

Exam Questions MD-102

Endpoint Administrator

<https://www.2passeasy.com/dumps/MD-102/>

NEW QUESTION 1

- (Exam Topic 4)

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD).

The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- The configuration must be managed from a central location.
- Internet traffic must be minimized.
- Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Windows Update technology to use:

Windows Server Update Services (WSUS)
 Microsoft Endpoint Configuration Manager
 Windows Update for Business

Manage the configuration by using:

A Group Policy object (GPO)
 Microsoft Endpoint Configuration Manager
 Microsoft Intune

Manage the traffic by using:

Delivery Optimization
 BranchCache
 Peer cache

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Windows Server Update Services (WSUS)

Windows Server Update Services (WSUS) enables information technology administrators to deploy the latest Microsoft product updates. You can use WSUS to fully manage the distribution of updates that are released through Microsoft Update to computers on your network.

Windows Server Update Services is a built-in server role that includes the following enhancements: Can be added and removed by using the Server Manager Includes Windows PowerShell cmdlets to manage the most important administrative tasks in WSUS Etc.

Box 2: A Group Policy object

In an Active Directory environment, you can use Group Policy to define how computers and users can interact with Windows Update to obtain automatic updates from Windows Server Update Services (WSUS).

Box 3: BranchCache

BranchCache is a bandwidth-optimization feature that has been available since the Windows Server 2008 R2 and Windows 7 operating systems. Each client has a cache and acts as an alternate source for content that devices on its own network request. Windows Server Update Services (WSUS) and Microsoft Endpoint Manager can use BranchCache to optimize network bandwidth during update deployment, and it's easy to configure for either of them. BranchCache has two operating modes: Distributed Cache mode and Hosted Cache mode.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-branchcache> <https://docs.microsoft.com/en-us/windows-server/administration/windows-server-update-services/deploy/4-conf>

NEW QUESTION 2

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You need to ensure that users are not added automatically to the local Administrators group when they join their Windows 11 device to contoso.com.

What should you configure?

- A. Windows Autopilot
- B. provisioning packages for Windows
- C. Security defaults in Azure AD
- D. Device settings in Azure AD

Answer: D

Explanation:

To ensure that users are not added automatically to the local Administrators group when they join their Windows 11 device to contoso.com, you should configure the Device settings in Azure AD. The Device settings allow you to manage which users can join devices to Azure AD and whether they are added as local administrators or standard users. By default, users who join devices to Azure AD are added to the local Administrators group, but you can change this setting to None or Selected¹.

The other options are not relevant for this scenario because:

- Windows Autopilot is a service that allows you to pre-configure new devices and enroll them automatically to Azure AD and Microsoft Intune. It does not control the local administrator role of the users who join the devices².
- Provisioning packages for Windows are files that contain custom settings and policies that can be applied to Windows devices during the setup process. They do not affect the Azure AD join process or the local administrator role of the users³.
- Security defaults in Azure AD are a set of basic identity security mechanisms that are enabled by default to protect your organization from common attacks. They do not include any settings related to device management or local administrator role⁴.

References: Manage device identities using the Microsoft Entra admin center, Windows Autopilot, Provisioning packages for Windows 10, What are security defaults?

NEW QUESTION 3

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune.

You need to implement a Microsoft Defender for Endpoint solution that meets the following requirements:

- Enforces compliance for Defender for Endpoint by using Conditional Access
- Prevents suspicious scripts from running on devices

What should you configure? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area
<input type="text" value="A device restriction policy"/>	Enforces compliance: <input type="text"/>
<input type="text" value="A security baseline"/>	Prevents suspicious scripts: <input type="text"/>
<input type="text" value="An attack surface reduction (ASR) rule"/>	
<input type="text" value="An Intune connection"/>	

A. Mastered

B. Not Mastered

Answer: A

Explanation:

To enforce compliance for Defender for Endpoint by using Conditional Access, you need to configure an Intune connection in the Defender for Endpoint portal.

This allows you to use Intune device compliance policies to evaluate the health and compliance status of devices that are enrolled in Defender for Endpoint. You can then use Conditional Access policies to block or allow access to cloud apps based on the device compliance status. References:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/conditional-access>

To prevent suspicious scripts from running on devices, you need to configure an attack surface reduction (ASR) rule in Intune. ASR rules are part of the endpoint protection settings that you can apply to devices by using device configuration profiles. You can use the ASR rule “Block Office applications from creating child processes” to prevent Office applications from launching child processes such as scripts or executables. References:

<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-windows-10#attack-surface-reduction>

NEW QUESTION 4

- (Exam Topic 4)

You create a Windows Autopilot deployment profile.

You need to configure the profile settings to meet the following requirements:

- Include the hardware serial number in the computer name.

Which two settings should you configure? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Create profile ...

NEW QUESTION 5

- (Exam Topic 4)

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant by using Azure AD Connect. You use Microsoft Intune and Configuration Manager to manage devices.

You need to recommend a deployment plan for new Windows 11 devices. The solution must meet the following requirements:

- Devices for the marketing department must be joined to the AD DS domain only. The IT department will install complex applications on the devices at build time, before giving the devices to the marketing department users.
- Devices for The sales department must be Azure AD joined. The devices will be shipped directly from the manufacturer to The homes of the sales department users.
- Administrative effort must be minimized.

Which deployment method should you recommend for each department? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Sales: Windows Autopilot with automatic registration
Configuration Manager
Windows Autopilot with automatic registration
Windows Autopilot with manual registration
Windows Autopilot with OEM registration

Marketing: Configuration Manager
Configuration Manager
Windows Autopilot with automatic registration
Windows Autopilot with manual registration
Windows Autopilot with OEM registration

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Sales: Windows Autopilot with automatic registration
Configuration Manager

Windows Autopilot with manual registration
Windows Autopilot with OEM registration

Marketing: Configuration Manager
Configuration Manager
Windows Autopilot with automatic registration
Windows Autopilot with manual registration
Windows Autopilot with OEM registration

NEW QUESTION 6

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 11.

A user named User1 plans to use Remote Desktop to connect to Computer1.

You need to ensure that the device of User1 is authenticated before the Remote Desktop connection is established and the sign in page appears.

What should you do on Computer1?

- A. Turn on Reputation-based protection.
B. Enable Network Level Authentication (NLA).
C. Turn on Network Discovery.
D. Configure the Remote Desktop Configuration service.

Answer: B

NEW QUESTION 7

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system	Description
Device1	32-bit version of Windows 10	Retired device
Device2	64-bit version of Windows 11	New device
Server1	Windows Server 2019	File server

You need to migrate app data from Device1 to Device2. The data must be encrypted and stored on Seryer1 during the migration.

