

## MS-102 Dumps

### Microsoft 365 Administrator Exam

<https://www.certleader.com/MS-102-dumps.html>

**NEW QUESTION 1**

- (Exam Topic 1)

On which server should you use the Defender for identity sensor?

- A. Server1
- B. Server2
- C. Server3
- D. Server4
- E. Servers5

**Answer:** A

**Explanation:**

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.

**NEW QUESTION 2**

- (Exam Topic 1)

You need to ensure that User1 can enroll the devices to meet the technical requirements. What should you do?

- A. From the Azure Active Directory admin center, assign User1 the Cloud device administrator role.
- B. From the Azure Active Directory admin center, configure the Maximum number of devices per user setting.
- C. From the Intune admin center, add User1 as a device enrollment manager.
- D. From the Intune admin center, configure the Enrollment restrictions.

**Answer:** C

**Explanation:**

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

**NEW QUESTION 3**

- (Exam Topic 1)

As of March, how long will the computers in each office remain supported by Microsoft? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Seattle:

|                          |           |
|--------------------------|-----------|
| <input type="checkbox"/> | 6 months  |
| <input type="checkbox"/> | 18 months |
| <input type="checkbox"/> | 24 months |
| <input type="checkbox"/> | 30 months |
| <input type="checkbox"/> | 5 years   |

New York:

|                          |           |
|--------------------------|-----------|
| <input type="checkbox"/> | 6 months  |
| <input type="checkbox"/> | 18 months |
| <input type="checkbox"/> | 24 months |
| <input type="checkbox"/> | 30 months |
| <input type="checkbox"/> | 5 years   |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

<https://support.microsoft.com/en-gb/help/13853/windows-lifecycle-fact-sheet> March Feature Updates: Serviced for 18 months from release date September Feature Updates: Serviced for 30 months from release date

References:

<https://www.windowscentral.com/whats-difference-between-quality-updates-and-feature-updates-windows-10>

**NEW QUESTION 4**

- (Exam Topic 1)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure a pilot for co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager. Solution: Define a Configuration Manager device collection as the pilot collection. Add Device1 to the

collection.  
Does this meet the goal?

- A. Yes
- B. NO

**Answer:** A

**Explanation:**

Device1 has the Configuration Manager client installed so you can manage Device1 by using Configuration Manager. To manage Device1 by using Microsoft Intune, the device has to be enrolled in Microsoft Intune. In the Co-management Pilot configuration, you configure a Configuration Manager Device Collection that determines which devices are auto-enrolled in Microsoft Intune. You need to add Device1 to the Device Collection so that it auto-enrolls in Microsoft Intune. You will then be able to manage Device1 using Microsoft Intune. Reference: <https://docs.microsoft.com/en-us/configmgr/comanage/how-to-enable>

**NEW QUESTION 5**

- (Exam Topic 1)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure a pilot for co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager. Solution: You create a device configuration profile from the Device Management admin center.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

It looks like the given answer is correct. There is an on-premises Active Directory synced to Azure Active Directory (Azure AD) So the co-management path1 - Auto-enroll existing clients 1. Hybrid Azure AD 2. Client agent setting for hybrid Azure AD-join 3. Configure auto-enrollment of devices to Intune 4. Enable co-management in Configuration Manager

<https://docs.microsoft.com/en-us/mem/configmgr/comanage/tutorial-co-manage-client>

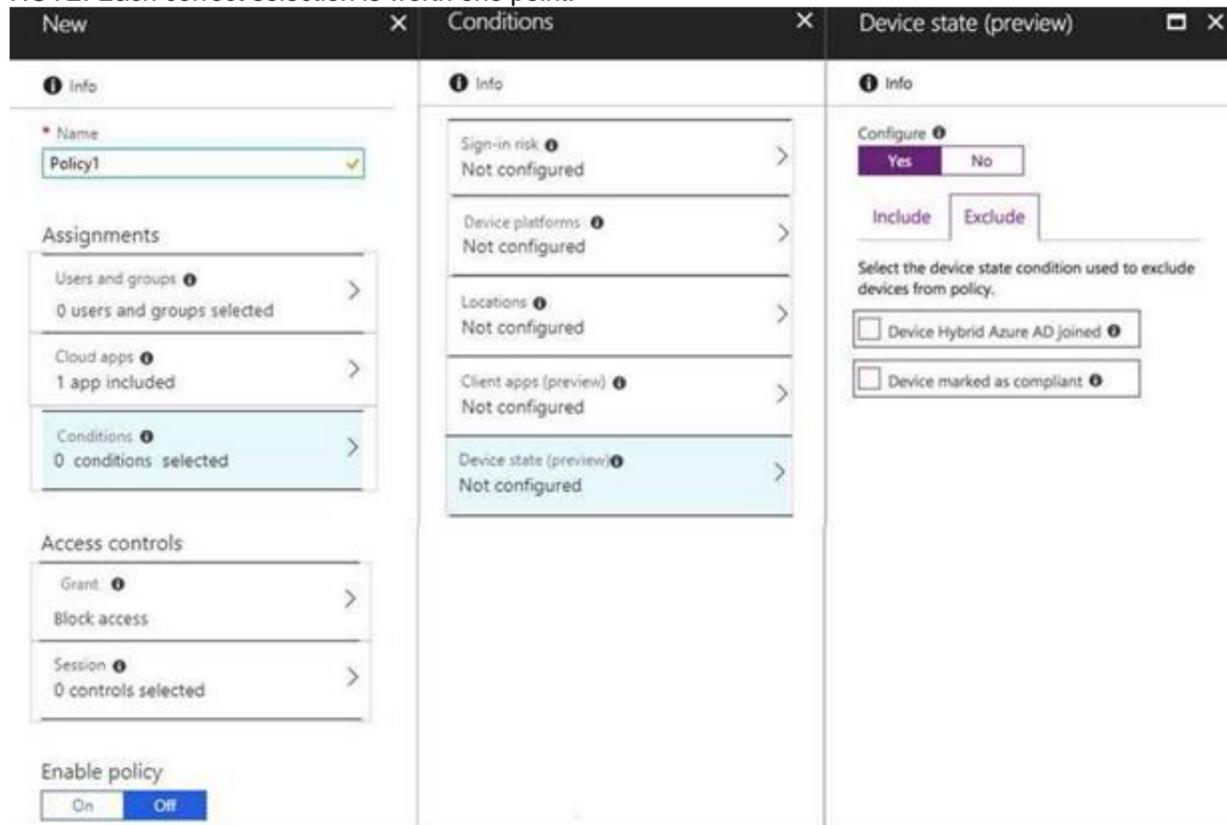

**NEW QUESTION 6**

- (Exam Topic 1)

You need to configure a conditional access policy to meet the compliance requirements. You add Exchange Online as a cloud app.

Which two additional settings should you configure in Policy1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Suggested Answer

References:<https://docs.microsoft.com/en-us/intune/create-conditional-access-intune>

**NEW QUESTION 7**

- (Exam Topic 2)

You need to protect the U.S. PII data to meet the technical requirements. What should you create?

- A. a data loss prevention (DLP) policy that contains a domain exception
- B. a Security & Compliance retention policy that detects content containing sensitive data
- C. a Security & Compliance alert policy that contains an activity
- D. a data loss prevention (DLP) policy that contains a user override

**Answer:** A

**NEW QUESTION 8**

- (Exam Topic 2)

You need to meet the technical requirement for the SharePoint administrator. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

From the Security & Compliance admin center, perform a search by using:

|                        |
|------------------------|
| ▼                      |
| Audit log              |
| Data governance events |
| DLP policy matches     |
| eDiscovery             |

Filter by:

|            |
|------------|
| ▼          |
| Activity   |
| Detail     |
| Item       |
| User agent |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance>

**NEW QUESTION 9**

- (Exam Topic 2)

You need to meet the technical requirement for large-volume document retrieval. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. an alert policy from the Security & Compliance admin center
- C. a file policy from Microsoft Cloud App Security
- D. an activity policy from Microsoft Cloud App Security

**Answer:** D

**Explanation:**

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/activity-policies-and-alerts>

**NEW QUESTION 10**

- (Exam Topic 3)

You create the planned DLP policies.

You need to configure notifications to meet the technical requirements. What should you do?

- A. From the Microsoft 365 security center, configure an alert policy.
- B. From the Microsoft Endpoint Manager admin center, configure a custom notification.
- C. From the Microsoft 365 admin center, configure a Briefing email.
- D. From the Microsoft 365 compliance center, configure the Endpoint DLP settings.

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-configure-view-alerts-policies?view=o365-worl>

**NEW QUESTION 10**

- (Exam Topic 3)

You need to create the Safe Attachments policy to meet the technical requirements. Which option should you select?

- A. Replace

- B. Enable redirect
- C. Block
- D. Dynamic Delivery

**Answer:** D

**Explanation:**

Reference:

<https://github.com/MicrosoftDocs/microsoft-365-docs/blob/public/microsoft-365/security/office-365-security/sa>

**NEW QUESTION 12**

- (Exam Topic 3)

You plan to implement the endpoint protection device configuration profiles to support the planned changes. You need to identify which devices will be supported, and how many profiles you should implement.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Supported devices:

|   |
|---|
| ▼   |
| Device1 only                                    |
| Device1 and Device2 only                        |
| Device1 and Device3 only                        |
| Device1, Device2, and Device3                   |
| Device1, Device4, and Device5                   |
| Device1, Device2, Device3, Device4, and Device5 |

Number of required profiles:

|   |
|---|
| ▼ |
| 1 |
| 2 |
| 3 |
| 4 |
| 5 |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

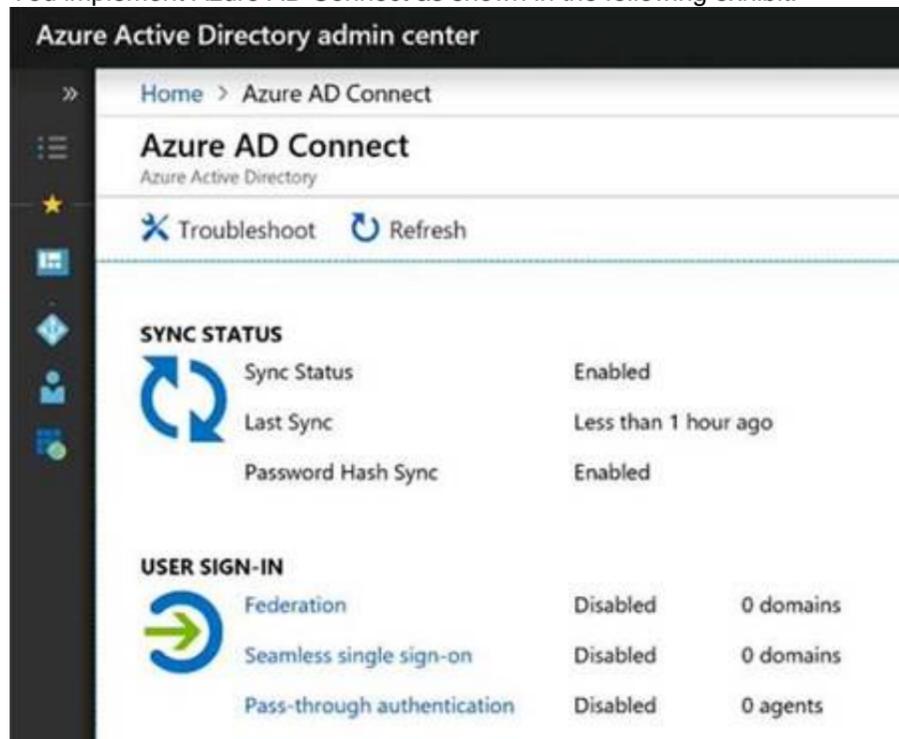

**NEW QUESTION 15**

- (Exam Topic 4)

HOTSPOT

You create the Microsoft 365 tenant.

You implement Azure AD Connect as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer Area**

During Project1, sales department users can access [answer choice] applications by using SSO.

|                                  |
|----------------------------------|
| ▼                                |
| both on-premises and cloud-based |
| only cloud-based                 |
| only on-premises                 |

If Active Directory becomes unavailable during Project1, sales department users can access the resources [answer choice].

|                                   |
|-----------------------------------|
| ▼                                 |
| both on-premises and in the cloud |
| in the cloud only                 |
| on-premises only                  |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: only on-premises

In the exhibit, seamless single sign-on (SSO) is disabled. Therefore, as SSO is disabled in the cloud, the Sales department users can access only on-premises applications by using SSO.

In the exhibit, directory synchronization is enabled and active. This means that the on-premises Active Directory user accounts are synchronized to Azure Active Directory user accounts. If the on-premises Active Directory becomes unavailable, the users can access resources in the cloud by authenticating to Azure Active Directory. They will not be able to access resources on-premises if the on-premises Active Directory becomes unavailable as they will not be able to authenticate to the on-premises Active Directory.

Box 2: in the cloud only

**NEW QUESTION 18**

- (Exam Topic 4)

Which role should you assign to User1?

Available Choices (select all choices that are correct)

- A. Hygiene Management
- B. Security Reader
- C. Security Administrator
- D. Records Management

**Answer:** B

**Explanation:**

A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.

Users with the Security Reader role have global read-only access on security-related features, including all information in Microsoft 365 security center, Azure Active Directory, Identity Protection, Privileged Identity Management, as well as the ability to read Azure Active Directory sign-in reports and audit logs, and in Office 365 Security & Compliance Center.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles>

**NEW QUESTION 20**

- (Exam Topic 5)

You have a new Microsoft 365 E5 tenant.

You need to enable an alert policy that will be triggered when an elevation of Microsoft Exchange Online administrative privileges is detected.

What should you do first?

- A. Enable auditing.
- B. Enable Microsoft 365 usage analytics.
- C. Create an Insider risk management policy.
- D. Create a communication compliance policy.

**Answer:** A

**Explanation:**

Microsoft Purview auditing solutions provide an integrated solution to help organizations effectively respond to security events, forensic investigations, internal investigations, and compliance obligations. Thousands of user and admin operations performed in dozens of Microsoft 365 services and solutions are captured, recorded, and retained in your organization's unified audit log. Audit records for these events are searchable by security ops, IT admins, insider risk teams, and compliance and legal investigators in your organization. This capability provides visibility into the activities performed across your Microsoft 365 organization.

Note: Permissions alert policies

Example: Elevation of Exchange admin privilege

Generates an alert when someone is assigned administrative permissions in your Exchange Online organization. For example, when a user is added to the Organization Management role group in Exchange Online.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/audit-solutions-overview> <https://learn.microsoft.com/en-us/microsoft-365/compliance/alert-policies>

**NEW QUESTION 22**

- (Exam Topic 5)

Your network contains an Active Directory forest named contoso.local.

You purchase a Microsoft 365 subscription.

You plan to move to Microsoft 365 and to implement a hybrid deployment solution for the next 12 months. You need to prepare for the planned move to Microsoft

365.

What is the best action to perform before you implement directory synchronization? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Purchase a third-party X.509 certificate.
- B. Create an external forest trust.
- C. Rename the Active Directory forest.
- D. Purchase a custom domain name.

**Answer: D**

**Explanation:**

The first thing you need to do before you implement directory synchronization is to purchase a custom domain name. This could be the domain name that you use in your on-premise Active Directory if it's a routable domain name, for example, contoso.com.

If you use a non-routable domain name in your Active Directory, for example contoso.local, you'll need to add the routable domain name as a UPN suffix in Active Directory.

Incorrect:

Not C: No need to rename the Active Directory forest. As we use a non-routable domain name contoso.local, we just need to add the routable domain name as a UPN suffix in Active Directory.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/set-up-directory-synchronization>

**NEW QUESTION 25**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. You deploy an Azure AD tenant.

Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: You run idfix.exe and export the 10 user accounts.

Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

The question states that "all the user account synchronizations completed successfully". If there were problems with the 10 accounts that needed fixing with idfix.exe, there would have been synchronization errors in Azure AD Connect Health.

