

Exam Questions MD-101

Managing Modern Desktops (beta)

<https://www.2passeasy.com/dumps/MD-101/>

NEW QUESTION 1

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains 100 Windows 10 devices enrolled in Microsoft Intune. You plan to use Endpoint analytics. You need to create baseline metrics. What should you do first?

- A. Create an Azure Monitor workbook.
- B. Onboard 10 devices to Endpoint analytics.
- C. Create a Log Analytics workspace.
- D. Modify the Baseline regression threshold.

Answer: B

Explanation:

Onboarding from the Endpoint analytics portal is required for Intune managed devices. Reference: <https://docs.microsoft.com/en-us/mem/analytics/enroll-intune>

NEW QUESTION 2

- (Exam Topic 4)

You have a Microsoft Intune subscription associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

Users use one of the following three suffixes when they sign in to the tenant: us.contoso.com, eu.contoso.com, or contoso.com.

You need to ensure that the users are NOT required to specify the mobile device management (MDM) enrollment URL as part of the enrollment process. The solution must minimize the number of changes. Which DNS records do you need?

- A. three TXT records
- B. one CNAME record only
- C. one TXT record only
- D. three CNAME records

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enroll#simplify-windows-enrollment-withou>

NEW QUESTION 3

- (Exam Topic 4)

You use the Antimalware Assessment solution in Microsoft Azure Log Analytics.

From the Protection Status dashboard, you discover the computers shown in the following table.

Name	Issue
Computer1	No real time protection
Computer2	Not reporting

You verify that both computers are connected to the network and running.

What is a possible cause of the issue on each computer? To answer, drag the appropriate causes to the correct computers. Each cause may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Possible Causes

The Microsoft Monitoring Agent is uninstalled.

The Microsoft Windows Malicious Software Removal Tool is installed.

Windows Defender Application Guard is misconfigured.

Windows Defender is disabled.

Answer Area

Computer1:

Possible Cause

Computer2:

Possible Cause

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/ga-ie/azure/security-center/security-center-install-endpoint-protection>

NEW QUESTION 4

- (Exam Topic 4)

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains Windows 10 devices that are managed by using Microsoft Endpoint Configuration Manager.

