NEW QUESTION 3
- (Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company has a Microsoft 365 subscription that uses an Azure Active Directory (Azure AD) tenant named contoso.com.
You need to prevent guest users in the tenant from using cameras during Microsoft Teams meetings.
Solution: From the Microsoft 365 admin center, you modify the Sharing settings. Does this meet the goal?

A. Yes
B. No

Answer: B

NEW QUESTION 4
- (Topic 5)
Your company has a Microsoft 365 subscription.
You need to prevent users from using Microsoft Teams to communicate with users in a partner company that uses an email domain named litewareinc.com.
What should you do from the Microsoft Teams admin center?

A. Turn off guest access.
B. Create a new messaging policy.
C. Modify the External access settings.
D. Create a new meeting policy.

Answer: C

NEW QUESTION 5
- (Topic 5)
Your company has a Microsoft subscription.
The Microsoft 365 tenant uses a domain named contoso.com.
You need to ensure that team channels can receive email only from users in the company
and email addresses that use an email domain named @fabrikam.com. What should you modify?

A. the External collaboration settings in the Azure Active Directory admin center
B. the list of accepted domains in Microsoft Exchange Online
C. the org-wide Teams settings
D. the global teams policy

Answer: C

NEW QUESTION 6
- (Topic 5)
You have a Microsoft 365 E3 subscription that contains 500 users. All the users have computers that run Windows 10 and are joined to Azure AD.
You need to generate a report that identifies which documents the users copied from Microsoft Teams to USB devices.
What should you do first?

A. Onboard the Windows 10 computers to Endpoint data loss prevention (Endpoint DLP).
B. Assign the Microsoft 365 ES compliance add-on to each user.
C. Create a custom data loss prevention (DLP) policy.
D. Assign the Enterprise Mobility + Security ES add-on to each user.

Answer: B

Explanation:
According to the Microsoft documentation1, to generate a report that identifies which documents the users copied from Teams to USB devices, you need to use advanced hunting on Microsoft Defender ATP. Advanced hunting lets you run queries to find threat activity involving USB devices, such as mounting and unmounting of USB drives or copying of files2.
To use advanced hunting, you need to have one of the following roles:
? Security administrator
? Security reader
? Security operator
? Global administrator
The Groups Administrator role does not have access to advanced hunting or Microsoft Defender ATP.
Therefore, based on this information, the correct answer is B. Assign the Microsoft 365 E5 compliance add-on to each user. This add-on includes Microsoft Defender ATP and allows you to use advanced hunting features3. Alternatively, you can request one of the roles that have access to advanced hunting, such as Security administrator or Global administrator.

NEW QUESTION 7
- (Topic 5)
The Subscription has the Teams policy shown in the following exhibit:

You need to ensure that the members of Group1 can create private channels. The solution must use the principle of least privilege.
What should you do first?

A. Create a team template.
B. Modify the Teams settings for the subscription.
C. Modify the Global (Org-wide default) policy and set Create private channels to On.
D. Create a Teams policy that has Create private channels set to On.

Answer: D

NEW QUESTION 8
- (Topic 5)
You have a Microsoft 365 E5 subscription that uses Microsoft Teams.
Users report that their presence information is available to external partners.
You need to ensure that the presence information is available only to the external partners on the users' contact lists.
What should you do?

A. From PowerShell, run Set-CsPrivacyConfiguration -EnablePrivacyMode Strue.
B. From External collaboration settings in the Azure Active Directory admin center, configure Guest user access restrictions.
C. From PowerShell, run Set-CsTenantFederationConfiguration AllowFederatedUsers$false.
D. From the Microsoft Teams admin center, add the external partners to the Allow only specific external domains list.

Answer: A

NEW QUESTION 9
- (Topic 5)
You plan to implement Microsoft Teams for 300 users.
For the first stage of the deployment, you will enable the following features:
• Audio
• Video
• Screen sharing
Users will be prevented from using the following features:
• File sharing
• PSTN calling
• Conference audio
• Conference video
• Conference screen sharing
You need to calculate how much network bandwidth is required for the first-stage deployment. What should you use?

