## Exam Questions MD-101

Managing Modern Desktops (beta)

## About ExamBible

*[Your Partner of IT Exam](#)*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

### NEW QUESTION 1

- (Exam Topic 4)

You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

What should you do?

- A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
- B. Create a provisioning package (.ppkg) file and email the file to the user
- C. Create a Windows To Go workspace and ship the workspace to the user
- D. Create a Sysprep Unattend (.xml) file and email the file to the user

**Answer: B**

### Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages>

### NEW QUESTION 2

- (Exam Topic 4)

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains Windows 10 devices that are managed by using Microsoft Endpoint Configuration Manager.

You plan to deploy Microsoft 365 Apps for enterprise to the devices by using Configuration Manager. You create a Configuration.xml file as shown in the following exhibit.

```
<Configuration ID="67e*0d4f-814a-4466-9e3c-1388d66a527c">
  <Add OfficeClientEdition="64" Channel="Current" OfficeMgmtCOM="TRUE">>
    <Product ID="O365ProPlusRetail">
      <Language ID="MatchOS" />
      <ExcludeApp ID="Access" />
      <ExcludeApp ID="Groove" />
      <ExcludeApp ID="Lync" />
      <ExcludeApp ID="Publisher" />
    </Product>
  </Add>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
  <Property Name="SCLCacheOverride" Value="0" />
  <Property Name="AUTOACTIVATE" Value="0" />
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="DeviceBasedLicensing" Value="1" />
  <RemoveMSI />
  <AppSettings>
    <Setup Name="Company" Value="Contoso.com" />
  </AppSettings>
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="\\Server1\Office" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Microsoft 365 Apps for enterprise will be installed from [answer choice]	<div>▼</div> <div>\\Server1\Office a Configuration Manager distribution point the Office 365 Content Delivery Network (CDN)</div>
New Microsoft Office feature updates will be available to devices [answer choice]	<div>▼</div> <div>twice a year in January and July once a month, on the second Tuesday of the month as soon as the update is ready, but on no set schedule</div>

- A. Mastered
- B. Not Mastered

**Answer: A**

### Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/office-deployment-tool-configuration-options> <https://docs.microsoft.com/en-us/deployoffice/overview-update-channels#semi-annual-enterprise-channel-overv>

### NEW QUESTION 3

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10
- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.

Which devices will apply Policy1?

- A. Device1, Device2, Device4, and Device5
- B. Device1, Device4, and Device5 only
- C. Device4 and Device5 only
- D. Device1, Device3, Device4 and Device5

**Answer:** A

#### Explanation:

Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.

Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

### NEW QUESTION 4

- (Exam Topic 4)

You have the x64 devices shown in the following table.

Name	Operating system	Installed apps
Computer1	64-bit version of Windows 8.1 Pro	Microsoft Office 2013
Computer2	32-bit version of Windows 8.1 Enterprise	None

You have the Windows 10 Enterprise images shown in the following table.

Name	Platform	Description
Image1	x64	Custom Windows 10 Enterprise image that has Microsoft Office 2019 installed
Image2	x64	Default Windows 10 Enterprise image created by Microsoft
Image3	x86	Custom Windows 10 Enterprise image that has Microsoft Office 2019 installed
Image4	x86	Default Windows 10 Enterprise image created by Microsoft

You need to identify which images can be used to perform an in-place upgrade of Computer1 and Computer2. Which images should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Answer Area

Computer1:	<div><div>Image1 only</div><div>Image2 only</div><div>Image1 and Image2 only</div><div>Image1, Image2, and Image3 only</div><div>Image1, Image2, Image3, and Image4</div></div>
Computer2:	<div><div>Image3 only</div><div>Image4 only</div><div>Image3 and Image4 only</div><div>Image2, Image3, and Image4 only</div><div>Image1, Image2, Image3, and Image4</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

### Explanation:

Box 1: Image1 and Image2 only

Computer1 is a x64 system so Image1 and Image2 are fine.

Note: x86 refers to a 32-bit CPU and operating system while x64 refers to a 64-bit CPU and operating system. Box 2: Image3 and Image4 only

There is no upgrade path from 32 bit versions of Windows to Windows 8 64 bit.

Reference:

<https://answers.microsoft.com/en-us/windows/forum/all/switch-from-x86-to-x64/a69b5aae-9d20-414b-86b8-004>

### NEW QUESTION 5

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You create an app protection policy for Android devices named Policy1 as shown in the following exhibit.

[Home](#) > [Apps](#) >

## Create policy

✓ Basics

**2 Apps**

1 Data protection

4 Access requirements

...

Choose how you want to apply this policy to apps on different devices. Then add at least one app.

Target to apps on all device types ⓘ

Yes No

Device types \* ⓘ

Unmanaged

Target policy to

All Apps

ⓘ

We'll continue to add managed apps to your policy as they become available in Intune. [View a list of apps that will be targeted](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

### Answer Area

To apply Policy1 to an Android device, you must [answer choice].

- |   |
|---|
| install the Company Portal app on the device              |
| install the Microsoft Authenticator app on the device     |
| onboard the device to Microsoft Defender for Endpoint     |
| onboard the device to the Microsoft 365 compliance center |

When Policy1 is assigned, the policy will apply to [answer choice].

- |                   |
|-------------------|
| users only        |
| devices only      |
| users and devices |

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Install the Intune Company Portal app on the device

On Android, Android devices will prompt to install the Intune Company Portal app regardless of which Device type is chosen.

Box 2: Devices only

For Android devices, unmanaged devices are devices where Intune MDM management has not been detected. This includes devices managed by third-party MDM vendors.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies#app-protection-policies-for-iosipado>

### NEW QUESTION 6

- (Exam Topic 4)

You have 100 computers that run Windows 8.1.

You plan to deploy Windows 10 to the computers by performing a wipe and load installation.

You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Actions

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Deploy Windows 10.

Run loadstate.exe.