You plan to deploy Microsoft 365 Apps for enterprise to the devices by using Configuration Manager. You create a Configuration.xml file as shown in the following exhibit.

```
<Configuration ID="67e*0d4f-814a-4466-9e3c-1388d66a527c">
  <Add OfficeClientEdition="64" Channel="Current" OfficeMgmtCOM="TRUE">>
    <Product ID="0365ProPlusRetail">
      <Language ID="MatchOS" />
      <ExcludeApp ID="Access" />
      <ExcludeApp ID="Groove" />
      <ExcludeApp ID="Lync" />
      <ExcludeApp ID="Publisher" />
    </Product>
  </Add>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
  <Property Name="SCLCacheOverride" Value="0" />
  <Property Name="AUTOACTIVATE" Value="0" />
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="DeviceBasedLicensing" Value="1" />
  <RemoveMSI />
  <AppSettings>
    <Setup Name="Company" Value="Contoso.com" />
  </AppSettings>
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="\\Server1\Office" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Microsoft 365 Apps for enterprise will be installed from [answer choice]	<div>▼</div> <div> \\Server1\Office a Configuration Manager distribution point the Office 365 Content Delivery Network (CDN) </div>
New Microsoft Office feature updates will be available to devices [answer choice]	<div>▼</div> <div> twice a year in January and July once a month, on the second Tuesday of the month as soon as the update is ready, but on no set schedule </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/office-deployment-tool-configuration-options> <https://docs.microsoft.com/en-us/deployoffice/overview-update-channels#semi-annual-enterprise-channel-overv>

NEW QUESTION 5

- (Exam Topic 4)

Your company has computers that run Windows 8.1, Windows 10, or macOS. The company uses Microsoft Intune to manage the computers.

You need to create an Intune profile to configure Windows Hello for Business on the computers that support it.

Which platform type and profile type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Platform type:	<div>✕</div> <div> macOS Windows 10 and later Windows 8.1 and later </div>
Profile type:	<div>✕</div> <div> Device restrictions Device restrictions (Windows 10 Team) Endpoint protection </div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-configure>

NEW QUESTION 6

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10
- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.

Which devices will apply Policy1?

- A. Device1, Device2, Device4, and Device5
B. Device1, Device4, and Device5 only
C. Device4 and Device5 only
D. Device1, Device3, Device4 and Device5

Answer: A

Explanation:

Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.

Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

NEW QUESTION 7

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

Existing on-premises computers are managed by using Microsoft System Center Configuration Manager (Current Branch). You configure contoso.com for co-management.

You deploy 100 new devices that run Windows 10. The devices are joined to Azure AD and enrolled in Microsoft Intune.

You need to ensure that the devices are co-managed. What should you create in Intune first?

- A. a conditional access policy
B. a device compliance policy
C. an app for the Configuration Manager client
D. a device configuration profile
E. an app configuration policy

Answer: C

Explanation:

For new internet-based devices, you need to create an app in Intune. Deploy this app to Windows 10 devices that aren't already Configuration Manager clients.

This scenario is when you have new Windows 10 devices that join Azure AD and automatically enroll to Intune. You install the Configuration Manager client to reach a co-management state.

References:

<https://docs.microsoft.com/en-us/configmgr/comanage/how-to-prepare-win10>

NEW QUESTION 8

- (Exam Topic 4)

You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Group
Device1	Windows 10	Group1, Group2
Device2	Android	Group2
Device3	iOS	Group2, Group3

You create device configuration profiles in Intune as shown in the following table.

Name	Platform	Minimum password length
Profile1	Windows 10 and later	4
Profile2	Android	5
Profile3	iOS	6
Profile4	Android	7
Profile5	iOS	8

You assign the device configuration profiles to groups as shown in the following table.

Group	Profile
Group1	Profile3
Group2	Profile1, Profile2, Profile4
Group3	Profile3, Profile5

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 must have a minimum password length of seven characters.	<input type="radio"/>	<input type="radio"/>
Device2 must have a minimum password length of seven characters.	<input type="radio"/>	<input type="radio"/>
Device3 must have a minimum password length of six characters.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

If a compliance policy evaluates against the same setting in another compliance policy, then the most restrictive compliance policy setting applies.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-troubleshoot>

NEW QUESTION 9

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription.

You create an app protection policy for Android devices named Policy1 as shown in the following exhibit.

[Home](#) > [Apps](#) >

Create policy

✓ Basics

2 Apps

1 Data protection

4 Access requirements

...

Choose how you want to apply this policy to apps on different devices. Then add at least one app.

Target to apps on all device types

Yes

No

Device types

Unmanaged

▼

Target policy to

All Apps

▼

We'll continue to add managed apps to your policy as they become available in Intune. [View a list of apps that will be targeted](#)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Passing Certification Exams Made Easy

visit - <https://www.2PassEasy.com>

Answer Area

To apply Policy1 to an Android device, you must [answer choice].

- install the Company Portal app on the device
- install the Microsoft Authenticator app on the device
- onboard the device to Microsoft Defender for Endpoint
- onboard the device to the Microsoft 365 compliance center

When Policy1 is assigned, the policy will apply to [answer choice].

- users only
- devices only
- users and devices

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Install the Intune Company Portal app on the device

On Android, Android devices will prompt to install the Intune Company Portal app regardless of which Device type is chosen.

Box 2: Devices only

For Android devices, unmanaged devices are devices where Intune MDM management has not been detected. This includes devices managed by third-party MDM vendors.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-protection-policies#app-protection-policies-for-iosipado>

NEW QUESTION 10

- (Exam Topic 4)

You have 100 computers that run Windows 8.1.

You plan to deploy Windows 10 to the computers by performing a wipe and load installation.

You need to recommend a method to retain the user settings and the user data.

Which three actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Configure known folder redirection in Microsoft OneDrive.

Create a system image backup.

Enable Enterprise State Roaming.

Deploy Windows 10.

Run loadstate.exe.

Run scanstate.exe.

Restore a system image backup

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios> <http://itproguru.com/expert/2016/01/step-by-step-how-to-migrate-users-and-user-data-from-xp-vista-windows-7>

NEW QUESTION 10

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

	▼
Security & Compliance in Microsoft 365	
Windows Security app	
Microsoft Endpoint Manager admin center	

Distribution method:

	▼
An Azure policy	
An Endpoint Protection configuration profile	
An Intune device compliance policy	
A device restrictions configuration profile	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/import-export-expl> <https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-atp/enable-exploit-prot>

NEW QUESTION 12

- (Exam Topic 4)

You use a Microsoft Intune subscription to manage iOS devices.

You configure a device compliance policy that blocks jailbroken iOS devices. You need to enable Enhanced jailbreak detection.

What should you configure?

- A. the device compliance policy
- B. the Compliance policy settings
- C. a network location
- D. a configuration profile

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 17

- (Exam Topic 4)

You manage 1,000 computers that run Windows 10. All the computers are enrolled in Microsoft Intune. You manage the servicing channel settings of the computers by using Intune.

You need to review the servicing status of a computer. What should you do?

- A. From Device configuration- Profiles, view the device status.
- B. From Device compliance, view the device compliance.
- C. From Software updates, view the audit logs.
- D. From Software updates, view the Per update ring deployment state.

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/windows-update-compliance-reports>

NEW QUESTION 21

- (Exam Topic 4)

Your company implements Microsoft Azure Active Directory (Azure AD), Microsoft 365, Microsoft Intune, and Azure Information Protection.

The company's security policy states the following:

- Personal devices do not need to be enrolled in Intune.
- Users must authenticate by using a PIN before they can access corporate email data.
- Users can use their personal iOS and Android devices to access corporate cloud services.
- Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.

You need to configure a solution to enforce the security policy. What should you create?

- A. a data loss prevention (DLP) policy from the Security & Compliance admin center
- B. a supervision policy from the Security & Compliance admin center
- C. an app protection policy from the Intune admin center
- D. a device configuration profile from the Intune admin center

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/app-protection-policy>

NEW QUESTION 26

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com.

You create a provisioning package named Package1 as shown in the following exhibit.

Steps	Summary
Set up device	Set up device Enter device name: Comp%RAND:1% Share devices: No Remove pre-installed software: No
Set up network	Network settings Network: Wired
Account management	Account management Domain name: Contoso.com Domain user name: contoso\administrator Domain user password: *****
Add applications	Add applications
Add certificates	Add certificates
Finish	Protect your package Protect the content of your package by specifying a password. The password length must be 8-16 characters.

☐ No

What is the maximum number of devices on which you can run Package1 successfully?

- A. 1
- B. 10
- C. 25
- D. unlimited

Answer: D

NEW QUESTION 27

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to create a Conditional Access policy to block users that have a high sign-in risk level.

You need to identify the required license, and what to use to identify the sign-in risk level. The solution must minimize costs.

To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

License:

Azure Active Directory Premium Plan 1
Azure Active Directory Premium Plan 2
Microsoft Office 365 E3

Use:

Azure AD Identity Protection
Security defaults
Verifiable credentials

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Azure AD Premium Plan 2

You will need an Azure AD Premium P1 license to get access to the Microsoft Office 365 conditional access policy feature.

However, need Azure AD Premium Plan 2 to sign-in risk. Box 2: Azure AD Identity Protection

A sign-in risk represents the probability that a given authentication request isn't authorized by the identity owner. Organizations with Azure AD Premium P2

licenses can create Conditional Access policies incorporating Azure AD Identity Protection sign-in risk detections.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-risk>

<https://blog.mydock365.com/what-is-conditional-access-in-microsoft-365>

NEW QUESTION 32

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10. You need to downgrade the computer to Windows 8.1. Solution: From the Settings app, you use the Recovery options. Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Reference:

https://answers.microsoft.com/en-us/windows/forum/windows_10-windows_install/how-to-recover-restore-your

NEW QUESTION 36

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the computers shown in the following table.

Name	Azure AD join type	Enrolled in Microsoft Intune	Operating system	Processor type
Computer1	Azure Active Directory (Azure AD) registered	Yes	Windows 10 Pro	x64
Computer2	Azure Active Directory (Azure AD) joined	No	Windows 8.1	x86

You plan to use Windows Autopilot.

You need to ensure that the computers support automatic registration in Windows Autopilot.

What should you do for each computer? To answer, select the appropriate options in the answer area.

Computer1:

Delete the Azure AD registration.
Join the computer to Azure AD.
Remove the computer from Intune.
Upgrade the operating system to Windows 10 Enterprise.

Computer2:

Enroll the computer in Intune.
Remove the computer from Azure AD.
Upgrade to an x64 processor.
Upgrade the operating system to Windows 10 Enterprise.

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Join the computer to Azure AD.

You can deploy hybrid Azure AD-joined devices by using Intune and Windows Autopilot. Box 2: Upgrade the operating system to Windows 10 Enterprise

The device to be enrolled must follow these requirements:

Use Windows 11 or Windows 10 version 1809 or later.

Reference: <https://docs.microsoft.com/en-us/mem/autopilot/windows-autopilot-hybrid>

NEW QUESTION 38

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All users have computers that run Windows 10. The computers are joined to Azure AD and managed by using Microsoft Intune.

You need to ensure that you can centrally monitor the computers by using the Update Compliance solution.

What should you create in Intune?

- A. a device configuration profile
- B. a conditional access policy
- C. a device compliance policy
- D. an update policy

Answer: A

Explanation:

Reference:

<https://www.jeffgilb.com/update-compliance-with-intune/>

NEW QUESTION 43

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You need to configure access to Microsoft Office 365 for unmanaged devices. The solution must meet the following requirements:

- Allow only the Microsoft Intune Managed Browser to access Office 365 web interfaces.