A. Network Assessment Tool
B. Advisor for Teams

C. Bandwidth Utilization Analyzer
D. Network Planner

Answer: D

Explanation:
According to the Microsoft documentation1, you can use Network Planner in the Microsoft Teams admin center to calculate how much network bandwidth is required for your Teams deployment. Network Planner helps you determine and organize network requirements for connecting your organization to Teams. You can use Network Planner to:
? Input your organization's information, such as the number of users, sites, and
expected call and meeting scenarios.
? Get a report that tells you if your network can support Teams.
? Get a report that tells you what network hardware you need to support Teams. To use Network Planner, you need to follow these steps1:
? In the left navigation of the Microsoft Teams admin center, go to Org-wide settings
> Network planner.
? Under Overview, click Download the Network Planner Excel template.
? Open the template and enter information about your organization's sites, users, and expected call and meeting scenarios.
? Save the template and then upload it in Network Planner.
? Under Calculated results, view the reports that show you the estimated network requirements for Teams.

NEW QUESTION 43
- (Topic 5)
You have a Microsoft 365 subscription that uses Microsoft Teams.
You feed 10 identify which teams were inactive during the past 90 days. What should you use?

A. Teams advisor
B. the Office 365 Groups activity report
C. the Teams user activity report
D. the Teams usage report

Answer: D

Explanation:
According to the Microsoft documentation1, you can use the Teams usage report in the Microsoft Teams admin center to get an overview of the usage activity in Teams. This includes the number of active users, channels, guests, and post messages via chat and conversations to know how many users in each team are actively using Teams to communicate and collaborate. However, this report only shows the last 7 or 28 days of activity of teams, which may not be enough to identify inactive teams over a longer period. Alternatively, you can use PowerShell scripts to generate activity reports that check the audit records of inactive teams and provide an HTML report file based on SharePoint site activity in the group's document library in the past 90 days and conversations that occurred in the mailbox in the past year2. However, this method requires writing complex and time- consuming PowerShell commands, which may not be feasible for administrators who need to produce multiple reports on a daily basis.
Another method to detect inactive teams in your Teams environment is by setting an expiration policy for the associated group in Azure AD. This notifies the owner of the team or group by sending an email to renew or delete the team after specified days if no activity is detected3. However, this method also has some drawbacks, such as:
? The owner may fail to notice the email or renew the team within the timeline of the
configured policy, resulting in the team being deleted automatically and not being restorable after 30 days.
? The expiration policy applies to all Microsoft 365 groups in an Azure AD
organization, not just Teams. This may affect other groups that are not related to Teams.
? The expiration policy requires Azure AD Premium licenses for the members of all

groups to which the policy is applied.

Therefore, based on this information, the correct answer is D. the Teams usage report. This report is the most straightforward and accessible way to find inactive teams in Microsoft Teams, even though it has some limitations. The other options are either not related to finding inactive teams (Teams advisor) or require additional licenses or permissions (the Office 365 Groups activity report and the Teams user activity report).

NEW QUESTION 46
HOTSPOT - (Topic 5)
You have a Microsoft 365 subscription that uses Microsoft Teams. You need to meet the following requirements:

You need to prevent incoming Teams call notifications when users are already on a Teams call or in a Teams meeting. The solution must NOT reject the call.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
To prevent incoming Teams call notifications when users are already on a Teams call or in a Teams meeting, you can use the Teams admin center to enable the Mute notifications during meetings and calls option. This option will suppress the incoming call notifications without rejecting the call. The caller will still hear the ringing tone and the callee can still answer the call from the Teams app or the taskbar. Here are the steps to enable this option:
? Sign in to the Teams admin center with your Microsoft 365 username and
password1.
? In the left navigation, go to Teams > Teams update policies.
? Select an existing policy or create a new one by clicking Add.
? In the Update policy pane, under Meetings and calls, turn on the toggle for Mute notifications during meetings and calls.
? Click Save and then Close.
Note: You can assign different update policies to different users or groups of users. For more information, see Manage update policies in Microsoft Teams2.

You need to acquire a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
To acquire a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada, you need to use the Teams admin center to request and assign a service number. A service number is a type of phone number that can handle hundreds of simultaneous calls and is used for services such as audio conferencing, auto attendants, and call queues. Here are the steps to follow:
? Sign in to the Teams admin center with your Microsoft 365 username and
password1.
? In the left navigation, go to Voice > Phone numbers.
? Click Add (+) and then select New service numbers.
? In the New service numbers pane, select the country or region as Canada, the number type as Toll or Toll-free, and the location as Manitoba (for 431 area code) or Ontario (for 343 area code).
? Enter the quantity of numbers that you need and then click Next.
? Review your order details and then click Submit request.
? Wait for an email confirmation that your request has been processed. This may
take up to 24 hours.
? After you receive the confirmation email, go back to the Teams admin center and click Refresh on the Phone numbers page. You should see the new service numbers that you requested.
? To assign a service number to your audio conferencing bridge, go to Meetings > Conference bridges and then click Edit next to Default toll or toll-free number.
? In the Edit default toll or toll-free number pane, select one of the new service numbers that you acquired from the drop-down menu and then click Apply.
Now, you have acquired and assigned a dedicated Microsoft dial-in bridge number from either 431 or 343 area codes in Canada.

