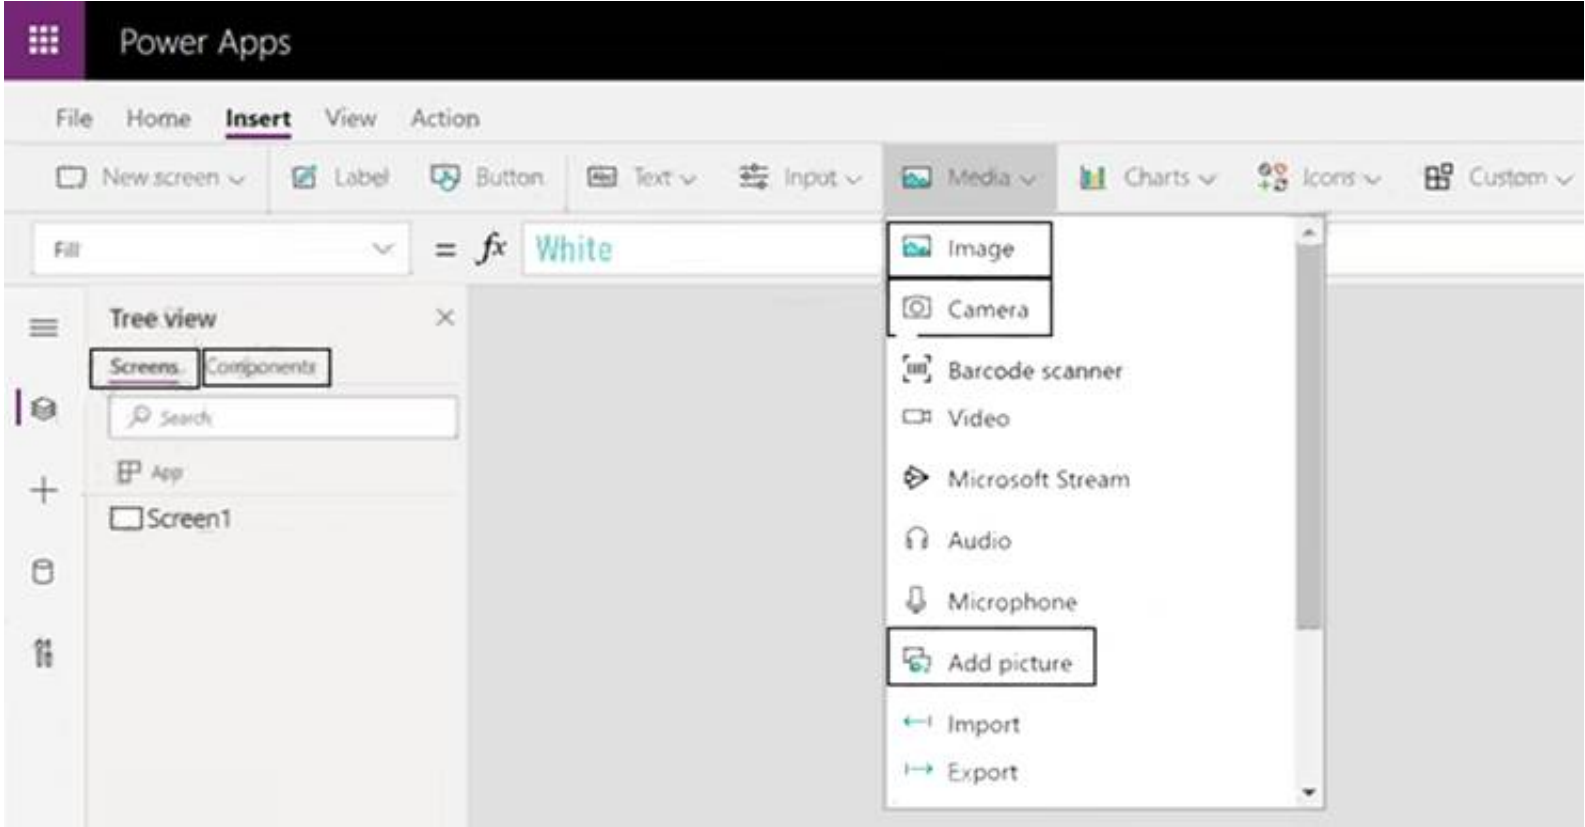

You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.