- Ensure that when users use the Intune Managed Browser to access Office 365 web interfaces, they can only copy data to applications that are managed by the company.

Which two settings should you configure from the Microsoft Intune blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/app-configuration-managed-browser#application-protection-policies-for>

NEW QUESTION 47

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1	Disabled
User2	Group1, Group2	Enforced

You have the devices shown in the following table.

Name	Platform
Device1	Windows 11
Device2	Android

You have a Conditional Access policy named CAPolicy1 that has the following settings:

- > Assignments
 - Users or workload identities: Group1
 - _ Cloud apps or actions: All cloud apps Conditions
 - Device platforms: include: Windows, Android
 - Grant access controls: Require multi-factor authentication

You have a Conditional Access named CAPolicy2 that has the following settings:

- > Assignments
 - Users or workload identities: Group2
 - _ Cloud apps or actions: All cloud apps Conditions
 - Device platforms: Android
 - Access controls: Block access

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Exchange Online from Device1.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

NEW QUESTION 51

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains two users named User1 and User2. You need to ensure that the users can perform the following tasks:

- User1 must be able to create groups and manage users.
- User2 must be able to reset passwords for nonadministrative users.

The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Roles

Global Administrator

Helpdesk Administrator

Security Administrator

User Administrator

Answer Area

User1:

User2:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: User Administrator User admin

Assign the user admin role to users who you want to access and manage user password resets and manage users and groups. They can also open and manage support requests to Microsoft support.

Box 2: Helpdesk Administrator

Assign the Helpdesk admin role to users who want to reset passwords, force users to sign out for any security issues. They can also open and manage support requests to Microsoft support. The Helpdesk admin can only help non-admin users and users assigned these roles: Directory reader, Guest inviter, Helpdesk admin, Message center reader, and Reports reader.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/admin/add-users/admin-roles-page>

NEW QUESTION 52

- (Exam Topic 4)

Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain.

The domain is synced to Microsoft Azure Active Directory (Azure AD).
You create an Azure Log Analytics workspace and deploy the Device Health solution. You need to enroll the computers in Windows Analytics.
Which Group Policy setting should you configure?

- A. Specify intranet Microsoft update service location
- B. Allow Telemetry
- C. Configure the Commercial ID
- D. Connected User Experiences and Telemetry

Answer: C

Explanation:

Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

References:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-get-started>

NEW QUESTION 55

- (Exam Topic 4)

You have a public computer named Public1 that runs Windows 10. Users use Public1 to browse the Internet by using Microsoft Edge.
You need to view events associated with website phishing attacks on Public1. Which Event Viewer log should you view?

- A. Applications and Services Logs > Microsoft\Windows > DeviceGuard > Operational
- B. Applications and Services Logs > Microsoft > Windows > Security-Mitigations> User Mode
- C. Applications and Services Logs > Microsoft > Windows > SmartScreen > Debug
- D. Applications and Services Logs > Microsoft > Windows > Windows Defender > Operational

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/microsoft-defender-smartscreen/microsoft-defender-smartscreen-overview#viewing-windows-event-logs-for-microsoft-defender-smartscreen>

NEW QUESTION 59

- (Exam Topic 4)

Your company has several Windows 10 devices that are enrolled in Microsoft Inline.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup. You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to <https://portal.manage.microsoft.com> and use the Devices tab. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Use MDM enrolment.

MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods>

NEW QUESTION 62

- (Exam Topic 4)

Your company has devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	iOS

In Microsoft Endpoint Manager, you define the company's network as a location named Location1. Which devices can use network location-based compliance policies?

- A. Device2 and Device3 only
- B. Device2 only
- C. Device1 and Device2 only
- D. Device1 only
- E. Device1, Device2, and Device3

Answer: E

Explanation:

Intune supported operating systems

Intune supports devices running the following operating systems (OS): iOS

Android Windows macOS

Note: View the device compliance settings for the different device platforms: Android device administrator

Android Enterprise iOS
 macOS

Windows Holographic for Business

Windows 8.1 and later Windows 10/11

Reference: <https://docs.microsoft.com/en-us/mem/intune/fundamentals/supported-devices-browsers> <https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 65

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com The tenant contains Windows 10 devices that are enrolled in Microsoft Intune.

You create an Azure Log Analytics workspace and add the Device Health solution to the workspace.

You need to create a custom device configuration profile that will enroll the Windows 10 devices in Device Health.

Which OMA-URI should you add to the profile?

- A. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push
- B. ./Vendor/MSFT/DMClient/Provider/MS DM Server/Push/ChannelURI
- C. ./Vendor/MSFT/DMClient/Provider/MS DM Server/CommercialID
- D. ./Vendor/MSFT/DMClient/Provider/MS DM Server/ManagementServerAddressList

Answer: C

Explanation:

References:

<https://allthingscloud.blog/monitor-windows-10-updates-for-intune-mdm-enrolled-devices/>

NEW QUESTION 70

- (Exam Topic 4)

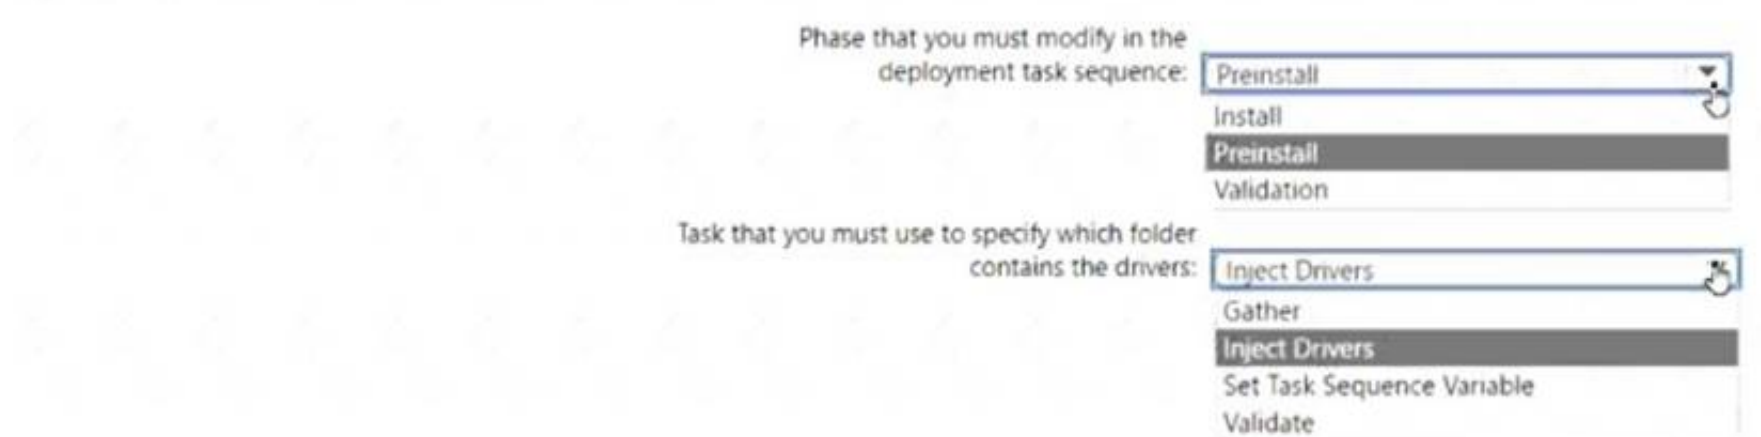

You manage a Microsoft Deployment Toolkit (MDT) deployment share named DS1. OS! contains an

Out-of-Box Drivers folder named Windows 10 x64 that has subfolders in the format of (make name)\ (model name).

You need to modify a deployment task sequence to ensure that all the drivers In the folder that match the make and model of the computers are installed without using PnP detection or selection profiles.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Preinstall PREINSTALL

Completes any tasks that need to be done (such as creating new partitions) before the target operating system is deployed.

Box 2: Inject Drivers Inject Drivers

This task sequence step injects drivers that have been configured for deployment to the target computer.

The unique properties and settings for the Inject Drivers task sequence step type are:

* Property: TypeSet this read-only type to Inject Drivers.

* Settings

Install only matching drivers: Injects only the drivers that the target computer requires and that match what is available in Out-of-Box Drivers

Install all drivers: Installs all drivers

Selection profile: Installs all drivers in the selected profile

Reference: <https://docs.microsoft.com/en-us/mem/configmgr/mdt/toolkit-reference>

NEW QUESTION 72

- (Exam Topic 4)

A company named A-Datum Corporation uses Microsoft Endpoint Configuration Manager, Microsoft Intune, and Desktop Analytics.

A-Datum purchases a company named Contoso, Ltd. Contoso has devices that run the following operating systems:

- > Windows 8.1
- > Windows 10
- > Android
- > iOS

A-D atum plans to use Desktop Analytics to monitor the Contoso devices.

You need to identify which devices can be monitored by using Desktop Analytics and how to add the devices to Desktop Analytics.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can be monitored by using Desktop Analytics:

Windows 10 only
Windows 10, Android, and iOS only
Windows 8.1 and Windows 10 only
Windows 8.1, Windows 10, Android, and iOS

To add a device to Desktop Analytics, you must:

Enroll the device in Microsoft Intune.
Install the Endpoint Configuration Manager agent.
Install the Microsoft Monitoring Agent.

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/overview>

NEW QUESTION 77

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a network share. From Windows 8.1 on Computer1, you run setup.exe from the network share.

Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Instead: You add Windows 10 startup and install images to a Windows Deployment Services (WDS) server. You start Computer1 by using WDS and PXE, and then you initiate the Windows 10 installation.

Reference: <https://docs.microsoft.com/en-us/windows/deployment/windows-deployment-scenarios-and-tools>

NEW QUESTION 78

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device 1 and Device2.

You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- * Assignments
- * Users or workload identities: User1
- * Cloud apps or actions: Office 365 Exchange Online
- * Access controls
- * Grant: Block access

You need to configure CAPolicy1 to allow mailbox access from Device 1 but block mailbox access from Device2.

Solution: You add a condition that specifies device platforms. Does this meet the goal?

- A. Yes
 B. No

Answer: B

Explanation:

Instead use solution: You add a condition to filter for devices. Note: Conditional Access: Filter for devices

When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 81

- (Exam Topic 4)

You need to enable Windows Defender Credential Guard on computers that run Windows 10. What should you install on the computers?

- A. Hyper-V
- B. Windows Defender Application Guard
- C. a guarded host
- D. containers

Answer: A

NEW QUESTION 83

- (Exam Topic 4)

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share. User1 signs in to Computer1 and performs the following tasks:

- > Configures screen saver to start after five minutes of inactivity
- > Modifies the default save location for Microsoft Word
- > Creates a file named File1.docx on the desktop
- > Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/folder-redirection-rup-overview>

NEW QUESTION 84

- (Exam Topic 4)

You have a computer named Computer1 that runs Windows 10.

The Wi-Fi network profile for Computer1 is configured as shown in the following exhibit.

Connect automatically when in range

Network profile

Your PC is hidden from other devices on the network and can't be used for printer and file sharing.

For a network you trust, such as at home or work. Your PC is discoverable and can be used for printer and file sharing if you set it up.

[Configure firewall and security settings](#)

The Delivery Optimization options for Computer1 are configured as shown in the following exhibit.

Allow downloads from other PCs

From which computers will Computer1 will receive updates and to which computers will Computer1 provide updates? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Receive updates from:

Provide updates to:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 89

- (Exam Topic 4)

You are licensed for Microsoft Endpoint Manager.

You use Microsoft Endpoint Configuration Manager and Microsoft Intune.

You have devices enrolled in Configuration Manager as shown in the following table.

Name	Collection
Device1	Collection1
Device2	Collection2
Device3	Collection1, Collection2

In Configuration Manager, you enable co-management and configure the following settings:

- > Automatic enrolment in Intune: Pilot
- > Intune Auto Enrollment: Collection1

In Configuration Manager, you configure co-management staging to have the following settings:

- > Compliance policies: Collection2
- > Device Configuration: Collection1

In Configuration Manager, you configure co-management workloads as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device1.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device2.	<input type="radio"/>	<input type="radio"/>
You can use the Microsoft Endpoint Manager admin center to monitor the compliance status of Device3.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Reference:

https://docs.microsoft.com/en-us/mem/configmgr/comanage/workloads

NEW QUESTION 93

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain that contains the locations shown in the following table.

Name	Internal IP address	Public Network Address Translation (NAT) IP address	Active Directory site
Location1	10.10.0.0/16	131.107.15.0/24	Site1
Location2	10.20.0.0/16	131.107.16.0/24	Site1
Location3	172.16.0.0/16	131.107.196.0/24	Site2

In Microsoft Intune, you enroll the Windows 10 devices shown in the following table.

Name	IP address
Device1	10.10.0.50
Device2	10.20.1.150
Device3	10.10.1.155
Device4	172.16.0.30

You have a Delivery Optimization device configuration profile applied to all the devices. The profile is configured as shown in the following exhibit.

Delivery Optimization

Windows 10 and later

Basics Configuration settings Assignments

If you already configured and deployed Delivery Optimization download mode in Windows 10 update rings, before you begin, go to Software updates – Windows 10 update rings and migrate your existing settings.

NEW QUESTION 94

- (Exam Topic 4)

You use Windows Admin Center to remotely administer computers that run Windows 10.

When connecting to Windows Admin Center, you receive the message shown in the following exhibit.

This site is not secure

This might mean that someone's trying to fool you or steal any info you send to the server. You should close this site immediately.

 Go to your Start page

Details

Your PC doesn't trust this website's security certificate.

Error Code: DLG_FLAGS_INVALID_CA

Go on to the webpage (Not recommended)

You need to prevent the message from appearing when you connect to Windows Admin Center. To which certificate store should you import the certificate?

- A. Personal
- B. Trusted Root Certification Authorities
- C. Client Authentication Issuers

Answer: A

Explanation:

Reference:

<https://social.technet.microsoft.com/Forums/en-US/6b3abb8e-007e-4047-bd30-2946b9c3aaba/windows-admin-c>

NEW QUESTION 95

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices. When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin. You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.