It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 28**

- (Exam Topic 5)

Your company has a Microsoft 365 tenant

You plan to allow users that are members of a group named Engineering to enroll their mobile device in mobile device management (MDM)

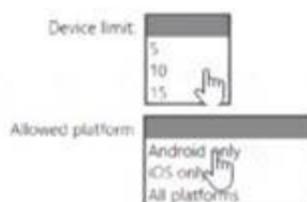

The device type restriction are configured as shown in the following table.

| Priority | Name      | Allowed platform | Assigned to |
|----------|-----------|------------------|-------------|
| 1        | iOS       | iOS              | Marketing   |
| 2        | Android   | Android          | Engineering |
| Default  | All users | All platforms    | All users   |

The device limit restriction are configured as shown in the following table.

| Priority | Name        | Device limit | Assigned to |
|----------|-------------|--------------|-------------|
| 1        | Engineering | 15           | Engineering |
| 2        | West Region | 5            | Engineering |
| Default  | All users   | 10           | All users   |

Answer Area

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

<https://docs.microsoft.com/en-us/mem/intune/enrollment/enrollment-restrictions-set#change-enrollment-restricti>

**NEW QUESTION 32**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the

stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your network contains an Active Directory domain. You deploy an Azure AD tenant. Another administrator configures the domain to synchronize to Azure AD. You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully. You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully. You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: From the Synchronization Rules Editor, you create a new outbound synchronization rule. Does this meet the goal?

- A. Yes
- B. No

**Answer: B**

**Explanation:**

The question states that "all the user account synchronizations completed successfully". Therefore, the synchronization rule is configured correctly. It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 35**

- (Exam Topic 5)

You have a Microsoft 365 tenant.

Company policy requires that all Windows 10 devices meet the following minimum requirements:

- > Require complex passwords.
- > Require the encryption of data storage devices.
- > Have Microsoft Defender Antivirus real-time protection enabled.

You need to prevent devices that do not meet the requirements from accessing resources in the tenant. Which two components should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a configuration policy
- B. a compliance policy
- C. a security baseline profile
- D. a conditional access policy
- E. a configuration profile

**Answer: BD**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

**NEW QUESTION 40**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains 500 Windows 10 devices. The devices are enrolled in Microsoft Intune.

You plan to use Endpoint analytics to identify hardware issues.

You need to enable Windows health monitoring on the devices to support Endpoint analytics. What should you do?

- A. Configure the Endpoint analytics baseline regression threshold.
- B. Create a configuration profile.
- C. Create a Windows 10 Security Baseline profile
- D. Create a compliance policy.

**Answer: B**

**NEW QUESTION 45**

- (Exam Topic 5)

HOTSPOT

Your network contains an on-premises Active Directory domain and a Microsoft 365 subscription. The domain contains the users shown in the following table.

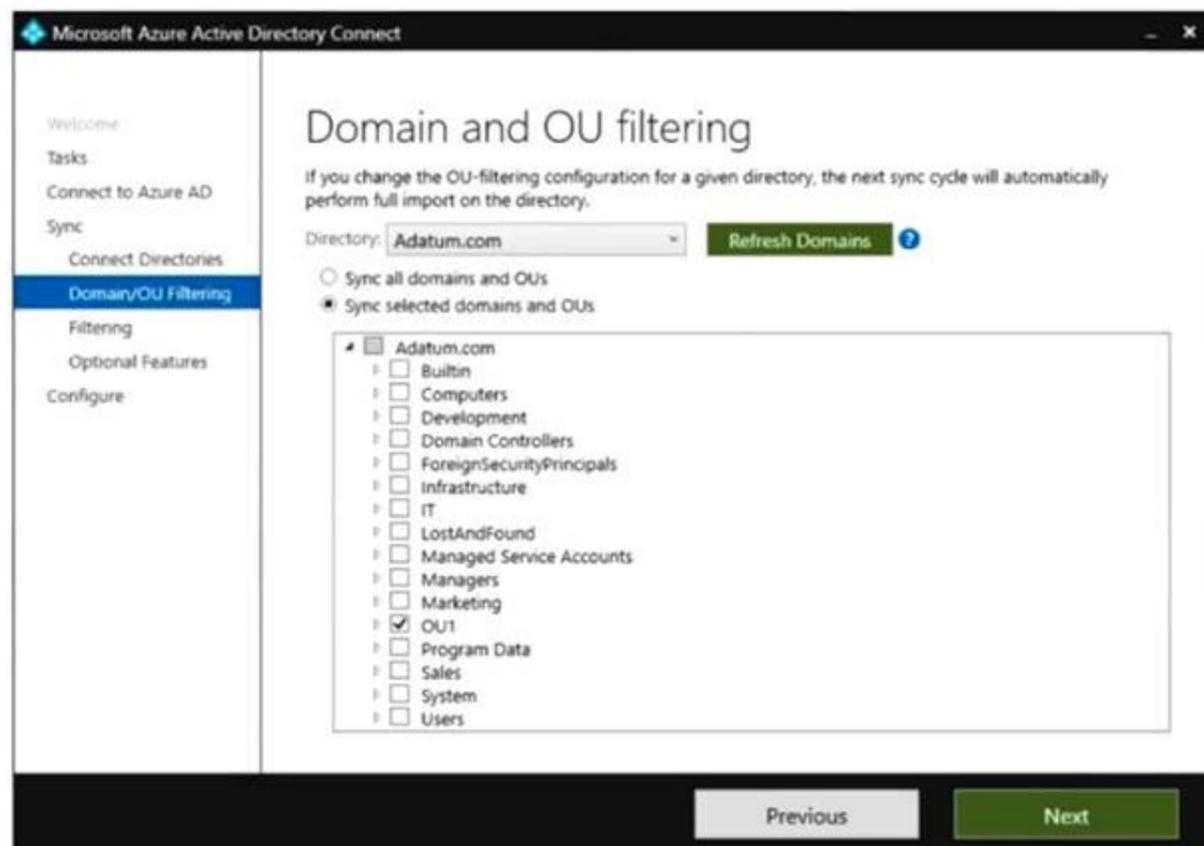

| Name  | Member of | In organizational unit (OU) |
|-------|-----------|-----------------------------|
| User1 | Group1    | OU1                         |
| User2 | Group2    | OU1                         |

The domain contains the groups shown in the following table.

| Name   | Member of | In OU |
|--------|-----------|-------|
| Group1 | None      | Sales |
| Group2 | Group1    | OU1   |

You are deploying Azure AD Connect.

You configure Domain and OU filtering as shown in the following exhibit.

You configure Filter users and devices as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
 NOTE: Each correct selection is worth one point.

**Answer Area**

| Statements                | Yes                              | No                    |
|---------------------------|----------------------------------|-----------------------|
| User1 syncs to Azure AD.  | <input checked="" type="radio"/> | <input type="radio"/> |
| User2 syncs to Azure AD.  | <input type="radio"/>            | <input type="radio"/> |
| Group2 syncs to Azure AD. | <input type="radio"/>            | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

| Statements                | Yes                                 | No                                  |
|---------------------------|-------------------------------------|-------------------------------------|
| User1 syncs to Azure AD.  | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| User2 syncs to Azure AD.  | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| Group2 syncs to Azure AD. | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

**NEW QUESTION 50**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 E5 subscription.

You need to implement identity protection. The solution must meet the following requirements:

- > Identify when a user's credentials are compromised and shared on the dark web.
- > Provide users that have compromised credentials with the ability to self-remediate. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

To identify when users have compromised credentials, configure:

A registration policy  
 A sign-in risk policy  
 A user risk policy  
 A multifactor authentication registration policy

To enable self-remediation, select:

Generate a temporary password  
 Require multi-factor authentication  
 Require password change

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: A user risk policy

Identify when a user's credentials are compromised and shared on the dark web. User risk-based Conditional Access policy

Identity Protection analyzes signals about user accounts and calculates a risk score based on the probability that the user has been compromised. If a user has risky sign-in behavior, or their credentials have been leaked, Identity Protection will use these signals to calculate the user risk level. Administrators can configure user risk-based Conditional Access policies to enforce access controls based on user risk, including requirements such as:

Block access

Allow access but require a secure password change.

A secure password change will remediate the user risk and close the risky user event to prevent unnecessary noise for administrators.

Box 2: Require password change

Provide users that have compromised credentials with the ability to self-remediate.

A secure password change will remediate the user risk and close the risky user event to prevent unnecessary noise for administrators

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/identity-protection/concept-identity-protection-policies#>

**NEW QUESTION 54**

- (Exam Topic 5)

You have a Microsoft 365 tenant.

You plan to enable BitLocker Disk Encryption (BitLocker) automatically for all Windows 10 devices that enroll in Microsoft Intune.

What should you use?

- A. an attack surface reduction (ASR) policy
- B. an app configuration policy
- C. a device compliance policy
- D. a device configuration profile

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/encrypt-devices>

**NEW QUESTION 57**

- (Exam Topic 5)

HOTSPOT

Your network contains an on-premises Active Directory domain. The domain contains the servers shown in the following table.

| Name    | Operating system                                | Configuration     |
|---------|---|-------------------|
| Server1 | Windows Server 2022                             | Domain controller |
| Server2 | Windows Server 2016                             | Member server     |
| Server3 | Server Core installation of Windows Server 2022 | Member server     |

You purchase a Microsoft 365 E5 subscription.

You need to implement Azure AD Connect cloud sync.

What should you install first and on which server? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Install:

- The Azure AD Application Proxy connector
- Azure AD Connect
- The Azure AD Connect provisioning agent
- Active Directory Federation Services (AD FS)

Server:

- Server1 only
- Server2 only
- Server3 only
- Server1 or Server2 only
- Server1 or Server3 only
- Server1, Server2, or Server3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: The Azure AD Connect provisioning agent Install the Azure AD Connect provisioning agent

How is Azure AD Connect cloud sync different from Azure AD Connect sync?

With Azure AD Connect cloud sync, provisioning from AD to Azure AD is orchestrated in Microsoft Online Services. An organization only needs to deploy, in their on-premises or IaaS-hosted environment, a

light-weight agent that acts as a bridge between Azure AD and AD. The provisioning configuration is stored in Azure AD and managed as part of the service.

Box 2: Server1 or Server2 only.

Cloud provisioning agent requirements include:

\* An on-premises server for the provisioning agent with Windows 2016 or later.

This server should be a tier 0 server based on the Active Directory administrative tier model. Installing the agent on a domain controller is supported.

Note: Windows Server Core is a minimal installation option for the Windows Server operating system (OS) that has no GUI and only includes the components required to perform server roles and run applications.

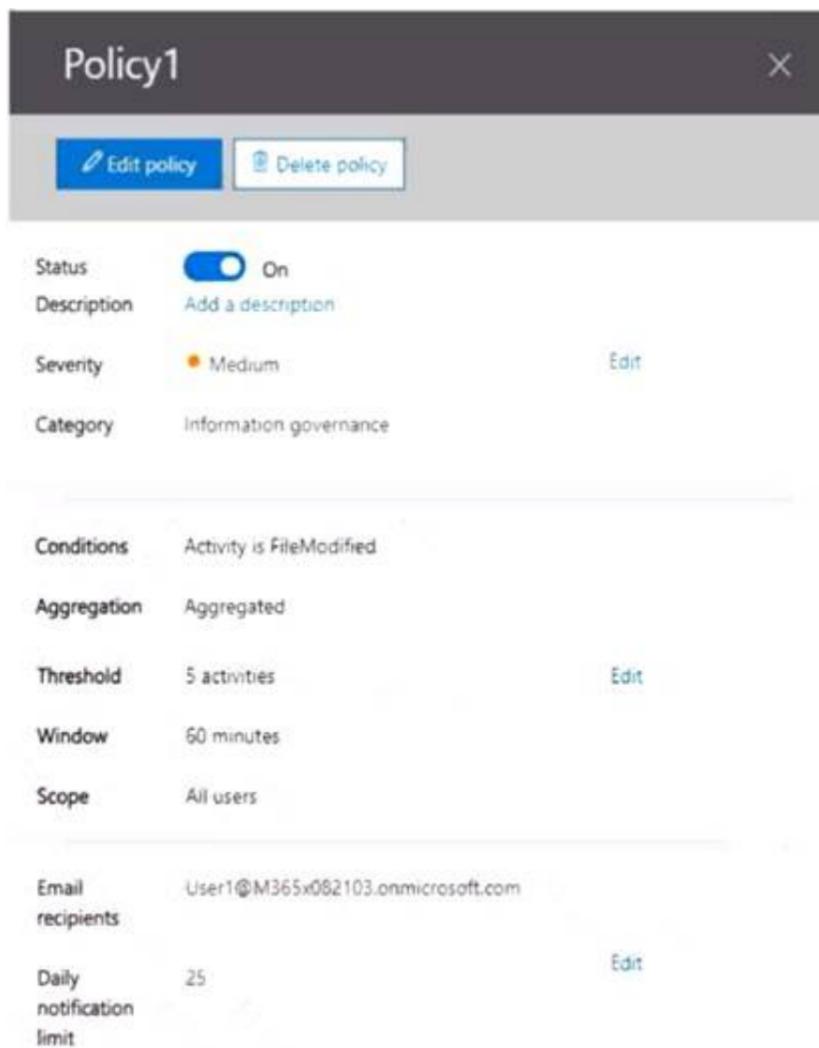

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/cloud-sync/how-to-install> <https://docs.microsoft.com/en-us/azure/active-directory/cloud-sync/how-to-prerequisites>

**NEW QUESTION 62**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains two users named User1 and User2. You create the alert policy shown in the following exhibit.

User2 runs a script that modifies a file in a Microsoft SharePoint Online library once every four minutes and runs for a period of two hours. How many alerts will User1 receive?

- A. 2
- B. 5
- C. 10
- D. 25

**Answer:** D

**NEW QUESTION 65**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates an Azure AD tenant named contoso.onmicrosoft.com. You plan to install Azure AD Connect on a member server and implement pass-through authentication. You need to prepare the environment for the planned implementation of pass-through authentication. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From a domain controller install an Authentication Agent
- B. From the Microsoft Entra admin center, configure an authentication method.
- C. From Active Director, ' Domains and Trusts add a UPN suffix
- D. Modify the email address attribute for each user account.
- E. From the Microsoft Entra admin center, add a custom domain name.
- F. Modify the User logon name for each user account.

**Answer:** ABE

**Explanation:**

Deploy Azure AD Pass-through Authentication Step 1: Check the prerequisites

Ensure that the following prerequisites are in place. In the Entra admin center

\* 1. Create a cloud-only Hybrid Identity Administrator account or a Hybrid Identity administrator account on your Azure AD tenant. This way, you can manage the configuration of your tenant should your on-premises services fail or become unavailable.

(E) 2. Add one or more custom domain names to your Azure AD tenant. Your users can sign in with one of these domain names.

(A) In your on-premises environment

\* 1. Identify a server running Windows Server 2016 or later to run Azure AD Connect. If not enabled already, enable TLS 1.2 on the server. Add the server to the same Active Directory forest as the users whose passwords you need to validate. It should be noted that installation of Pass-Through Authentication agent on Windows Server Core versions is not supported.

\* 2. Install the latest version of Azure AD Connect on the server identified in the preceding step. If you already have Azure AD Connect running, ensure that the version is supported.

\* 3. Identify one or more additional servers (running Windows Server 2016 or later, with TLS 1.2 enabled) where you can run standalone Authentication Agents. These additional servers are needed to ensure the high availability of requests to sign in. Add the servers to the same Active Directory forest as the users whose passwords you need to validate.

\* 4. Etc.

(B) Step 2: Enable the feature

Enable Pass-through Authentication through Azure AD Connect.

If you're installing Azure AD Connect for the first time, choose the custom installation path. At the User

sign-in page, choose Pass-through Authentication as the Sign On method. On successful completion, a Pass-through Authentication Agent is installed on the same server as Azure AD Connect. In addition, the Pass-through Authentication feature is enabled on your tenant.

Incorrect:

Not C: From Active Directory Domains and Trusts, add a UPN suffix Not D. Modify the email address attribute for each user account.