You need to add the following disclaimer as pan of all Teams meeting invites: "Disc aimer: This meeting may be recorded for quality and training purposes."

A. Mastered
B. Not Mastered

Answer: A

Explanation:
To add a disclaimer to all Teams meeting invites, you can use the Exchange admin center to create a mail flow rule that applies the disclaimer to meeting requests. Here are the steps to follow:
? Sign in to the Exchange admin center with your Microsoft 365 username and
password1.
? In the left navigation, go to Mail flow > Rules.
? Click Add (+) and then select Create a new rule.
? In the New rule pane, enter a name for the rule, such as "Meeting disclaimer".
? Under Apply this rule if, select A message header includes any of these words.
? In the Specify header name box, enter X-MS-Exchange-Calendar-Meeting- Request. This is a special header that identifies meeting requests2.
? In the Specify words or phrases box, enter True. This means that the rule will apply to any message that has the header set to True.
? Click Add and then OK.
? Under Do the following, select Append the disclaimer.
? In the Specify disclaimer text box, enter the disclaimer text that you want to add to the meeting invites, such as:
Disclaimer: This meeting may be recorded for quality and training purposes.
? Click Enter text and then OK.
? Under Choose a mode for this rule, select Enforce.

? Click Save.
Now, when you or anyone in your organization schedules a Teams meeting, the disclaimer will be added to the meeting invites automatically.

NEW QUESTION 157
- (Topic 5)
Your company uses Microsoft Teams and a Microsoft calling plan. The company has a main office in Chicago.
The company opens a new office in Toronto that has 500 users.

You need to ensure that the correct address is available to emergency responders. What should you do?

A. Create a calling policy and assign the policy to each user.
B. Create a configuration profile and assign the profile to the device of each user.
C. Add an emergency address, and then modify the outbound calling setting for each user.
D. Add an emergency address, and then modify the location for each phone number.

Answer: D

Explanation:
According to the Microsoft documentation1, you need to add an emergency address for each location where your users make and receive phone calls. An emergency address is a civic address—the physical or street address of a place of business for your organization. It is used to route emergency calls to the appropriate dispatch authorities and to assist in locating the emergency caller.
After you add an emergency address, you need to assign a phone number to it. You can assign either a user number or a service number. A user number is assigned to a specific user in your organization who makes and receives phone calls. A service number is used for services such as Audio Conferencing (for dial-in numbers), auto attendants, or call queues.
To assign a phone number to an emergency address, you need to modify the location for each phone number. You can do this by using the Microsoft Teams admin center or PowerShell. For example, to modify the location for a user number by using PowerShell, you can use the Set-CsOnlineVoiceUser cmdlet with the -LocationID parameter2.

NEW QUESTION 257
- (Topic 5)
Your company uses Teams Calling Plans.
When a user places a Teams call to an ambulance service, you need to ensure that a notification is also sent to the main receptionist of the company.
What should you configure?

A. a voice routing policy
B. an emergency calling policy
C. a calling policy
D. a caller ID policy

Answer: B

Explanation:
 you should configure an emergency calling policy to define what happens when a Teams user in your organization makes an emergency call. You can set who to notify and how they are notified when a user who is assigned the policy calls emergency services. For example, you can configure policy settings to automatically notify your organization's main receptionist and have them listen in emergency calls.
To create a custom emergency calling policy, you can follow these steps1:
? In the left navigation of the Microsoft Teams admin center, go to Voice > Emergency policies, and then click the Calling policies tab.
? Click Add.
? Enter a name and description for the policy.
? Set how you want to notify people in your organization, typically the main receptionist, when an emergency call is made. To do this, under Notification mode, select one of the following:
? Set the Emergency service disclaimer to show a banner to remind your end users to confirm their emergency location.