 Solution: From the Azure Active Directory admin center, you configure the Authentication methods. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead, from the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

References:

<https://docs.microsoft.com/en-us/intune/protect/windows-hello>

NEW QUESTION 99

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains 1,000 Android devices enrolled in Microsoft intune. You create an app configuration policy that contains the following settings:

- Device enrollment type: Managed devices
- Profile Type: All Profile Types
- Platform: Android Enterprise

Which two types of apps can be associated with the policy? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Android Enterprise system app
- B. Android store app
- C. Web link
- D. Managed Google Play store app
- E. Built-in Android app

Answer: AD

NEW QUESTION 103

- (Exam Topic 4)

You have a Microsoft 365 subscription. All devices run Windows 10.

You need to prevent users from enrolling the devices in the Windows Insider Program.

What should you configure from Microsoft 365 Device Management? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a Windows 10 security baseline
- B. an app configuration policy
- C. a custom device configuration profile
- D. a Windows 10 update ring
- E. a device restrictions device configuration profile

Answer: D

NEW QUESTION 106

- (Exam Topic 4)

Your company has a computer named Computer1 that runs Windows 10 Pro.

The company develops a proprietary Universal Windows Platform (UWP) app named App1. App1 is signed with a certificate from a trusted certification authority (CA).

You need to sideload App1 to Computer1.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To enable sideloading:

<input type="checkbox"/>	Configure the Apps & features settings in the Settings app
<input type="checkbox"/>	Configure the For developers settings in the Settings app
<input type="checkbox"/>	Run the Enable-WindowsOptionalFeature cmdlet
<input type="checkbox"/>	Run the Set-WindowsEdition cmdlet

To sideload App1:

<input type="checkbox"/>	Double-click App1.appx in File Explorer
<input type="checkbox"/>	Use the Add a package option in the Settings app
<input type="checkbox"/>	Run the Install-Package cmdlet
<input type="checkbox"/>	Run the Add-AppxPackage cmdlet

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://www.windowscentral.com/how-enable-windows-10-sideload-apps-outside-store> <https://docs.microsoft.com/en-us/windows/application-management/sideload-apps-in-windows-10>

NEW QUESTION 110

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer that runs Windows 8.1.

Two days ago, you upgraded the computer to Windows 10.

You need to downgrade the computer to Windows 8.1.

Solution: From View update history in the Settings app, you select Uninstall updates.

Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 113

- (Exam Topic 4)

Your company plans to deploy Windows 10 to device that will be configured for Englis use and other devices that will be configured for Korean use.

You need to create a single multivariate provisioning for the planned for the planned devices. You create the provisioning package.

What should do you next to add the language settings to the package?

A. Create a file named Language.XML that contains a header for Korean.

B. Modify the .ppkg file.

C. Create a file named languages.xml that contains a header for English.

D. Modify the Customizations xmlfile

Answer: D

Explanation:

Follow these steps to create a provisioning package with multivariant capabilities.

- Build a provisioning package and configure the customizations you want to apply during certain conditions.
- After you've configured the settings, save the project.
- Open the project folder and copy the customizations.xml file to any local location.
- Use an XML or text editor to open the customizations.xml file.
- Edit the customizations.xml file to create a Targets section to describe the conditions that will handle your multivariant settings.
- In the customizations.xml file, create a Variant section for the settings you need to customize.
- Save the updated customizations.xml file and note the path to this updated file. You will need the path as one of the values for the next step.
- Use the Windows Configuration Designer command-line interface to create a provisioning package using the updated customizations.xml.

References:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-multivariant>

NEW QUESTION 118

- (Exam Topic 4)

You have a Microsoft 365 tenant named contoso.com that contains a group named ContosoUsers. All the users in contoso.com are members of ContosoUsers.

You have two Windows 10 devices as shown in the following table.

Name	Join type	Mobile device management (MDM)
Computer1	Azure Active Directory (Azure AD) - registered	Microsoft Intune
Computer2	Azure Active Directory (Azure AD) – joined	Microsoft Intune

Both Computer1 and Computer2 contain two apps named App1 and App2.

You configure an app protection policy named AppPolicy1 that has the following settings:

- Protected apps: App1
- Assignments: ContosoUsers
- Enrollment state: Without enrollment
- Windows Information Protection mode: Block

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On Computer1, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
On Computer2, a user can copy and paste data from App1 to App2.	<input type="radio"/>	<input type="radio"/>
Data created by App1 can be wiped selectively from Computer1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-information-protection-policy-create> <https://docs.microsoft.com/en-us/mem/intune/apps/apps-selective-wipe>

NEW QUESTION 123

- (Exam Topic 4)

Your company has a Microsoft 365 E5 tenant.

All the devices of the company are enrolled in Microsoft Endpoint Manager.

You need to create advanced reports by using custom queries and visualizations from raw Microsoft Endpoint Manager data.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add a certificate connector to Microsoft Endpoint Manager.

Add diagnostic settings.

Install Microsoft Power BI Desktop.

Create a Log Analytics workspace.

Purchase an Azure subscription.

Create a Microsoft SharePoint Online site.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/fundamentals/reports>

NEW QUESTION 124

- (Exam Topic 4)

You have five computers that runs Windows 10.

You need to create a provisioning package to configure the computers to meet the following requirements: ➤ Run an interactive app.

- Automatically sign in by using a local user account.
- Prevent users from accessing the desktop and running other applications.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Apply the provisioning package.

Run the Provision desktop devices project.

Copy the provisioning package to each computer.

Run the Provision kiosk devices project.

Install the Microsoft Deployment Toolkit (MDT).

Enable Microsoft User Experience Virtualization (UE-V).

Install the Windows Configuration Designer.

Answer Area

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-install-icd>

NEW QUESTION 127

- (Exam Topic 4)

You have the on-premises servers shown in the following table.

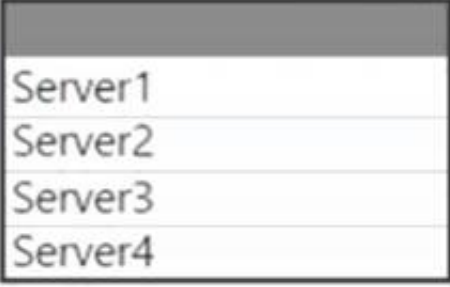

Name	Description
DC1	Domain controller that runs Windows Server 2022
Server1	Standalone server that runs Windows Server 2022
Server2	Member server that runs Windows Server 2022 and has the Remote Access role installed
Server3	Member server that runs Windows Server 2019
Server4	Red Hat Enterprise Linux (RHEL) 8.4 server

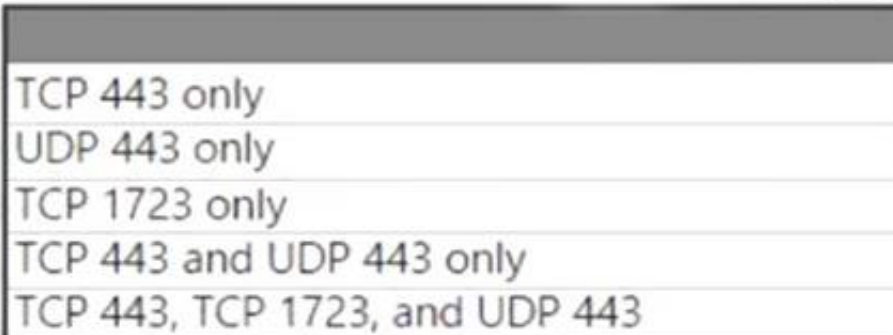

You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune.

You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports.

To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Server: 

Ports: 

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Server4

Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.

Box 2: TCP 443 and UDP 443 only

Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443.

By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Server Configuration – Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.

Incorrect:

TCP 1723 is not used.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/microsoft-tunnel-overview>

NEW QUESTION 130

- (Exam Topic 4)

You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.

You have a computer named Computer1 that runs Windows 10. You need to view the events collected from Computer1.

Which query should you run in Log Analytics?

- A. Event| where Computer == "Computer1"
 B. ETWEvent| where SourceSystem == "Computer1"
 C. ETWEvent| where Computer == "Computer1"

D. Event| where SourceSystem == "Computer1"

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

NEW QUESTION 135

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You have a workgroup computer named Computer1 that runs Windows 10. You need to add Computer1 to contoso.com.

What should you use?

- A. the Settings app
- B. Computer Management
- C. netdom.exe
- D. dsregcmd.exe

Answer: D

Explanation:

If you want to manually join the computer to Azure AD, you can execute the dsregcmd /join command. This command should be run in SYSTEM context (using psexec for example) and will force an attempt to Azure AD.

Reference: <https://365bythijs.be/2019/11/02/troubleshooting-hybrid-azure-ad-join/>

NEW QUESTION 137

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription that contains a user named User1 and the devices shown in the following table.

Name	Operating system	Azure AD status
Device1	Windows 11	Joined
Device2	Windows 10	Joined

User1 can access her Microsoft Exchange Online mailbox from both Device 1 and Device2.

You plan to create a Conditional Access policy named CAPolicy1 that will have the following settings:

- * Assignments
- * Users or workload identities: User1
- * Cloud apps or actions: Office 365 Exchange Online
- * Access controls
- * Grant: Block access

You need to configure CAPolicy1 to allow mailbox access from Device 1 but block mailbox access from Device2.

Solution: You add a condition that specifies a trusted locations. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use solution: You add a condition to filter for devices. Note: Conditional Access: Filter for devices

When creating Conditional Access policies, administrators have asked for the ability to target or exclude specific devices in their environment. The condition filter for devices gives administrators this capability. Now you can target specific devices using supported operators and properties for device filters and the other available assignment conditions in your Conditional Access policies.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/conditional-access/concept-condition-filters-for-devices>

NEW QUESTION 138

- (Exam Topic 4)

You have a computer named Computer5 that has Windows 10 installed. You create a Windows PowerShell script named config.ps1.

You need to ensure that config.ps1 runs after feature updates are installed on Computer5. Which file should you modify on Computer5?

- A. Unattend.xml
- B. Unattend.bat
- C. SetupConfig.ini
- D. LiteTouch.wsf

Answer: C

Explanation:

<https://www.joseespitia.com/2017/06/01/how-to-run-a-post-script-after-a-windows-10-feature-upgrade/>

NEW QUESTION 143

- (Exam Topic 4)

You use Microsoft Intune to manage client computers. The computers run one of the following operating systems:

- Windows 8.1
- Windows 10 Pro
- Windows 10 Enterprise

➤ Windows 10 Enterprise LTSC

You plan to manage Windows updates on the computers by using update rings. Which operating systems support update rings?

- A. Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC only
- B. Windows 8.1, Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC
- C. Windows 10 Enterprise and Windows 10 Enterprise LTSC only
- D. Windows 10 Pro and Windows 10 Enterprise only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure>

NEW QUESTION 144

- (Exam Topic 4)

You have computers that run Windows 10, are joined to Azure Active Directory (Azure AD), and are enrolled in Microsoft Intune.

You have an Azure web app named App1. App1 only allows connections over HTTPS. App1 uses a certificate from an on-premises certification authority (CA).

You need to ensure that the computers can connect to App1 from Microsoft Edge.

Which type of device configuration profile should you create in Microsoft Endpoint Manager?

- A. trusted certificate
- B. Simple Certificate Enrollment Protocol (SCEP) certificate
- C. imported public key pair (PKCS) certificate
- D. public key pair (PKCS) certificate

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/certificates-scep-configure> <https://docs.microsoft.com/en-us/mem/intune/protect/certificates-configure>

NEW QUESTION 147

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune.

You need to implement an ADMX-backed policy. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions
- D. Device restrictions (Windows 10 Team)

Answer: B

Explanation:

Reference:

<https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-usingmicr>

NEW QUESTION 152

- (Exam Topic 4)

You have an Azure Active Directory group named Group1. Group1 contains two Windows 10 Enterprise devices named Device1 and Device2.

You create a device configuration profile named Profile1. You assign Profile1 to Group1. You need to ensure that Profile1 applies to Device1 only. What should you modify in Policy1?

- A. Assignments
- B. Applicability Rules
- C. Settings
- D. Scope (Tags)

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-assign>

NEW QUESTION 154

- (Exam Topic 4)

Your company has a main office and six branch offices. The branch offices connect to the main office by using a WAN link. All offices have a local Internet connection and a Hyper-V host cluster.

The company has a Microsoft System Center Configuration Manager deployment. The main office is the primary site. Each branch has a distribution point. All computers that run Windows 10 are managed by using both Configuration Manager and Microsoft Intune.

You plan to deploy the latest build of Microsoft Office 365 ProPlus to all the computers.

You need to minimize the amount of network traffic on the company's Internet links for the planned deployment.

What should you include in the deployment plan?