Which command should you run on each device? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Device1:

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
```

Device2:

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
```

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Device1:

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
```

Device2:

```
LoadState.exe \\server1\share1 /i:MigApp.xml /v:13 /decrypt /key: "mysecretKey"
LoadState.exe \\server1\share1 /i:MigApp.xml /v:8 /decrypt
LoadState.exe \\server1\share1 /i:MigDocs.xml /v:13 /decrypt/key: "mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:13 /encrypt /key:"mysecretKey"
ScanState.exe \\server1\share1 /i:MigApp.xml /config:Config.xml /v:8 /encrypt
ScanState.exe \\server1\share1 /i:MigDocs.xml /v:13 /encrypt /key:"mysecretkey"
```

NEW QUESTION 8

- (Exam Topic 4)

You manage 1.000 devices by using Microsoft Intune. You review the Device compliance trends report. For how long will the report display trend data?

- A. 30 days
B. 60 days
C. 90 days
D. 365 days

Answer: B

Explanation:

The Device compliance trends report shows the number of devices that are compliant, noncompliant, and not evaluated over time. The report displays trend data for the last 60 days by default, but you can change the time range to view data for the last 7, 14, or 30 days as well. The report does not show data for more than 60 days. References: [Device compliance trends report]

NEW QUESTION 9

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE_x64.iso image and connect to MDT1. the welcome screen appears as shown In the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1. Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Modify the CustomSettings.ini file.

Update the deployment share.

Modify the Bootstrap.ini file.

Replace the ISO image.

Modify the task sequence.

Answer Area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Modify the Bootstrap.ini file.
Add this to your bootstrap.ini file and then update the deployment share and use the new boot media created in that process:
SkipBDDWelcome=YES
Box 2: Modify the CustomSettings.ini file. SkipBDDWelcome
Indicates whether the Welcome to Windows Deployment wizard page is skipped.
For this property to function properly it must be configured in both CustomSettings.ini and BootStrap.ini. BootStrap.ini is processed before a deployment share (which contains CustomSettings.ini) has been selected.
Box 3: Update the deployment share. Reference:
https://docs.microsoft.com/en-us/mem/configmgr/mdt/toolkit-reference#table-6-deployment-wizard-pages

NEW QUESTION 10

- (Exam Topic 4)
You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1. You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. LiteTouch.wsf
- B. SetupConfig.ini
- C. Unattendb*
- D. Unattend.xml

Answer: B

Explanation:

SetupConfig.ini is a file that can be used to customize the behavior of Windows Setup during feature updates. You can use this file to specify commands or scripts that run before or after the installation process. To run a PowerShell script after a feature update, you can use the PostOOBE parameter in SetupConfig.ini and specify the path to the script file. References: [SetupConfig.ini reference]

NEW QUESTION 10

- (Exam Topic 4)
You have the on-premises servers shown in the following table.

Name	Description
DC1	Domain controller that runs Windows Server 2022
Server1	Standalone server that runs Windows Server 2022
Server2	Member server that runs Windows Server 2022 and has the Remote Access role installed
Server3	Member server that runs Windows Server 2019
Server4	Red Hat Enterprise Linux (RHEL) 8.4 server

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune.

You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports.

To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Server:

Server1

Server2

Server3

Server4

Ports:

TCP 443 only

UDP 443 only

TCP 1723 only

TCP 443 and UDP 443 only

TCP 443, TCP 1723, and UDP 443

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Server4

Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.

Box 2: TCP 443 and UDP 443 only

Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443.

By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Saerver Configuration – Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.

Incorrect:

TCP 1723 is not used.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/microsoft-tunnel-overview>

NEW QUESTION 12

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 17

- (Exam Topic 4)
Your company has a Remote Desktop Gateway (RD Gateway).
You have a server named Server1 that is accessible by using Remote Desktop Services (RDS) through the RD Gateway.
You need to configure a Remote Desktop connection to connect through the gateway. Which setting should you configure?

- A. Connect from anywhere
- B. Server authentication
- C. Connection settings
- D. Local devices and resources

Answer: A

Explanation:

To connect to a remote server through the RD Gateway, you need to configure the Connect from anywhere setting in the Remote Desktop Connection client. This setting allows you to specify the domain name and port of the RD Gateway server, as well as the authentication method. The other settings are not related to the RD Gateway connection. References: Configure Remote Desktop Connection Settings for Remote Desktop Gateway

NEW QUESTION 21

- (Exam Topic 4)
You have a Microsoft Intune subscription.
You are creating a Windows Autopilot deployment profile named Profile1 as shown in the following exhibit.

Create profile

NEW QUESTION 27

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 100 unmanaged iPad devices.

You need to deploy a specific iOS update to the devices. Users must be prevented from manually installing a more recent version of iOS.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Enroll the devices in Microsoft Intune by using the Intune Company Portal.
B. Create a compliance policy.
C. Enroll the devices in Microsoft Intune by using Apple Business Manager.
D. Create an iOS app provisioning profile.
E. Create a device configuration profile.

Answer: CE

Explanation:

To deploy a specific iOS update to the unmanaged iPad devices, you need to perform the following actions:

➤ Enroll the devices in Microsoft Intune by using Apple Business Manager. Apple Business Manager is a service that allows you to enroll and manage iOS/iPadOS devices in bulk. You can use Apple Business Manager to assign devices to Microsoft Intune and enroll them as supervised devices. Supervised devices are devices that have more management features and restrictions than unsupervised devices. You can also use Apple Business Manager to create device groups and assign roles and permissions¹².

➤ Create a device configuration profile. A device configuration profile is a policy that you can create and assign in Microsoft Intune to configure settings on your devices. You can use a device configuration profile to manage software updates for iOS/iPadOS supervised devices. You can choose to deploy the latest update or an older update, specify a schedule for the update installation, and delay the visibility of software updates on the devices³⁴.

The other options are not correct for this scenario because:

➤ Enrolling the devices in Microsoft Intune by using the Intune Company Portal is not suitable for unmanaged devices. The Intune Company Portal is an app that users can download and install on their personal or corporate-owned devices to enroll them in Microsoft Intune. However, this method requires user interaction and consent, and does not enroll the devices as supervised devices⁵.