When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.

You need to design phone-based and web-based versions of the app.

Which app type and media control should you use? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

App Type: Screens

To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.

Media Type: Camera

Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.

Tap or select the camera control to capture a picture from the camera.

The most recently captured picture is available through the Photo property. With this property, the images can be:

- ? Viewed with the Image control. Use the Image control to view the captured image.
- ? Temporarily put in a variable or a collection.
- ? Stored in a database.
- ? Transmitted as a base64 encoded text string.

**NEW QUESTION 205**

- (Topic 4)

You create a personal view.

You need to ensure that other users can access the view. What should you do?

- A. Email the users a link to the view.
- B. Set the view as the default view.
- C. Share the view with the users.
- D. Assign the view to the users.

**Answer:** C

**NEW QUESTION 206**

- (Topic 4)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until

it conforms to Microsoft accessibility requirements and recommendations.  
You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports
- B. Microsoft Compliance Center
- C. Power Apps Studio
- D. Microsoft Accessibility Guides
- E. Microsoft Visual Studio

Answer: C

Explanation:

- ? Find accessibility issues
- ? In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- ? App checker icon.
- ? In the menu that appears, select Accessibility.
- ? A list of issues appears, sorted first by severity and then by screen.
- ? Select the arrow next to an item to show details about it.
- ? Accessibility checker details.
- ? Select the back arrow to return to the list of items.
- ? If you decide to address an issue, select it to open the affected property.
- ? After you change one or more properties, select Re-check to update the list of issues.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://support.microsoft.com/en-us/accessibility/enterprise-answer-desk>

NEW QUESTION 208

HOTSPOT - (Topic 4)

A company is creating new app for use by technicians.

Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices.

Which design element should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Design element
Create an app that does not specify a screen size in the design	<div><div></div><div>Phone form factor</div><div>Tablet form factor</div><div>Blank canvas app</div><div>Model-driven app</div></div>
Lock the screen size for an app that needs to be set to a specific resolution	<div><div></div><div>Aspect ratio</div><div>Orientation</div><div>Image positioning</div><div>Display mode</div></div>