- A. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Microsoft Deployment Toolkit (MDT) deployment share.
- B. From Intune, configure app assignments for the Office 365 ProPlus suite. In each office, copy the Office 365 distribution files to a Configuration Manager

distribution point.

C. From Configuration Manager, create an application deployment. Copy the Office 365 distribution files to a Configuration Manager cloud distribution point.

D. From Configuration Manager, create an application deployment. In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployoffice/deploy-office-365-proplus-with-system-center-configurationmana>

NEW QUESTION 156

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) solution that is used to manage Windows 10 deployment tasks.

MDT contains the operating system images shown in the following table.

Name	Description
Image1.wim	Custom-built Windows 10 image that has preinstalled custom apps
Image2.wim	Custom-built Windows 10 image without apps
Install.wim	Default Windows 10 image

You need to perform a Windows 10 in-place upgrade on several computers that run Windows 8.1. From the Deployment Workbench, you open the New Task Sequence Wizard.

You need to identify which task sequence template and which operating system image to use for the task sequence. The solution must minimize administrative effort.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task sequence template:

Standard Client Task Sequence
Standard Client Replace Task Sequence
Standard Client Upgrade Task Sequence

Operating system image:

Image1.wim
Image2.wim
Install.wim

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Standard Client Upgrade Task Sequence

Use Template: Standard Client Upgrade Task Sequence

In-place upgrade is the preferred method to use when migrating from Windows 10 to a later release of Windows 10, and is also a preferred method for upgrading from Windows 7 or 8.1 if you do not plan to significantly change the device's configuration or applications. MDT includes an in-place upgrade task sequence template that makes the process really simple.

Box 2: Install.wim

In-place upgrade differs from computer refresh in that you cannot use a custom image to perform the in-place upgrade. I

NEW QUESTION 159

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com and a Microsoft Intune subscription.

Contoso.com contains a user named user1@contoso.com.

You have a computer named Computer1 that runs Windows 8.1.

You need to perform an in-place upgrade of Computer1 to Windows 10.

Solution: You assign a Windows 10 license to User1. You instruct User1 to sign in to Computer1. Does this meet the goal?

A. Yes

B. No

Answer: B

NEW QUESTION 164

- (Exam Topic 4)

You use Microsoft Endpoint Manager to manage Windows 10 devices.
 You are designing a reporting solution that will provide reports on the following:

- Compliance policy trends
- Trends in device and user enrolment
- App and operating system version breakdowns of mobile devices

You need to recommend a data source and a data visualization tool for the design.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Data source:

Audit logs in Azure Active Directory (Azure AD)
Audit logs in Microsoft Intune
Azure Synapse Analytics
The Microsoft Intune Data Warehouse

Data visualization tool:

Azure Data Studio
Microsoft Power BI
The Azure portal

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/developer/reports-nav-create-intune-reports> <https://docs.microsoft.com/en-us/mem/intune/developer/reports-proc-get-a-link-powerbi>

NEW QUESTION 169

- (Exam Topic 4)

Your company has computers that run Windows 10. The company uses Microsoft Intune to manage the computers.

You have an app protection policy for Microsoft Edge. You assign the policy to a group. On a computer named Computer1, you open Microsoft Edge.

You need to verify whether Microsoft Edge on Computer1 is protected by the app protection policy. Which column should you add in Task Manager?

- A. Operating system context
- B. UAC virtualization
- C. Enterprise Context
- D. Data Execution Prevention

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/wip> <https://www.itpromentor.com/win10-mam-wip/>

NEW QUESTION 170

- (Exam Topic 4)

Your company has a Microsoft Azure Active Directory (Azure AD) tenant. All users in the company are licensed for Microsoft Intune.

You need to ensure that the users enroll their iOS device in Intune. What should you configure first?

- A. A Device Enrollment Program (DEP) token.
- B. An Intune device configuration profile.
- C. A Device enrollment manager (DEM) account.
- D. An Apple MDM Push certificate.

Answer: D

Explanation:

Reference:

https://www.manageengine.com/mobile-device-management/help/enrollment/mdm_creating_apns_certificate.ht

Prerequisites for iOS enrollment Before you can enable iOS devices, complete the following steps: Make sure your device is eligible for Apple device enrollment.

Set up Intune - These steps set up your Intune infrastructure. In particular, device enrollment requires that you set your MDM authority. Get an Apple MDM Push

certificate - Apple requires a certificate to enable management of iOS and macOS devices.

<https://docs.microsoft.com/en-gb/intune/enrollment/apple-mdm-push-certificate-get>

NEW QUESTION 172

- (Exam Topic 4)

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- Creates a VPN connection to the corporate network
- Installs a Microsoft Store app named App1
- Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

<input type="checkbox"/>
<input type="checkbox"/> Removed
<input type="checkbox"/> Retained and the passphrase will be retained
<input type="checkbox"/> Retained but the passphrase will be reset

App1 will be:

<input type="checkbox"/>
<input type="checkbox"/> Reinstalled at sign-in
<input type="checkbox"/> Removed
<input type="checkbox"/> Retained

The VPN connection will be:

<input type="checkbox"/>
<input type="checkbox"/> Removed
<input type="checkbox"/> Retained and the credentials will be cached
<input type="checkbox"/> Retained but the credentials will be reset

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 177

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains computers that run Windows 10. All users use Roaming User Profiles.

You have a user named Public1 that is used to sign-in to a public computer.

You need to prevent changes to the user settings of Public1 from being saved to the user profile. What should you do?

- A. Rename the Roaming User Profile folder to Public1.man
- B. Rename Ntuser.dat to Ntuser.v6
- C. Rename Ntuser.dat to Ntuser.man
- D. Rename the Roaming User Profile folder to Public1.v1

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/answers/questions/168551/set-roaming-profile-download-from-server-to-pc> but <https://docs.microsoft.com/en-us/windows/client-management/mandatory-user-profile>

NEW QUESTION 181

- (Exam Topic 4)

You have an on-premises server named Server1 that hosts a Microsoft Deployment Toolkit (MDT) deployment share named MDT1.

You need to ensure that MDT1 supports multicast deployments. What should you install on Server1?

- A. Windows Server Update Services (VVSUS)
- B. Multipath I/O (MPIO)
- C. Windows Deployment Services (WDS)
- D. Multipoint Connector

Answer: C

NEW QUESTION 182

- (Exam Topic 4)

You have a Microsoft Azure Active Directory (Azure AD) tenant. All corporate devices are enrolled in Microsoft Intune.

You have a web-based application named App1 that uses Azure AD to authenticate.

You need to prompt all users of App1 to agree to the protection of corporate data when they access App1 from both corporate and non-corporate devices.

What should you configure?

- A. Notifications in Device compliance
- B. Terms and Conditions in Device enrollment
- C. Terms of use in Conditional access
- D. an Endpoint protection profile in Device configuration

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/terms-of-use>

NEW QUESTION 184

- (Exam Topic 4)

Your company standardizes on Windows 10 Enterprise for all users.

Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:

- Ensure that any applications installed by the users are retained.
- Minimize user intervention.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Microsoft Deployment Toolkit (MDT)
- B. Windows Deployment Services (WDS)
- C. a Windows Configuration Designer provisioning package
- D. Windows AutoPilot

Answer: C

Explanation:

You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.

NEW QUESTION 189

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

Name	Enabled	OS	Version	Join Type	Owner	MDM	Compliant
 LON-CL2	 Yes	Windows	10.0.17763.615	Azure AD registered	User2	Microsoft Intune	 Yes
 LON-CL4	 Yes	Windows	10.0.17763.107	Azure AD joined	User1	Microsoft Intune	 Yes

How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Identified by Intune as a personal device:

LON-CL2 only
LON-CL4 only
Both LON-CL2 and LON-CL4
Neither LON-CL2 or LON-CL4

Identified by Intune as a corporate device:

LON-CL2 only
LON-CL4 only
Both LON-CL2 and LON-CL4
Neither LON-CL2 or LON-CL4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-join> <https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register>

NEW QUESTION 191

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains a computer named Computer1 that runs Windows 8.1.

Computer1 has apps that are compatible with Windows 10.

You need to perform a Windows 10 in-place upgrade on Computer1.

Solution: You copy the Windows 10 installation media to a Microsoft Deployment Toolkit (MDT) deployment share. You create a task sequence, and then you run the MDT deployment wizard on Computer1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 196

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows Autopilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10.

User1 leaves the company.

You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You perform a local Windows Autopilot Reset. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 200

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains the users shown in the following table.

Name	Role
User1	None
User2	Global administrator
User3	Cloud device administrator
User4	Intune administrator

You configure the following device settings for the tenant:

- > Users may join devices to Azure AD: User1
- > Additional local administrators on Azure AD joined devices: None

You install Windows 10 on a computer named Computer1.

You need to identify which users can join Computer1 to adatum.com, and which users will be added to the Administrators group after joining adatum.com.

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Users who can join Computer1 to adatum.com:

▼

User1 only
User1 and User2 only
User1, User2, and User3 only
User1, User3, and User 4 only
User1, User2, User3, and User4

Users who will be added to the Administrators group after joining adatum.com:

▼

User1 only
User2 only
User1 and User2 only
User3 and User4 only
User2, User3, and User4 only

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/assign-local-admin>

NEW QUESTION 204

- (Exam Topic 4)

You install a feature update on a computer that runs Windows 10. How many days do you have to roll back the update?

- A. 5
- B. 10
- C. 14
- D. 30

Answer: B

Explanation:

Microsoft has changed the time period associated with operating system rollbacks with Windows 10 version 1607, decreasing it to 10 days. Previously, Windows 10 had a 30-day rollback period.

References:

<https://redmondmag.com/articles/2016/08/04/microsoft-shortens-windows-10-rollback-period.aspx>

NEW QUESTION 207

- (Exam Topic 4)

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune.

You need to enable self-service password reset on the sign-in screen.

Which settings should you configure from the Microsoft Intune blade?

- A. Device configuration
- B. Device compliance
- C. Device enrollment
- D. Conditional access

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows>

NEW QUESTION 209

- (Exam Topic 4)

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM) You need to deploy the Microsoft Office 365 ProPlus suite to all the computers. What should you do?

- A. From Microsoft Azure Active Directory (Azure AD), add an app registration.
- B. From the Device Management admin center, add an app.
- C. From the Device Management admin center, create a Windows 10 device profile.
- D. From Microsoft Azure Active Directory (Azure AD), add an enterprise application

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/client-management/mdm/enterprise-app-management#application-management>

NEW QUESTION 210

- (Exam Topic 4)

You have an Azure Active Directory Premium Plan 2 subscription that contains the users shown in the following table.

Name	Member of	Assigned license
User1	Group1	Enterprise Mobility + Security E5
User2	Group2	Enterprise Mobility + Security E5

You purchase the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	Android

You configure automatic mobile device management (MDM) and mobile application management (MAM) enrollment by using the following settings:

➤ MDM user scope: Group1

➤ MAM user scope: Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User1 can enroll Device2 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>
User2 can enroll Device1 in Intune by using automatic enrollment.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference: <https://docs.microsoft.com/en-us/mem/intune/enrollment/android-enroll> <https://powerautomate.microsoft.com/fr-fr/blog/mam-flow-mobile/>

NEW QUESTION 213

- (Exam Topic 4)

You use Microsoft Intune to manage Windows updates.

You have computers that run Windows 10. The computers are in a workgroup and are enrolled in Intune. The computers are configured as shown in the following table.

Name	Tag	Member of
Computer1	None	Group1
Computer2	Tag2	Group2
Computer3	Tag3	Group3

On each computer, the Select when Quality Updates are received Group Policy setting is configured as shown in the following table.

Name	State	Configuration
Computer1	Not configured	<i>Not applicable</i>
Computer2	Enabled	Deferral period of 5 days
Computer3	Disabled	<i>Not applicable</i>

You have Windows 10 update rings in Intune as shown in the following table.

Name	Quality update deferral period (days)	Scope (Tags)	Assignment
Ring1	2	Tag1	Group1
Ring2	7	Tag2	Group2
Ring3	14	Tag2	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