- Creating a compliance policy is not necessary for this scenario. A compliance policy is a policy that you can create and assign in Microsoft Intune to evaluate and enforce compliance settings on your devices. You can use a compliance policy to check if the devices meet certain requirements, such as minimum OS version, encryption, or password settings. However, a compliance policy does not deploy or manage software updates on the devices6.
- Creating an iOS app provisioning profile is not relevant for this scenario. An iOS app provisioning profile is a file that contains information about the app and its distribution method. You can use an iOS app provisioning profile to deploy custom or line-of-business apps to your iOS/iPadOS devices by using Microsoft Intune. However, an iOS app provisioning profile does not affect the software updates on the devices7.
- References: What is Apple Business Manager?, Enroll iOS/iPadOS devices in Intune, Manage iOS/iPadOS software update policies in Intune, Software updates planning guide and scenarios for supervised iOS/iPadOS devices in Microsoft Intune, Enroll your personal device in Intune, Device compliance policies in Microsoft Intune, Add an iOS app provisioning profile with Microsoft Intune

NEW QUESTION 31

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a user named Admin1. All computers run Windows 10.

You enable Windows PowerShell remoting on the computers.

You need to ensure that Admin1 can establish remote PowerShell connections to the computers. The solution must use the principle of least privilege.

To which group should you add Admin1?

- A. Access Control Assistance Operators
- B. Remote Desktop Users
- C. Power Users
- D. Remote Management Users

Answer: B

NEW QUESTION 34

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment

share. You create a task sequence, and then you run the MDT deployment wizard on Computer1. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 37

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 11
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

- A. Device2 only
- B. Device1 and Device2 only
- C. Device3 and Device4 only
- D. Device2, Device3, and Device4 only
- E. Device1, Device2, Device B, and Device4

Answer: D

Explanation:

The correct answer is D because app configuration policies can be applied to managed devices and managed apps1. Managed devices are enrolled and managed by Intune, while managed apps are integrated with Intune App SDK or wrapped using the Intune Wrapping Tool1. Device2, Device3, and Device4 are either enrolled in Intune or have managed apps installed, so they can receive app configuration policies2. Device1 is not enrolled in any MDM solution and does not have any managed apps installed, so it cannot receive app configuration policies2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Policy sets - Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/fundamentals/policy-sets>

NEW QUESTION 42

- (Exam Topic 4)

Your company uses Microsoft Intune to manage devices.

You need to ensure that only Android devices that use Android work profiles can enroll in intune. Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.

NOTE Each correct selection is worth one point.

- A. From Platform Settings, set Android device administrator Personally Owned to Block.
- B. From Platform Settings, set Android Enterprise (work profile) to Allow.
- C. From Platform Settings, set Android device administrator Personally Owned to Allow
- D. From Platform Settings, set Android device administrator to Block.

Answer: AB

Explanation:

To ensure that only Android devices that use Android work profiles can enroll in Intune, you need to perform two configurations in the device enrollment restrictions. First, you need to set Android device administrator Personally Owned to Block. This prevents users from enrolling personal Android devices that use device administrator mode. Second, you need to set Android Enterprise (work profile) to Allow. This allows users to enroll corporate-owned or personal Android devices that use work profiles. References: <https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set>

NEW QUESTION 46

- (Exam Topic 4)

You have a Microsoft Intune deployment that contains the resources shown in the following table.

Name	Type	Platform
Comply1	Device compliance policy	Windows 10 and later
Comply2	Device compliance policy	iOS/iPadOS
CA1	Conditional Access policy	<i>Not applicable</i>
Conf1	Device configuration profile	Windows 10 and later
Office1	Office app policy	<i>Not applicable</i>

You create a policy set named Set1 and add Comply1 to Set1. Which additional resources can you add to Set1?

- A. Conf1 only
- B. Comply2 only
- C. Comply2 and Conf1 only
- D. CA1. Conf1. and Office 1 only
- E. Comply2. CA1, Conf1. and Office1

Answer: B

NEW QUESTION 49

- (Exam Topic 4)

You have a Microsoft Intune subscription.

You have devices enrolled in intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage Appl ?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: B

Explanation:

The correct answer is B because you need to create two app configuration policies for managed devices, one for iOS/iPadOS devices and one for Android devices1. App configuration policies let you customize the settings of apps for iOS/iPadOS or Android devices1. The settings are assigned to user groups and applied when the app runs1. The app developer or supplier provides the configuration settings (keys and values) that are exposed to Intune1. You can't use a single app configuration policy for both iOS/iPadOS and Android devices because they have different configuration settings2. References: 1: App configuration policies for Microsoft Intune | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview> 2: Add app configuration policies for managed iOS/iPadOS devices | Microsoft Learn <https://learn.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-use-ios>

NEW QUESTION 51

- (Exam Topic 3)

You need to meet the requirements for the MKG department users. What should you do?

- A. Assign the MKG department users the Purchaser role in Microsoft Store for Business
- B. Download the APPX file for App1 from Microsoft Store for Business
- C. Add App1 to the private store
- D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business
- E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store> Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

NEW QUESTION 54

- (Exam Topic 3)

You need a new conditional access policy that has an assignment for Office 365 Exchange Online. You need to configure the policy to meet the technical requirements for Group4.

Which two settings should you configure in the policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Device Hybrid Azure AD joined

Device marked as compliant

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The policy needs to be applied to Group4 so we need to configure Users and Groups. The Access controls are set to Block access

A screenshot of a computer Description automatically generated

We therefore need to exclude compliant devices. From the scenario:

➤ Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.

Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview> <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions> <https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

NEW QUESTION 56

- (Exam Topic 3)

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Policy1:

Device1 only	
Device2 only	
Device3 only	
Device4 only	
Device2 and Device3 only	
Device1 and Device3 only	