Not F. Modify the User logon name for each user account. Reference:  
<https://learn.microsoft.com/en-us/azure/active-directory/hybrid/connect/how-to-connect-pta-quick-start>

**NEW QUESTION 67**

- (Exam Topic 5)

You have an Azure subscription and an on-premises Active Directory domain. The domain contains 50 computers that run Windows 10.

You need to centrally monitor System log events from the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In Azure:

|                          |  |
|--------------------------|--|
| <input type="checkbox"/> | Add and configure the Diagnostics settings for the Azure Activity Log. |
| <input type="checkbox"/> | Add and configure an Azure Log Analytics workspace.                    |
| <input type="checkbox"/> | Add an Azure Storage account and Azure Cognitive Search                |
| <input type="checkbox"/> | Add an Azure Storage account and a file share.                         |

On the computers:

|                          |   |
|--------------------------|---|
| <input type="checkbox"/> | Create an event subscription.                         |
| <input type="checkbox"/> | Modify the membership of the Event Log Readers group. |
| <input type="checkbox"/> | Enroll in Microsoft Endpoint Manager.                 |
| <input type="checkbox"/> | Install the Microsoft Monitoring Agent.               |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/learn/quick-collect-windows-computer>

**NEW QUESTION 71**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains 500 Android devices enrolled in Microsoft Intune. You need to use Microsoft Endpoint Manager to deploy a managed Google Play app to the devices.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions** **Answer Area**

|   |
|---|
| Create an app configuration policy                          |
| Link the account to Intune                                  |
| Create a Microsoft account                                  |
| Configure a mobile device management (MDM) push certificate |
| Add the app   |
| Create a Google account                                     |
| Assign the app  |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Reference:

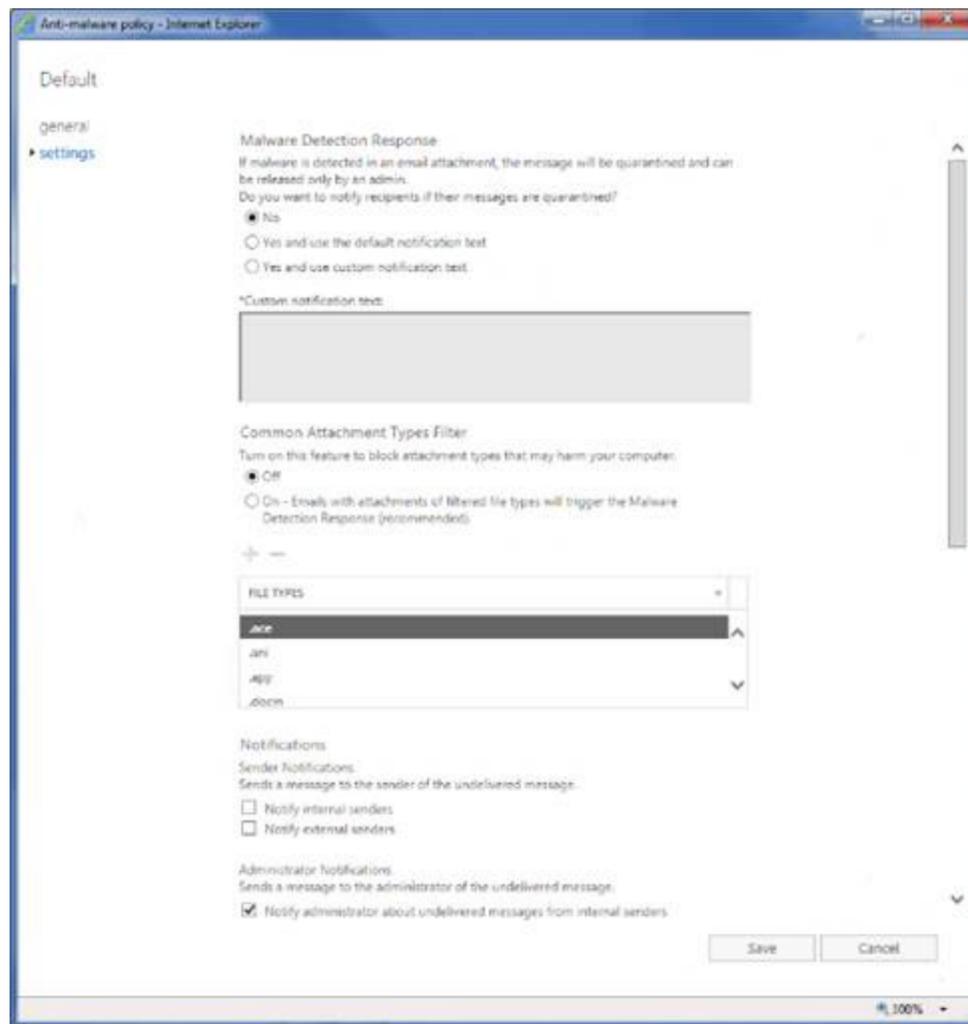

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add-android-for-work#assign-a-managed-google-play-a>

**NEW QUESTION 74**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains a user named User1.

The subscription has a single anti-malware policy as shown in the following exhibit.

An email message that contains text and two attachments is sent to User1. One attachment is infected with malware. How will the email message and the attachments be processed?

- A. Both attachments will be remove
- B. The email message will be quarantined, and Used will receive an email message without any attachments and an email message that includes the following text: 'Malware was removed.'
- C. The email message will be quarantined, and the message will remain undelivered.
- D. Both attachments will be remove
- E. The email message will be quarantined, and User1 will receive a copy of the message containing the original text and a new attachment that includes the following text: 'Malware was removed.'
- F. The malware-infected attachment will be remove
- G. The email message will be quarantined, and User1 will receive a copy of the message containing only the uninfected attachment.

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/anti-malware-protection?view=o36>

**NEW QUESTION 76**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses Microsoft Defender for Office 365.

You need to ensure that users are prevented from opening or downloading malicious files from Microsoft Teams, OneDrive, or SharePoint Online.

What should you do?

- A. Create a newAnti-malware policy
- B. Configure the Safe Links global settings.
- C. Create a new Anti-phishing policy
- D. Configure the Safe Attachments global settings.

**Answer:** D

**Explanation:**

Safe Attachments for SharePoint, OneDrive, and Microsoft Teams

In organizations with Microsoft Defender for Office 365, Safe Attachments for SharePoint, OneDrive, and Microsoft Teams provides an additional layer of protection against malware. After files are asynchronously scanned by the common virus detection engine in Microsoft 365, Safe Attachments opens files in a virtual environment to see what happens (a process known as detonation). Safe Attachments for SharePoint, OneDrive, and Microsoft Teams also helps detect and block existing files that are identified as malicious in team sites and document libraries.

<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/safe-attachments-for-spo-odfb-team>

**NEW QUESTION 81**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant.

You need to ensure that administrators are notified when a user receives an email message that contains malware. The solution must use the principle of least privilege.

Which type of policy should you create and which Microsoft 365 compliance center role is required to create the pokey? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**  
Answer Area

**NEW QUESTION 85**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains 200 Android devices enrolled in Microsoft Intune. You create an Android app protection policy named Policy! that is targeted to all Microsoft apps and assigned to all users. Policy! has the Data protection settings shown in the following exhibit.

|  |   |
|--|---|
| Select apps to exempt                              | <input type="button" value="Select"/>                                       |
| Save copies of org data ⓘ                          | <input type="radio"/> Allow <input checked="" type="radio"/> Block          |
| Allow user to save copies to selected services ⓘ   | SharePoint ▾  |
| Transfer telecommunication data to ⓘ               | Any Dialer App ▾  |
| Dialer App Package ID                              | <input type="text"/>  |
| Dialer App Name                                    | <input type="text"/>  |
| Received data from other apps ⓘ                    | All Apps ▾  |
| Open data into Org documents ⓘ                     | <input type="radio"/> Allow <input checked="" type="radio"/> Block          |
| Allow users to open data from services ⓘ           | 3 selected ▾  |
| Restrict cut, copy, and paste between other apps ⓘ | Policy managed apps with paste in ▾   |
| Cut and copy character limit for any app           | <input type="text" value="0"/>  |
| Screen capture and Google Assistant ⓘ              | <input checked="" type="radio"/> Allow <input type="radio"/> Block          |
| Approved keyboards ⓘ                               | <input type="radio"/> Require <input checked="" type="radio"/> Not required |
| Select keyboards to approve                        | <input type="button" value="Select"/>                                       |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

Answer Area

A user can copy files from Microsoft OneDrive to [answer choice] only.

▾  
 OneDrive  
 local storage  
 Microsoft SharePoint Online  
 Microsoft SharePoint Online and OneDrive

A user can copy and paste text from [answer choice] to Microsoft Word document stored in Microsoft OneDrive.

▾  
 any app  
 only managed apps  
 only unmanaged apps

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

A user can copy files from Microsoft OneDrive to [answer choice] only.

A user can copy and paste text from [answer choice] to Microsoft Word document stored in Microsoft OneDrive.

**NEW QUESTION 88**

- (Exam Topic 5)

DRAG DROP

You have a Microsoft 365 E5 subscription that contains two groups named Group1 and Group2. You need to ensure that each group can perform the tasks shown in the following table.

| Group  | Task   |
|--------|--|
| Group1 | <ul style="list-style-type: none"> <li>• Manage service requests.</li> <li>• Purchase new services.</li> <li>• Manage subscriptions.</li> <li>• Monitor service health.</li> </ul>             |
| Group2 | <ul style="list-style-type: none"> <li>• Assign licenses.</li> <li>• Add users and groups.</li> <li>• Create and manage user views.</li> <li>• Update password expiration policies.</li> </ul> |

The solution must use the principle of least privilege.

Which role should you assign to each group? To answer, drag the appropriate roles to the correct groups. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Roles**

- Billing Administrator
- Global Administrator
- Helpdesk Administrator
- License Administrator
- Service Support Administrator
- User Administrator

**Answer Area**

Group1:

Group2:

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Billing admin manage service request  
Purchase new services Etc.

Assign the Billing admin role to users who make purchases, manage subscriptions and service requests, and monitor service health.

Box 2: User admin User admin

Assign the User admin role to users who need to do the following for all users:

- Add users and groups
- Assign licenses
- Manage most users properties
- Create and manage user views
- Update password expiration policies
- Manage service requests
- Monitor service health Reference:

<https://learn.microsoft.com/en-us/microsoft-365/admin/add-users/about-admin-roles>

**NEW QUESTION 92**

- (Exam Topic 5)

You have a Microsoft 365 F5 subscription.

You plan to deploy 100 new Windows 10 devices.

You need to order the appropriate version of Windows 10 for the new devices. The version must Meet the following requirements.

Be serviced for a minimum of 24 months.

Support Microsoft Application Virtualization (App-V) Which version should you identify?

- A. Window 10 Pro, version 1909
- B. Window 10 Pro, version 2004
- C. Window 10 Pro, version 1909
- D. Window 10 Enterprise, version 2004

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/release-health/release-information> <https://docs.microsoft.com/en-us/windows/application-management/app-v/appv-supported-configurations>

**NEW QUESTION 95**

- (Exam Topic 5)

You use Microsoft Defender for Endpoint.

You have the Microsoft Defender for Endpoint device groups shown in the following table

| Name                         | Rank | Members                                 |
|------------------------------|------|---|
| Group1                       | 1    | Operating system in Windows 10          |
| Group2                       | 2    | Name ends with London                   |
| Group3                       | 3    | Operating system in Windows Server 2016 |
| Ungrouped machines (default) | Last | Not applicable                          |

You plan to onboard computers to Microsoft Defender for Endpoint as shown in the following table.

| Name             | Operating system    |
|------------------|---------------------|
| Computer1-London | Windows 10          |
| Server1-London   | Windows Server 2016 |

**Answer Area**

Computer1-London:

Server1-London:

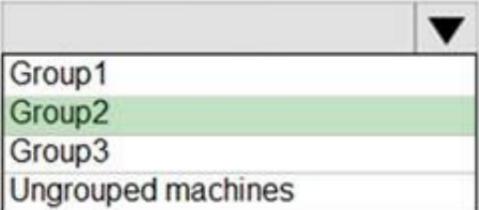

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Computer1-London:

**NEW QUESTION 100**

- (Exam Topic 5)

You have a Microsoft 365 subscription. You have a user named User1. You need to ensure that User1 can place a hold on all mailbox content. What permission should you assign to User1?

- A. the Information Protection administrator role from the Azure Active Directory admin center.
- B. the eDiscovery Manager role from the Microsoft 365 compliance center.
- C. the Compliance Management role from the Exchange admin center.
- D. the User management administrator role from the Microsoft 365 admin center.

**Answer:** B

**NEW QUESTION 105**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name  | Member of | Multi-factor authentication (MFA) method registered |
|-------|-----------|---|
| User1 | Group1    | Microsoft Authenticator app (push notification)     |
| User2 | Group2    | Microsoft Authenticator app (push notification)     |
| User3 | Group1    | None  |

You configure the Microsoft Authenticator authentication method policy to enable passwordless authentication as shown in the following exhibit.

Both User1 and User2 report that they are NOT prompted for passwordless sign-in in the Microsoft Authenticator app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

| Statements  | Yes                      | No                       |
|---|--------------------------|--------------------------|
| User1 will be prompted for passwordless authentication once User1 sets up phone sign-in in the Microsoft Authenticator app. | <input type="checkbox"/> | <input type="checkbox"/> |
| User2 will be prompted for passwordless authentication once User2 sets up phone sign-in in the Microsoft Authenticator app. | <input type="checkbox"/> | <input type="checkbox"/> |
| User3 can use passwordless authentication without further action.   | <input type="checkbox"/> | <input type="checkbox"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

User1 is member of Group1.

User1 has MFA registered method of Microsoft Authenticator app (push notification)

The Microsoft Authenticator authentication method policy is configured for Group1, registration is optional, authentication method is any.  
Note: Microsoft Authenticator can be used to sign in to any Azure AD account without using a password. Microsoft Authenticator uses key-based authentication to enable a user credential that is tied to a device, where the device uses a PIN or biometric. Windows Hello for Business uses a similar technology. This authentication technology can be used on any device platform, including mobile. This technology can also be used with any app or website that integrates with Microsoft Authentication Libraries.

Box 2: No

User2 is member of Group2.

The Microsoft Authenticator authentication method policy is configured for Group1, not for Group2. Box 3: No

User3 is member of Group1.

User3 has no MFA method registered.

User3 must choose an authentication method.

Note: Enable passwordless phone sign-in authentication methods

Azure AD lets you choose which authentication methods can be used during the sign-in process. Users then register for the methods they'd like to use.

**NEW QUESTION 107**

- (Exam Topic 5)

HOTSPOT

Your company uses Microsoft Defender for Endpoint. Microsoft Defender for Endpoint includes the device groups shown in the following table.

| Rank | Device group                | Members                                       |
|------|-----------------------------|---|
| 1    | Group1                      | Tag Equals demo And OS In Windows 10          |
| 2    | Group2                      | Tag Equals demo                               |
| 3    | Group3                      | Domain Equals adatum.com                      |
| 4    | Group4                      | Domain Equals adatum.com And OS In Windows 10 |
| Last | Ungrouped devices (default) | Not applicable                                |

You onboard a computer named computer1 to Microsoft Defender for Endpoint as shown in the following exhibit.

Settings > Endpoints > computer1

**Device summary**

Risk level ⓘ

None

**Device details**

Domain

adatum.com

OS

Windows 10 64-bit

Version 21H2

Build 19044.2130

Use the drop-down menus to select the answer choice that completes each statement.

NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of [answer choice].

- Group3 only
- Group4 only
- Group3 and Group4 only
- Ungrouped devices

If you add the tag demo to Computer1, the computer will be a member of [answer choice].

- Group1 only
- Group1 and Group2 only
- Group1, Group2, Group3, and Group4
- Ungrouped devices

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Group3 and Group4 only Computer1 has no Demo Tag.

Computer1 is in the adatum domain and OS is Windows 10. Box 2: Group1, Group2, Group3 and Group4

**NEW QUESTION 108**

- (Exam Topic 5)

You have Windows 10 devices that are managed by using Microsoft Endpoint Manager. You need to configure the security settings in Microsoft Edge. What should you create in Microsoft Endpoint Manager?

