NEW QUESTION 2

HOTSPOT - (Topic 1)

You create a user-owned custom entity by using Common Data Service.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	<input type="radio"/>	<input type="radio"/>
You can create a business rule for a custom entity that can be used in a Flow.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.

Box 2: Yes

By combining conditions and actions, you can do any of the following with business rules:

Set field values Clear field values

Set field requirement levels Show or hide fields

Enable or disable fields

Validate data and show error messages

Create business recommendations based on business intelligence.

NEW QUESTION 10

- (Topic 3)

You create a Power BI dashboard that displays data from Dynamics 365 Customer Engagement.

You need to share the Power BI dashboard with coworkers.

What are three possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a Power BI workspace and grant coworkers permissions.
- B. Publish the dashboard as an app to your coworkers.
- C. Export the data into Common Data Service for others to manipulate in Power BI.
- D. Export the data to Microsoft Excel for coworkers to import and view in Power BI.
- E. Embed reports in your company's internal web portal.

Answer: ABE

Explanation:

A: Basic Sharing for Dashboards and Reports through a workspace is the most common way of sharing the Power BI content. Basic Sharing is very simple and easy to use method. You can simply click on the Share button in the dashboard or report, and then share it with other users.

B: Apps are great sharing method for multiple environment, and best way of sharing for users in production environment.

Power BI App is the solution for multiple environment approach. With Power BI App, your development environment (workspace), and user environment (App) are isolated from each other.

Note: If you are using SharePoint online as a portal for document management and some other reasons already, then consider using Embed in SharePoint Online feature of Power BI reports. This method is secure and you can share the report only with Power BI users you want.

E: Sometimes, you don't need a secure way of sharing, you may search for an easy and free way of sharing, and your content is not confidential or sensitive.

Publish to web is your friend in such situation. This is the only free way of sharing in Power BI, but be aware that this method is not secure.

Publish to web method, gives you an embed code, which you can use in any web pages to embed the Power BI report in it

NEW QUESTION 39

- (Topic 3)

Your company has an on premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.

You need to establish a secure connection between the database and the app.

What should you use?

- A. Data source
- B. App
- C. Gateway
- D. Flow

Answer: C

Explanation:

For an on-premises database, identify a data gateway that was shared with you (or create one).

Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

NEW QUESTION 50

DRAG DROP - (Topic 3)
A company plans to create an information portal that managers can use to view critical information about their teams. You need to recommend the type of Power BI components that the company should use. What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE. Each correct selection is worth one point.

Component types	Requirement	Component type
<div>Dashboard</div>	Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	<div>Component type</div>
<div>Report</div>	Display the top departmental goal metrics and alert users when specific thresholds targets are met.	<div>Component type</div>
	Display Sales charts that can be filtered by region.	<div>Component type</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Report
Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.
Box 2: Dashboard
Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.
Box 3: Report
Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.
Note: Power BI dashboards are one placeholder to display the most important decision- making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

NEW QUESTION 55

HOTSPOT - (Topic 3)
You have a Power BI report.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can export data from a visualization in a Power BI report.	<input type="radio"/>	<input type="radio"/>
You can show the data behind a visual report on your screen without exporting the data.	<input type="radio"/>	<input type="radio"/>
You must export data to view supporting data for a KPI.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

If you'd like to see the data that Power BI uses to create a visualization, you can display that data in Power BI. You can also export that data to Excel as an .xlsx or .csv file. The option to export the data requires a Pro or Premium license and edit permissions to the dataset and report.

Note: Export data from a Power BI dashboard

? Select the ellipsis in the upper-right corner of the visualization.

? Choose the Export data icon.

? Power BI exports the data to a .csv file. If you've filtered the visualization, then the app will filter the downloaded data.

? Your browser will prompt you to save the file. Once saved, open the .csv file in Excel.

Box 2: No

Underlying data: Select this option if you want to see the data in the visual and additional data from the model (see chart below for details). If your visualization has an aggregate, selecting Underlying data removes the aggregate. When you select Export, Power BI exports the data to an .xlsx file and your browser prompts you to save the file. Once saved, open the file in Excel.

Box 3: Yes

A KPI dataset needs to contain goal values for a KPI. If your dataset doesn't contain goal values, you can create them by adding an Excel sheet with goals to your data model or PBIX file.

Note: A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.

NEW QUESTION 58

DRAG DROP - (Topic 4)

You are creating a model-driven app to track requests for quotes. The app must use the following navigation structure:

Sales

? Sales Log

? Request for Quotes

? Projects

? Settings

? Customers

? Product Lines

? Sales Territories Administration

? User Admin

? Users

? Roles

You need to create the app navigation.

Which sitemap component types should you use? To answer, drag the appropriate component types to the correct navigation elements. Each component type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.
You need to ensure that users can revert a flow to the current state.
Which two options can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Export
- B. Rename
- C. Save As
- D. Share

Answer: AC

Explanation:
A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.
C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.
Here's how:
Go to your My flows page. Click on the More (...) menu item next to the flow that you want to create a copy of. Click on the Save As command.