Run scanstate.exe.

Restore a system image backup

#### Answer Area

- A. Mastered  
B. Not Mastered

**Answer:** A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios> <http://itproguru.com/expert/2016/01/step-by-step-how-to-migrate-users-and-user-data-from-xp-vista-windows-7>

### NEW QUESTION 7

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 500 macOS devices enrolled in Microsoft Intune. You need to ensure that you can apply Microsoft Defender for Endpoint antivirus policies to the macOS devices. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a configuration profile.
- B. From the Microsoft Endpoint Manager admin center, create a security baseline.
- C. Onboard the macOS devices to the Microsoft 365 compliance center.
- D. Install Defender for Endpoint on the macOS devices.

**Answer:** D

**Explanation:**

Just install, and use Defender for Endpoint on Mac. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/microsoft-defender-endpoint-mac>

**NEW QUESTION 8**

- (Exam Topic 4)

Your company implements Microsoft Azure Active Directory (Azure AD), Microsoft 365, Microsoft Intune, and Azure Information Protection.

The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. a supervision policy from the Security & Compliance admin center
- C. an app protection policy from the Intune admin center
- D. a device configuration profile from the Intune admin center

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

**NEW QUESTION 9**

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD)

You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.

You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computer.

What should you use?

- A. Roaming user profiles
- B. Folder Redirection
- C. The Microsoft SharePoint Migration Tool
- D. Enterprise State Roaming

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-faqs>

**NEW QUESTION 10**

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All users have computers that run Windows 10. The computers are joined to Azure AD and managed by using Microsoft Intune.

You need to ensure that you can centrally monitor the computers by using the Update Compliance solution.

What should you create in Intune?

- A. a device configuration profile
- B. a conditional access policy
- C. a device compliance policy
- D. an update policy

**Answer:** A

**Explanation:**

Reference:

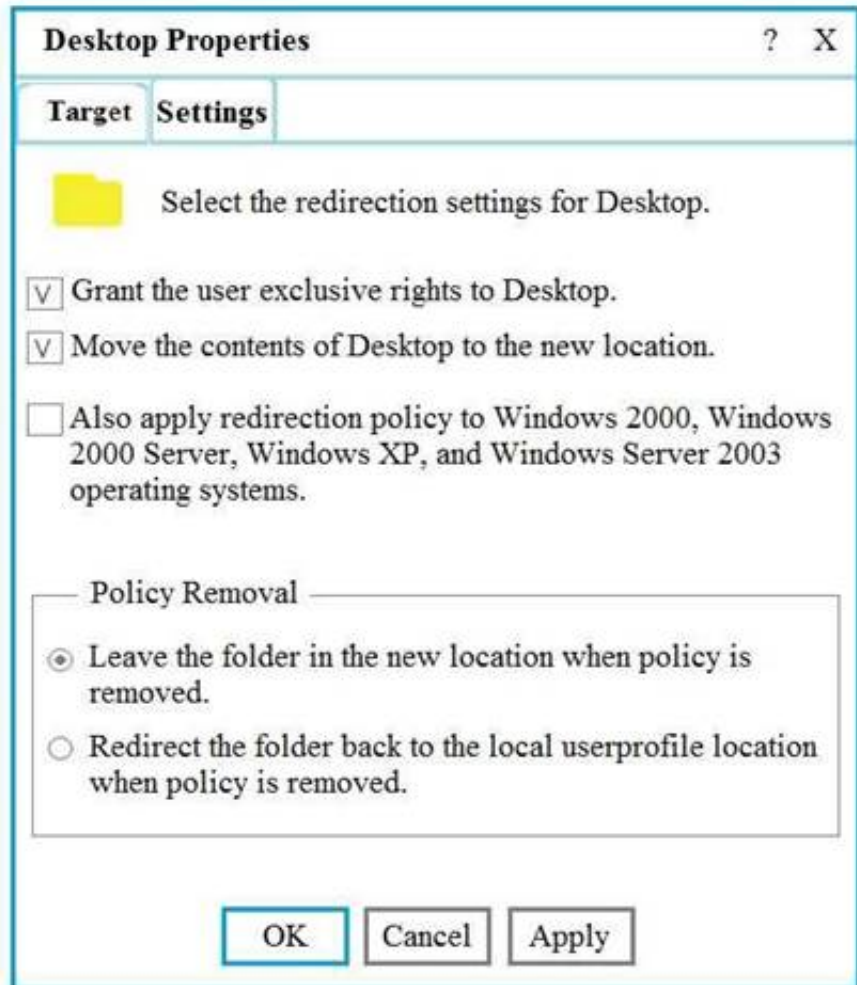

<https://www.jeffgilb.com/update-compliance-with-intune/>

**NEW QUESTION 10**

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10.

Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

**Answer: BC**

**Explanation:**

The OneDrive Known Folder Move Group Policy objects won't work if you previously used Windows Folder Redirection Group Policy objects to redirect the Documents, Pictures, or Desktop folders to a location other than OneDrive. Remove the Windows Group Policy objects for these folders before you enable the OneDrive Group Policy objects. The OneDrive Group Policy objects won't affect the Music and Videos folders, so you can keep them redirected with the Windows Group Policy objects. For info about Windows Folder Redirection, see [Deploy Folder Redirection with Offline Files](#)."

**NEW QUESTION 13**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains two users named User1 and User2. You need to ensure that the users can perform the following tasks:

- User1 must be able to create groups and manage users.
- User2 must be able to reset passwords for nonadministrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: User Administrator User admin

Assign the user admin role to users who you want to access and manage user password resets and manage users and groups. They can also open and manage support requests to Microsoft support.

Box 2: Helpdesk Administrator

Assign the Helpdesk admin role to users who want to reset passwords, force users to sign out for any security issues. They can also open and manage support requests to Microsoft support. The Helpdesk admin can only help non-admin users and users assigned these roles: Directory reader, Guest inviter, Helpdesk admin, Message center reader, and Reports reader.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/admin/add-users/admin-roles-page>

#### NEW QUESTION 18

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain. The domain is synced to Microsoft Azure Active Directory (Azure AD). You create an Azure Log Analytics workspace and deploy the Device Health solution. You need to enroll the computers in Windows Analytics. Which Group Policy setting should you configure?