- A. Mastered
- B. Not Mastered

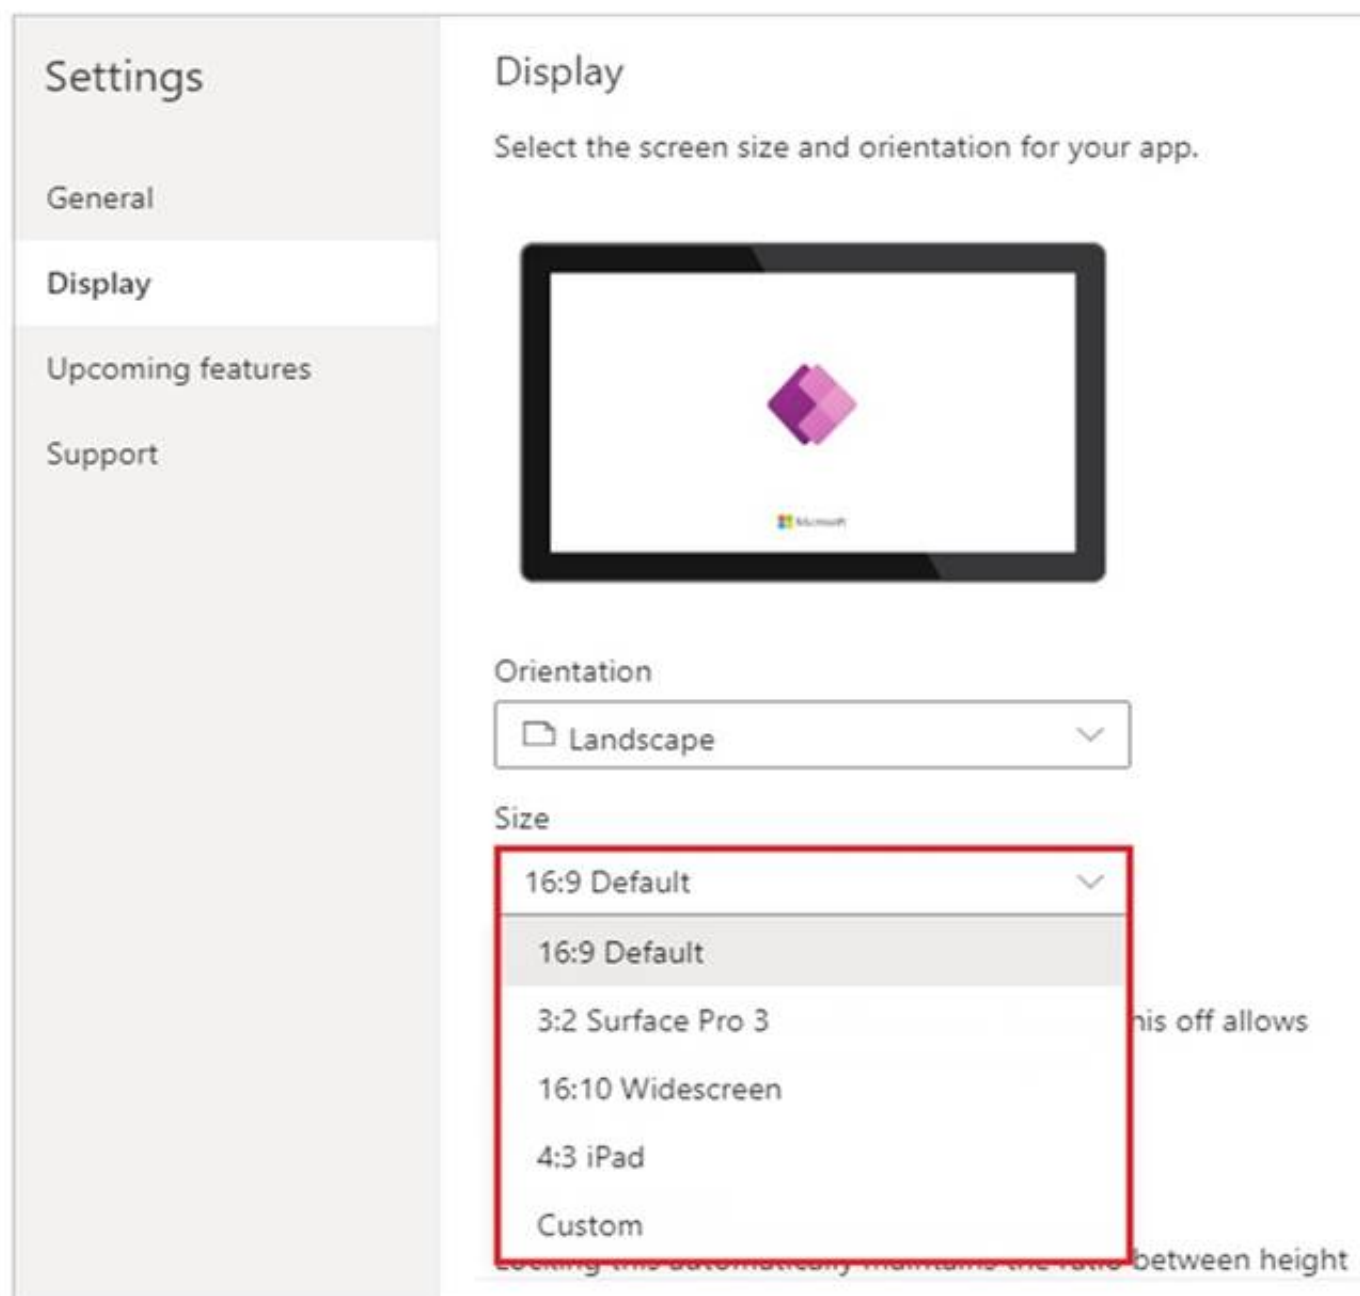

Answer: A

Explanation:

Box 1: Tablet form factor Box 2: Aspect version

Customize a canvas app by changing its screen size.