On Computer1, quality updates will be deferred for two days.	<input type="radio"/>	<input checked="" type="radio"/>
On Computer2, quality updates will be deferred for seven days.	<input checked="" type="radio"/>	<input type="radio"/>
On Computer3, quality updates will be deferred for 14 days.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 216

- (Exam Topic 4)

You have a Microsoft 365 E5 tenant that connects to Microsoft Defender for Endpoint. You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Windows 8.1
Device3	iOS
Device4	Android

You plan to use risk levels in Microsoft Defender for Endpoint to identify whether a device is compliant.

Noncompliant devices must be blocked from accessing corporate resources.

You need to identify which devices can be onboarded to Microsoft Defender for Endpoint, and which Endpoint security policies must be configured.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Devices that can onboarded to Microsoft Defender for Endpoint:

▼

Device 1 only
Device 1 and Device 2 only
Device 1 and Device 3 only
Device 1 and Device 4 only
Device 1, Device 2, and Device 4 only
Device 1, Device 2, Device 3, and Device 4

Endpoint security policies that must be configured:

▼

A conditional access policy only
A device compliance policy only
A device configuration profile only
A device configuration profile and a conditional access policy only
Device configuration profile, device compliance policy, and conditional access policy

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Device 1, Device2, Device 3, and Device 4

Supported Windows versions include Windows 8.1 and Windows 10 Other supported operating systems

Android iOS Linux macOS

Box 2: Device configuration profile, device compliance policy, and conditional access policy We need all three policies.

Establish a service-to-service connection between Intune and Microsoft Defender for Endpoint. This connection lets Microsoft Defender for Endpoint collect data about machine risk from supported devices you manage with Intune.

Use a device configuration profile to onboard devices with Microsoft Defender for Endpoint. You onboard devices to configure them to communicate with Microsoft Defender for Endpoint and to provide data that helps assess their risk level.

Use a device compliance policy to set the level of risk you want to allow. Risk levels are reported by Microsoft Defender for Endpoint. Devices that exceed the allowed risk level are identified as noncompliant.

Use a conditional access policy to block users from accessing corporate resources from devices that are noncompliant.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/minimum-requirements> <https://docs.microsoft.com/en-us/mem/intune/protect/advanced-threat-protection#onboard-devices-by-using-a-c>

NEW QUESTION 218

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains devices enrolled in Microsoft Intune. You need to create Endpoint security policies to enforce the following requirements:

- Computers that run macOS must have FileVault enabled.
- Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.
- Computers that run Windows 10 must have Microsoft Defender Application Control enabled.

Which Endpoint security feature should you use for each requirement? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

Account protection

Attack surface reduction (ASR)

Disk encryption

Endpoint detection and response (EDR)

Answer Area

Computers that run macOS must have FileVault enabled:

Computers that run Windows 10 must have Microsoft Defender Application Control enabled:

Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled:

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Disk encryption

Computers that run macOS must have FileVault enabled.

Intune supports macOS FileVault disk encryption. FileVault is a whole-disk encryption program that is included with macOS. You can use Intune to configure FileVault on devices that run macOS 10.13 or later.

Box 2: Attack surface reduction (ASR)

Computers that run Windows 10 must have Microsoft Defender Application Control enabled. Attack surface reduction profiles include:

* Application control - Application control settings can help mitigate security threats by restricting the applications that users can run and the code that runs in the System Core (kernel). Manage settings that can block unsigned scripts and MSIs, and restrict Windows PowerShell to run in Constrained Language Mode.

Note: Attack surface reduction rules target certain software behaviors, such as: Launching executable files and scripts that attempt to download or run files

Running obfuscated or otherwise suspicious scripts

Performing behaviors that apps don't usually initiate during normal day-to-day work

Box 3: Account protection

Computers that run Windows 10 must have Microsoft Defender Credential Guard enabled.

The account protection policy is focused on settings for Windows Hello and Credential Guard, which is part of Windows identity and access management.

Note: Microsoft Defender Credential Guard protects against credential theft attacks. It isolates secrets so that only privileged system software can access them.

Reference: <https://learn.microsoft.com/en-us/mem/intune/protect/encrypt-devices-filevault> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-account-protection-policy> <https://learn.microsoft.com/en-us/mem/intune/protect/endpoint-security-asr-policy>

NEW QUESTION 222

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1. Solution: You configure an applicability rule for Profile1. You assign Profile1 to Group1. Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 224

- (Exam Topic 4)

You have 500 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You plan to distribute certificates to the computers by using Simple Certificate Enrollment Protocol (SCEP).

You have the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Root certification authority (CA)
Server3	Subordinate certification authority (CA)
Server4	Network Device Enrollment Service (NDES)

NDES issues certificates from the subordinate CA.

You are configuring a device profile as shown in the exhibit. (Click the Exhibit tab.)

You need to complete the SCEP profile.

- A. Server1
- B. Server2
- C. Server3
- D. Server4

Answer: D

NEW QUESTION 228

- (Exam Topic 4)

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 domain-joined computers that run Windows 10. The computers are joined to Azure AD and enrolled in Microsoft Intune.

You plan to implement Windows Defender Exploit Guard.

You need to create a custom Windows Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Tool to use to configure the settings:

Security & Compliance in Microsoft 365
Windows Configuration Designer
Windows Defender Security Center

Distribution method:

An Azure policy
A Group Policy object (GPO)
An Intune device compliance policy

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/endpoint-protection-windows-10>

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/enable-ex>

NEW QUESTION 231

- (Exam Topic 4)

You need to ensure that feature and quality updates install automatically on a Windows to compute during a maintenance window.

Solution: in Group Policy. from the Windows Update settings, you enable Configure Automatic Updates, select 4 - Auto download and schedule the Install, and then enter a time.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 235

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) deployment share named Share1. You add Windows 10 images to Share1 as shown in the following table.

Name	In WIM file	Description
Image1	Install1.wim	Default Windows 10 Pro image from the Windows 10 installation media
Image2	Install1.wim	Default Windows 10 Enterprise image from the Windows 10 installation media
Image3	Install2.wim	Default Windows 10 Pro for Workstations image from the Windows 10 installation media
Image4	Custom1.wim	Custom Windows 10 Enterprise image without any additional applications
Image5	Custom2.wim	Custom Windows 10 Enterprise image that includes custom applications

Which images can be used in the Standard Client Task Sequence, and which images can be used in the Standard Client Upgrade Task Sequence?

NOTE: Each correct selection is worth one point.

Standard Client Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

Standard Client Upgrade Task Sequence:

Image3 only
Image3, Image4, and Image5 only
Image1, Image2, and Image3 only
Image1, Image2, Image3, and Image4 only
Image1, Image2, Image3, Image4, and Image5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Image1, Image2, Image3, Image4, and Image5. All images.

Standard Client Task Sequence

Standard Client task sequence. The most frequently used task sequence. Used for creating reference images and for deploying clients in production.

Box 2: Image1, Image2, Image3, and Image4 only. Exclude image5 with applications.

Standard Client Upgrade Task Sequence

Standard Client Upgrade task sequence. A simple task sequence template used to perform an in-place upgrade from Windows 7, Windows 8, or Windows 8.1 directly to Windows 10, automatically preserving existing data, settings, applications, and drivers.

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/get-started-with-the-microsoft-dep>

NEW QUESTION 238

- (Exam Topic 3)

You implement the planned changes for Connection1 and Connection2

How many VPN connections will there be for User1 when the user signs in to Device 1 and Device2? To answer select the appropriate options in the answer area.

NOTE; Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, table Description automatically generated

NEW QUESTION 241
- (Exam Topic 3)
Which user can enroll Device6 in Intune?

- A. User4 and User2 only
- B. User4 and User 1 only
- C. User1, User2, User3, and User4
- D. User4. User Land User2 only

Answer: B

NEW QUESTION 244
- (Exam Topic 3)
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device4 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device5 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Text Description automatically generated

NEW QUESTION 249
- (Exam Topic 3)
You implement Boundary1 based on the planned changes.
Which devices have a network boundary of 192.168.1.0/24 applied?

- A. Device2 only
- B. Device3 only
- C. Device 1. Device2. and Device5 only
- D. Device 1, Device2, Device3, and Device4 only

Answer: D

Explanation:
Reference:
<https://docs.microsoft.com/en-us/mem/intune/configuration/network-boundary-windows>

NEW QUESTION 250

- (Exam Topic 3)

Which devices are registered by using the Windows Autopilot deployment service?

- A. Device1 only
- B. Device3 only
- C. Device1 and Device3 only
- D. Device1, Device2, and Device3

Answer: C

Explanation:

Scenario: Windows Autopilot Configuration Assignments

Included groups: Group1 Excluded groups: Group2 Device1 is member of Group1.

Device2 is member of Group1 and member of Group2. Device3 is member of Group1.

Group1 and Group2 have a Membership type of Assigned.

Exclusion takes precedence over inclusion in the following same group type scenarios. Reference: <https://learn.microsoft.com/en-us/mem/intune/apps/apps-inc-exl-assignments>

NEW QUESTION 255

- (Exam Topic 3)

You need to ensure that computer objects can be created as part of the Windows Autopilot deployment. The solution must meet the technical requirements.

To what should you grant the right to create the computer objects?

- A. Server2
- B. Server1
- C. GroupA
- D. DC1

Answer: B

Explanation:

Reference:

<https://blog.matrixpost.net/set-up-windows-autopilot-production-environment-part-2/>

NEW QUESTION 259

- (Exam Topic 2)

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device profile

Answer: D

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

NEW QUESTION 260

- (Exam Topic 2)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory admin center.
- B. Extract the hardware ID information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.
- C. Extract the hardware ID information of each computer to an XML file and upload the file from the Devices settings in Microsoft Store for Business.
- D. Extract the serial number information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

NEW QUESTION 264

- (Exam Topic 2)

You need to prepare for the deployment of the Phoenix office computers. What should you do first?

- A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.
- B. Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active Directory blade in the Azure portal.
- C. Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.
- D. Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/add-profile-to-devices#manage-autopilot-deployment-profiles>

NEW QUESTION 269

- (Exam Topic 2)

You are evaluating which devices are compliant.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input type="radio"/>
Device3 is compliant	<input type="radio"/>	<input type="radio"/>
Device4 is compliant	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Device1 is compliant	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant	<input checked="" type="radio"/>	<input type="radio"/>
Device4 is compliant	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 271

- (Exam Topic 2)

You need to meet the requirements for the MKG department users. What should you do?

A. Assign the MKG department users the Purchaser role in Microsoft Store for Business

B. Download the APPX file for App1 from Microsoft Store for Business

C. Add App1 to the private store

D. Assign the MKG department users the Basic Purchaser role in Microsoft Store for Business

E. Acquire App1 from Microsoft Store for Business

Answer: E

Explanation:

References:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

Enable the users in the MKG department to use App1.

The private store is a feature in Microsoft Store for Business and Education that organizations receive during the signup process. When admins add apps to the private store, all employees in the organization can view and download the apps. Your private store is available as a tab in Microsoft Store app, and is usually named for your company or organization. Only apps with online licenses can be added to the private store.

Reference:

<https://docs.microsoft.com/en-us/microsoft-store/distribute-apps-from-your-private-store>

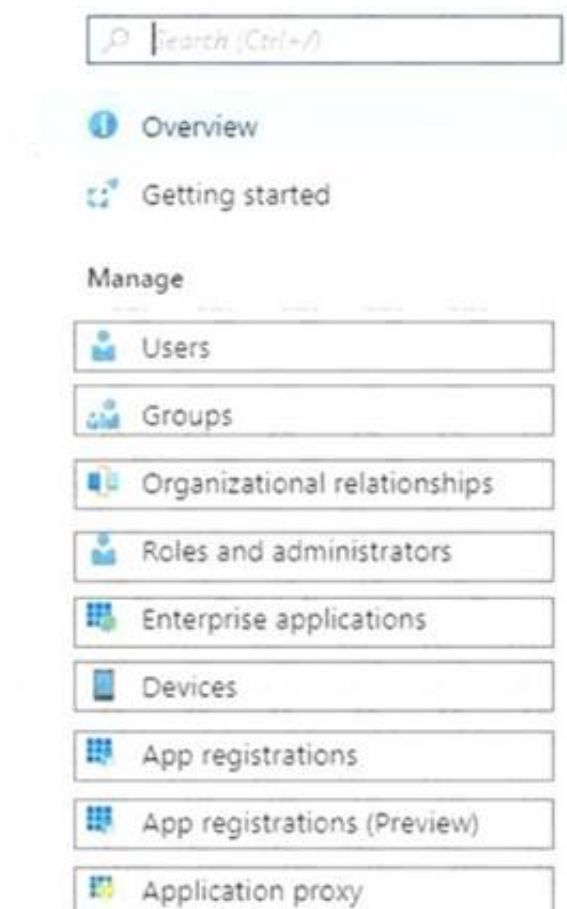

NEW QUESTION 276

- (Exam Topic 1)