- A. Specify intranet Microsoft update service location
- B. Allow Telemetry
- C. Configure the Commercial ID
- D. Connected User Experiences and Telemetry

**Answer: C**

#### Explanation:

Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-get-started>

#### NEW QUESTION 23

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the devices shown in the following table.

Name	Platform	(Azure Active Directory) Azure AD join type	Managed by using Microsoft Intune
Device1	Windows 10	Joined	Yes
Device2	Android	Registered	Yes
Device3	iOS	None	Yes
Device4	Windows 10	None	No
Device5	iPadOS	Registered	No

You need to assign app protection settings to the devices.

What is the minimum number of app protection policies required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

**Answer: B**

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies>

#### NEW QUESTION 27

- (Exam Topic 4)

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 500 laptops that run Windows 8.1 Professional. The users of the laptops work from home.

Your company uses Microsoft Intune, the Microsoft Deployment Toolkit (MDT), and Windows Configuration Designer to manage client computers.

The company purchases 500 licenses for Windows 10 Enterprise.

You verify that the hardware and applications on the laptops are compatible with Windows 10.

The users will bring their laptop to the office, where the IT department will deploy Windows 10 to the laptops while the users wait.

You need to recommend a deployment method for the laptops that will retain their installed applications. The solution must minimize how long it takes to perform the deployment.

What should you include in the recommendation?

- A. an in-place upgrade
- B. a clean installation by using a Windows Configuration Designer provisioning package
- C. Windows AutoPilot
- D. a clean installation and the User State Migration Tool (USMT)

**Answer: A**

#### Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios#in-place-upgrade>

#### NEW QUESTION 30

- (Exam Topic 4)

You have a server that runs the Microsoft Deployment Toolkit (MDT). You have computers that run Windows 8.1 or Windows 10.

You have a Microsoft 365 tenant. Microsoft 365 Enterprise E5 licenses are assigned to all users.

You need to recommend a strategy to install Windows 10 on the Windows 8.1 computers. The installation must retain the user files, settings, and supported applications. What should you recommend?

- A. Refresh the Window 8.1 computers by using Windows 10 and use the User State Migration Tool (USMT).
- B. Perform an in-place upgrade of Windows 8.1 to Windows 10.
- C. Refresh the Window 8.1 computers by using Windows 10 and use Windows Autopilot white glove service to finalize the installation.
- D. Refresh the Window 8.1 computers by using Windows 10 and use Windows Autopilot user-driven mode.

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-m365>

<https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-upgrade-paths>

**NEW QUESTION 35**

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.

From the Microsoft Endpoint Manager admin center, you plan to create a baseline to monitor the Startup score and the App reliability score of enrolled Windows 10 devices.

You need to identify which tool to use to create the baseline and the minimum number of devices required to create the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use:	<div><div></div><div>Workbooks</div><div>Log Analytics</div><div>Endpoint analytics</div><div>Security baselines</div></div>
Minimum number of devices:	<div><div></div><div>1</div><div>5</div><div>10</div><div>25</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/analytics/scores#understanding-scores>

**NEW QUESTION 36**

- (Exam Topic 4)

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain. You create a workspace in Microsoft Azure Log Analytics.

You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Azure service to provision:	<div><div></div><div>An Azure Storage account</div><div>Azure Cosmos DB</div><div>Azure SQL Database</div><div>Log Analytics</div></div>
Action to perform on the computers:	<div><div></div><div>Create a collector initiated subscription</div><div>Install the Microsoft Monitoring Agent</div><div>Enroll in Microsoft Intune</div><div>Register to Azure Active Directory (Azure AD)</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/agent-windows>

**NEW QUESTION 39**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Update for Business.

The research department has several computers that have specialized hardware and software installed. You need to prevent the video drivers from being updated automatically by using Windows Update.

Solution: From the Windows Update settings in a Group Policy object (GPO), you enable Do not include drivers with Windows Updates.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

References:

[https://www.stigviewer.com/stig/microsoft\\_windows\\_server\\_2012\\_member\\_server/2013-07-25/finding/WN12](https://www.stigviewer.com/stig/microsoft_windows_server_2012_member_server/2013-07-25/finding/WN12)

**NEW QUESTION 40**

- (Exam Topic 4)

You have a Microsoft 365 tenant.

You plan to enable Enterprise State Roaming.

Which three types of data will sync across devices? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. desktop theme settings
- B. internet passwords
- C. Microsoft Edge Chromium settings
- D. Microsoft Teams settings
- E. mouse settings

**Answer:** ABC

**NEW QUESTION 44**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You need to create a Conditional Access policy to ensure that when a user accesses the Microsoft 365 portal, the user will be prompted to sign in again after seven days.

What should you configure to specify the sign-in frequency?

- A. Session access controls
- B. an assignment that uses the Cloud apps or actions settings
- C. Grant access controls
- D. an assignment condition

**Answer:** A

**Explanation:**

Conditional Access: Session

Within a Conditional Access policy, an administrator can make use of session controls to enable limited experiences within specific cloud applications.

Sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource. Administrators can select a period of time (hours or days) or choose to require reauthentication every time.

Sign-in frequency setting works with apps that have implemented OAUTH2 or OIDC protocols according to the standards. Most Microsoft native apps for Windows, Mac, and Mobile including the following web applications follow the setting.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-session>

**NEW QUESTION 48**

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10. Computer1 was used by a user who left the company.

You plan to repurpose Computer1 and assign the computer to a new user. You need to redeploy Computer1 by using Windows AutoPilot.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Upload the file by using Microsoft Store for Business.

Upload the file by running azcopy.exe.

Generate a JSON file that contains the computer information.