- ? Sign in to Power Apps.
- ? Open the app to edit.
- ? Select Settings.
- ? Select Display.
- ? (Tablet apps only) Under Aspect ratio, perform either of these steps:
- ? Select the ratio that matches the target device for this app.
- ? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.

#### NEW QUESTION 209

HOTSPOT - (Topic 4)

You use Microsoft Power BI Desktop to create a report. Users note that column headings are confusing.

You need to modify some columns and delete other columns.

Which tool should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

### NEW QUESTION 210

- (Topic 4)

A company is implementing the Microsoft Power Platform to assist with consolidation of onsite inspections and audits of retail stores. Currently, the data used by the retail store inspections is located across multiple systems.

The canvas app must use one database to view and record all data used in the inspection process.

You need to design the solution.

Which three capabilities should you implement? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use an embedded access management framework for user security.
- B. Execute real-time data operations against external data sources through virtual entities.
- C. Store data used by a Power Apps app on both iOS and Android mobile platforms.
- D. Use Azure Data Lake storage to host the transactional data.

**Answer:** BCE

#### Explanation:

B: Virtual tables (also known as virtual entities) enable the integration of data residing in external systems by seamlessly representing that data as tables in Microsoft Dataverse, without replication of data and often without custom coding.

CE: Authenticating to a Gen 1 DataLakeStore Account Gen 1 uses OAuth 2.0 in Azure AD for authentication.

Reference:

<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

### NEW QUESTION 213

DRAG DROP - (Topic 4)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**App types**

Canvas app

Model-driven app

Embedded canvas app

**Answer Area**

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Canvas app

Model-driven app

Embedded canvas app

**Answer Area**

Group	App type
Reception area staff	Canvas app
Medical staff	Embedded canvas app
Cleaning staff	Model-driven app

### NEW QUESTION 218

- (Topic 4)

A company creates an app that uses Microsoft Dataverse tables.

The app creator wants to verify that the app is operating as expected by using a sample set of real-world data.

You need to import the sample data into Dataverse tables.

Which two technologies can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI

- B. SharePoint
- C. Power Query
- D. Dataflows

**Answer:** CD

**Explanation:**

C: You can create a table in Dataverse and fill that table with data from an OData feed by using Power Query. You can use the same techniques to integrate data from these online and on-premises sources, among others:

SQL Server Salesforce IBM DB2

Access

Excel Web APIs

OData feeds Text files

D: You can create a new Dataverse table that stores all the metadata from the dataflow run. For every refresh of a dataflow, a record is added to this table. You can also store metadata for multiple dataflow runs in the same table.

Reference:

<https://docs.microsoft.com/en-us/power-query/dataflows/load-dataflow-metadata-into-dataverse-table>

<https://docs.microsoft.com/en-us/power-query/dataflows/add-data-power-query>

**NEW QUESTION 219**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create a Prediction custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead create an Object Detection custom model

Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

**NEW QUESTION 222**

- (Topic 4)

You create a custom table as part of a solution in the development environment. You deploy major version solutions as managed solutions to production. The organization does not allow new solutions to be created in the production environment.

When a minor update is made to a column length, users cannot enter entire values. You need to allow users to enter entire values in the column.

Solution: Update the column length in the development environment. Export the solution as a managed solution, import the solution into production

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 225**

- (Topic 4)

You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.

Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

You need to incorporate the flows that can be added to the solution.

Which two flows can you include? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. FlowA
- B. FlowB
- C. FlowC

D. FlowD

**Answer:** AD

**Explanation:**

You can add any of these conditions to determine precisely when your flow is triggered.

Reference:

<https://docs.microsoft.com/en-us/power-automate/connection-cds-native>

**NEW QUESTION 229**

- (Topic 4)

A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Chores
- B. Choice
- C. Text
- D. Lookup

**Answer:** D

**NEW QUESTION 232**