Device1, Device2, and Device 3	

Policy2:

Device1 only	
Device2 only	
Device3 only	
Device4 only	
Device2 and Device3 only	
Device1 and Device3 only	
Device1, Device2, and Device 3	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/device-profile-assign>

NEW QUESTION 59

- (Exam Topic 3)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Specify ComputerName as:

"HR"+ RAND(4)	
"HumanResources-" + RAND(????)	
HR-%RAND:4%	
HR-????	
HumanResources-%RAND:4%	

Specify AccountOU as:

CN=Computers, CN=HR, DC=Contoso, DC=com	
Computers/HumanResources/Contoso.com	
Contoso.com/HR/Computers	
OU=Computers, OU=HR, DC=Contoso, DC=com	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 60

- (Exam Topic 2)

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. A password policy from the Microsoft Office 365 portal.

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

NEW QUESTION 63

- (Exam Topic 2)

You need to recommend a solution to meet the device management requirements.

What should you include in the recommendation? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

For the Research department employees:

<input type="checkbox"/>
<input checked="" type="checkbox"/> An app configuration policy
<input checked="" type="checkbox"/> An app protection policy
<input checked="" type="checkbox"/> Azure information Protection
<input checked="" type="checkbox"/> iOS app provisioning profiles

For the Sales department employees:

<input type="checkbox"/>
<input checked="" type="checkbox"/> An app configuration policy
<input checked="" type="checkbox"/> An app protection policy
<input checked="" type="checkbox"/> Azure information Protection
<input checked="" type="checkbox"/> iOS app provisioning profiles

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 65

- (Exam Topic 2)

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 70

- (Exam Topic 2)

You need to resolve the performance issues in the Los Angeles office.

How should you configure the update settings? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Change Delivery Optimization
download mode to:

Bypass mode

HTTP blended with internet peering

HTTP blended with peering behind same NAT

Simple download mode with no peering

NEW QUESTION 72

- (Exam Topic 1)

Which user can enroll Device6 in Intune?

- A. User4 and User2 only
- B. User4 and User 1 only
- C. User1, User2, User3, and User4
- D. User4. User Land User2 only

Answer: B

NEW QUESTION 73

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 iOS devices enrolled in Microsoft Intune. You need to ensure that notifications of iOS updates are deferred for 30 days after the updates are released. What should you create?

- A. a device configuration profile based on the Device features template
- B. a device configuration profile based on the Device restrictions template
- C. an update policy for iOS/iPadOS
- D. an iOS app provisioning profile

Answer: C

Explanation:

Manage iOS/iPadOS software update policies in Intune, delay visibility of software updates.

When you use update policies for iOS, you might have need to delay visibility of an iOS software update. Reasons to delay visibility include:

Prevent users from updating the OS manually

To deploy an older update while preventing users from installing a more recent one

To delay visibility, deploy a device restriction template that configures the following settings: Defer software updates = Yes

This doesn't affect any scheduled updates. It represents days before software updates are visible to end users after release.

Delay default visibility of software updates = 1 to 90 90 days is the maximum delay that Apple supports.

Reference: https://docs.microsoft.com/en-us/mem/intune/protect/software-updates-ios

NEW QUESTION 75

- (Exam Topic 4)

Your company has an Azure AD tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Microsoft Entra admin center, you configure automatic mobile device management (MDM) enrollment. From the Microsoft Intune admin center,

you create and assign a device restrictions profile.
 Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 80

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 81

- (Exam Topic 4)

You have an Azure AD tenant that contains the devices shown in the following table. You purchase Windows 11 Enterprise E5 licenses. Which devices can use Subscription Activation to upgrade to Windows 11 Enterprise?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, Device3, and Device4

Answer: B

NEW QUESTION 86

- (Exam Topic 4)

You have two computers named Computer1 and Computer2 that run Windows 10. Computer2 has Remote Desktop enabled.

From Computer1, you connect to Computer2 by using Remote Desktop Connection.

You need to ensure that you can access the local drives on Computer1 from within the Remote Desktop session.

What should you do?

- A. From Computer 2, configure the Remote Desktop settings.
- B. From Windows Defender Firewall on Computer 1, allow Remote Desktop.
- C. From Windows Defender Firewall on Computer 2, allow File and Printer Sharing.
- D. From Computer1, configure the Remote Desktop Connection settings.

Answer: D

NEW QUESTION 87

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Tool to use to configure the settings:

	▼
Security & Compliance in Microsoft 365	
Windows Security app	
Microsoft Endpoint Manager admin center	

Distribution method:

	▼
An Azure policy	
An Endpoint Protection configuration profile	
An Intune device compliance policy	
A device restrictions configuration profile	

A. Mastered

B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/import-export-expl> <https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/enable-exploit-prot>

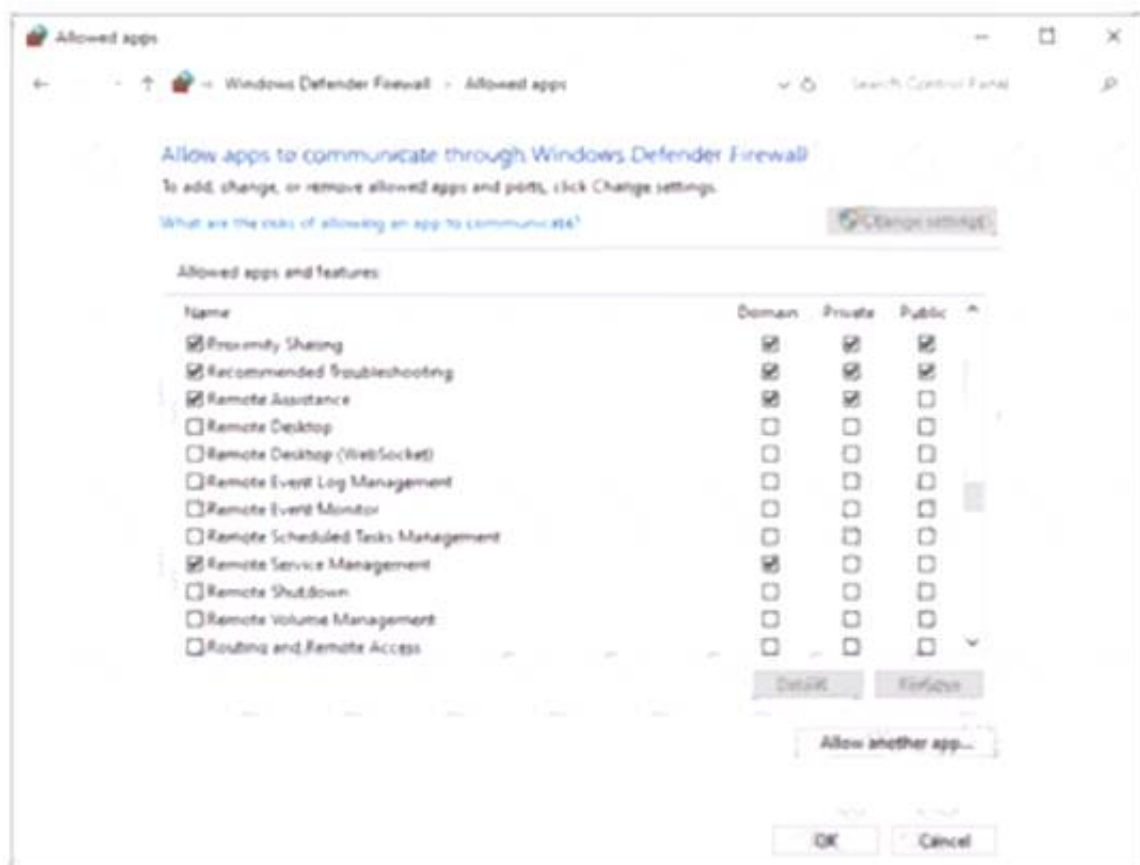

NEW QUESTION 88

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com, a workgroup, and computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of	Active Windows Defender Firewall profile
Computer1	Adatum.com	Domain
Computer2	Adatum.com	Domain
Computer3	Workgroup	Public

The local Administrator accounts on Computer1, Computer2, and Computer3 have the same user name and password. On Computer3, Windows Defender Firewall is configured as shown in the following exhibit.

Status	Name	DisplayName
Stopped	RasAuto	Remote Access Auto Connection Manager
Running	RasMan	Remote Access Connection Manager
Stopped	RemoteAccess	Routing and Remote Access
Stopped	RemoteRegistry	Remote Registry
Stopped	RetailDemo	Retail Demo Service
Running	RmSvc	Radio Management Service
Running	RpcEptMapper	RPC Endpoint Mapper
Stopped	RpcLocator	Remote Procedure Call (RPC) Locator
Running	RpcSs	Remote Procedure Call (RPC)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input type="radio"/>	<input type="radio"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
From Computer2, you can use Disk Management to manage Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer2, you can use Registry Editor to edit the registry of Computer1 remotely.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
From Computer3, you can use Performance Monitor to monitor the performance of Computer1.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

NEW QUESTION 89

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 150 hybrid Azure AD joined Windows devices. All the devices are enrolled in Microsoft Intune. You need to configure Delivery Optimization on the devices to meet the following requirements:

- Allow downloads from the internet and from other computers on the local network.
- Limit the percentage of used bandwidth to 50. What should you use?

- A. a configuration profile
- B. a Windows Update for Business Group Policy setting