NEW QUESTION 142

- (Topic 7)

A company is creating a chatbot to replace a frequently asked questions (FAQ) site. You must perform step-by-step testing for all scenarios that are part of a complex user interaction that includes multiple topics. Testers must be able to see the workflow while interacting with the chatbot. You need to test the chatbot. What should you do?

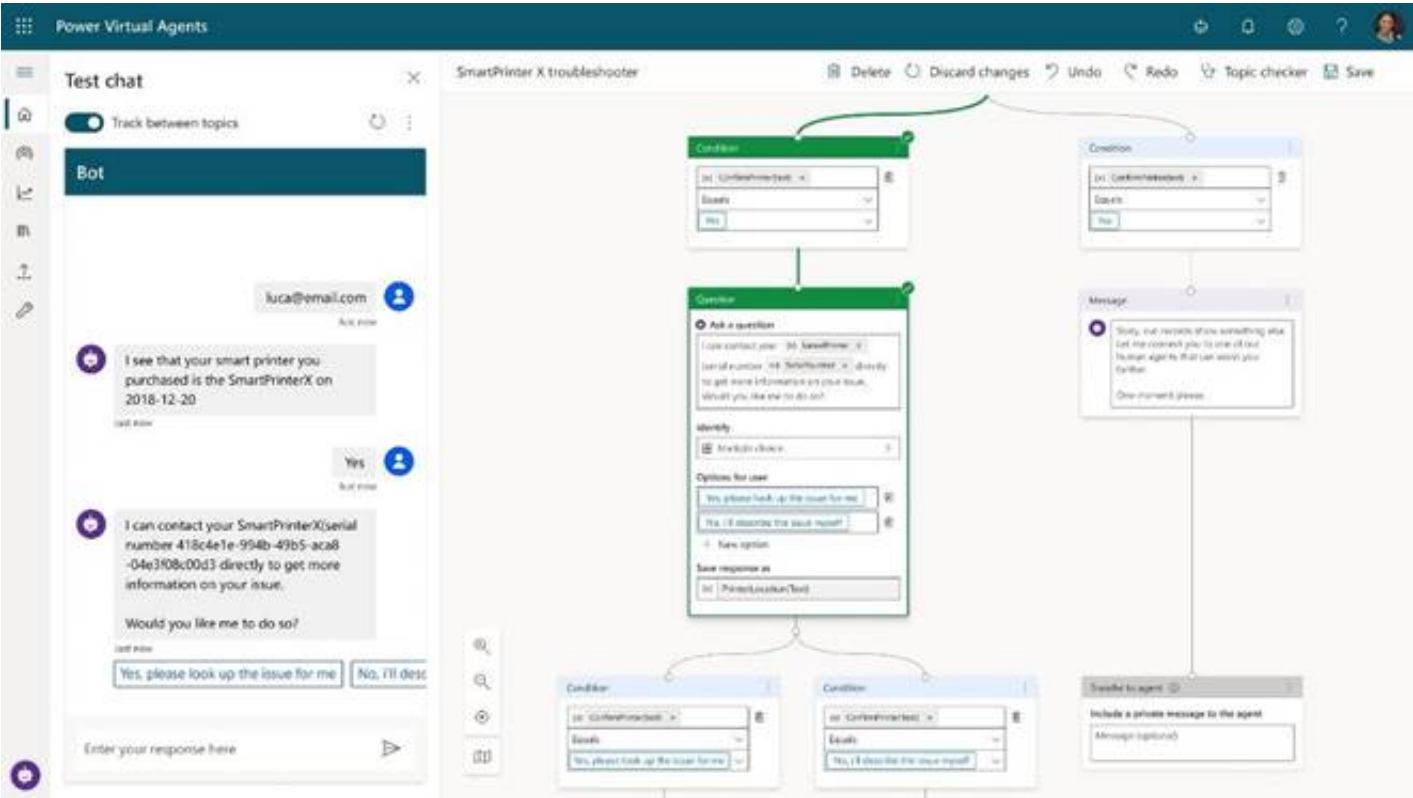

- A. Publish the chatbot and test it in the demo website.
- B. Use the chatbot designer to test the chatbot

- C. View analytics for a chatbot conversation.
- D. Publish the chatbot and test it in any channel

Answer: B

Explanation:

Test and maintain chatbots through an incredibly easy-to-use graphical interface. Recognize and act on dozens of common entities in the user’s conversation such as colors, currencies, ages, dates and times, or create your own, and store user information in variables and use them to branch or create complex conversations.

Donut	Show the quarterly sales total to date in relation to the sales goal.	
KPIs	View the sales trend by month of the sales year to date for all regions.	
Line chart	View the year-to-date sales as a percentage by region.	
Matrix		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: KPIs
 A Key Performance Indicator (KPI) is a visual cue that communicates the amount of progress made toward a measurable goal.
 Box 2: Line chart
 Line charts emphasize the overall shape of an entire series of values, usually over time.
 Box 3: Donut
 Doughnut charts are similar to pie charts. They show the relationship of parts to a whole. The only difference is that the center is blank and allows space for a label or icon.