You need to meet the technical requirements for Windows AutoPilot.

Which two settings should you configure from the Azure Active Directory blade? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>

NEW QUESTION 280

- (Exam Topic 1)

You need to capture the required information for the sales department computers to meet the technical requirements. Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

"This topic describes how to convert Windows 7 or Windows 8.1 domain-joined computers to Windows 10 devices joined to either Azure Active Directory or Active Directory (Hybrid Azure AD Join) by using Windows Autopilot"

NEW QUESTION 282

- (Exam Topic 1)

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access? view=azure-devops>

NEW QUESTION 287

- (Exam Topic 1)

You need to resolve the performance issues in the Los Angeles office.

How should you configure the update settings? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Change Delivery Optimization
download mode to:

Bypass mode	<input type="checkbox"/>
HTTP blended with internet peering	<input type="checkbox"/>
HTTP blended with peering behind same NAT	<input type="checkbox"/>
Simple download mode with no peering	<input type="checkbox"/>

Update Active Hours Start to:

10 AM	<input type="checkbox"/>
11 AM	<input type="checkbox"/>
10 PM	<input type="checkbox"/>
11 PM	<input type="checkbox"/>

Update Active Hours End to:

10 AM	<input type="checkbox"/>
11 AM	<input type="checkbox"/>
10 PM	<input type="checkbox"/>
11 PM	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization> <https://2pintsoftware.com/delivery-optimization-dl-mode/>

NEW QUESTION 288

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune.

You use the Company Portal app to access and install published apps to enrolled devices. From the Microsoft Endpoint Manager admin center, you add a Microsoft Store app. Which two App information types are visible in the Company Portal?

Note: Each correct selection is worth one point.

- A. information URL
- B. Developer
- C. Privacy URL
- D. Owner

Answer: BC

NEW QUESTION 293

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune for mobile device management (MDM). You associate a Microsoft Store for Business account with Intune.

You purchase an app named Appl from the Microsoft Store for Business. You need to ensure that Appl can be deployed by using Intune.

What should you do?

- A. Sync purchased apps from the Microsoft Store for Business.
- B. Integrate the Windows Autopilot Deployment Program into the Microsoft Store for Business.
- C. Create an app category in Intune.
- D. Create an app protection policy in Intune.

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/windows-store-for-business>

NEW QUESTION 298

- (Exam Topic 4)

You have a Microsoft Intune subscription that has the following device compliance policy settings: Mark devices with no compliance policy assigned as: Compliant
 Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- > Name: Policy1

- > Platform: Windows 10 and later
- > Require BitLocker: Require
- > Mark device noncompliant: 5 days after noncompliance
- > Scope (Tags): Tag1
- > Name: Policy2
- > Platform: Windows 10 and later
- > Firewall: Require
- > Mark device noncompliant: Immediately
- > Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On January 7, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device1 is marked as compliant.	<input type="radio"/>	<input type="radio"/>
On January 8, Device2 is marked as compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No.

Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No

For the same reason as Box1.

Box 3: Yes

Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.

The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

NEW QUESTION 302

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1.

Solution: You create a scope tag, and then you add the scope tag to the Windows 10 Enterprise devices. You edit the settings of Profile1.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/device-profile-create>

NEW QUESTION 305

- (Exam Topic 4)

You have the device configuration profile shown in the following exhibit.

Kiosk

Windows 10 and later

Basics Configuration settings Assignments

Configure your devices to run in kiosk mode. Before you select a kiosk mode, review your app assignments in the Mobile Apps blade. Apps that you want to run in kiosk mode should be assigned to a Windows device. [Learn more about Windows kiosk mode.](#)

Select a kiosk mode * Single app, full-screen kiosk

User logon type * Auto logon (Windows 10, version 1803+)

Application type * Add Microsoft Edge browser

This kiosk profile requires Microsoft Edge version 87 and later with Windows 10 version 1909 and later. [Learn more about Microsoft Edge kiosk mode.](#)

Edge Kiosk URL * https://contoso.com

Microsoft Edge kiosk mode type Public Browsing (InPrivate)

Refresh browser after idle time 5

Specify Maintenance Window for App Restarts * Require Not configured

Maintenance Window Start Time MM/DD/YYYY h:mm:ss A

Maintenance Window Recurrence Daily (recommended)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic NOTE: Each correct selection is worth one point.

Answer Area

Users

can access any URL.
cannot view the address bar in Microsoft Edge.
can only access URLs that include contoso.com.
can only access URLs that start with https://contoso.com/ .

Windows 10 devices can have

a single Microsoft Edge instance that has a single tab.
a single Microsoft Edge instance that has multiple tabs.
multiple Microsoft Edge instances that have multiple tabs.
multiple Microsoft Edge instances that each has a single tab.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: can access any URL.

Public Browsing (InPrivate): Runs a limited multi-tab version of Microsoft Edge. Users can browse publicly, or end their browsing session.

Box 2: a single Microsoft Edge instance that has multiple tabs

Single app, full-screen kiosk runs only one app on the device, such as a web browser or Store app. Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings-windows>

NEW QUESTION 306

- (Exam Topic 4)

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Type
Device1	Windows 10
Device2	iOS
Device3	Android Enterprise

You need to ensure that only devices running trusted firmware or operating system builds can access network resources.

Which compliance policy setting should you configure for each device? To answer, drag the appropriate settings to the correct devices. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Settings	Answer Area
Require BitLocker.	Device1: Setting
Prevent jailbroken devices from having corporate access.	Device2: Setting
Prevent rooted devices from having corporate access.	Device3: Setting
Require Secure Boot to be enabled on the device.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1:

Device Compliance settings for Windows 10/11 in Intune

There are the different compliance settings you can configure on Windows devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require BitLocker, set a minimum and maximum operating system, set a risk level using Microsoft Defender for Endpoint, and more.

Note: Windows Health Attestation Service evaluation rules Require BitLocker:

Windows BitLocker Drive Encryption encrypts all data stored on the Windows operating system volume. BitLocker uses the Trusted Platform Module (TPM) to help protect the Windows operating system and user data. It also helps confirm that a computer isn't tampered with, even if its left unattended, lost, or stolen. If the computer is equipped with a compatible TPM, BitLocker uses the TPM to lock the encryption keys that protect the data. As a result, the keys can't be accessed until the TPM verifies the state of the computer.

Not configured (default) - This setting isn't evaluated for compliance or non-compliance.

Require - The device can protect data that's stored on the drive from unauthorized access when the system is off, or hibernates.

Box 2: Prevent jailbroken devices from having corporate access Device Compliance settings for iOS/iPadOS in Intune

There are different compliance settings you can configure on iOS/iPadOS devices in Intune. As part of your mobile device management (MDM) solution, use these settings to require an email, mark rooted (jailbroken) devices as not compliant, set an allowed threat level, set passwords to expire, and more.

Device Health

Jailbroken devices

Supported for iOS 8.0 and later

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted (jailbroken) devices as not compliant.

Box 3: Prevent rooted devices from having corporate access. Device compliance settings for Android Enterprise in Intune

There are different compliance settings you can configure on Android Enterprise devices in Intune. As part of your mobile device management (MDM) solution, use these settings to mark rooted devices as not compliant, set an allowed threat level, enable Google Play Protect, and more.

Device Health - for Personally-Owned Work Profile Rooted devices

Not configured (default) - This setting isn't evaluated for compliance or non-compliance. Block - Mark rooted devices as not compliant.

Reference: <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-windows> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-android-for-work> <https://docs.microsoft.com/en-us/mem/intune/protect/compliance-policy-create-ios>

NEW QUESTION 311

- (Exam Topic 4)

You use the Microsoft Deployment Toolkit (MDT) to deploy Windows 10. You need to modify the deployment share to meet the following requirements:

➤ Define a rule for how to name computers during the deployment.

The solution must NOT replace the existing WinPE image.

Which file should you modify for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Administrator password:	<div>▼</div> <div>Bootstrap.ini</div> <div>CustomSettings.in</div> <div>Settings.ini</div> <div>System.ini</div>
Computer names:	<div>▼</div> <div>Bootstrap.ini</div> <div>CustomSettings.in</div> <div>Settings.ini</div> <div>System.ini</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/windows/deployment/deploy-windows-mdt/deploy-a-windows-10-image-using>

NEW QUESTION 314

- (Exam Topic 4)

You need to assign the same deployment profile to all the computers that are configured by using Windows Autopilot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: each correct selection is worth one point.

- A. Join the computers to Microsoft Azure Active Directory (Azure AD)
- B. Assign a Windows AutoPilot deployment profile to a group
- C. Join the computers to an on-premises Active Directory domain
- D. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the operatingSystem tag
- E. Create a Group Policy object (GPO) that is linked to a domain
- F. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the ZTDID tag

Answer: BF

Explanation:

References:

<https://www.petervanderwoude.nl/post/automatically-assign-windows-autopilot-deployment-profile-to-windows>

NEW QUESTION 319

- (Exam Topic 4)

You have a Windows 10 device named Computer1 enrolled in Microsoft Intune.

You need to configure Computer1 as a public workstation that will run a single customer-facing, full-screen application.

Which template should you use to create a configuration profile for Computer1 in the Microsoft Endpoint Manager admin center?

- A. Kiosk
- B. Device restrictions
- C. Shared multi-user device
- D. Endpoint protection

Answer: A

Explanation:

On Windows 10/11 devices, you can configure these devices to run in single-app kiosk mode. On Windows 10 devices, you can configure these devices to run in multi-app kiosk mode.

Single app, full-screen kiosk

Runs only one app on the device, such as a web browser or Store app.

* Select a kiosk mode: Choose Single app, full-screen kiosk.

* Etc.

Reference: <https://docs.microsoft.com/en-us/mem/intune/configuration/kiosk-settings-windows>

NEW QUESTION 322

- (Exam Topic 4)

Your network contains an Active Directory domain. The domain contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

You have a server named Server that runs Windows Server 2019 and has the Windows Deployment Services role installed. Server1 contains an x86 boot image and three Windows 10 install images. The install images are shown in the following table.

Name	Architecture	User permission
Image1	x64	Full control: Administrators, WDSServer
Image2	x64	Full control: Administrators Read: Group1
Image3	x86	Full control: Administrators, WDSServer Read: Group2

You purchase a computer named Computer1 that is compatible with the 64-bit version of Windows 10. For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can install Image1 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User1 can install Image2 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>
User2 can install Image3 on Computer1 by using Windows Deployment Services (WDS).	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: No
 User1 is a member of Group1. User1 does not have any permission to Image1. Box 2: Yes
 User1 has read permissions to Image2 through Group1. Box 3: Yes
 User2 has read permissions to Image3 through Group2.

NEW QUESTION 325

- (Exam Topic 4)

You have a Microsoft 365 tenant that uses Microsoft Intune to manage the devices shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android device administrator
Device3	Android Enterprise
Device4	iOS
Device5	iPadOS

You need to deploy a compliance solution that meets the following requirements:

- > Marks the devices as Not Compliant if they do not meet compliance policies
- > Remotely locks noncompliant devices

What is the minimum number of compliance policies required, and which devices support the remote lock action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Minimum number of compliance policies required:

Devices that support the remote lock action:

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, table Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started> <https://docs.microsoft.com/en-us/mem/intune/protect/actions-for-noncompliance>

NEW QUESTION 329

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named User1. User1 has a user principal name (UPN) of user1@contoso.com.

You join a Windows 10 device named Client1 to contoso.com.

You need to add User1 to the local Administrators group of Client1.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
net accounts
net localgroup
net user
```