Reset the computer.

Generate a CSV file that contains the computer information.

Answer Area

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>  
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 53

- (Exam Topic 4)  
You have a Microsoft 365 tenant.  
You have a Windows 10 update ring named Policy1 as shown in the following exhibit.

Basics

Name	Policy1
Description	--

Update ring settings

Update settings

Servicing channel	Semi-Annual Channel
Microsoft product updates	Allow
Windows drivers	Block
Quality update deferral period (days)	0
Feature update deferral period (days)	0
Set feature update uninstall period (2–60 days)	14

A Windows 10 Feature update deployment named Policy2 is configured as shown in the following exhibit.

Deployment settings

Name	Policy2
Description	--
Feature deployment settings	
Name	Windows 10 2004

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Windows 10 edition	Policy applied
Device1	Windows 10 Enterprise, version 20H2	Policy1
Device2	Windows 10 Pro, version 2004	Policy2
Device3	Windows 10 Enterprise, version 20H2	Policy2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Your Partner of IT Exam

visit - <https://www.exambible.com>

Statements	Yes	No
Device1 will install feature updates twice a year.	<input type="radio"/>	<input type="radio"/>
Device2 will install feature update 20H2.	<input type="radio"/>	<input type="radio"/>
Device3 will be downgraded to feature update 2004.	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-10-update-rings>

**NEW QUESTION 57**

- (Exam Topic 4)

You have the Microsoft Deployment Toolkit (MDT) installed. You install and customize Windows 10 on a reference computer. You need to capture an image of the reference computer and ensure that the image can be deployed to multiple computers. Which command should you run before you capture the image?

- A. dism  
B. wpeinit  
C. bcdedit  
D. sysprep

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/sysprep--system-preparation-- overview>

**NEW QUESTION 62**

- (Exam Topic 4)

You use Windows Admin Center to remotely administer computers that run Windows 10.

When connecting to Windows Admin Center, you receive the message shown in the following exhibit.

**This site is not secure**

This might mean that someone's trying to fool you or steal any info you send to the server. You should close this site immediately.

 Go to your Start page

Details

Your PC doesn't trust this website's security certificate.

Error Code: DLG\_FLAGS\_INVALID\_CA

**Go on to the webpage** (Not recommended)

You need to prevent the message from appearing when you connect to Windows Admin Center. To which certificate store should you import the certificate?

- A. Personal  
B. Trusted Root Certification Authorities  
C. Client Authentication Issuers

**Answer:** A

**Explanation:**

Reference:

<https://social.technet.microsoft.com/Forums/en-US/6b3abb8e-007e-4047-bd30-2946b9c3aaba/windows-admin-c>

**NEW QUESTION 63**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

A. Yes

B. No

**Answer: B****Explanation:**

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

References:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

**NEW QUESTION 65**

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the Windows 10 devices shown in the following table.

Name	Used by	Azure Active Directory (Azure AD) join type	Managed by using Microsoft Intune
Device1	User1	Joined	Yes
Device2	User1	Registered	Yes
Device3	User1	Joined	No

You enable Enterprise State Roaming

You need to ensure that User1 can sync Windows settings across the devices. What should you do?

A. Join Device2 to Azure AD.

B. Add a Microsoft account to each device.

C. Remove Device1 and Device2 from Intune.

D. Enroll Device3 in Intune.

**Answer: D****NEW QUESTION 66**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft Intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Android Enterprise system app

B. Android store app

C. Web link

D. Managed Google Play store app

E. Built-in Android app

**Answer: AD****NEW QUESTION 71**

- (Exam Topic 4)

You have computers that run Windows 8.1 or Windows 10. All the computers are enrolled in Microsoft Intune, Endpoint Configuration Manager, and Desktop Analytics. Co-management is enabled for your environment.

You plan to upgrade the Windows 8.1 computers to Windows 10.

You need to identify which Windows 8.1 computers do NOT have supported Windows 10 drivers.

What should you use?

A. the General Hardware Inventory report in Configuration Manager

B. the List of devices in a specific device category report in Configuration Manager

C. Deployment plans in Desktop Analytics

D. the Device compliance report in Intune

**Answer: C****Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/about-deployment-plans>

### NEW QUESTION 73

- (Exam Topic 4)

Your company uses Windows Defender Advanced Threat Protection (Windows Defender ATP). Windows Defender ATP includes the machine groups shown in the following table.

Rank	Name	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
5	Group5	Name starts with COMP
Last	Ungrouped machines (default)	Not applicable

You onboard a computer to Windows Defender ATP as shown in the following exhibit.

What is the effect of the Windows Defender ATP configuration? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Computer1 will be a member of:

▼

☐ Group3 only  
☐ Group4 only  
☐ Group5 only  
☐ Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

▼

☐ Group1 only  
☐ Group2 only  
☐ Group1 and Group2 only  
☐ Group1, Group2, Group3, Group4, and Group5

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Computer1 will be a member of:

▼

☐ Group3 only  
☐ Group4 only  
☒ Group5 only  
☐ Group3, Group4, and Group5 only

If you add the tag demo to Computer1, Computer1 will be a member of:

▼

☐ Group1 only  
☐ Group2 only  
☐ Group1 and Group2 only  
☒ Group1, Group2, Group3, Group4, and Group5

### NEW QUESTION 75

- (Exam Topic 4)

Your company plans to deploy Windows 10 to device that will be configured for English use and other devices that will be configured for Korean use.

You need to create a single multivariate provisioning for the planned for the planned devices. You create the provisioning package.

What should do you next to add the language settings to the package?

- A. Create a file named Language.XML that contains a header for Korean.
- B. Modify the .pkg file.
- C. Create a file named languages.xml that contains a header for English.

D. Modify the Customizations xmlfile

**Answer:** D

**Explanation:**

Follow these steps to create a provisioning package with multivariant capabilities.