- A. an app configuration policy
- B. an app
- C. a device configuration profile
- D. a device compliance policy

**Answer: C**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/deployedge/configure-edge-with-intune>

**NEW QUESTION 112**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant.

You plan to deploy a monitoring solution that meets the following requirements:

- > Captures Microsoft Teams channel messages that contain threatening or violent language.
- > Alerts a reviewer when a threatening or violent message is identified.

What should you include in the solution?

- A. Data Subject Requests (DSRs)
- B. Insider risk management policies
- C. Communication compliance policies
- D. Audit log retention policies

**Answer: C**

**NEW QUESTION 113**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains the devices shown in the following table.

| Name    | Platform              |
|---------|-----------------------|
| Device1 | MacOS                 |
| Device2 | Windows 10 Pro        |
| Device3 | Windows 10 Enterprise |
| Device4 | Ubuntu 18.04 LTS      |

You plan to implement attack surface reduction (ASR) rules. Which devices will support the ASR rules?

- A. Device 1, Device2, and Device3 only
- B. Device3 only
- C. Device2 and Device3 only
- D. Device1, Device2, Devices and Device4

**Answer: C**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/enable-attack-surface-reduction?vie>

**NEW QUESTION 115**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 has he files in the following table.

| Name       | Number of IP addresses in the file |
|------------|------------------------------------|
| File1.docx | 1                                  |
| File2.txt  | 2                                  |
| File3.xlsx | 2                                  |
| File4.bmp  | 3                                  |
| File5.doc  | 5                                  |

The Site1 users are assigned the roles shown in the following table.

| Name  | Role    |
|-------|---------|
| User1 | Owner   |
| User2 | Visitor |

You create a data less prevention (DLP) policy names Policy1 as shown in the following exhibit.

New DLP policy

- Choose the information to protect
- Name your policy
- Choose locations
- Policy settings
- Review your settings

### Review your settings

|  |                      |
|--|----------------------|
| Template name<br>Custom policy   | <a href="#">Edit</a> |
| Policy name<br>Policy1   | <a href="#">Edit</a> |
| Description  | <a href="#">Edit</a> |
| Applies to content in these locations<br>SharePoint sites  | <a href="#">Edit</a> |
| Policy settings<br>If the content contains these types of sensitive info: IP Address then notify people with a policy tip and email message.<br><br>If there are at least 2 instances of the same type of sensitive info, block access to the content. | <a href="#">Edit</a> |
| Turn policy on after it's created?<br>Yes  | <a href="#">Edit</a> |

How many files will be visible to user1 and User2 after Policy' is applied to answer, selected select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer Area**

**NEW QUESTION 119**

- (Exam Topic 5)

Your company has digitally signed applications.

You need to ensure that Microsoft Defender Advanced Threat Protection (Microsoft Defender ATP) considers the digitally signed applications safe and never analyzes them.

What should you create in the Microsoft Defender Security Center?

- A. a custom detection rule
- B. an allowed/blocked list rule
- C. an alert suppression rule
- D. an indicator

**Answer: D**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/manage-indicators>

**NEW QUESTION 120**

- (Exam Topic 5)

Your network contains an Active Directory domain named adatum.com that is synced to Azure AD. The domain contains 100 user accounts.

The city attribute for all the users is set to the city where the user resides.

You need to modify the value of the city attribute to the three-letter airport code of each city. What should you do?

- A. From Windows PowerShell on a domain controller, run the Gec-ADUser and Sec-ADUser cmdlets.
- B. From Azure Cloud Shell, run the Gec-ADUser and Sec-ADUser cmdlets.
- C. From Windows PowerShell on a domain controller, run the Gec-MgUser and Updace-MgUser cmdlets.
- D. From Azure Cloud Shell, run the Gec-MgUser and Update-MgUser cmdlets.

**Answer: A**

**Explanation:**

The user accounts are synced from the on-premise Active Directory to the Microsoft Azure Active Directory (Azure AD). Therefore, the city attribute must be changed in the on-premise Active Directory.

You can use Windows PowerShell on a domain controller and run the Get-ADUser cmdlet to get the required users and pipe the results into Set-ADUser cmdlet to modify the city attribute.

Note:

There are several versions of this question in the exam. The question has two possible correct answers:

- \* 1. From Windows PowerShell on a domain controller, run the Get-ADUser and Set-ADUser cmdlets.
- \* 2. From Active Directory Administrative Center, select the Active Directory users, and then modify the Properties settings.

Other incorrect answer options you may see on the exam include the following:

- \* 1. From the Azure portal, select all the Azure AD users, and then use the User settings blade.
- \* 2. From Windows PowerShell on a domain controller, run the Get-AzureADUser and Set-AzureADUser cmdlets.
- \* 3. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.
- \* 4. From Azure Cloud Shell, run the Get-ADUser and Set-ADUser cmdlets. Reference:

<https://docs.microsoft.com/en-us/powershell/module/addsadministration/set-aduser>

**NEW QUESTION 121**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

Conditional Access is configured to block high-risk sign-ins for all users.

All users are in France and are registered for multi-factor authentication (MFA). Users in the media department will travel to various countries during the next month.

You need to ensure that if the media department users are blocked from signing in while traveling, the users can remediate the issue without administrator intervention. What should you configure?

- A. an exclusion group
- B. the MFA registration policy
- C. named locations
- D. self-service password reset (SSPR)

**Answer: D**

**Explanation:**

Self-remediation with self-service password reset

If a user has registered for self-service password reset (SSPR), then they can also remediate their own user risk by performing a self-service password reset.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/identity-protection/howto-identity-protection-remediate>

**NEW QUESTION 123**

- (Exam Topic 5)

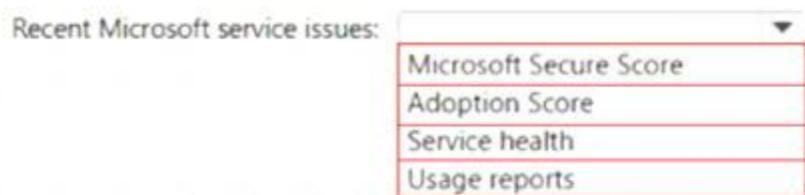

HOTSPOT

You have a Microsoft 365 subscription.

You need to review metrics for the following: The daily active users in Microsoft Teams Recent Microsoft service issues

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Usage reports

The daily active users in Microsoft Teams

Microsoft 365 Reports in the admin center - Microsoft Teams usage activity

The brand-new Teams usage report gives you an overview of the usage activity in Teams, including the number of active users, channels and messages so you can quickly see how many users across your organization are using Teams to communicate and collaborate. It also includes other Teams specific activities, such as the number of active guests, meetings, and messages.

Box 2: Service Health

Recent Microsoft service issues

You can view the health of your Microsoft services, including Office on the web, Yammer, Microsoft Dynamics CRM, and mobile device management cloud services, on the Service health page in the Microsoft 365 admin center. If you are experiencing problems with a cloud service, you can check the service health to determine whether this is a known issue with a resolution in progress before you call support or spend time troubleshooting.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/admin/activity-reports/microsoft-teams-usage-activity> <https://learn.microsoft.com/en-us/microsoft-365/enterprise/view-service-health>

**NEW QUESTION 127**

- (Exam Topic 5)

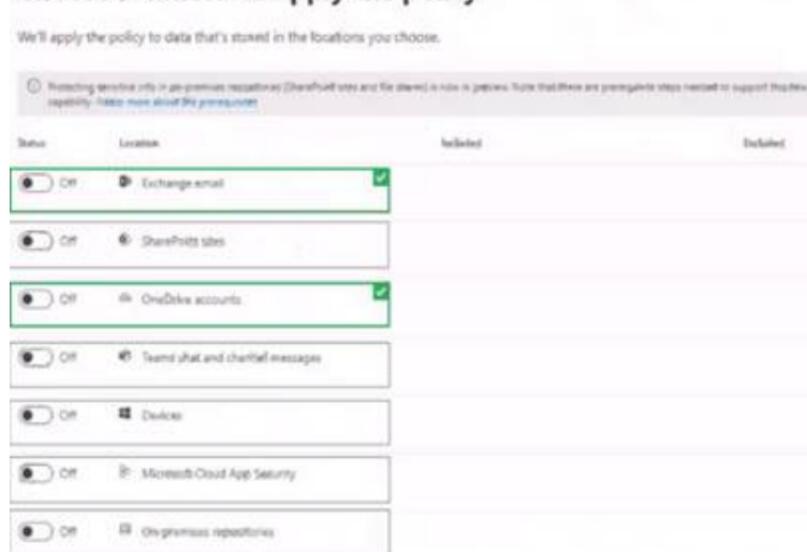

You have a Microsoft 365 E5 tenant

You create a data loss prevention (DLP) policy to prevent users from using Microsoft Teams to share internal documents with external users.

To which two locations should you apply the policy? To answer, select the appropriate locations in the answer area.

NOTE: Each correct selection is worth one point.

**Choose locations to apply the policy**

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

### Choose locations to apply the policy

We'll apply the policy to data that's stored in the locations you choose.

Protecting sensitive info in on-premises repositories (SharePoint sites and file shares) is now in preview. Note that there are prerequisite steps needed to support this file capability. [Learn more about the prerequisite.](#)

| Status                              | Location                        | Included                            | Excluded                 |

| <input type="checkbox"/>            | On-premises repositories        | <input type="checkbox"/>            | <input type="checkbox"/> |

### NEW QUESTION 130

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint site named Site1 and a data loss prevention (DLP) policy named DLP1. DLP1 contains the rules shown in the following table.

| Name  | Priority | Action   |
|-------|----------|--|
| Rule1 | 0        | Notify users by using email and policy tips.<br>Customize the policy tip as Rule1 tip.<br>Disable user overrides.                                    |
| Rule2 | 1        | Notify users by using email and policy tips.<br>Customize the policy tip as Rule2 tip.<br>Restrict access to the content.<br>Disable user overrides. |
| Rule3 | 2        | Notify users by using email and policy tips.<br>Customize the policy tip as Rule3 tip.<br>Restrict access to the content.<br>Enable user overrides.  |
| Rule4 | 3        | Notify users by using email and policy tips.<br>Customize the policy tip as Rule4 tip.<br>Restrict access to the content.<br>Disable user overrides. |

Site1 contains the files shown in the following table.

| Name       | Matched DLP rule    |
|------------|---------------------|
| File1.docx | Rule1, Rule2, Rule3 |
| File2.docx | Rule1, Rule3, Rule4 |

Which policy tips are shown for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer Area

File1.docx:

- Rule1 tip only
- Rule2 tip only
- Rule3 tip only
- Rule1 tip and Rule2 tip only
- Rule1 tip, Rule2 tip, and Rule3 tip

File2.docx:

- Rule1 tip only
- Rule3 tip only
- Rule4 tip only
- Rule1 tip and Rule4 tip only
- Rule1 tip, Rule3 tip, and Rule4 tip

- A. Mastered
- B. Not Mastered

Answer: A

### Explanation:

Box 1: Rule1 tip only

File1 matches Rule1, Rule2, and Rule3. Rule1 has the highest priority.

Note: The Priority parameter specifies a priority value for the policy that determines the order of policy processing. A lower integer value indicates a higher priority, the value 0 is the highest priority, and policies can't have the same priority value.

Box 2: Rule1 tip only

Note: User Override support

The option to override is per rule, and it overrides all of the actions in the rule (except sending a notification, which can't be overridden).

It's possible for content to match several rules in a DLP policy or several different DLP policies, but only the policy tip from the most restrictive, highest-priority rule will be shown (including policies in Test mode). For example, a policy tip from a rule that blocks access to content will be shown over a policy tip from a rule that simply sends a notification. This prevents people from seeing a cascade of policy tips.

If the policy tips in the most restrictive rule allow people to override the rule, then overriding this rule also

overrides any other rules that the content matched. Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/dlp-overview-plan-for-dlp> <https://learn.microsoft.com/en-us/microsoft-365/compliance/use-notifications-and-policy-tips>

**NEW QUESTION 134**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You need to create a data loss prevention (DLP) policy that is configured to use the Set headers action. To which location can the policy be applied?

- A. OneDrive accounts
- B. Exchange email
- C. Teams chat and channel messages
- D. SharePoint sites

**Answer: B**

**NEW QUESTION 136**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains the groups shown in the following table.

| Name   | Type                  |
|--------|-----------------------|
| Group1 | Distribution          |
| Group2 | Mail-enabled security |
| Group3 | Security              |

You plan to create a new Windows 10 Security Baseline profile. To which groups can you assign to the profile?

- A. Group3 only
- B. Group1 and Group3 only
- C. Group2 and Group3 only
- D. Group1, Group2, and Group3

**Answer: A**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/security-baselines-configure#create-the-profile> <https://docs.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?view=o365-worldwide>

**NEW QUESTION 141**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

You configure a new alert policy as shown in the following exhibit.

**How do you want the alert to be triggered?**

Every time an activity matches the rule

When the volume of matched activities reaches a threshold

More than or equal to  activities

During the last  minutes

On

When the volume of matched activities becomes unusual

On

You need to identify the following:

- > How many days it will take to establish a baseline for unusual activity.
- > Whether alerts will be triggered during the establishment of the baseline.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

How many days it will take to establish the baseline:

|    |
|----|
| 1  |
| 5  |
| 7  |
| 10 |

Whether the alerts will be triggered during the establishment of the baseline:

|   |
|---|
| Alerts will be triggered.   |
| Alerts will not be triggered.   |
| Alerts will be triggered only after the process to establish the baseline has been running for one day. |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/compliance/alert-policies?view=o365-worldwide>

**NEW QUESTION 142**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Office 365.

The subscription has the default inbound anti-spam policy and a custom Safe Attachments policy. You need to identify the following information:

- The number of email messages quarantined by zero-hour auto purge (ZAP)
- The number of times users clicked a malicious link in an email message

Which Email & collaboration report should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

To identify the number of emails quarantined by ZAP:

|                                 |
|---------------------------------|
| Threat protection status        |
| Mailflow status report          |
| Spoof detections                |
| <b>Threat protection status</b> |
| URL threat protection           |

To identify the number of times users clicked a malicious link in an email:

|                               |
|-------------------------------|
| Mailflow status report        |
| <b>Mailflow status report</b> |
| Spoof detections              |
| Threat protection status      |
| URL threat protection         |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

To identify the number of emails quarantined by ZAP:

|                                 |
|---------------------------------|
| Threat protection status        |
| Mailflow status report          |
| Spoof detections                |
| <b>Threat protection status</b> |
| URL threat protection           |

To identify the number of times users clicked a malicious link in an email:

|                               |
|-------------------------------|
| Mailflow status report        |
| <b>Mailflow status report</b> |
| Spoof detections              |
| Threat protection status      |
| URL threat protection         |

**NEW QUESTION 147**

- (Exam Topic 5)

Your network contains an on-premises Active Directory domain named contoso.com.

For all user accounts, the Logon Hours settings are configured to prevent sign-ins outside of business hours. You plan to sync contoso.com to an Azure AD tenant.

You need to recommend a solution to ensure that the logon hour restrictions apply when synced users sign in to Azure AD.

What should you include in the recommendation?

- A. pass-through authentication
- B. conditional access policies
- C. password synchronization

D. Azure AD Identity Protection policies

**Answer:** A

**Explanation:**

Reference:

<https://nickblog.azurewebsites.net/2016/10/17/azure-ad-pass-through-authentication/>

**NEW QUESTION 152**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains 100 Windows 10 devices. The devices are managed by using Microsoft Endpoint Manager.

You plan to create two attack surface reduction (ASR) policies named ASR1 and ASR2. ASR1 will be used to configure Microsoft Defender Application Guard.

ASR2 will be used to configure Microsoft Defender SmartScreen.

Which ASR profile type should you use for each policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

ASR1:  Device control  
 Exploit protection  
 Application control  
 App and browser isolation  
 Attack surface reduction rules

ASR2:  Device control  
 Exploit protection  
 Application control  
 App and browser isolation  
 Attack surface reduction rules

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-security-asr-policy>

**NEW QUESTION 154**

- (Exam Topic 5)

Your company has a Microsoft 365 E5 tenant that contains a user named User1. You review the company's compliance score.

