

Microsoft

Exam Questions PL-100

Microsoft Power Platform App Maker

NEW QUESTION 1

DRAG DROP - (Topic 4)

You are developing an app that warehouse workers will run on their phones to perform inventory counts.

You need to design the app.

Which type of control should you use? To answer, drag the appropriate control types to the correct requirements. Each control type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection presents a complete solution.

Control types

Text box

Combo box

Slider

Radio

Answer Area

Requirement

Capture decimal numbers.

Select multiple products from a list.

Set the status of a product.

Control type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 2

DRAG DROP - (Topic 4)

You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.

You need to pick the appropriate solution type for each requirement.

Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement

Edit existing components of the solution.

Add new components to the solution.

Export the solution.

Solution type

Unmanaged

Unmanaged

Managed

Box 1: Unmanaged

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Box 2: Unmanaged

Box 3: Managed

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

NEW QUESTION 3

DRAG DROP - (Topic 4)

A company has 500 products. Each product is referenced by a product ID. Each product belongs to one of eight product categories.

You are creating an app to manage requests for new products.

The product categories will never change. Categories are defined in the column itself, not in a separate table. The data must be structured in a way that does not allow for misspellings.

Only two new tables should be created in Microsoft Dataverse:
 ? Products: Holds the products that can be requested.
 ? Requests: Holds the requests for the product ID and quantity. The products are filtered by product category.
 You need to identify the data types to use when building the table columns in Dataverse.
 Which data type should you use? To answer, drag the appropriate data types to the correct requirements. Each data type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
 NOTE: Each correct selection is worth one point.

Data types	Answer Area								
<div>Lookup</div> <div>Choice</div> <div>Text</div>	<table border="1"> <thead> <tr> <th>Scenario</th> <th>Data types</th> </tr> </thead> <tbody> <tr> <td>Create a column in the Products table that displays the category of the product</td> <td>Data type</td> </tr> <tr> <td>Create a column in the Products table for the product ID of the product</td> <td>Data type</td> </tr> <tr> <td>Create a column in the Requests table that allows the user to select form a list of available products</td> <td>Data type</td> </tr> </tbody> </table>	Scenario	Data types	Create a column in the Products table that displays the category of the product	Data type	Create a column in the Products table for the product ID of the product	Data type	Create a column in the Requests table that allows the user to select form a list of available products	Data type
Scenario	Data types								
Create a column in the Products table that displays the category of the product	Data type								
Create a column in the Products table for the product ID of the product	Data type								
Create a column in the Requests table that allows the user to select form a list of available products	Data type								

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Text
 Text columns can contain text characters. This column type has several format options that will change the presentation of the text.
 Box 2: Lookup
 When you create a new lookup column you are creating a new Many-to-One (N:1) table relationship between the table you're working with and the Target Row Type defined for the lookup.
 Box 3: Choice
 You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form, they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 4

- (Topic 4)
 You are creating a canvas app that displays a list of accounts.
 Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.
 You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.
 You need to complete the app.
 What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
- B. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
- C. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- D. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Vie
- E. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form to First(Accounts).Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- F. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to Ne
- G. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).Set the data source of the form to Account
- H. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).
- I. Add a display form to Screen_AccountDetail.Set the data source of the form to Account
- J. Set the Item property of the form to Selected.Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Answer: AD

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 5

- (Topic 4)
 You are an app designer for a hotel.
 The hotel wants to create an app to help the housekeeping staff schedule work. You need to create a new environment for the app.
 Where should you create the environment?

- A. Power Platform Admin center
- B. Power Apps Maker portal
- C. Dynamics 365 Admin center

Answer: A

Explanation:

Manage environment in the Power Platform admin center. Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/create-environment>

NEW QUESTION 6

DRAG DROP - (Topic 4)

A company uses a canvas app.

The finance team and sales team require access to the canvas app. You must perform the following actions:

- Add members of the sales team to the app as users.
- Add members of the finance team to the app as co-owners.