- Build a provisioning package and configure the customizations you want to apply during certain conditions.
- After you've configured the settings, save the project.
- Open the project folder and copy the customizations.xml file to any local location.
- Use an XML or text editor to open the customizations.xml file.
- Edit the customizations.xml file to create a Targets section to describe the conditions that will handle your multivariant settings.
- In the customizations.xml file, create a Variant section for the settings you need to customize.
- Save the updated customizations.xml file and note the path to this updated file. You will need the path as one of the values for the next step.
- Use the Windows Configuration Designer command-line interface to create a provisioning package using the updated customizations.xml.

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-multivariant>

**NEW QUESTION 78**

- (Exam Topic 4)

You have a Microsoft 365 tenant named contoso.com that contains a group named ContosoUsers. All the users in contoso.com are members of ContosoUsers. You have two Windows 10 devices as shown in the following table.

Name	Join type	Mobile device management (MDM)
Computer1	Azure Active Directory (Azure AD) - registered	Microsoft Intune
Computer2	Azure Active Directory (Azure AD) – joined	Microsoft Intune

Both Computer1 and Computer2 contain two apps named App1 and App2.

You configure an app protection policy named AppPolicy1 that has the following settings:

- Protected apps: App1
- Assignments: ContosoUsers
- Enrollment state: Without enrollment
- Windows Information Protection mode: Block

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
On Computer2, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
Data created by App1 can be wiped selectively from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-information-protection-policy-create> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-selective-wipe>

**NEW QUESTION 82**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1. You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to C:\Folder1, and then you run the RegSvr32.exe Package1.ppkg command.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package>

**NEW QUESTION 86**

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. the Settings app
- B. Computer Management
- C. netdom.exe
- D. dsregcmd.exe

**Answer: D**

**Explanation:**

If you want to manually join the computer to Azure AD, you can execute the dsregcmd /join command. This command should be run in SYSTEM context (using psexec for example) and will force an attempt to Azure AD.

Reference: <https://365bythijs.be/2019/11/02/troubleshooting-hybrid-azure-ad-join/>

**NEW QUESTION 88**

- (Exam Topic 4)

You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. Unattend.xml
- B. Unattend.bat
- C. SetupConfig.ini
- D. LiteTouch.wsf

**Answer: C**

**Explanation:**

References:

<https://www.joseespitia.com/2017/06/01/how-to-run-a-post-script-after-a-windows-10-feature-upgrade/>

**NEW QUESTION 92**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 93**

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.

You are designing a reporting solution that will provide reports on the following:

- Compliance policy trends
- Trends in device and user enrolment
- App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data source:	<div><div></div><div>Audit logs in Azure Active Directory (Azure AD)</div><div>Audit logs in Microsoft Intune</div><div>Azure Synapse Analytics</div><div>The Microsoft Intune Data Warehouse</div></div>
Data visualization tool:	<div><div></div><div>Azure Data Studio</div><div>Microsoft Power BI</div><div>The Azure portal</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/developer/reports-nav-create-intune-reports> <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

**NEW QUESTION 97**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You start Computer1 from the Windows 10 installation media and use the Install option. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 102**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 10 Android Enterprise devices. Each device has a corporate-owned work profile and is enrolled in Microsoft Intune.

You need to configure the devices to run a single app in kiosk mode.

Which Configuration settings should you modify in the device restrictions profile?

- A. General
- B. Users and Accounts
- C. System security
- D. Device experience

**Answer:** D

**Explanation:**

Device experience

Use these settings to configure a kiosk-style experience on your dedicated devices, or to customize the home screen experiences on your fully managed devices.

You can configure devices to run one app, or run many apps. When a device is set with kiosk mode, only the apps you add are available.

Device experience, Enrollment profile type: Select an enrollment profile type to start configuring Microsoft Launcher or the Microsoft Managed Home Screen on your devices. Your options:

\* Dedicated device, Kiosk mode, Single App

\* etc.

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-android-for-work>

**NEW QUESTION 105**

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

➤ Ensure that any applications installed by the users are retained.

➤ Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment ToolKit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package
- D. Windows AutoPilot

**Answer:** C

**Explanation:**

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

**NEW QUESTION 109**

- (Exam Topic 4)

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager. You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Device profile type:

Administrative Templates
Device restrictions
Endpoint protection
PKCS certificate

Setting:

Apps from store only
Developer unlock
Enable Dynamic Virtualization
Trusted app installation

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-restrictions-windows-10>

**NEW QUESTION 111**

- (Exam Topic 4)

You install a feature update on a computer that runs Windows 10. How many days do you have to roll back the update?

- A. 5
- B. 10
- C. 14
- D. 30

**Answer:** B

**Explanation:**

Microsoft has changed the time period associated with operating system rollbacks with Windows 10 version 1607, decreasing it to 10 days. Previously, Windows 10 had a 30-day rollback period.

References:

<https://redmondmag.com/articles/2016/08/04/microsoft-shortens-windows-10-rollback-period.aspx>

**NEW QUESTION 114**

- (Exam Topic 4)

You have a Microsoft 365 E5 tenant that connects to Microsoft Defender for Endpoint. You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 8.1
Device3	iOS
Device4	Android

You plan to use risk levels in Microsoft Defender for Endpoint to identify whether a device is compliant.

Noncompliant devices must be blocked from accessing corporate resources.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint, and which Endpoint security policies must be configured.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can onboarded to Microsoft Defender for Endpoint:

Device 1 only

Device 1 and Device 2 only

Device 1 and Device 3 only

Device 1 and Device 4 only

Device 1, Device 2, and Device 4 only

Device 1, Device 2, Device 3, and Device 4

Endpoint security policies that must be configured:

A conditional access policy only

A device compliance policy only

A device configuration profile only

A device configuration profile and a conditional access policy only

Device configuration profile, device compliance policy, and conditional access policy

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Device 1, Device2, Device 3, and Device 4  
Supported Windows versions include Windows 8.1 and Windows 10 Other supported operating systems  
Android iOS Linux macOS  
Box 2: Device configuration profile, device compliance policy, and conditional access policy We need all three policies.  