- C. a Microsoft Peer-to-Peer Networking Services Group Policy setting
- D. an Update ring for Windows 10 and later profile

Answer: A

Explanation:

A configuration profile is the correct answer because it allows you to configure Delivery Optimization settings for Windows devices in Intune. You can specify the download mode, bandwidth limit, caching options, and more. A configuration profile is a template that contains one or more settings that you can apply to groups of devices. References:

- > Windows 10 Delivery Optimization settings for Intune - Microsoft Intune | Microsoft Learn
- > Delivery Optimization settings in Microsoft Intune

NEW QUESTION 91

- (Exam Topic 4)

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain. You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Azure service to provision:

<input type="checkbox"/>
An Azure Storage account
Azure Cosmos DB
Azure SQL Database
Log Analytics

Action to perform on the computers:

<input type="checkbox"/>
Create a collector-initiated subscription
Install the Microsoft Monitoring Agent
Enroll in Microsoft Intune
Register to Azure Active Directory (Azure AD)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure service to provision:

<input type="checkbox"/>
An Azure Storage account
Azure Cosmos DB
Azure SQL Database
Log Analytics

Action to perform on the computers:

<input type="checkbox"/>
Create a collector-initiated subscription
Install the Microsoft Monitoring Agent
Enroll in Microsoft Intune
Register to Azure Active Directory (Azure AD)

NEW QUESTION 96

- (Exam Topic 4)

You have groups that use the Dynamic Device membership type as shown in the following table.

Name	Syntax
Group1	(device.deviceOwnership -eq "Company")
Group2	(device.deviceOwnership -eq "Personal")

You are deploying Microsoft 365 apps.

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Platform
LT1	Company	Windows 10 Enterprise x64
LT2	Personal	Windows 10 Enterprise x64
LT3	Company	MacOS Big Sur

In the Microsoft Endpoint Manager admin center, you create a Microsoft 365 Apps app as shown in the exhibit. (Click the Exhibit tab.)

App Information [Edit](#)

Name	Microsoft 365 Apps for Windows 10
Description	Microsoft 365 Apps for Windows 10
Publisher	Microsoft
Category	Productivity
Show this as a featured app in the Company Portal	No
Information URL	https://products.office.com/en-us/explore-office-for-home
Privacy URL	https://privacy.microsoft.com/en-US/privacystatement
Developer	Microsoft
Owner	Microsoft
Notes	...
Logo	
Architecture	Teams, Word
Update channel	64-bit
Remove other versions	Current Channel
Version to install	Yes
Use shared computer activation	Latest
Accept the Microsoft Software License	No
Teams on behalf of users	No
Install background service for Microsoft Search in Bing	No
Apps to be installed as part of the suite	1 language(s) selected

Assignments [Edit](#)

Group mode	Group
<input type="checkbox"/> Required	
<input checked="" type="checkbox"/> Included	Group1
Available for enrolled devices	

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
LT1 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT2 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>
LT3 will have Microsoft Office 365 installed	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-office365

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-deploy> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

NEW QUESTION 97

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 11 on a reference computer.

You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers.

Which command should you run before you capture the image?

- A. dism
- B. wpeinit
- C. sysprep
- D. bcdedit

Answer: C

Explanation:

To capture an image of a reference computer and make it ready for deployment to multiple computers, you need to run the sysprep command with the /generalize option. This option removes all unique system information from the Windows installation, such as the computer name, security identifier (SID), and driver cache.

The other commands are not used for this purpose. References: Sysprep (Generalize) a Windows installation

NEW QUESTION 99

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You have devices enrolled in Microsoft Intune.

You assign a conditional access policy named Policy1 to a group named Group1. Policy1 restricts devices marked as noncompliant from accessing Microsoft OneDrive for Business.

You need to identify which noncompliant devices attempt to access OneDrive for Business. What should you do?

- A. From the Microsoft Entra admin center, review the Conditional Access Insights and Reporting workbook.
- B. From the Microsoft Intune admin center, review Device compliance report.
- C. From the Microsoft Intune admin center, review the Noncompliant devices report.
- D. From the Microsoft Intune admin center, review the Setting compliance report.

Answer: C

NEW QUESTION 103

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a group named Group1.

You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.

You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.

What should you configure?

- A. Session access controls
- B. an assignment that uses a User risk condition
- C. an assignment that uses a Sign-in risk condition
- D. Grant access controls

Answer: A

Explanation:

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.

The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.

Sign-in frequency control

- Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.
- Browse to Azure Active Directory > Security > Conditional Access.
- Select New policy.
- Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.
- Choose all required conditions for customer's environment, including the target cloud apps.
- Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

- Save your policy. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-session-life>

NEW QUESTION 106

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1 and uses Microsoft Intune Suite. You use Microsoft Intune to manage devices that run Windows 11.

User1 provides remote support for 75 devices in the marketing department.

You need to add User1 to the Remote Desktop Users group on each marketing department device. What should you configure?

- A. an app configuration policy
- B. a device compliance policy
- C. an account protection policy
- D. a device configuration profile

Answer: D

NEW QUESTION 111

- (Exam Topic 4)

Your network contains an Active Directory domain named adatum.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Remote Desktop is enabled on Computer2.

The domain contains the user accounts shown in the following table.

Name	Member of
User1	Domain Admins
User2	Domain Users
User3	Domain Users

Computer2 contains the local groups shown in the following table.

Name	Members
Group1	ADATUM\User2 ADATUM\User3
Group2	ADATUM\User2
Group3	ADATUM\User3
Administrators	ADATUM\Domain Admins ADATUM\User3
Remote Desktop Users	Group1

The relevant user rights assignments for Computer2 are shown in the following table.

Policy	Security Setting
Allow log on through Remote Desktop Services	Administrators, Remote Desktop Users
Deny log on through Remote Desktop Services	Group2
Deny log on locally	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can establish a Remote Desktop session to Computer2.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can establish a Remote Desktop session to Computer2.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 114

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com.

You have a workgroup computer named Computer1 that runs Windows 11. You need to add Computer1 to contoso.com.