You need to assign the following improvement action to User1:Enable self-service password reset. What should you do first?

- A. From Compliance Manager, turn off automated testing.
- B. From the Azure Active Directory admin center, enable self-service password reset (SSPR).
- C. From the Microsoft 365 admin center, modify the self-service password reset (SSPR) settings.
- D. From the Azure Active Directory admin center, add User1 to the Compliance administrator role.

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/compliance-manager-improvement-actions?view=o>  
<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/active-directory-users-assign-role-azure-p>

**NEW QUESTION 155**

- (Exam Topic 5)

Your company has 10,000 users who access all applications from an on-premises data center. You plan to create a Microsoft 365 subscription and to migrate data to the cloud.

You plan to implement directory synchronization.

User accounts and group accounts must sync to Azure AD successfully. You discover that several user accounts fail to sync to Azure AD.

You need to resolve the issue as quickly as possible. What should you do?

- A. From Active Directory Administrative Center, search for all the users, and then modify the properties of the user accounts.
- B. Run idfix.exe, and then click Edit.
- C. From Windows PowerShell, run the start-AdSyncSyncCycle -PolicyType Delta command.
- D. Run idfix.exe, and then click Complete.

**Answer:** B

**Explanation:**

IdFix is used to perform discovery and remediation of identity objects and their attributes in an on-premises Active Directory environment in preparation for

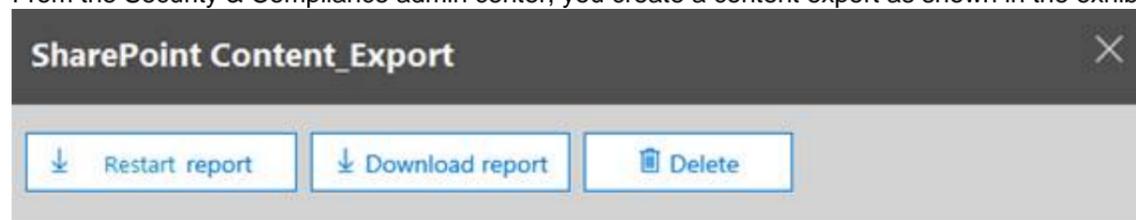

migration to Azure Active Directory. IdFix is intended for the Active Directory administrators responsible for directory synchronization with Azure Active Directory.  
Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/prepare-directory-attributes-for-synch-with-idfix>

**NEW QUESTION 159**

- (Exam Topic 5)

From the Security & Compliance admin center, you create a content export as shown in the exhibit. (Click the Exhibit tab.)

**Status:**

The export has completed. You can start downloading the results.

**Items included from the search:**

All items, excluding ones that have unrecognized format, are encrypted, or weren't indexed for other reasons.

**Exchange content format:**

One PST file for each mailbox.

**De-duplication for Exchange content:**

Not enabled.

**SharePoint document versions:**

Included

**Export files in a compressed (zipped) folder:**

Yes

**The export data was prepared within region:**

Default region

Close

Feedback

What will be excluded from the export?

- A. a 10-MB XLSX file
- B. a 5-MB MP3 file
- C. a 5-KB RTF file
- D. an 80-MB PPTX file

**Answer: B**

**Explanation:**

Unrecognized file formats are excluded from the search.

Certain types of files, such as Bitmap or MP3 files, don't contain content that can be indexed. As a result, the search indexing servers in Exchange and SharePoint don't perform full-text indexing on these types of files. These types of files are considered to be unsupported file types.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/partially-indexed-items-in-content-search?view=o3> <https://docs.microsoft.com/en-us/office365/securitycompliance/export-a-content-search-report>

**NEW QUESTION 160**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

Users have the devices shown in the following table.

| Name    | Platform   | Owner | Enrolled in Microsoft Endpoint Manager |
|---------|------------|-------|--|
| Device1 | Android    | User1 | Yes                                    |
| Device2 | Android    | User1 | No                                     |
| Device3 | iOS        | User1 | No                                     |
| Device4 | Windows 10 | User2 | Yes                                    |
| Device5 | Windows 10 | User2 | No                                     |
| Device6 | iOS        | User2 | Yes                                    |

On which devices can you manage apps by using app configuration policies in Microsoft Endpoint Manager?

- A. Device1, Device4, and Device6
- B. Device2, Device3, and Device5
- C. Device1, Device2, Device3, and Device6
- D. Device1, Device2, Device4, and Device5

**Answer: C**

**Explanation:**

You can create and use app configuration policies to provide configuration settings for both iOS/iPadOS or Android apps on devices that are and are not enrolled in Microsoft Endpoint Manager.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview>

**NEW QUESTION 165**

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains a user named User1 and a Microsoft SharePoint Online site named Site1. User1 is assigned the Owner role for Site1. To Site1, you publish the file plan retention labels shown in the following table.

| Name       | Retention period | During the retention period       |
|------------|------------------|-----------------------------------|
| Retention1 | 5 years          | Retain items even if users delete |
| Retention2 | 5 years          | Mark items as a record            |
| Retention3 | 5 years          | Mark items as a regulatory record |

Site1 contains the files shown in the following table.

| Name  | Label      |
|-------|------------|
| File1 | None       |
| File2 | Retention1 |
| File3 | Retention2 |
| File4 | Retention3 |

Which files can User1 rename, and which files can User1 delete? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Rename:

- File1 only
- File1 and File2 only
- File1, File2, and File3 only**
- File1, File2, File3, and File4

Delete:

- File1 only
- File1 and File2 only**
- File1, File2, and File3 only
- File1, File2, File3, and File4

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

Rename:

- File1 only
- File1 and File2 only
- File1, File2, and File3 only**
- File1, File2, File3, and File4

Delete:

- File1 only
- File1 and File2 only**
- File1, File2, and File3 only
- File1, File2, File3, and File4

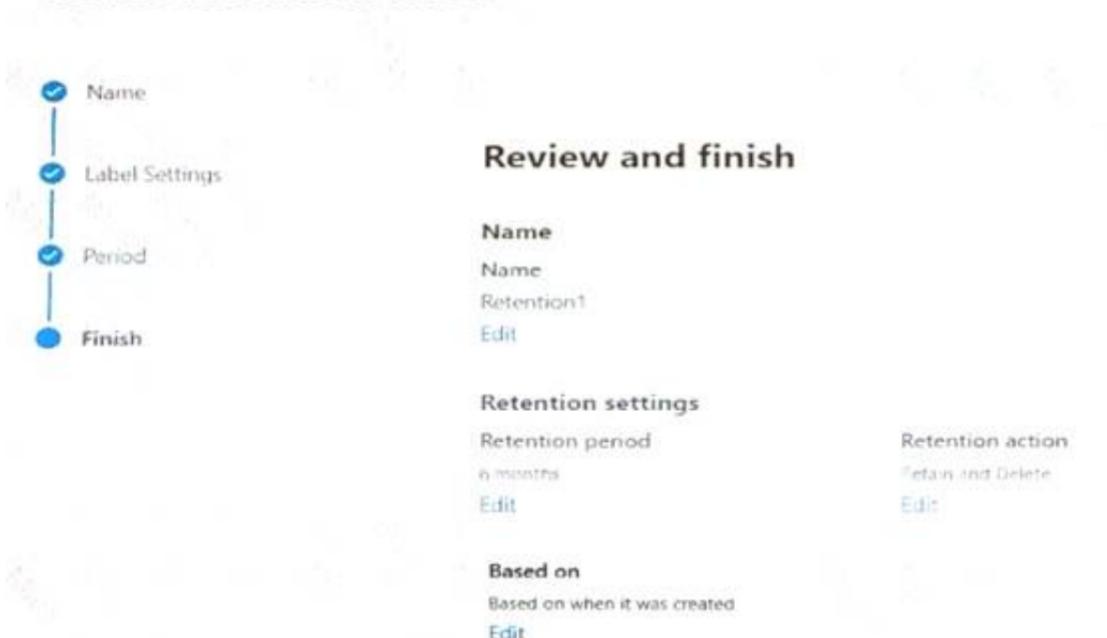

**NEW QUESTION 167**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You create a retention label named Retention1 as shown in the following exhibit.

## Create retention label

You apply Retention1 to all the Microsoft OneDrive content. On January 1, 2020, a user stores a file named File1 in OneDrive. On January 10, 2020, the user modifies File1. On February 1, 2020, the user deletes File1. When will File1 be removed permanently and unrecoverable from OneDrive?

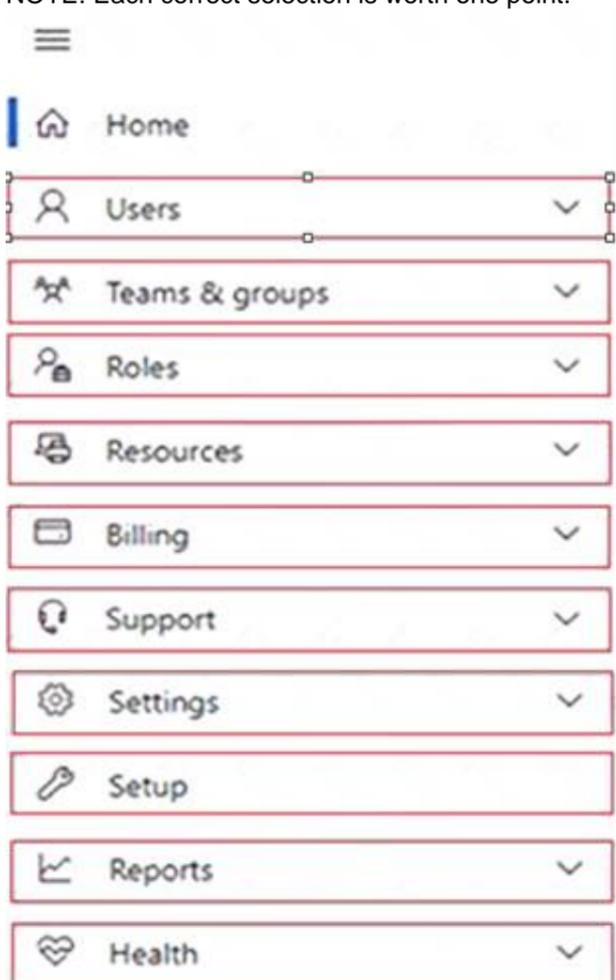

- A. February 1, 2020
- B. July 1, 2020
- C. July 10, 2020
- D. August 1, 2020

**Answer: B**

### NEW QUESTION 170

- (Exam Topic 5)  
HOTSPOT

Your company has a Microsoft 365 E5 subscription. You need to perform the following tasks:  
View the Adoption Score of the company. Create a new service request to Microsoft.  
Which two options should you use in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Reports  
View the Adoption Score of the company. How to enable Adoption Score  
To enable Adoption Score:

- > Sign in to the Microsoft 365 admin center as a Global Administrator and go to Reports > Adoption Score
- > Select enable Adoption Score. It can take up to 24 hours for insights to become available. Box 2: Support

Create a new service request to Microsoft.

Sign in to Microsoft 365 with your Microsoft 365 admin account, and select Support > New service request. If you're in the admin center, select Support > New service request.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/admin/adoption/adoption-score> <https://support.microsoft.com/en-us/topic/contact-microsoft-office-support-fd6bb40e-75b7-6f43-d6f9-c13d1085>

**NEW QUESTION 173**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

All users have Mac computers. All the computers are enrolled in Microsoft Endpoint Manager and onboarded to Microsoft Defender for Endpoint.

You need to configure Microsoft Defender for Endpoint on the computers. What should you create from the Endpoint Management admin center?

- A. a Microsoft Defender for Endpoint baseline profile
- B. an update policy for iOS
- C. a device configuration profile
- D. a mobile device management (MDM) security baseline profile

**Answer: D**

**NEW QUESTION 174**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that has published sensitivity labels shown in the following exhibit.

[Home](#) > [sensitivity](#)

| Labels  |           | Label policies | Auto-labeling(preview) |
|---|-----------|----------------|------------------------|
| Sensitivity labels are used to classify email messages, documents, sites, and more. When a label is applied (automatically or by the user), the content or site is protected based on the settings you choose. For example, you can create labels that encrypt files, add content marking, and control user access to specific sites. <a href="#">Learn more about sensitivity labels</a> |           |                |                        |
| + Create a label    Publish labels    Refresh   |           |                |                        |
| Name  | Order     | Created by     | Last modified          |
| Label1  | 0-highest | Pri            | 04/24/2020             |
| - Label2  | 1         | Pri            | 04/24/2020             |
| Label3  | 0-highest | Pri            | 04/24/2020             |
| Label4  | 0-highest | Pri            | 04/24/2020             |
| - Label5  | 5         | Pri            | 04/24/2020             |
| Label6  | 0-highest | Pri            | 04/24/2020             |

Which labels can users apply to content?

- A. Label1, Label2, and Label5 only
- B. Label3, Label4, and Label6 only
- C. Label1, Label3, Label2, and Label6 only
- D. Label1, Label2, Label3, Label4, Label5, and Label6

**Answer: C**

**NEW QUESTION 179**

- (Exam Topic 5)

**HOTSPOT**

Your network contains an on-premises Active Directory domain. You have a Microsoft 365 E5 subscription.

You plan to implement directory synchronization.

You need to identify potential synchronization issues for the domain. The solution must use the principle of least privilege.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Tool:

- AccessChk
- Azure AD Connect
- Active Directory Explorer
- IdFix

Required group membership:

- Domain Admins
- Domain Users
- Server Operators
- Enterprise Admins

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: IdFix

Query and fix invalid object attributes with the IdFix tool

Microsoft is working to reduce the time required to remediate identity issues when onboarding to Microsoft 365. A portion of this effort is intended to address the time involved in remediating the Windows Server Active Directory (Windows Server AD) errors reported by the directory synchronization tools such as Azure AD Connect and Azure AD Connect cloud sync. The focus of IdFix is to enable you to accomplish this task in a simple, expedient fashion.

The IdFix tool provides you the ability to query, identify, and remediate the majority of object synchronization errors in your Windows Server AD forests in preparation for deployment to Microsoft 365. The utility does not fix all errors, but it does find and fix the majority. This remediation will then allow you to successfully synchronize users, contacts, and groups from on-premises Active Directory into Microsoft 365. Note: IdFix might identify errors beyond those that emerge during synchronization. The most common example is compliance with rfc 2822 for smtp addresses. Although invalid attribute values can be synchronized to the cloud, the product group recommends that these errors be corrected.

Incorrect:

\* AccessChk

Box 2: Enterprise Admins IdFix permissions requirements

The user account that you use to run IdFix must have read and write access to the AD DS domain.

If you aren't sure if your user account meets these requirements, and you're not sure how to check, you can still download and run IdFix. If your user account doesn't have the right permissions, IdFix will simply display an error when you try to run it.

\* Enterprise Admins

The Enterprise Admins group exists only in the root domain of an Active Directory forest of domains. The group is a Universal group if the domain is in native mode. The group is a Global group if the domain is in mixed mode. Members of this group are authorized to make forest-wide changes in Active Directory, like adding child domains.

Incorrect:

\* Domain Admins

Members of the Domain Admins security group are authorized to administer the domain. By default, the Domain Admins group is a member of the Administrators group on all computers that have joined a domain, including the domain controllers. The Domain Admins group is the default owner of any object that's created in Active Directory for the domain by any member of the group. If members of the group create other objects, such as files, the default owner is the Administrators group.

\* Server Operator

Server Operators can log on to a server interactively; create and delete network shares; start and stop services; back up and restore files; format the hard disk of the computer; and shut down the computer. Any service that accesses the system has the Service identity.

\* Domain Users - too few permissions

The Domain Users group includes all user accounts in a domain. When you create a user account in a domain, it's automatically added to this group.

Reference: <https://microsoft.github.io/idfix/>

<https://learn.microsoft.com/en-us/windows-server/identity/ad-ds/manage/understand-security-groups>

**NEW QUESTION 183**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant.

You configure a device compliance policy as shown in the following exhibit.