Establish a service-to-service connection between Intune and Microsoft Defender for Endpoint. This connection lets Microsoft Defender for Endpoint collect data about machine risk from supported devices you manage with Intune.  
Use a device configuration profile to onboard devices with Microsoft Defender for Endpoint. You onboard devices to configure them to communicate with Microsoft Defender for Endpoint and to provide data that helps assess their risk level.  
Use a device compliance policy to set the level of risk you want to allow. Risk levels are reported by Microsoft Defender for Endpoint. Devices that exceed the allowed risk level are identified as noncompliant.  
Use a conditional access policy to block users from accessing corporate resources from devices that are noncompliant.  
Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/minimum-requirements> <https://docs.microsoft.com/en-us/mem/intune/protect/advanced-threat-protection#onboard-devices-by-using-a-c>

NEW QUESTION 119

- (Exam Topic 4)  
Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business. You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

Answer: AC

Explanation:

Reference:  
<https://community.windows.com/en-us/stories/windows-sign-in-options> <https://fossbytes.com/how-to-unlock-windows-10/>

NEW QUESTION 122

- (Exam Topic 4)  
Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD). There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune. You plan to implement Windows Defender Exploit Guard. You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

▼

Security & Compliance in Microsoft 365  
Windows Configuration Designer  
Windows Defender Security Center

Distribution method:

▼

An Azure policy  
A Group Policy object (GPO)  
An Intune device compliance policy

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

**NEW QUESTION 126**

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the groups shown in the following table.

Name	Description
Group1	Azure AD group that contains a user named User1
Group2	Azure AD group that contains iOS devices

You create a Conditional Access policy named CAPolicy1 that will block access to Microsoft Exchange Online from iOS devices. You assign CAPolicy1 to Group1. You discover that User1 can still connect to Exchange Online from an iOS device. You need to ensure that CAPolicy1 is enforced. What should you do?

- A. Configure a new terms of use (TOU).
- B. Assign CAPolicy1 to Group2.
- C. Enable CAPolicy1
- D. Add a condition in CAPolicy1 to filter for devices.

**Answer: B**

**Explanation:**

Common signals that Conditional Access can take in to account when making a policy decision include the following signals:

\* User or group membership

Policies can be targeted to specific users and groups giving administrators fine-grained control over access.

\* Device

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

Use filters for devices to target policies to specific devices like privileged access workstations.

\* Etc.

Reference: <https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/overview>

**NEW QUESTION 129**

- (Exam Topic 4)

You have computers that run Windows 10 and are joined to Azure Active Directory (Azure AD). All users sign in to the computers by using their Azure AD account. Enterprise State Roaming is enabled.

From the Settings app, a user named User1 adds a Microsoft account. Which account will be used for the Synchronizing Windows setting?

- A. the work account only
- B. the Microsoft account only
- C. both the Microsoft account and the work account

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-enable>

**NEW QUESTION 134**

- (Exam Topic 3)

Which user can enroll Device6 in Intune?

- A. User4 and User2 only

- B. User4 and User 1 only
- C. User1, User2, User3, and User4
- D. User4. User Land User2 only

Answer: B

NEW QUESTION 137

- (Exam Topic 3)  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Text Description automatically generated

NEW QUESTION 142

- (Exam Topic 3)  
You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements.  
To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: B

Explanation:  
  
Reference:  
<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 143

- (Exam Topic 2)  
You need a new conditional access policy that has an assignment for Office 365 Exchange Online. You need to configure the policy to meet the technical requirements for Group4.  
Which two settings should you configure in the policy? To answer, select the appropriate settings in the answer area.  
NOTE: Each correct selection is worth one point.

Include

Exclude

Select the device state condition used to exclude devices from policy.

☐ Device Hybrid Azure AD joined

☐ Device marked as compliant

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

The policy needs to be applied to Group4 so we need to configure Users and Groups. The Access controls are set to Block access

We therefore need to exclude compliant devices. From the scenario:

➤ Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.

Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview> <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions> <https://docs.microsoft.com/en-us/intune/device-compliance-get-started>

**NEW QUESTION 146**

- (Exam Topic 2)

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Specify ComputerName as:**

<input type="checkbox"/>
<input checked="" type="checkbox"/> "HR" + RAND(4)
<input checked="" type="checkbox"/> "HumanResources-" + RAND(????)
<input type="checkbox"/> HR-%RAND:4%
<input type="checkbox"/> HR-????
<input type="checkbox"/> HumanResources-%RAND:4%

**Specify AccountOU as:**

<input type="checkbox"/>
<input checked="" type="checkbox"/> CN=Computers, CN=HR, DC=Contoso, DC=com
<input checked="" type="checkbox"/> Computers/HumanResources/Contoso.com
<input type="checkbox"/> Contoso.com/HR/Computers
<input type="checkbox"/> OU=Computers, OU=HR, DC=Contoso, DC=com

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

**NEW QUESTION 147**

- (Exam Topic 2)

You need to meet the technical requirements for the IT department. What should you do first?

- A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
- B. From the Configuration Manager console, add an Intune subscription.
- C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
- D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients>

**NEW QUESTION 152**

- (Exam Topic 2)

You need to meet the technical requirements for the LEG department computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Configure the commercial ID on the LEG department computers.		
Create an Azure Machine Learning service workspace.		
Create an Azure Log Analytics workspace.		
Install the Microsoft Monitoring Agent on the LEG department computers.		
Add a solution to a workspace.		

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

**NEW QUESTION 153**

- (Exam Topic 1)

You need to capture the required information for the sales department computers to meet the technical requirements. Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune  
B. Install-Script Get-WindowsAutoPilotInfo  
C. Import-AutoPilotCSV  
D. Get-WindowsAutoPilotInfo

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

**NEW QUESTION 155**

- (Exam Topic 1)

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.  