What should you use?

- A. dsreecmd.exe
- B. Computer Management
- C. netdom.exe
- D. the Settings app

Answer: A

NEW QUESTION 119

- (Exam Topic 4)

Your company implements Azure AD, Microsoft 365, Microsoft Intune, and Azure Information Protection. The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a device configuration profile from the Microsoft Intune admin center
- B. a data loss prevention (DIP) policy from the Microsoft Purview compliance portal
- C. an insider risk management policy from the Microsoft Purview compliance portal
- D. an app protection policy from the Microsoft Intune admin center

Answer: B

NEW QUESTION 122

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. The subscription contains the users shown in the following table.

Name	Member of
User1	Group1, Group2
User2	Group2
User3	Group3

Group2 and Group3 are members of Group1. All the users use Microsoft Excel.

From the Microsoft Endpoint Manager admin center, you create the policies shown in the following table.

Name	Type	Priority	Assigned to	Default file format for Excel
Policy1	Policies for Office apps	0	Group1	OpenDocument Spreadsheet (*.ods)
Policy2	Policies for Office apps	1	Group2	Excel Binary Workbook (*.xlsb)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 saves a new spreadsheet, the .ods format is used.	<input type="radio"/>	<input type="radio"/>
When User2 saves a new spreadsheet, the .xlsb format is used.	<input type="radio"/>	<input type="radio"/>
When User3 saves a new spreadsheet, the .xlsx format is used.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

User1 is member of Group1 and Group2.

Policy1 with priority 0 is assigned to Group1: default file format for Excel is.ods. Policy2 with priority 1 is assigned to Group2: default file format for Excel is.xlsb.

Note: Key points to remember about policy order

Policies are assigned an order of priority. Devices receive the first applied policy only.

You can change the order of priority for policies. Default policies are given the lowest order of priority. Box 2: Yes

User2 is member of Group2.

Group2 and Group3 are members of Group1. Box 3: No
User3 is member of Group3.
Group2 and Group3 are members of Group1.
Reference: <https://learn.microsoft.com/en-us/microsoft-365/security/defender-business/mdb-policy-order>

NEW QUESTION 127

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Built-in Android app
- B. Managed Google Play store app
- C. Web link
- D. Android Enterprise system app
- E. Android store app

Answer: BD

NEW QUESTION 131

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the objects shown in the following table. You are creating a compliance policy named Compliance1.

Which objects can you specify in Compliance1 as additional recipients of noncompliance notifications?

- A. Group3 and Group4 only
- B. Group3, Group4, and Admin1 only
- C. Group1, Group2, and Group3 only
- D. Group1, Group2, Group3, and Group4 only
- E. Group1, Group2, Group3, Group4, and Admin1

Answer: C

Explanation:

NEW QUESTION 134

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 11.

You create a new task sequence by using the Standard Client Task Sequence template to deploy Windows 11 Enterprise to new computers. The computers have a single hard disk.

You need to modify the task sequence to create a system volume and a data volume.

Which phase should you modify in the task sequence?

- A. Initialization
- B. State Restore
- C. Preinstall
- D. Postinstall

Answer: C

NEW QUESTION 139

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have devices enrolled in Microsoft Intune as shown in the following table. To which devices can you deploy apps by using Intune?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3 only
- E. Device1, Device2, Device3, and Device4

Answer: E

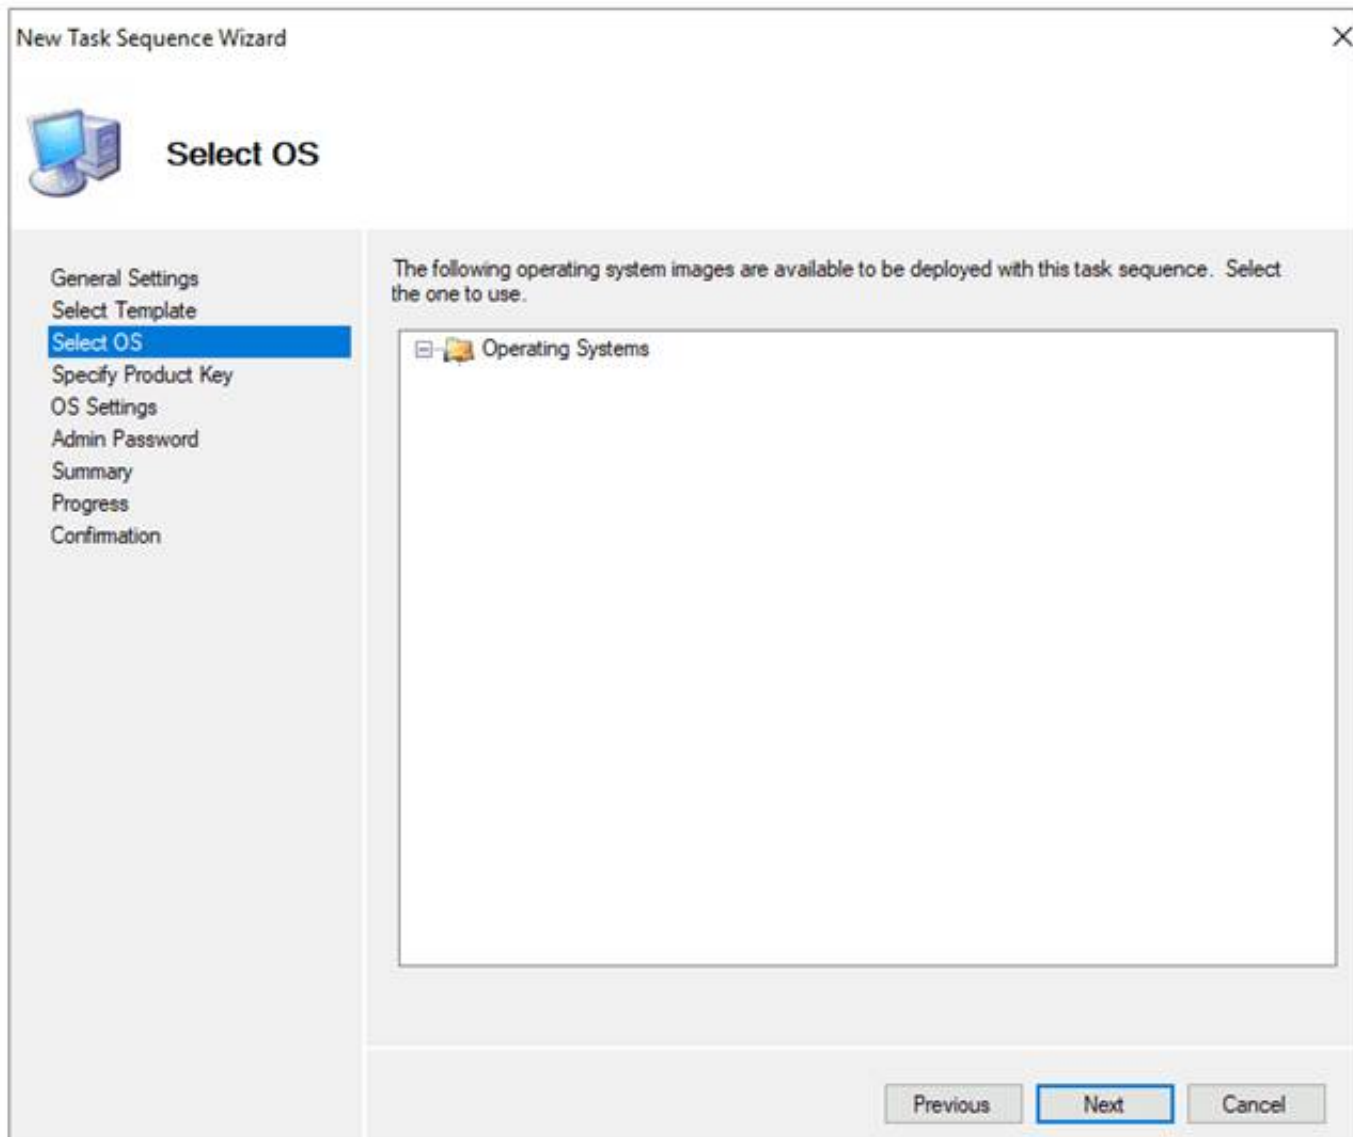

NEW QUESTION 141

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share.

From the Deployment Workbench, you open the New Task Sequence Wizard and select the Standard Client Upgrade Task Sequence task sequence template.

You discover that there are no operating system images listed on the Select OS page as shown in the following exhibit.

You need to be able to select an operating system image to perform a Windows 11 in-place upgrade. What should you do?

- A. Enable monitoring for the deployment share.
- B. Import a full set of source files.
- C. Import a custom image file.
- D. Run the Update Deployment Share Wizard

Answer: D

NEW QUESTION 142

- (Exam Topic 4)

You have a Microsoft 365 Business Standard subscription and 100 Windows 10 Pro devices. You purchase a Microsoft 365 E5 subscription. You need to upgrade the Windows 10 Pro devices to Windows 10 Enterprise. The solution must minimize administrative effort. Which upgrade method should you use?

- A. Windows Autopilot
- B. a Microsoft Deployment Toolkit (MDT) lite-touch deployment
- C. Subscription Activation
- D. an in-place upgrade by using Windows installation media

Answer: C

Explanation:

Subscription Activation is a feature that allows you to upgrade from Windows 10 Pro or Windows 11 Pro to Windows 10 Enterprise or Windows 11 Enterprise without needing a product key or reinstallation. You just need to assign a subscription license (such as Microsoft 365 E5) to the user in Azure AD, and then sign in to the device with that user account. The device will automatically activate Windows Enterprise edition using the firmware-embedded activation key for Windows Pro edition. This method minimizes administrative effort and simplifies the upgrade process. References: Windows subscription activation, Deploy Windows Enterprise licenses

NEW QUESTION 145

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 2,000 computers that run Windows 10. You implement hybrid Azure AD and Microsoft Intune.

You need to automatically register all the existing computers to Azure AD and enroll the computers in Intune. The solution must minimize administrative effort. What should you use?

- A. an Autodiscover address record
- B. a Group Policy object (GPO)
- C. an Autodiscover service connection point (SCP)
- D. a Windows Autopilot deployment profile

Answer: D

NEW QUESTION 149

- (Exam Topic 4)

You have a Hyper-V host that contains the virtual machines shown in the following table.

Name	Generation	Virtual processors	Memory
VM1	1	4	16 GB
VM2	2	1	8 GB
VM3	2	2	4 GB

On which virtual machines can you install Windows 11?

- A. VM1 only
- B. VM3only
- C. VM1 and VM2 only
- D. VM2 and VM3 only
- E. VM1, VM2, and VM3

Answer: E

NEW QUESTION 150

- (Exam Topic 4)

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enable the Allow Remote Shell access setting.
- B. Enable the Allow remote server management through WinRM setting.
- C. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- D. Enable the Windows Defender Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Set the Startup Type of the Remote Registry service to Automatic
- F. Enable the Windows Defender Firewall: Allow inbound remote administration exception setting.

Answer: BCF

Explanation:

To enable WinRM on domain computers using Group Policy, you need to perform the following actions:

- Enable the Allow remote server management through WinRM setting under Computer Configuration > Policies > Administrative Templates > Windows Components > Windows Remote Management (WinRM) > WinRM Service. This setting allows you to specify the IP address ranges that can connect to the WinRM service.
- Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic under Computer Configuration > Preferences > Control Panel Settings > Services. This setting ensures that the WinRM service starts automatically on the computers.
- Enable the Windows Defender Firewall: Allow inbound remote administration exception setting under Computer Configuration > Policies > Security Settings > Windows Firewall and Advanced Security > Windows Firewall and Advanced Security > Inbound Rules. This setting creates a firewall rule that allows incoming TCP connections on port 5985 for WinRM. References: How to Enable WinRM via Group Policy, Installation and configuration for Windows Remote Management

NEW QUESTION 154

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

- MDM user scope: Group1
- MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 registers Device1 in contoso.com, Device1 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User1 joins Device1 to contoso.com, Device2 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>
If User2 registers Device3 in contoso.com, Device3 is enrolled automatically in Microsoft Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

NEW QUESTION 156

- (Exam Topic 4)

You have a Microsoft 365 subscription that uses Microsoft Intune. You have five new Windows 11 Pro devices.

You need to prepare the devices for corporate use. The solution must meet the following requirements:

- Install Windows 11 Enterprise on each device.
- Install a Windows Installer (MSI) package named App1 on each device.
- Add a certificate named Certificate1 that is required by App1.
- Join each device to Azure AD.

Which three provisioning options can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. subscription activation
 B. a custom Windows image
 C. an in-place upgrade
 D. Windows Autopilot
 E. provisioning packages

Answer: BDE

NEW QUESTION 160

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune.

You have an update ring named UpdateRing1 that contains the following settings:

- Automatic update behavior: Auto install and restart at a scheduled time
- Automatic behavior frequency: First week of the month
- Scheduled install day: Tuesday
- Scheduled install time: 3 AM

From the Microsoft Intune admin center, you select Uninstall for the feature updates of UpdateRing1. When will devices start to remove the feature updates?

- A. when a user approves the uninstall
 B. as soon as the policy is received
 C. next Tuesday
 D. the first Tuesday of the next month

Answer: C

NEW QUESTION 163

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You need to create Endpoint security policies to meet the following requirements:

- Hide the Firewall & network protection area in the Windows Security app.
- Disable the provisioning of Windows Hello for Business on the devices.

Which two policy types should you use? To answer, select the policies in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Manage

 Antivirus

 Disk encryption

 Firewall

 Endpoint detection and response

 Attack surface reduction

 Account protection

 Device compliance

 Conditional access

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

In the Antivirus policy settings, you can hide the Firewall and network protection area in the Windows Security app.

Windows Hello for Business settings are configured in Identity protection. Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/antivirus-security-experience-windows-settings> <https://docs.microsoft.com/en-us/mem/intune/protect/identity-protection-windows-settings>

NEW QUESTION 164

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

Name	Description
Group1	Azure AD group that contains a user named User1
Group2	Azure AD group that contains iOS devices

You create a Conditional Access policy named CAPolicy1 that will block access to Microsoft Exchange Online from iOS devices. You assign CAPolicy1 to Group1. You discover that User1 can still connect to Exchange Online from an iOS device. You need to ensure that CAPolicy1 is enforced. What should you do?

- A. Configure a new terms of use (TOU).
 B. Assign CAPolicy1 to Group2.
 C. Enable CAPolicy1
 D. Add a condition in CAPolicy1 to filter for devices.

Answer: B

Explanation:

Common signals that Conditional Access can take in to account when making a policy decision include the following signals:

* User or group membership

Policies can be targeted to specific users and groups giving administrators fine-grained control over access.

* Device

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

Use filters for devices to target policies to specific devices like privileged access workstations.

* Etc.

NEW QUESTION 168

- (Exam Topic 4)

You have an Azure AD tenant named contoso.com. You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Windows 10
Device3	iOS
Device4	Ubuntu Linux

Which devices can be Azure AD joined, and which devices can be registered in contoso.com? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Azure AD joined:

Device1 and Device2 only

Device1 only

Device1 and Device2 only

Device1 and Device3 only

Device1, Device2, and Device3 only

Device1, Device2, Device3, and Device4

Registered in contoso.com:

Device1 and Device2 only

Device1 and Device2 only

Device2 and Device3 only

Device3 and Device4 only

Device2, Device3, and Device4 only

Device1, Device2, Device3, and Device4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Azure AD joined:

Device1 and Device2 only

Device1 only

Device1 and Device2 only

Device1 and Device3 only

Device1, Device2, and Device3 only

Device1, Device2, Device3, and Device4

Registered in contoso.com:

Device1 and Device2 only

Device1 and Device2 only

Device2 and Device3 only

Device3 and Device4 only

Device2, Device3, and Device4 only

Device1, Device2, Device3, and Device4

NEW QUESTION 173

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and a computer that runs Windows 11. You need to create a customized installation of Microsoft 365 Apps for enterprise.
Which four actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Actions

Run setup.exe and specify the /packager switch.

Download the Microsoft Office Deployment Tool (ODT) and run the self-extracting executable (.exe) file.

Edit the XML configuration file.

Run setup.exe and specify the /download switch.

Run setup.exe and specify the /configure switch.

>

<

Answer Area

<

>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- * 1. Download ODT application
 - * 2. Create a configuration file (XML)
 - * 3. setup.exe /download to download the installation files
 - * 4. setup.exe /configure to deploy the application
- <https://learn.microsoft.com/en-us/deployoffice/deploy-microsoft-365-apps-local-source>

NEW QUESTION 175

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 11. You need to enable the Windows Remote Management (WinRM) service on Computer1 and perform the following configurations:

- For the WinRM service, set Startup type to Automatic.
- Create a listener that accepts requests from any IP address.
- Enable a firewall exception for WS-Management communications. Which PowerShell cmdlet should you use?

- A. Connect-WSMan
- B. Enable-PSRemoting
- C. Invoke-WSManAction
- D. Enable-PSSessionConfiguration

Answer: B

NEW QUESTION 180

- (Exam Topic 4)

You have a Microsoft 365 subscription.

All computers are enrolled in Microsoft Intune.

You have business requirements for securing your Windows 11 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Microsoft Defender for Endpoint risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement1:

Requirement2:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 185

- (Exam Topic 4)