**Compliance settings** [Edit](#)

**Microsoft Defender ATP**

Require the device to be at or under the machine risk score. Low

**Device Health**

Rooted devices  
Require the device to be at or under the Device Threat Level Block

**System Security**

Require a password to unlock mobile devices Require  
Required password type Device default  
Encryption of data storage on device Require  
Block apps from unknown sources Block

**Actions for noncompliance** [Edit](#)

| Action                         | Schedule    |
|--------------------------------|-------------|
| Mark device noncompliant       | Immediately |
| Retire the noncompliant device | Immediately |

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

When a device reports a medium threat level, the device will

- be locked remotely
- display a notification
- marked as compliant
- marked as noncompliant
- removed from the database

Rooted devices will be

- allowed to access company resources
- marked as compliant
- prevented from accessing company resources
- reported with a low device threat

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android>

**NEW QUESTION 185**

- (Exam Topic 5)

Your network contains three Active Directory forests. There are forests trust relationships between the forests. You create an Azure AD tenant. You plan to sync the on-premises Active Directory to Azure AD. You need to recommend a synchronization solution. The solution must ensure that the synchronization can complete successfully and as quickly as possible if a single server fails. What should you include in the recommendation?

- A. one Azure AD Connect sync server and one Azure AD Connect sync server in staging mode
- B. three Azure AD Connect sync servers and one Azure AD Connect sync server in staging mode
- C. six Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode
- D. three Azure AD Connect sync servers and three Azure AD Connect sync servers in staging mode

**Answer:** A

**Explanation:**

Azure AD Connect can be active on only one server. You can install Azure AD Connect on another server for redundancy but the additional installation would need to be in Staging mode. An Azure AD connect installation in Staging mode is configured and ready to go but it needs to be manually switched to Active to perform directory synchronization.  
Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-install-custom>

**NEW QUESTION 186**

- (Exam Topic 5)

You have a Microsoft 365 tenant and a LinkedIn company page. You plan to archive data from the LinkedIn page to Microsoft 365 by using the LinkedIn connector. Where can you store data from the LinkedIn connector?

- A. a Microsoft OneDrive for Business folder
- B. a Microsoft SharePoint Online document library
- C. a Microsoft 365 mailbox
- D. Azure Files

**Answer:** C

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/compliance/archive-linkedin-data?view=o365-worldwide>

**NEW QUESTION 187**

- (Exam Topic 5)  
You have a Microsoft 365 tenant.  
You plan to manage incidents in the tenant by using the Microsoft 365 security center.  
Which Microsoft service source will appear on the Incidents page of the Microsoft 365 security center?

- A. Microsoft Cloud App Security
- B. Azure Sentinel
- C. Azure Web Application Firewall
- D. Azure Defender

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/security/defender/investigate-alerts?view=o365-worldwide>

**NEW QUESTION 188**

- (Exam Topic 5)  
You configure a data loss prevention (DLP) policy named DLP1 as shown in the following exhibit.

**Choose the types of content to protect**

This policy will protect that matches these requirements. You can choose sensitive info types and existing labels

**Content contains**

Any of these ▾

| Sensitive info type | Match accuracy |     |   |
|---------------------|----------------|-----|---|
|                     | min            | max |   |
| Credit Card Number  | 85             | 100 | × |

**Retention labels**

1 year

Add ▾

[+ Add group](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

DLP1 cannot be applied to [answer choice].

- Exchange email
- SharePoint sites
- OneDrive accounts

DLP1 will be applied only to documents that have [answer choice].

- both a credit card number and the 1 year label applied
- either a credit card number or the 1 year label applied
- between 85 and 100 credit card numbers

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Using a retention label in a policy is only supported for items in SharePoint Online and OneDrive for Business.  
Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/compliance/data-loss-prevention-policies?view=o365-worldwid>

**NEW QUESTION 191**

- (Exam Topic 5)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

| Name  | UPN suffix   |
|-------|--------------|
| User1 | Contoso.com  |
| User2 | Fabrikam.com |

The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

**PROVISION FROM ACTIVE DIRECTORY**

**Azure AD Connect cloud provisioning**

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

**Azure AD Connect sync**

|                    |                      |
|--------------------|----------------------|
| Sync Status        | Enabled              |
| Last Sync          | Less than 1 hour ago |
| Password Hash Sync | Enabled              |

**USER SIGN-IN**

|                             |          |           |
|-----------------------------|----------|-----------|
| Federation                  | Disabled | 0 domains |
| Seamless single sign-on     | Enabled  | 1 domain  |
| Pass-through authentication | Enabled  | 2 agents  |

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD. Solution: From the Microsoft Entra admin center, you add fabrikam.com as a custom domain. You instruct User2 to sign in as user2@fabrikam.com. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

The on-premises Active Directory domain is named contoso.com. To enable users to sign on using a different UPN (different domain), you need to add the domain to Microsoft 365 as a custom domain.

**NEW QUESTION 192**

- (Exam Topic 5)  
HOTSPOT

You have a Microsoft 365 E5 subscription linked to an Azure Active Directory (Azure AD) tenant. The tenant contains a group named Group1 and the users shown in the following table:

| Name   | Role                             |
|--------|----------------------------------|
| Admin1 | Conditional Access administrator |
| Admin2 | Security administrator           |
| Admin3 | User administrator               |

The tenant has a conditional access policy that has the following configurations: Name: Policy1

Assignments:

- Users and groups: Group1
- Cloud apps or actions: All cloud apps
- > Access controls:
  - > Grant, require multi-factor authentication
  - > Enable policy: Report-only

You set Enabled Security defaults to Yes for the tenant.

For each of the following settings select Yes, if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Statements**

**Yes No**

- Admin1 can set Enable policy for Policy1 to **On**.  Yes  No
- Admin2 can set Enable policy for Policy1 to **Off**.  Yes  No
- Admin3 can set Users and groups for Policy1 to **All users**.  Yes  No

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Report-only mode is a new Conditional Access policy state that allows administrators to evaluate the impact of Conditional Access policies before enabling them in their environment. With the release of report-only mode:

- > Conditional Access policies can be enabled in report-only mode.
- > During sign-in, policies in report-only mode are evaluated but not enforced.
- > Results are logged in the Conditional Access and Report-only tabs of the Sign-in log details.
- > Customers with an Azure Monitor subscription can monitor the impact of their Conditional Access policies using the Conditional Access insights workbook.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-report-on>

**NEW QUESTION 195**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

| Name  | Role         |
|-------|--------------|
| User1 | Global admin |
| User2 | None         |
| User3 | None         |

You provision the private store in Microsoft Store for Business.

You assign Microsoft Store for Business roles to the users as shown in the following table.

| Name  | Role            |
|-------|-----------------|
| User1 | None            |
| User2 | Purchaser       |
| User3 | Basic Purchaser |

You need to identify which users can add apps to the private store, and which users can assign apps from Microsoft Store for Business.

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Can add apps to the private store:

▼

User2 only

User1 and User2 only

User2 and User3 only

User1, User2, and User3

Can assign apps from Microsoft Store for Business:

▼

User2 only

User1 and User2 only

User2 and User3 only

User1, User2, and User3

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business> <https://docs.microsoft.com/en-us/education/windows/education-scenarios-store-for-business#basic-purchaser-rol>

**NEW QUESTION 198**

- (Exam Topic 5)

You have a Microsoft Azure Active Directory (Azure AD) tenant named Contoso.com. You create a Microsoft Defender for identity instance Contoso.

The tenant contains the users shown in the following table.

| Name  | Member of group                              | Azure AD role          |
|-------|--|------------------------|
| User1 | Defender for Identity Contoso Administrators | None                   |
| User2 | Defender for Identity Contoso Users          | None                   |
| User3 | None   | Security administrator |
| User4 | Defender for Identity Contoso Users          | Global administrator   |

You need to modify the configuration of the Defender for identify sensors.

Solutions: You instruct User1 to modify the Defender for identity sensor configuration. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 202**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains a user named User1.

User1 exceeds the default daily limit of allowed email messages and is on the Restricted entities list. You need to remove User1 from the Restricted entities list.

What should you use?

- A. the Exchange admin center
- B. the Microsoft Purview compliance portal
- C. the Microsoft 365 admin center
- D. the Microsoft 365 Defender portal
- E. the Microsoft Entra admin center

**Answer:** D

**Explanation:**

Admins can remove user accounts from the Restricted entities page in the Microsoft 365 Defender portal or in Exchange Online PowerShell.

Remove a user from the Restricted entities page in the Microsoft 365 Defender portal

In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & collaboration > Review

> Restricted entities. Or, to go directly to the Restricted entities page, use <https://security.microsoft.com/restrictedentities>.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/removing-user-from-restricted-user>

**NEW QUESTION 205**

- (Exam Topic 5)

You have the sensitivity labels shown in the following exhibit.

[Home](#) > sensitivity

**Labels**      Label policies      Auto-labeling(preview)

Sensitivity labels are used to classify email messages, documents, sites, and more. When a label is applied (automatically or by the user), the content or site is protected based on the settings you choose. For example, you can create labels that encrypt files, add content marking, and control user access to specific sites. [Learn more about sensitivity labels](#)

+ Create a label    Publish labels    Refresh

| Name     | Order     | Created by | Last modified |
|----------|-----------|------------|---------------|
| Label1   | 0-highest | Prvi       | 04/24/2020    |
| - Label2 | 1         | Prvi       | 04/24/2020    |
| Label3   | 0-highest | Prvi       | 04/24/2020    |
| Label4   | 0-highest | Prvi       | 04/24/2020    |
| - Label5 | 5         | Prvi       | 04/24/2020    |
| Label6   | 0-highest | Prvi       | 04/24/2020    |

Which labels can users apply to content?

- A. Label3, Label4, and Label6 only
- B. Label1, Label2, Label3, Label4, Label5, and Label6
- C. Label1, Label2, and Label5 only
- D. Label1, Label3, Label4, and Label6 only

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide>

**NEW QUESTION 208**

- (Exam Topic 5)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

| Name  | Member of      |
|-------|----------------|
| User1 | Group1         |
| User2 | Group2         |
| User3 | Group1, Group2 |

You integrate Microsoft Intune and contoso.com as shown in the following exhibit.

### Configure

Microsoft Intune

Save Discard Delete

You purchase a Windows 10 device named Device1.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| If User1 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.     | <input type="radio"/> | <input type="radio"/> |
| If User2 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.     | <input type="radio"/> | <input type="radio"/> |
| If User3 registers Device1 in contoso.com, Device1 is enrolled in Intune automatically. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll>

**NEW QUESTION 209**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains devices enrolled in Microsoft Intune. The devices are configured as shown in the following table.

| Name    | Platform   |
|---------|------------|
| Device1 | Windows 10 |
| Device2 | Android    |
| Device3 | iOS        |

You plan to perform the following device management tasks in Microsoft Endpoint Manager:

- > Deploy a VPN connection by using a VPN device configuration profile.
- > Configure security settings by using an Endpoint Protection device configuration profile. You support the management tasks.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

VPN device configuration profile:

|                              |
|------------------------------|
| ▼                            |
| Device1 only                 |
| Device1 and Device2 only     |
| Device1 and Device3 only     |
| Device1, Device2 and Device3 |

Endpoint Protection device configuration profile:

|                              |
|------------------------------|
| ▼                            |
| Device1 only                 |
| Device1 and Device2 only     |
| Device1 and Device3 only     |
| Device1, Device2 and Device3 |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application Description automatically generated

<https://docs.microsoft.com/en-us/mem/intune/configuration/vpn-settings-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-macos>

**NEW QUESTION 211**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft Entra admin center, you assign SecAdmin1 the Security Administrator role.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp>

**NEW QUESTION 214**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. You deploy an Azure AD tenant.

Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: From Azure AD Connect, you modify the Azure AD credentials. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

The question states that "all the user account synchronizations completed successfully". Therefore, the Azure AD credentials are configured correctly in Azure AD Connect. It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

**NEW QUESTION 219**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains the compliance policies shown in the following table.

| Name    | Require BitLocker | Require the device to be at or under the machine risk score |
|---------|-------------------|---|
| Policy1 | Required          | High  |
| Policy2 | Not configured    | Medium  |
| Policy3 | Required          | Low   |

The tenant contains the devices shown in the following table.

| Name    | BitLocker Drive Encryption (BitLocker) | Microsoft Defender for Endpoint risk status | Policies applied |
|---------|--|---|------------------|
| Device1 | Configured                             | High  | Policy1, Policy3 |
| Device2 | Not configured                         | Medium                                      | Policy2, Policy3 |
| Device3 | Not configured                         | Low   | Policy1, Policy2 |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

| Statements                      | Yes                   | No                    |
|---------------------------------|-----------------------|-----------------------|
| Device1 is marked as compliant. | <input type="radio"/> | <input type="radio"/> |
| Device2 is marked as compliant. | <input type="radio"/> | <input type="radio"/> |
| Device3 is marked as compliant. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 220**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name   | Member of Microsoft 365 role group                              |
|--------|---|
| Admin1 | Content Explorer List viewer<br>Content Explorer Content viewer |
| Admin2 | Security Administrator<br>Content Explorer List Viewer          |

You have labels in Microsoft 365 as shown in the following table.

| Name   | Type        |
|--------|-------------|
| Label1 | Sensitivity |
| Label2 | Retention   |

The content in Microsoft 365 is assigned labels as shown in the following table.

| Name  | Type                             | Label  |
|-------|----------------------------------|--------|
| File1 | File in SharePoint Online        | Label1 |
| Mail1 | Email message in Exchange Online | Label2 |

You have labels in Microsoft 365 as shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

**Answer Area**

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| Admin1 can view the contents of File1 by using Content explorer.            | <input type="radio"/> | <input type="radio"/> |
| Admin2 can view the contents of File1 by using Content explorer.            | <input type="radio"/> | <input type="radio"/> |
| Admin2 can use Content explorer to verify that Label2 is assigned to Mail1. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

| Statements  | Yes                              | No                               |
|---|----------------------------------|----------------------------------|
| Admin1 can view the contents of File1 by using Content explorer.            | <input checked="" type="radio"/> | <input type="radio"/>            |
| Admin2 can view the contents of File1 by using Content explorer.            | <input type="radio"/>            | <input checked="" type="radio"/> |
| Admin2 can use Content explorer to verify that Label2 is assigned to Mail1. | <input type="radio"/>            | <input checked="" type="radio"/> |

**NEW QUESTION 222**

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains a user named User1. User1 requires admin access to perform the following tasks:  
Manage Microsoft Exchange Online settings.  
Create Microsoft 365 groups.  
You need to ensure that User1 only has admin access for eight hours and requires approval before the role assignment takes place.  
What should you use?

- A. Azure AD Identity Protection
- B. Microsoft Entra Verified ID
- C. Conditional Access
- D. Azure AD Privileged Identity Management (PIM)

**Answer: D**

**Explanation:**

Privileged Identity Management provides time-based and approval-based role activation to mitigate the risks of excessive, unnecessary, or misused access permissions on resources that you care about. Here are some of the key features of Privileged Identity Management:  
Provide just-in-time privileged access to Azure AD and Azure resources  
Assign time-bound access to resources using start and end dates  
Require approval to activate privileged roles  
Enforce multi-factor authentication to activate any role  
Use justification to understand why users activate  
Get notifications when privileged roles are activated  
Conduct access reviews to ensure users still need roles  
Download audit history for internal or external audit  
Prevents removal of the last active Global Administrator and Privileged Role Administrator role assignments. Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure>

**NEW QUESTION 224**

- (Exam Topic 5)

You have a Microsoft 365 subscription.  
Your company has a customer ID associated to each customer. The customer IDs contain 10 numbers followed by 10 characters. The following is a sample customer ID: 12-456-7890-abc-de-fghij.  
You plan to create a data loss prevention (DLP) policy that will detect messages containing customer IDs. D18912E1457D5D1DDCDBD40AB3BF70D5D  
What should you create to ensure that the DLP policy can detect the customer IDs?