The app must be shareable with current and future team members.

You need to request creation of group types for team members. This must enable sharing of the app with the least amount of effort.

Which group types should you request? To answer, drag the appropriate group types to the correct activities. Each group type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 7

- (Topic 4)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
B. Create test cases for each requirement.
C. Save the app to your computer.
D. Create a test suite.
E. Record test cases for each requirement.

Answer: D

Explanation:

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

NEW QUESTION 8

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- ? Provision production environments named P1 and P2.
- ? Copy the current production environment to P1 and P2.
- ? Use P1 for development and P2 for testing.

Does the solution meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Don't use production environment for development and testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 9

DRAG DROP - (Topic 4)

You are an app and report maker. You provide visualizations for two departments in an organization.

Each department requires department-specific visualizations:

Department	Requirement
Department1	Provide unstructured answers to free text survey questions.
Department2	Chart real-time data in columns that groups complaints by category, urgency, and status.

You need to create the visualizations.
Which chart type should you use? To answer, drag the appropriate chart type to the correct requirements. Each chart type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Chart types

Multi-series

Tag

Stacked column

Requirement

Unstructured answers to free text survey questions.

Real-time column chart that groups complaints by category, urgency, and status.

Chart type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Tag
Box 2: Multi-series
Multi-series charts: Charts that display data with multiple series values mapped to a single category value.

NEW QUESTION 10
DRAG DROP - (Topic 4)
: 186 DRAG DROP
A company uses Power Apps.
The company requites a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.
Which connector types should you use? To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 10
- (Topic 4)
A company uses Power Apps in a single Microsoft Dataverse environment.
Users are divided into two groups about not a canvas app should work. The company decides that each group of users will try a version of the app for one week and switch to the other version of the app the following week.
You need to manage the app creation. What should you do?

- A. Create one app with two different version numbers.
- B. Create one app with two different version notes.
- C. Create two apps with the same name.
- D. Create two apps with different app names.

Answer: A

NEW QUESTION 14

- (Topic 4)

A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.

A user updates the Excel file daily with updated data.

The company needs a solution that automatically displays the latest analytics.

You need to create a basic report that contains pie charts that display the most profitable channels.

You need to propose the right solution.

Solution: Model-driven application using native charts. Does the solution meet the goal?

A. Yes

Answer: B

NEW QUESTION 16

DRAG DROP - (Topic 4)

DRAG DROP

A company is creating Power Apps apps for their customer service team.

You must create a final released solution to export to their test environment that cannot be changed in the new environment.

You need to determine the types of solutions to use.

Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution type

Managed

Unmanaged

Answer Area

Condition

Assign a publisher for the first time

Export the solution

Solution type

Solution type

Solution type

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged

Unmanaged solutions are used in development environments while you make changes to your application.

Box 2: Managed

Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 20

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform. Users create charts based on specific needs in

You create a solution in a development environment. You rebuild personal charts of the users inside the solution. All charts must appear on one page.

You need to create a single page that includes all charts without switching to classic. Which three steps should you perform in sequence? To answer, move the appropriate

actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a new dashboard.

Open the solution in the Maker portal.

Add the charts to the dashboard.

Create a new interactive experience dashboard.

Answer Area

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Actions

Create a new dashboard.

Open the solution in the Maker portal.

Add the charts to the dashboard.

Create a new interactive experience dashboard.

