NEW QUESTION 333

- (Exam Topic 4)

Which step of the 'continual improvement model' defines measurable targets?

- A. how we get there?
- B. Where are we now?
- C. What is the vision?
- D. Where do we want to be?

Answer: D

Explanation:

This is one of the most important questions for continual improvement. This question helps to define measurable targets for the IT service provider that will help to reach the vision of the company in the long-term. At this stage, we look at the identified key performance indicators from the previous step and determine what values we want to target for each of these indicators. This decision must be made with the business's vision in mind, but also with a sense of what is practically possible.

- (Exam Topic 4)

Which of the following includes configuring components and activities to facilitate outcomes for stakeholders?

- A. Service relationship management
- B. Service consumption
- C. The service value system
- D. The release management' practice

Answer: C

Explanation:

Organizations maximize co-creation of value with their customers by facilitating the outcomes they want to achieve. The four dimensions of service management have shown that a holistic approach is the best way for an organization to:

- Achieve its goals in delivering quality and cost effective services
- Meet the needs of its customers
- Satisfy the requirements of its stakeholders

NEW QUESTION 352

- (Exam Topic 4)

Why should a service level agreement include bundles of metrics?

- A. To ensure that the service levels have been agreed with customers
- B. To reduce the number of metrics that need to be measured and reported
- C. To ensure that all services are included in the service reports
- D. To help focus on business outcomes, rather than operational result.

Answer: D

Explanation:

Individual metrics without a specified service context are unhelpful. They should relate to defined outcomes and not simply operational metrics. This can be achieved with balanced bundles of metrics, such as customer satisfaction and key business outcomes.

NEW QUESTION 362

- (Exam Topic 4)

Which practice handles all pre-defined user-initiated service actions?

- A. Deployment management
- B. Incident management
- C. Service level management
- D. Service request management

Answer: D

Explanation:

The purpose of the service request management practice is to support the agreed quality of a service by handling all pre-defined, user-initiated service requests in an effective and user-friendly manner. Service request management is dependent upon well-designed processes and procedures, which are operationalized through tracking and automation tools to maximize the efficiency of the practice. To be handled optimally, service request management should follow these guidelines:

- > Service requests and their fulfilment should be standardized and automated to the greatest degree possible.
- > Policies should define which service requests will be fulfilled with limited or even no additional approvals so that fulfilment can be streamlined.
- > The expectations of users regarding fulfilment times and costs should be clearly set, based on what the organization can realistically deliver.
- > Opportunities for improvement should be identified and implemented to produce faster fulfilment times and take advantage of automation.

Which organization delivers output or outcomes of a service?

- A. A service consumer delivers outcomes of the service
- B. A service provider delivers outcomes of the service
- C. A service consumer delivers outputs of the service
- D. A service provider delivers outputs of the service

Answer: B

Explanation:

When an organization acts as a service provider, it produces outputs that help its consumers to achieve certain outcomes. An output is defined as a tangible or intangible deliverable of an activity; for example, transportation from one location to another.
<https://www.bmc.com/blogs/itil-key-concepts-service-management/>

NEW QUESTION 373

- (Exam Topic 4)

When using the 'continual improvement model, which information should be produced by an organization to understand where the organization is now?

- A. Business objectives
- B. Improvement plans
- C. Assessment results
- D. Measureable Targets

Answer: C

Explanation:

The second step is to conduct an objective current-state assessment of existing services and service management practices. This should include consideration of the users' perception of the value being received, along with a review of people's competencies and skills, the processes and procedures involved, the capabilities of the available technological solutions and the prevailing organizational culture. The success of an improvement initiative depends on a clear and accurate understanding of the starting point and the required impact of the initiative.

For example, an organization can measure the current net promoter score (NPS) from a customer satisfaction survey, conduct a benchmark survey against its competitors or review findings of operational statistics or audit reports to understand its current state. If this step is skipped, the current state will not be understood and there will not be an objective baseline measurement against which improvement can be measured.

NEW QUESTION 380

- (Exam Topic 4)

Which statement about the input and output of the value chain activities is CORRECT?

- A. Each value chain activity receives inputs and provides outputs
- B. The organization's governance will determine the inputs and outputs of each value chain activity
- C. Some value chain activities only have input, whereas others only have outputs
- D. Input and output are fixed for each value chain activity

Answer: A

Explanation:

Each activity contributes to the value chain by transforming specific inputs into outputs. The inputs could be demand from outside the value chain, or outputs of other activities, while the transformation is facilitated by ITIL practices, undertaken using internal or third-party resources, processes, skills, and competencies.

NEW QUESTION 383

- (Exam Topic 4)

What is MOST LIKELY to be handled as a service request?

- A. An emergency change to apply a security patch
- B. The implementation of a workaround
- C. Providing a virtual server for a development team
- D. Managing an interruption to a service

Answer: D

NEW QUESTION 385

- (Exam Topic 4)

Which TWO of the following statements are MOST associated with the 'optimize and automate' guiding principle?

- * 1. It is important to assess which method of communication is appropriate 'or each type of stakeholder.
- * 2. Complex systems should be designed with an understanding of how the components' parts are related.
- * 3. Organizations should consider whether technology could improve the efficiency o' manual processes.
- * 4 It is important to understand the organization's objectives when assessing the impact of potential improvements.

- A. 1 and 2
- B. 2 and 3
- C. 3 and 4
- D. 1 and 4

Answer: C

Explanation:

You need to use all of your resources as effectively and efficiently as you can. This means that you should automate wherever you can, and use people only for tasks that can't be automated. It also means that you need to think carefully about what you can automate and about the circumstances where only a person will do; and about simplifying those processes you do decide to automate to eliminate wasteful or inefficient steps. You should always optimize the work BEFORE you automate it, as automating something that is inefficient or ineffective may just result in you doing the wrong thing faster!

NEW QUESTION 433

- (Exam Topic 3)

Which Practice includes management of workarounds and known errors?

- A. Monitoring and event management
- B. Service configuration management
- C. Problem management
- D. Incident management

Answer: C

Explanation:

What is problem management?

The purpose of problem management is to reduce the likelihood and impact of incidents by identifying actual and potential causes of incidents, and managing workarounds and known errors.

Problems are related to incidents, but it is important to differentiate them in the way they are managed:

- Incidents have an impact on users or business processes, and must be resolved so that normal business activity can take place.
- Problems are the causes of incidents therefore they require investigation and analysis to identify the causes, develop workarounds, and recommend longer-term resolution. This reduces the number and impact of future incidents.