B. The Accounts options in an endpoint protection profile.  
C. The Password Policy settings in a Group Policy object (GPO).  
D. A password policy from the Microsoft Office 365 portal.

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

**NEW QUESTION 159**

- (Exam Topic 1)

You need to meet the OOBЕ requirements for Windows AutoPilot.

Which two settings should you configure from the Azure Active Directory blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**NEW QUESTION 161**

- (Exam Topic 4)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
You have a Microsoft 365 subscription.  
You have 20 computers that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You plan to replace the computers with new computers that run Windows 10. The new computers will be joined to Azure AD.  
You need to ensure that the desktop background, the favorites, and the browsing history are available on the new computers.  
Solution: You configure roaming user profiles. Does this meet the goal?

- A. Yes
- B. No

Answer: B

**Explanation:**

References:  
<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/deploy-roaming-user-profiles>

**NEW QUESTION 163**

- (Exam Topic 4)  
You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant  
Compliance status validity period (days): 14  
On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- Name: Policy1
- Platform: Windows 10 and later
- Require BitLocker: Require
- Mark device noncompliant: 5 days after noncompliance
- Scope (Tags): Tag1
- Name: Policy2
- Platform: Windows 10 and later
- Firewall: Require
- Mark device noncompliant: Immediately
- Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: No.

Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No

For the same reason as Box1.

Box 3: Yes

Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.

The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

**NEW QUESTION 166**

- (Exam Topic 4)

You have 100 devices that run Windows 10 and are joined to Microsoft Azure Active Directory (Azure AD). You need to prevent users from joining their home computer to Azure AD.

What should you do?

- A. From the Device enrollment blade in the Intune admin center, modify the Enrollment restriction settings.
- B. From the Devices blade in the Azure Active Directory admin center, modify the Device settings.
- C. From the Device enrollment blade in the Intune admin center, modify the Device enrollment manages settings.
- D. From the Mobility (MDM and MAM) blade in the Azure Active Directory admin center, modify the Microsoft Intune enrollment settings.

**Answer:** B

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/enrollment-restrictions-set>

**NEW QUESTION 170**

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources. Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Settings

Require BitLocker.

Prevent jailbroken devices from having corporate access.

Prevent rooted devices from having corporate access.

Require Secure Boot to be enabled on the device.

Answer Area

Device1:

Setting

Device2:

Setting

Device3:

Setting

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:  
Device Compliance settings for Windows 10/11 in Intune  
There are the different compliance settings you can configure on Windows devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require BitLocker, set a minimum and maximum operating system, set a risk level using Microsoft Defender for Endpoint, and more.  
Note: Windows Health Attestation Service evaluation rules Require BitLocker:  
Windows BitLocker Drive Encryption encrypts all data stored on the Windows operating system volume. BitLocker uses the Trusted Platform Module (TPM) to help protect the Windows operating system and user data. It also helps confirm that a computer isn't tampered with, even if its left unattended, lost, or stolen. If the computer is equipped with a compatible TPM, BitLocker uses the TPM to lock the encryption keys that protect the data. As a result, the keys can't be accessed until the TPM verifies the state of the computer.  
Not configured (default) - This setting isn't evaluated for compliance or non-compliance.  
Require - The device can protect data that's stored on the drive from unauthorized access when the system is off, or hibernates.  
Box 2: Prevent jailbroken devices from having corporate access Device Compliance settings for iOS/iPadOS in Intune  
There are different compliance settings you can configure on iOS/iPadOS devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require an email, mark rooted (jailbroken) devices as not compliant, set an allowed threat level, set passwords to expire, and more.  
Device Health  
Jailbroken devices  
Supported for iOS 8.0 and later  
Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted (jailbroken) devices as not compliant.  
Box 3: Prevent rooted devices from having corporate access. Device compliance settings for Android Enterprise in Intune  
There are different compliance settings you can configure on Android Enterprise devices in Intune. As part of your mobile device management (MDM) solution, use these settings to mark rooted devices as not compliant, set an allowed threat level, enable Google Play Protect, and more.  
Device Health - for Personally-Owned Work Profile Rooted devices  
Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted devices as not compliant.  
Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-ios>

NEW QUESTION 175

- (Exam Topic 4)  
You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.  
You join a Windows 10 device named Client1 to contoso.com.  
You need to add User1 to the local Administrators group of Client1.  
How should you complete the command? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

net accounts

net localgroup

net user

Administrators /add "

AzureAD

CONTOSO

UPN

\user1@contoso.com"

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: net localgroup

Add user to group from command line (CMD)

Windows provides command line utilities to manage user groups. In this post, learn how to use the command net localgroup to add user to a group from command prompt

For example to add a user 'John' to administrators group, we can run the below command. net localgroup administrators John /add

Box 2: Contoso

The domain of the user is Contoso.

Reference: <https://www.windows-commandline.com/add-user-to-group-from-command-line/>

**NEW QUESTION 176**

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 8.1 Readiness scenario.

Does this meet the goal?

A. Yes

B. No

**Answer:** B

**NEW QUESTION 179**

- (Exam Topic 4)

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune.

Currently, Windows updates are downloaded without using Delivery Optimization. You need to configure the computers to use Delivery Optimization.

What should you create in Intune?

A. a device configuration profile

B. a device compliance policy

C. an app protection policy

D. a Windows 10 update ring

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/intune/delivery-optimization-windows>

**NEW QUESTION 183**

- (Exam Topic 4)

You have 100 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to configure the following device restrictions:

➤ Block users from browsing to suspicious websites.

➤ Scan all scripts loaded into Microsoft Edge.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**NEW QUESTION 185**

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains 5,000 computers that run Windows 10.

All users use Roaming User Profiles.