Administrators /add "

```
AzureAD
CONTOSO
UPN
```

\user1@contoso.com"

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: net localgroup

Add user to group from command line (CMD)

Windows provides command line utilities to manage user groups. In this post, learn how to use the command net localgroup to add user to a group from command prompt

For example to add a user 'John' to administrators group, we can run the below command. net localgroup administrators John /add

Box 2: Contoso

The domain of the user is Contoso.

Reference: <https://www.windows-commandline.com/add-user-to-group-from-command-line/>

NEW QUESTION 330

- (Exam Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. The domain contains member computers that run Windows 8.1 and are enrolled in Microsoft Intune.

You need to identify which computers can be upgraded to Windows 10.

Solution: You install the Microsoft Assessment and Planning Toolkit. From the Microsoft Assessment and Planning Toolkit, you collect inventory data and run the Windows 8.1 Readiness scenario.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 334

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant named contoso.com. You create a terms of use (ToU) named Terms1 in contoso.com.

You are creating a conditional access policy named Policy1 to assign a cloud app named App1 to the users in contoso.com.

You need to configure Policy1 to require the users to accept Terms1. What should you configure in Policy1?

- A. Grant in the Access controls section
- B. Conditions in the Assignments section
- C. Cloud apps or actions in the Assignments section
- D. Session in the Access controls section

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/require-tou>

NEW QUESTION 335

- (Exam Topic 4)

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE_x64.iso image and connect to MDT1, the welcome screen appears as shown In the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Modify the CustomSettings.ini file.	
Update the deployment share.	
Modify the Bootstrap.ini file.	
Replace the ISO image.	
Modify the task sequence.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Modify the Bootstrap.ini file.

Add this to your bootstrap.ini file and then update the deployment share and use the new boot media created in that process:

SkipBDDWelcome=YES

Box 2: Modify the CustomSettings.ini file. SkipBDDWelcome

Indicates whether the Welcome to Windows Deployment wizard page is skipped.

For this property to function properly it must be configured in both CustomSettings.ini and BootStrap.ini. BootStrap.ini is processed before a deployment share (which contains CustomSettings.ini) has been selected.

Box 3: Update the deployment share. Reference:

<https://docs.microsoft.com/en-us/mem/configmgr/mdt/toolkit-reference#table-6-deployment-wizard-pages>

NEW QUESTION 340

- (Exam Topic 4)

You are creating a device configuration profile in Microsoft Intune. You need to configure specific OMA-URI settings in the profile. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions (Windows 10 Team)
- D. Device restrictions

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/configuration/custom-settings-windows-10>

NEW QUESTION 344

- (Exam Topic 4)

Your company has 200 computers that run Windows 10. The computers are managed by using Microsoft Intune.

Currently, Windows updates are downloaded without using Delivery Optimization. You need to configure the computers to use Delivery Optimization.

What should you create in Intune?

- A. a device configuration profile
- B. a device compliance policy
- C. an app protection policy

D. a Windows 10 update ring

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/delivery-optimization-windows>

NEW QUESTION 349

- (Exam Topic 4)

You have a Microsoft 365 E5 subscription and 150 Windows 10 devices. All the devices are enrolled in Microsoft Intune. You need to use Intune to apply Windows updates to the devices. What should you do first?

- A. From the Microsoft Endpoint Manager admin center, configure scope tags.
- B. Create a device restriction policy that has telemetry set to the minimum setting of Required
- C. From the Microsoft Endpoint Manager admin center, configure a security baseline.
- D. Create a device restriction policy that has telemetry set to Security (Enterprise Only).

Answer: A

NEW QUESTION 353

- (Exam Topic 4)

Your network contains an on-premises Active Directory domain and an Azure Active Directory (Azure AD) tenant. The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

You need to migrate the existing Default Domain Policy GPO settings to a device configuration profile. Which type of device configuration profile should you create?

- A. Administrative Templates
- B. Endpoint protection
- C. Custom
- D. Device restrictions

Answer: C

Explanation:

NEW QUESTION 354

- (Exam Topic 4)

You have a Microsoft 365 tenant that contains the users shown in the following table.

Name	UPN	Member of
User1	User1@contoso.com	Group1
User2	User2@contoso.com	None

You have Windows 10 devices enrolled in Microsoft Intune as shown in the following table.

Name	Ownership	Enrolled by UPN	Active hours
Device1	Personal	User1@contoso.com	10 AM to 6 PM
Device2	Corporate	User2@contoso.com	9 AM to 5 PM
Device3	Corporate	User1@contoso.com	10 AM to 6 PM

You create a Windows 10 update ring that has the following settings:

> Basics:

- Name: Ring1

> Update ring settings:

- Active hours start: 8 AM

- Active hours end: 8 PM

> Assignments:

- Included Groups: All devices

- Excluded Groups: Group1

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The active hours of Device1 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device2 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>
The active hours of Device3 are from 8 AM to 8 PM	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

NEW QUESTION 362

- (Exam Topic 4)

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1	Disabled
User2	Group1	Enforced

MFA has a trusted IP address range of 123.30.20.0/24.

You have the Azure AD named locations shown in the following table.

Name	IP address range	Trusted
Location1	64.10.10.0/24	Yes
Location2	210.77.11.0/24	No

You create a Conditional Access policy that has the following settings:

> Name: CAPolicy1

- > Assignments
 - Users or workload identities
 - Include: Group1
 - _Cloud apps or actions: App1 Conditions
- = Locations
 - Include: All trusted locations
- > Access controls
 - Grant access
 - Require multi-factor authentication

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 connects to App1 from a device that has an IP address of 210.77.11.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User1 connects to App1 from a device that has an IP address of 64.10.10.15, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>
If User2 connects to App1 from a device that has an IP address of 123.30.20.10, the user will be prompted for MFA.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes
Location2 is not trusted.
Box 2: No
Location1 is trusted.
Box 3: No
MFA IP range is also trusted.

NEW QUESTION 367

- (Exam Topic 4)
You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All Windows 10 devices are enrolled in Microsoft Intune. You configure the following settings in Windows Information Protection (WIP):
> Protected apps: App1
> Exempt apps: App2
> Windows Information Protection mode: Silent App1, App2, and App3 use the same file format. You create a file named File1 in App1. You need to identify which apps can open File1.
What apps should you identify? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

You can open File1 from:

☐

App1 only
App1, and App2 only
App1 and App3 only
App1, App2, and App3

An action will be logged when you attempt to open File1 from:

☐

App1 only
App3 only
App1, and App2 only
App2 and App3 only
App1, App2, and App3

- A. Mastered
- B. Not Mastered

Answer: A