- A. a sensitive information type
- B. a sensitivity label
- C. a supervision policy
- D. a retention label

**Answer: A**

**Explanation:**

Reference:  
<https://docs.microsoft.com/en-us/microsoft-365/compliance/custom-sensitive-info-types?view=o365-worldwide>

**NEW QUESTION 226**

- (Exam Topic 5)

You have a Microsoft 365 tenant that has Enable Security defaults set to No in Azure Active Directory (Azure AD).  
The tenant has two Compliance Manager assessments as shown in the following table.

| Name                     | Score | Status     | Assessment progress | Your improvement actions | Microsoft actions    | Group  | Product       | Regulation               |
|--------------------------|-------|------------|---------------------|--------------------------|----------------------|--------|---------------|--------------------------|
| SP800                    | 15444 | Incomplete | 72%                 | 3 of 450 completed       | 887 of 887 completed | Group1 | Microsoft 365 | NIST 800-53              |
| Data Protection Baseline | 14370 | Incomplete | 70%                 | 3 of 489 completed       | 835 of 835 completed | Group2 | Microsoft 365 | Data Protection Baseline |

The SP800 assessment has the improvement actions shown in the following table.

| Improvement action  | Test status | Impact    | Points achieved | Regulations                           |
|---|-------------|-----------|-----------------|---------------------------------------|
| Establish a threat intelligence program                   | None        | +9 points | 0/9             | NIST 800-53, Data Protection Baseline |
| Establish and document a configuration management program | None        | +9 points | 0/9             | NIST 800-53, Data Protection Baseline |

You perform the following actions:

- > For the Data Protection Baseline assessment, change the Test status of Establish a threat intelligence program to Implemented.
- > Enable multi-factor authentication (MFA) for all users.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements  | Yes                   | No                    |
|---|-----------------------|-----------------------|
| Establish a threat intelligence program will appear as Implemented in the SP800 assessment. | <input type="radio"/> | <input type="radio"/> |
| The SP800 assessment score will increase by 54 points.                                      | <input type="radio"/> | <input type="radio"/> |
| The Data Protection Baseline score will increase by 9 points.                               | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/compliance-manager-assessments?view=o365-worldwide> <https://docs.microsoft.com/en-us/microsoft-365/compliance/compliance-score-calculation?view=o365-worldwide>

**NEW QUESTION 227**

- (Exam Topic 5)

You have a Microsoft 365 tenant.

You plan to implement device configuration profiles in Microsoft Intune. Which platform can you manage by using the profiles?

- A. Ubuntu Linux
- B. macOS
- C. Android Enterprise
- D. Windows 8.1

**Answer:** D

**NEW QUESTION 230**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that uses Microsoft Intune.

You need to ensure that users can select a department when they enroll their device in Intune. What should you create?

- A. scope tags
- B. device configuration profiles
- C. device categories
- D. device compliance policies

**Answer:** C

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/device-group-mapping>

**NEW QUESTION 234**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Office 365 Advanced Threat Protection (ATP) settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Azure Active Directory admin center, you assign SecAdmin1 the Teams Service Administrator role.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp?view=o365-worldwide>

**NEW QUESTION 237**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains a Windows 10 device named Device1 and the Microsoft Endpoint Manager policies shown in the following table.

| Name    | Type                            | Block execution of potentially obfuscated scripts (js/vbs/ps) |
|---------|---------------------------------|---|
| Policy1 | Attack surface reduction (ASR)  | Audit mode  |
| Policy2 | Microsoft Defender ATP Baseline | Disable   |
| Policy3 | Device configuration profile    | Not configured  |

The policies are assigned to Device1.

Which policy settings will be applied to Device1?

- A. only the settings of Policy1
- B. only the settings of Policy2

- C. only the settings of Policy3
- D. no settings

**Answer:** D

**NEW QUESTION 238**

- (Exam Topic 5)  
HOTSPOT

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name  | Role                            |
|-------|---------------------------------|
| User1 | Global Administrator            |
| User2 | Service Support Administrator   |
| User3 | Cloud Application Administrator |
| User4 | None                            |

You plan to provide User4 with early access to Microsoft 365 feature and service updates.

You need to identify which Microsoft 365 setting must be configured, and which user can modify the setting. The solution must use the principle of least privilege.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Microsoft 365 setting:

▼

Office installation options

Privileged access

Release preferences

User:

▼

User1 only

User2 only

User3 only

User1 and User2 only

User1 and User3 only

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Microsoft 365 setting:

▼

Office installation options

Privileged access

Release preferences

User:

▼

User1 only

User2 only

User3 only

User1 and User2 only

User1 and User3 only

**NEW QUESTION 242**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name  | Member of      |
|-------|----------------|
| User1 | Group1, Group2 |
| User2 | Group2, Group3 |
| User3 | Group1, Group3 |

In Microsoft Endpoint Manager, you have the Policies for Office apps settings shown in the following table.

| Name    | Priority | Applies to |
|---------|----------|------------|
| Policy1 | 0        | Group1     |
| Policy2 | 1        | Group2     |
| Policy3 | 2        | Group3     |

The policies use the settings shown in the following table.

| Name    | Cursor movement | Clear cache on close |
|---------|-----------------|----------------------|
| Policy1 | Logical         | Disabled             |
| Policy2 | Not configured  | Enabled              |
| Policy3 | Visual          | Enabled              |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements                               | Yes                   | No                    |
|--|-----------------------|-----------------------|
| User1 has their cache cleared on close.  | <input type="radio"/> | <input type="radio"/> |
| User2 has Cursor movement set to Visual. | <input type="radio"/> | <input type="radio"/> |
| User3 has Cursor movement set to Visual. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated  
Reference:  
<https://docs.microsoft.com/en-us/deployoffice/overview-office-cloud-policy-service>

**NEW QUESTION 247**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

You plan to implement Microsoft Purview policies to meet the following requirements:

Identify documents that are stored in Microsoft Teams and SharePoint that contain Personally Identifiable Information (PII). Report on shared documents that contain PII. What should you create?

- A. a data loss prevention (DLP) policy
- B. a retention policy
- C. an alert policy
- D. a Microsoft Defender for Cloud Apps policy

**Answer:** A

**Explanation:**

Demonstrate data protection

Protection of personal information in Microsoft 365 includes using data loss prevention (DLP) capabilities. With DLP policies, you can automatically protect sensitive information across Microsoft 365.

There are multiple ways you can apply the protection. Educating and raising awareness to where EU resident data is stored in your environment and how your employees are permitted to handle it represents one level of information protection using Office 365 DLP.

In this phase, you create a new DLP policy and demonstrate how it gets applied to the IBANs.docx file you stored in SharePoint Online in Phase 2 and when you attempt to send an email containing IBANs.

- > From the Security & Compliance tab of your browser, click Home.
- > Click Data loss prevention > Policy.
- > Click + Create a policy.
- > In Start with a template or create a custom policy, click Custom > Custom policy > Next.
- > In Name your policy, provide the following details and then click Next: a. Name: EU Citizen PII Policy
- b. Description: Protect the personally identifiable information of European citizens
- > Etc. Reference:

<https://learn.microsoft.com/en-us/compliance/regulatory/gdpr-discovery-protection-reporting-in-office365-dev-t>

**NEW QUESTION 249**

- (Exam Topic 5)

You have a Microsoft 365 subscription that contains the users shown in the following table.

| Name  | Member of | Azure Active Directory (Azure AD) role |
|-------|-----------|--|
| User1 | Group1    | Global administrator                   |
| User2 | Group2    | Cloud device administrator             |

You configure an Enrollment Status Page profile as shown in the following exhibit.

### Settings

The enrollment status page appears during initial device setup. If enabled, users can see the installation progress of assigned apps and profiles.

Show app and profile installation progress.  Yes  No

Show time limit error when installation takes longer than specified number of minutes.

Show custom message when time limit error occurs.  Yes  No

Allow users to collect logs about installation errors.  Yes  No

Only show page to devices provisioned by out-of-box experience (OOBE)  Yes  No

Block device use until all apps and profiles are installed  Yes  No

You assign the policy to Group1.

You purchase the devices shown in the following table.

| Name    | Platform   |
|---------|------------|
| Device1 | Windows 10 |
| Device2 | Android    |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| If User1 performs the initial device enrollment for Device1, the Enrollment Status Page will show. | <input type="radio"/> | <input type="radio"/> |
| If User1 performs the initial device enrollment for Device2, the Enrollment Status Page will show. | <input type="radio"/> | <input type="radio"/> |
| If User2 performs the initial device enrollment for Device2, the Enrollment Status Page will show. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-status>

**NEW QUESTION 254**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

From Microsoft 365 Defender, you create a role group named US eDiscovery Managers by copying the eDiscovery Manager role group.

You need to ensure that the users in the new role group can only perform content searches of mailbox content for users in the United States.

Solution: From Windows PowerShell, you run the New-complianceSecurityFilter cmdlet with the appropriate parameters.

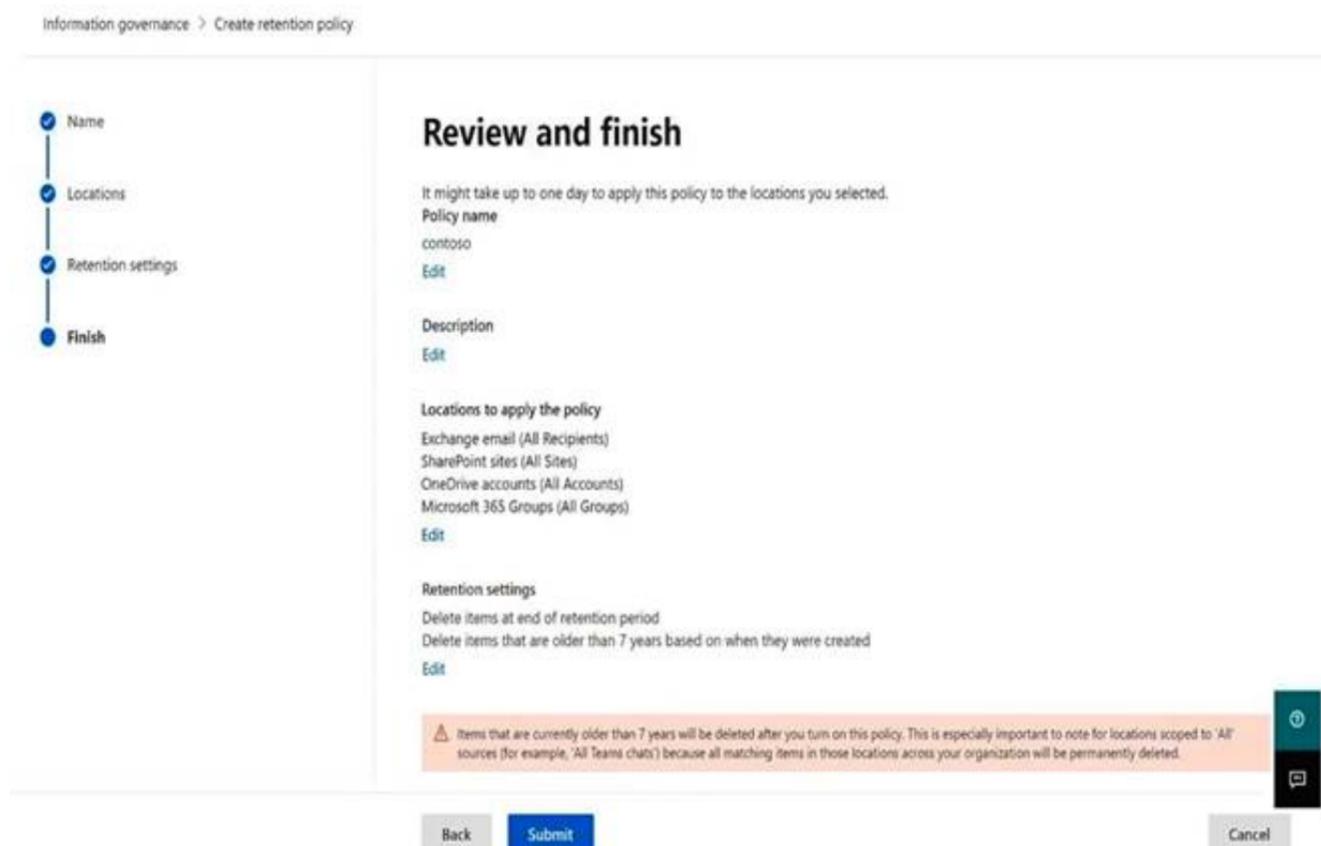

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 257**

- (Exam Topic 5)  
HOTSPOT  
You have a Microsoft 365 tenant.  
You plan to create a retention policy as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

**Answer Area**

Microsoft SharePoint files that are affected by the policy will be [answer choice].

- recoverable for up to seven years
- deleted seven years after they were created
- retained for only seven years from when they were created

Once the policy is created, [answer choice].

- some data may be deleted immediately
- data will be retained for a minimum of seven years
- users will be prevented from permanently deleting email messages for seven years

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Deleted seven years after they were created. From the exhibit:  
The retention policy applies to SharePoint sites.

Delete items that are older than 7 years based on when they were created. Box 2: data will be retained for a minimum of seven years

The longest retention period wins. If content is subject to multiple retention settings that retain content for different periods of time, the content will be retained until the end of the longest retention period for the item.

Note: Use a retention policy to assign the same retention settings for content at a site or mailbox level, and use a retention label to assign retention settings at an item level (folder, document, email).

For example, if all documents in a SharePoint site should be retained for 5 years, it's more efficient to do this with a retention policy than apply the same retention label to all documents in that site. However, if some documents in that site should be retained for 5 years and others retained for 10 years, a retention policy wouldn't be able to do this. When you need to specify retention settings at the item level, use retention labels.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/retention>

**NEW QUESTION 259**

- (Exam Topic 5)  
You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

| Name  | Mailbox size |
|-------|--------------|
| User1 | 5 MB         |
| User2 | 15 MB        |
| User3 | 25 MB        |
| User4 | 55 MB        |

You have a Microsoft Office 365 retention label named Retention1 that is published to Exchange email.

You have a Microsoft Exchange Online retention policy that is applied to all mailboxes. The retention policy contains a retention tag named Retention2.

Which users can assign Retention1 and Retention2 to their emails? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can assign Retention1:  ▼

|                                |
|--------------------------------|
| User4 only                     |
| User3 and User4 only           |
| User2, User3, and User4 only   |
| User1, User2, User3, and User4 |

Users who can assign Retention2:  ▼

|                                |
|--------------------------------|
| User4 only                     |
| User3 and User4 only           |
| User2, User3, and User4 only   |
| User1, User2, User3, and User4 |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, chat or text message Description automatically generated

<https://docs.microsoft.com/en-us/microsoft-365/compliance/retention-policies-exchange?view=o365-worldwide>

**NEW QUESTION 260**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains four devices enrolled in Microsoft Intune as shown in the following table.

| Name    | Platform   |
|---------|------------|
| Device1 | Windows 10 |
| Device2 | Android    |
| Device3 | macOS      |
| Device4 | iOS        |

You plan to deploy Microsoft 365 Apps for enterprise by using Microsoft Endpoint Manager. To which devices can you deploy Microsoft 365 Apps for enterprise?

- A. Device1 only
- B. Device1 and Device3 only
- C. Device2 and Device4 only
- D. Device1, Device2, and Device3 only
- E. Device1, Device2, Device3, and Device4

**Answer:** B

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/apps-add>

**NEW QUESTION 264**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that has sensitivity label support enabled for Microsoft and SharePoint Online.

You need to enable unified labeling for Microsoft 365 groups. Which cmdlet should you run?

- A. set-unifiedGroup
- B. Set-Labelpolicy
- C. Execute-AzureAdLabelSync
- D. Add-UnifiedGroupLinks

**Answer:** C

**NEW QUESTION 269**

- (Exam Topic 5)

You have an Azure AD tenant.

You have 1,000 computers that run Windows 10 Pro and are joined to Azure AD. You purchase a Microsoft 365 E3 subscription.

You need to deploy Windows 10 Enterprise to the computers. The solution must minimize administrative effort.