Some users report that it takes a long time to sign in to the computers. You discover that the users have user profiles that are larger than 1 GB. You need to reduce the amount of time it takes for the users to sign in. What should you configure?

- A. Delivery Optimization in the Settings app
- B. Folder Redirection by using a Group Policy Object (GPO)
- C. Microsoft User Experience Virtualization (UE-V) by using PowerShell
- D. Sync your settings in the Settings app

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/ue-v/uev-for-windows>

**NEW QUESTION 186**

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain and an Azure Active Directory (Azure AD) tenant. The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

You need to migrate the existing Default Domain Policy GPO to a device configuration profile. Which type of device configuration profile should you create?

- A. Administrative Templates
- B. Endpoint protection
- C. Custom
- D. Device restrictions

**Answer:** C

**Explanation:**

Reference:

<https://danielchronlund.com/2018/11/27/how-to-replace-your-old-gpos-with-intune-configuration-profiles/>

**NEW QUESTION 187**

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the users shown in the following table.

Name	UPN	Member of
User1	User1@contoso.com	Group1
User2	User2@contoso.com	None

You have Windows 10 devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Enrolled by UPN	Active hours
Device1	Personal	User1@contoso.com	10 AM to 6 PM
Device2	Corporate	User2@contoso.com	9 AM to 5 PM
Device3	Corporate	User1@contoso.com	10 AM to 6 PM

You create a Windows 10 update ring that has the following settings:

> Basics:

- Name: Ring1

> Update ring settings:

- Active hours start: 8 AM

- Active hours end: 8 PM

> Assignments:

- Included Groups: All devices

- Excluded Groups: Group1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The active hours of Device1 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device2 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device3 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-10-update-rings>

**NEW QUESTION 192**

- (Exam Topic 4)

Your company has a Microsoft 365 subscription.

The company uses Microsoft Intune to manage all devices.

The company uses conditional access to restrict access to Microsoft 365 services for devices that do not comply with the company's security policies.

You need to identify which devices will be prevented from accessing Microsoft 365 services. What should you use?

A. The Device Health solution in Windows Analytics.

B. Windows Defender Security Center.

C. The Device compliance blade in the Intune admin center.

D. The Conditional access blade in the Azure Active Directory admin center.

**Answer: C**

**NEW QUESTION 193**

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.azure.com> and use the Windows enrollment blade. Does this meet the goal?

A. Yes

B. No

**Answer: B**

**Explanation:**

Use MDM enrolment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

#### NEW QUESTION 196

- (Exam Topic 4)

Your on-premises network contains a database server and is accessible by using a VPN server. You have a Microsoft 365 tenant.

You manage devices by using Microsoft Endpoint Manager.

You have an application named App1 that is deployed to every computer enrolled in Microsoft Intune. Each computer has a VPN profile assigned.

You need to ensure that App1 can access only the database server. App1 must be prevented from accessing other resources on the on-premises network.

What should you modify in the VPN profile?

- A. Proxy
- B. Network traffic rules
- C. DNS Settings
- D. Conditional Access

**Answer: B**

#### Explanation:

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources. For each rule, you can specify source and destination, port, and protocol.

A network security group contains zero, or as many rules as desired, within Azure subscription limits. Reference: <https://docs.microsoft.com/en-us/azure/virtual-network/network-security-groups-overview>

#### NEW QUESTION 198

- (Exam Topic 4)

You have the devices shown in the following table.

Name	Operating system
Device1	Windows 10 Enterprise
Device2	Windows 8.1 Pro
Device3	Android 9.03
Device4	iOS

You plan to implement Desktop Analytics.

You need to identify which devices support the following:

- > Compatibility insights
- > App usage insights

Which devices should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Compatibility insights:

Device1 only  
Device1 and Device2 only  
Device3 and Device4 only  
Device1, Device2, Device3, and Device4

App usage insights:

Device1 only  
Device1 and Device2 only  
Device3 and Device4 only  
Device1, Device2, Device3, and Device4

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/compat-assessment><https://docs.microsoft.com/en-us/updates/application-insights-adds-support-for-ios-and-android-apps-improved>

#### NEW QUESTION 202

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From the Settings app on Computer1, you use the Connect to work or school account settings. Does this meet the goal?

- A. Yes

B. No

Answer: B

Explanation:

Use MDM enrolment.  
MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.  
References:  
<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 207

- (Exam Topic 4)  
You network contains an Active Directory domain. The domain contains 200 computers that run Windows 8.1. You have a Microsoft Azure subscription.  
You plan to upgrade the computers to Windows 10.  
You need to generate an Upgrade Readiness report for the computers.  
What should you do? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

In Azure:

Create a migration project and discover machines.

Create an Azure Log Analytics workspace and add a solution.

Choose the MDM authority and configure Windows enrollment.

On the computers:

Configure the commercial ID.

Enroll in the Windows Insider Program.

Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

In Azure:

Create a migration project and discover machines.

Create an Azure Log Analytics workspace and add a solution.

Choose the MDM authority and configure Windows enrollment.

On the computers:

Configure the commercial ID.

Enroll in the Windows Insider Program.

Install the Microsoft Monitoring Agent.

NEW QUESTION 208

- (Exam Topic 4)  
You have a Microsoft 365 tenant that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	macOS

In Endpoint security, you need to configure a disk encryption policy for each device.  
Which encryption type should you use for each device, and which role-based access control (RBAQ role in Intune should you use to manage the encryption keys?  
To answer, select the appropriate options m the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

Device1:

FileVault  
Cryptsetup  
Encrypting File System (EFS)  
BitLocker Drive Encryption (BitLocker)

Device2:

FileVault  
Cryptsetup  
Encrypting File System (EFS)  
BitLocker Drive Encryption (BitLocker)

RBAC role:

Help Desk Operator  
Application Manager  
Intune Role Administrator  
Policy and Profile Manager

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Graphical user interface, text, application Description automatically generated