You have the device configuration profile shown in the following exhibit.

Kiosk

Windows 10 and later

✓ Basics

2 Configuration settings

3 Assignments

Configure your devices to run in kiosk mode. Before you select a kiosk mode, review your app assignments in the Mobile Apps blade. Apps that you want to run in kiosk mode should be assigned to a Windows device. [Learn more about Windows kiosk mode.](#)

Select a kiosk mode *

Single app, full-screen kiosk

User logon type *

Auto logon (Windows 10, version 1803+)

Application type *

Add Microsoft Edge browser

This kiosk profile requires Microsoft Edge version 87 and later with Windows 10 version 1909 and later. [Learn more about Microsoft Edge kiosk mode.](#)

Edge Kiosk URL *

https://contoso.com

Microsoft Edge kiosk mode type

Public Browsing (InPrivate)

Refresh browser after idle time

5

Specify Maintenance Window for App Restarts *

Require

Not configured

Maintenance Window Start Time

MM/DD/YYYY

h:mm:ss A

Maintenance Window Recurrence

Daily (recommended)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Answer Area

Users

can access any URL.

cannot view the address bar in Microsoft Edge.

can only access URLs that include contoso.com.

can only access URLs that start with https://contoso.com/ .

Windows 10 devices can have

a single Microsoft Edge instance that has a single tab.

a single Microsoft Edge instance that has multiple tabs.

multiple Microsoft Edge instances that have multiple tabs.

multiple Microsoft Edge instances that each has a single tab.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Users can only access URLs that start with https://contoso.com/ Windows 10 and later devices can have multiple Microsoft Edge instances that each has a single tab

he device configuration profile shown in the exhibit is a kiosk browser profile that configures Microsoft Edge to run in kiosk mode. The profile has the following

settings:

- > Kiosk mode: Enabled
- > Kiosk type: Multi-app
- > Allowed URLs: https://contoso.com/*
- > Address bar: Disabled

These settings mean that users can only access URLs that start with https://contoso.com/ and cannot view the address bar in Microsoft Edge. The kiosk type of Multi-app allows users to open multiple instances of Microsoft Edge, but each instance can only have a single tab. Therefore, users cannot access any URL, cannot view the address bar in Microsoft Edge, and can have multiple Microsoft Edge instances that each has a single tab. References: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings#kiosk-browser-settings>

NEW QUESTION 186

- (Exam Topic 4)

You have a Microsoft 365 subscription that includes Microsoft Intune. You have computers that run Windows 11 as shown in the following table.

Name	Azure AD status	Intune	BitLocker Drive Encryption (BitLocker)	Firewall
Computer1	Joined	Enrolled	Disabled	Enabled
Computer2	Registered	Enrolled	Enabled	Enabled
Computer3	Registered	Not enrolled	Enabled	Disabled

You have the groups shown in the following table.

Name	Members
Group1	Computer1, Computer2
Group2	Computer3

You create and assign the compliance policies shown in the following table.

Name	Configuration	Action for noncompliance	Assignment
Policy1	Require BitLocker to be enabled on the device.	Mark device as noncompliant after 10 days.	Group1
Policy2	Require firewall to be on and monitoring.	Mark device as noncompliant immediately.	Group2

The next day, you review the compliance status of the computers.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
The compliance status of Computer1 is In grace period.	<input type="radio"/>	<input type="radio"/>
The compliance status of Computer2 is Compliant.	<input type="radio"/>	<input type="radio"/>
The compliance status of Computer3 is Not compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
The compliance status of Computer1 is In grace period.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
The compliance status of Computer2 is Compliant.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
The compliance status of Computer3 is Not compliant.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

NEW QUESTION 191

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

in the Out-of-Box Drivers node, you create folders that contain drivers for different hardware models.

You need to configure the Inject Drivers MDT task to use PnP detection to install the drivers for one of the hardware models.

What should you do first?

- A. Import an OS package.
- B. Create a selection profile.
- C. Add a Gather task to the task sequence.
- D. Add a Validate task to the task sequence.

Answer: B

NEW QUESTION 195

- (Exam Topic 4)

You have a hybrid Azure AD tenant.

You configure a Windows Autopilot deployment profile as shown in the following exhibit.

Create profile
Windows PC

1 Basics 2 Out-of-box experience (OOBE) 3 Scope tags 4 Assignments 5 Review + create

Configure the out-of-box experience for your Autopilot devices

* Deployment mode 1 User-Driven

User account type 1 Administrator Standard

Allow White Glove OOBE 1 No Yes

Apply device name template 1 No Yes

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

To apply the profile to a new computer, you must first

join the device to Azure AD
enroll the device in Microsoft Intune
import a CSV file into Windows Autopilot

When the Windows Autopilot profile is applied to a computer, the computer will be

joined to Azure AD only
registered in Azure AD only
joined to Active Directory only
joined to Active Directory and registered in Azure AD

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

To apply the profile to a new computer, you must first

join the device to Azure AD enroll the device in Microsoft Intune import a CSV file into Windows Autopilot
--

When the Windows Autopilot profile is applied to a computer, the computer will be

joined to Azure AD only registered in Azure AD only joined to Active Directory only joined to Active Directory and registered in Azure AD
--

NEW QUESTION 198

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 1.000 computers that run Windows 11.

You need to configure the Remote Desktop settings of all the computers. The solution must meet the following requirements:

- Prevent the sharing of clipboard contents.
- Ensure that users authenticate by using Network Level Authentication (NLA).

Which two nodes of the Group Policy Management Editor should you use? To answer, select the appropriate nodes in the answer area. NOTE: Each correct selection is worth one point.

Remote Desktop Session Host

NEW QUESTION 200

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains a user named User1. User1 is assigned a Windows 10/11 Enterprise E3 license. You use Microsoft Intune Suite to manage devices. User1 activates the following devices:

- Device1: Windows 11 Enterprise
- Device2: Windows 10 Enterprise
- Device3: Windows 11 Enterprise

How many more devices can User1 activate?

- A. 2
- B. 3
- C. 7
- D. 8

Answer: A

NEW QUESTION 204

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need provide a user the ability to disable Security defaults and principle of least privilege. Which role should you assign to the user?

- A. Global Administrator
- B. Conditional Access Administrator
- C. Security Administrator
- D. Intune Administrator

Answer: B

Explanation:

To enable or disable security defaults in your directory, sign in to the Azure portal as a security administrator, Conditional Access administrator, or global administrator.

Note: Conditional Access Administrator

Users with this role have the ability to manage Azure Active Directory Conditional Access settings.