What should you do?

- A. From the Microsoft Endpoint Manager admin center, create a Windows Autopilot deployment profile. Assign the profile to all the computer
- B. Instruct users to restart their computer and perform a network restart.
- C. Enroll the computers in Microsoft Intun
- D. Create a configuration profile by using the Edition upgrade and mode switch templat
- E. From the Microsoft Endpoint Manager admin center, assign the profile to all the computers and instruct users to restart their computer.
- F. From Windows Configuration Designer, create a provisioning package that has an EditionUpgrade configuration and upload the package to a Microsoft SharePoint Online sit
- G. Instruct users to run the provisioning package from SharePoint Online.

- H. From the Azure Active Directory admin center, create a security group that has dynamic device membershipi
- I. Assign licenses to the group and instruct users to sign in to their computer.

**Answer:** B

**NEW QUESTION 274**

- (Exam Topic 5)

You have a Microsoft 365 tenant that contains a Windows 10 device named Device1 and the Microsoft Endpoint Manager policies shown in the following table.

| Name    | Type                            | Block execution of potentially obfuscated scripts (js/vbs/ps) |
|---------|---------------------------------|---|
| Policy1 | Attack surface reduction (ASR)  | Audit mode  |
| Policy2 | Microsoft Defender ATP Baseline | Disable   |
| Policy3 | Device configuration profile    | Not configured  |

- A. only the settings of Policy1
- B. only the settings of Policy2
- C. only the settings of Policy3
- D. no settings

**Answer:** C

**NEW QUESTION 275**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains 500 Windows 10 devices and a Windows 10 compliance policy.

You deploy a third-party antivirus solution to the devices. You need to ensure that the devices are marked as compliant.

Which three settings should you modify in the compliance policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

**Windows 10 compliance policy**  
Windows 10 and later

Encryption

Encryption of data storage on device  Require  Not configured

Device Security

Firewall  Require  Not configured

Trusted Platform Module (TPM)  Require  Not configured

Antivirus  Require  Not configured

Antispyware  Require  Not configured

Defender

Microsoft Defender Antimalware  Require  Not configured

Microsoft Defender Antimalware minimum version  Not configured

Microsoft Defender Antimalware security intelligence up-to-date  Require  Not configured

Real-time protection  Require  Not configured

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows>

**NEW QUESTION 276**

- (Exam Topic 5)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that contains a user named User1. You need to enable User1 to create Compliance Manager assessments.

Solution: From the Microsoft 365 compliance center, you add User1 to the Compliance Manager Assessors role group.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:**

Reference:

<https://github.com/MicrosoftDocs/microsoft-365-docs/blob/public/microsoft-365/security/office-365-security/pe>

**NEW QUESTION 281**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant that contains two users named User1 and User2 and the groups shown in the following table.

| Name   | Members       |
|--------|---------------|
| Group1 | User1         |
| Group2 | User2, Group1 |

You have a Microsoft Intune enrollment policy that has the following settings:

- > MDM user scope: Some
- > Groups: Group1
- > MAM user scope: Some
- > Groups: Group2

You purchase the devices shown in the following table.

| Name    | Platform   |
|---------|------------|
| Device1 | Windows 10 |
| Device2 | Android    |

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements   | Yes                   | No                    |
|--|-----------------------|-----------------------|
| User1 can enroll Device1 in Intune by using automatic enrollment | <input type="radio"/> | <input type="radio"/> |
| User1 can enroll Device2 in Intune by using automatic enrollment | <input type="radio"/> | <input type="radio"/> |
| User2 can enroll Device2 in Intune by using automatic enrollment | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll> <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll-device-administrator>

**NEW QUESTION 285**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You plan to implement Microsoft Purview Privileged Access Management. Which Microsoft Office 365 workloads support privileged access?

- A. Microsoft Exchange Online only
- B. Microsoft Teams only
- C. Microsoft Exchange Online and SharePoint Online only
- D. Microsoft Teams and SharePoint Online only
- E. Microsoft Teams, Exchange Online, and SharePoint Online

**Answer: A**

**Explanation:**

Privileged access management

Having standing access by some users to sensitive information or critical network configuration settings in Microsoft Exchange Online is a potential pathway for compromised accounts or internal threat activities. Microsoft Purview Privileged Access Management helps protect your organization from breaches and helps to meet compliance best practices by limiting standing access to sensitive data or access to critical configuration settings. Instead of administrators having constant access, just-in-time access rules are implemented for tasks that need elevated permissions. Enabling privileged access management for Exchange Online in Microsoft 365 allows your organization to operate with zero standing privileges and provide a layer of defense against standing administrative access vulnerabilities.

Note: When will privileged access support Office 365 workloads beyond Exchange? Privileged access management will be available in other Office 365 workloads soon. Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/privileged-access-management-solution-overview> <https://learn.microsoft.com/en-us/microsoft-365/compliance/privileged-access-management>

**NEW QUESTION 287**

- (Exam Topic 5)

You have a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the users shown in the following table.

| Name  | Role                   |
|-------|------------------------|
| User1 | Exchange Administrator |
| User2 | User Administrator     |
| User3 | Global Administrator   |
| User4 | None                   |

You add another user named User5 to the User Administrator role. You need to identify which two management tasks User5 can perform. Which two tasks should you identify? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. Delete User2 and User4 only.
- B. Reset the password of User4 only
- C. Reset the password of any user in Azure AD.
- D. Delete User1, User2, and User4 only.
- E. Reset the password of User2 and User4 only.
- F. Delete any user in Azure AD.

**Answer:** AE

**Explanation:**

Users with the User Administrator role can create users and manage all aspects of users with some restrictions (see below).

Only on users who are non-admins or in any of the following limited admin roles:

- Directory Readers
- Guest Inviter
- Helpdesk Administrator
- Message Center Reader
- Reports Reader
- User Administrator Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/directory-assign-admin-roles#availab>

**NEW QUESTION 288**

- (Exam Topic 5)

DRAG DROP

You have a Microsoft 365 E5 tenant.

You need to implement compliance solutions that meet the following requirements:

- Use a file plan to manage retention labels.
- Identify, monitor, and automatically protect sensitive information.
- Capture employee communications for examination by designated reviewers.

Which solution should you use for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

| Solutions               | Answer Area  |
|-------------------------|--|
| Data loss prevention    | Identify, monitor, and automatically protect sensitive information:      |
| Information governance  | Capture employee communications for examination by designated reviewers: |
| Insider risk management | Use a file plan to manage retention labels:                              |
| Records management      |  |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

**NEW QUESTION 293**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1. You need to automatically label the documents on Site1 that contain credit card numbers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

| Actions  | Answer Area |
|--|-------------|
| Create a sensitivity label.                    |             |
| Create an auto-labeling policy.                |             |
| Create a sensitive information type.           |             |
| Wait 24 hours, and then turn on the policy.    |             |
| Publish the label.                             |             |
| Create a retention label.                      |             |
| Wait eight hours, and then turn on the policy. |             |

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application, email Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide#what-labe> <https://docs.microsoft.com/en-us/microsoft-365/compliance/apply-sensitivity-label-automatically?view=o365-w>

**NEW QUESTION 296**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription.

You need to identify which users accessed Microsoft Office 365 from anonymous IP addresses during the last seven days.

What should you do?

- A. From the Cloud App Security admin center, select Users and accounts.
- B. From the Microsoft 365 security center, view the Threat tracker.
- C. From the Microsoft 365 admin center, view the Security & compliance report.
- D. From the Azure Active Directory admin center, view the Risky sign-ins report.

**Answer:** A

**NEW QUESTION 297**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 subscription.

You are planning a threat management solution for your organization.

You need to minimize the likelihood that users will be affected by the following threats:

- > Opening files in Microsoft SharePoint that contain malicious content
- > Impersonation and spoofing attacks in email messages

Which policies should you create in Microsoft 365 Defender? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Opening files in SharePoint that contain malicious content:

|                          |                  |
|--------------------------|------------------|
| <input type="checkbox"/> | Anti-spam        |
| <input type="checkbox"/> | Anti-Phishing    |
| <input type="checkbox"/> | Safe Attachments |
| <input type="checkbox"/> | Safe Links       |

Impersonation and spoofing attacks in email messages:

|                          |                  |
|--------------------------|------------------|
| <input type="checkbox"/> | Anti-spam        |
| <input type="checkbox"/> | Anti-Phishing    |
| <input type="checkbox"/> | Safe Attachments |
| <input type="checkbox"/> | Safe Links       |

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Opening files in SharePoint that contain malicious content:

|                                     |                  |
|-------------------------------------|------------------|
| <input type="checkbox"/>            | Anti-spam        |
| <input type="checkbox"/>            | Anti-Phishing    |
| <input checked="" type="checkbox"/> | Safe Attachments |
| <input type="checkbox"/>            | Safe Links       |

Impersonation and spoofing attacks in email messages:

|                                     |                  |
|-------------------------------------|------------------|
| <input type="checkbox"/>            | Anti-spam        |
| <input checked="" type="checkbox"/> | Anti-Phishing    |
| <input type="checkbox"/>            | Safe Attachments |
| <input type="checkbox"/>            | Safe Links       |

**NEW QUESTION 299**

- (Exam Topic 5)

You have a Microsoft 365 ES subscription that has three auto retention policies as show in the following exhibit.

```

Select Administrator Windows PowerShell
Name           : Retention1
Priority        : 200
RecordTypes    : {MicrosoftTeams}
Operations      : {}
UserIds        : {}
RetentionDuration : ThreeMonths

Name           : Retention2
Priority        : 150
RecordTypes    : {MicrosoftTeams}
Operations      : {teamcreated}
UserIds        : {User1@sk200628outlook.onmicrosoft.com}
RetentionDuration : SixMonths

Name           : Retention3
Priority        : 100
RecordTypes    : {}
Operations      : {}
UserIds        : {User2@sk200628outlook.onmicrosoft.com}
RetentionDuration : TwelveMonths

PS C:\>
    
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic NOTE Each correct selection is worth one point.

Answer Area

If User1 creates a team in Microsoft Teams, the event is [answer choice]

- not retained
- retained for 90 days
- retained for six months
- retained for one year

If User2 adds a channel in Microsoft Teams, the event is [answer choice]

- not retained
- retained for 90 days
- retained for six months
- retained for one year

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

If User1 creates a team in Microsoft Teams, the event is [answer choice]

- not retained
- retained for 90 days
- retained for six months
- retained for one year

If User2 adds a channel in Microsoft Teams, the event is [answer choice]

- not retained
- retained for 90 days
- retained for six months
- retained for one year

**NEW QUESTION 304**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 subscription that contains a Microsoft 365 group named Group1. Group1 is configured as shown in the following exhibit.

**Group1**  
Private group • 1 owner • 1 member

General Members Settings Microsoft Teams

**General settings**

- Allow external senders to email this group
- Send copies of group conversations and events to group members
- Hide from my organization's global address list

**Privacy**

- Private
- Public

An external user named User1 has an email address of user1@outlook.com. You need to add User1 to Group1. What should you do first, and which portal should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Action:

- Add User1 to the subscription as an active user.
- For Group1, change the Privacy setting to Public.
- For Group1, select Allow external senders to email this group.
- Invite User1 to collaborate with your organization as a guest.

Portal:

- The Microsoft Entra admin center
- The Exchange admin center
- The Microsoft 365 admin center
- The Microsoft Purview compliance portal

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Invite User1 to collaborate with your organization as a guest.

To manage guest users of a Microsoft 365 tenant via the Admin Center portal, go through the following steps. Navigate with your Web browser to <https://admin.microsoft.com>.

On the left pane, click on "Users", then click "Guest Users".

On the "Guest Users" page, to create a new guest user, click on either the "Add a guest user" link on the top of the page or click on "Go to Azure Active Directory to add guest users" link at the bottom of the page. Both of these links will take you to the Azure Active Directory portal, which is located at <https://aad.portal.azure.com>.

On the "New user" page in the Microsoft Azure portal, you must choose to either "Create user" or "Invite user". If you choose the "Create user" option, this will create a new user in your organization, which will have a login address with format username@tenantdomain.dot.com. If you choose the "Invite user" option, this will invite a new guest user to collaborate with your organization. The user will be emailed an email invitation which they can accept in order to begin collaborating. For the purpose of creating a guest user, you must choose the "Invite user" option.

Box 2: The Microsoft Entra admin center

Microsoft Entra admin center unites Azure AD with family of identity and access products

Microsoft Entra admin center gives customers an entire toolset to secure access for everyone and everything in multicloud and multiplatform environments. The entire Microsoft Entra product family is available at this new admin center, including Azure Active Directory (Azure AD) and Microsoft Entra Permissions Management, formerly known as CloudKnox.

Starting this month, waves of customers will begin to be automatically directed to [entra.microsoft.com](https://entra.microsoft.com) from Microsoft 365 in place of the Azure AD admin center ([aad.portal.azure.com](https://aad.portal.azure.com)).

<https://stefanos.cloud/kb/how-to-manage-microsoft-365-guest-users> <https://m365admin.handsontek.net/microsoft-entra-admin-center-unites-azure-ad-with-family-of-identity-and-ac>

**NEW QUESTION 305**

- (Exam Topic 5)

You have a Microsoft 365 E5 tenant.

You need to create a policy that will trigger an alert when unusual Microsoft Office 365 usage patterns are detected.

What should you use to create the policy?

- A. the Microsoft 365 admin center
- B. the Microsoft Purview compliance portal
- C. the Microsoft Defender for Cloud Apps portal
- D. the Microsoft Apps admin center

**Answer:** C

**NEW QUESTION 310**

- (Exam Topic 5)

HOTSPOT

You have a Microsoft 365 subscription that contains the users shown in the following table.

| Name  | Type   | Department  |
|-------|--------|-------------|
| User1 | Guest  | IT support  |
| User2 | Guest  | SupportCore |
| User3 | Member | IT support  |

You need to configure a dynamic user group that will include the guest users in any department that contains the word Support.

How should you complete the membership rule? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

(user.userType ) and (user.department )

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: -eq "Guest"

Dynamic membership rules for groups in Azure Active Directory Supported expression operators

The following table lists all the supported operators and their syntax for a single expression. Operators can be used with or without the hyphen (-) prefix. The Contains operator does partial string matches but not item in a collection matches.

\* Equals

-eq

\* Contains

-contains

\* Etc.

Box 2: -contains "Support" Incorrect:

\* -in

If you want to compare the value of a user attribute against multiple values, you can use the -in or -notin operators.

<https://learn.microsoft.com/en-us/azure/active-directory/enterprise-users/groups-dynamic-membership>

**NEW QUESTION 314**

- (Exam Topic 5)

You have a Microsoft 365 E5 subscription that uses Azure Advanced Threat Protection (ATP). You need to create a detection exclusion in Azure ATP. Which tool should you use?

- A. the Security & Compliance admin center
- B. Microsoft Defender Security Center
- C. the Microsoft 365 admin center
- D. the Azure Advanced Threat Protection portal
- E. the Cloud App Security portal

**Answer:** D

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/defender-for-identity/what-is> <https://docs.microsoft.com/en-us/defender-for-identity/excluding-entities-from-detections>

**NEW QUESTION 319**

- (Exam Topic 5)

You have a Microsoft 365 subscription.

You configure a data loss prevention (DLP) policy.

You discover that users are incorrectly marking content as false positive and bypassing the DLP policy. You need to prevent the users from bypassing the DLP policy.

What should you configure?

- A. actions
- B. incident reports
- C. exceptions
- D. user overrides

**Answer:** D

**Explanation:**

A DLP policy can be configured to allow users to override a policy tip and report a false positive.

You can educate your users about DLP policies and help them remain compliant without blocking their work. For example, if a user tries to share a document containing sensitive information, a DLP policy can both send them an email notification and show them a policy tip in the context of the document library that allows them to override the policy if they have a business justification. The same policy tips also appear in Outlook on the web, Outlook, Excel, PowerPoint, and Word. If you find that users are incorrectly marking content as false positive and bypassing the DLP policy, you can configure the policy to not allow user overrides.