Answer Area

NEW QUESTION 22

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Power Apps. The company has a model-driven app that accesses a Microsoft Dataverse table. The app is shared with all users who all have the

Basic User security role.
You must prevent the users from running and sharing the app.
What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Prevent users from running the app.	<div>Turn off the app.</div> <div>Export the app.</div> <div>Turn off the app.</div> <div>Remove access to the table.</div>
Prevent users from sharing the app.	<div>Remove access to the table.</div> <div>Export the app.</div> <div>Turn off the app.</div> <div>Remove access to the table.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Action
Prevent users from running the app.	<div>Turn off the app.</div> <div>Export the app.</div> <div>Turn off the app.</div> <div>Remove access to the table.</div>
Prevent users from sharing the app.	<div>Remove access to the table.</div> <div>Export the app.</div> <div>Turn off the app.</div> <div>Remove access to the table.</div>

NEW QUESTION 27

- (Topic 4)
A company receives its marketing campaign performance report as a Microsoft Excel file. The company stores the file in Microsoft SharePoint.
A user updates the Excel file daily with updated data.
The company needs a solution that automatically displays the latest analytics.
You need to create a basic report that contains pie charts that display the most profitable channels.
You need to propose the right solution.
Solution: Microsoft Power Apps canvas app having an Excel file imported into the app and Pie chart control.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 30

HOTSPOT - (Topic 4)
A company uses Microsoft Dataverse to store holiday employee request data.
An HR manager needs a report that displays overview information about the employee requests.
You need to design a report that visualizes request data over time and type.
Which Microsoft Power BI functionalities should you use to complete each step? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Step	Functionality
Create additional relationships between tables	<div>Model view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Change the data type of a column	<div>Data view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Design visuals	<div>Report view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Choose data for import	<div>Navigator</div> <div>Data view</div> <div>Report view</div> <div>Navigator</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Step	Functionality
Create additional relationships between tables	<div>Model view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Change the data type of a column	<div>Data view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Design visuals	<div>Report view</div> <div>Model view</div> <div>Data view</div> <div>Report view</div>
Choose data for import	<div>Navigator</div> <div>Data view</div> <div>Report view</div> <div>Navigator</div>

NEW QUESTION 33

DRAG DROP - (Topic 4)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties. You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
<div>Entity</div>	Reuse the custom control for multiple canvas apps.	<div></div>
<div>Component</div>		
<div>Component library</div>	Receive input data through a custom property.	<div></div>
<div>Component framework</div>		

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Component library
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.
By creating a component library, app makers easily share and update one or more components with other makers.
Component libraries are containers of component definitions that make it easy to: Discover and search components.
Publish updates.
Notify app makers of available component updates.
Box 2: Component
A component can receive input values and emit data if you create one or more custom properties.

NEW QUESTION 35

- (Topic 4)
A company plans to roll out several Power Apps apps to multiple business units across international operations.
The apps must be managed through an application lifecycle management (ALM) solution to provide a consistent and predictable use experience. All changes to the app must be traceable and documented in a single location. You must be able to revert to a previous version of an app. The app release cycles must be as streamlined as possible.
You need to create an application for the apps.
Which two tools should you use? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Microsoft Azure DevOps
- B. Microsoft Visual Studio
- C. Lifecycle Services
- D. AppSource
- E. Common Data Service

Answer: AD

Explanation:

A: DevOps is the combining of two historically disparate disciplines: software development and IT operations. The primary goal of DevOps is to shorten the software development lifecycle and provide continuous integration and continuous delivery (CI/CD) with high software quality. You can use Power Apps build tools to automate common build and deployment tasks related to Power Apps if your DevOps platform is Azure DevOps.
D: Microsoft AppSource is now embedded in the Dynamics 365 home page and throughout the common navigation. It now includes a private gallery of apps available to you within your company. Select Get more apps from the home page or task pane, and navigate to the My Organization tab to see apps that are available to you.
Reference:
<https://docs.microsoft.com/en-us/power-platform/alm/devops-build-tools> <https://docs.microsoft.com/en-us/powerapps/user/app-source>

NEW QUESTION 37

DRAG DROP - (Topic 3)
You need to create the food bank notification.
Which four actions should you perform in sequence? To answer, move the appropriate

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Create a food bank topic.

Retrieve the food bank locations.

Authenticate the food bank user.

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

Answer area

Retrieve meals in food pool filtered by location.

Filter the list of food available to the food pool.

Prompt the user to select a location.

Prompt the user to select meals.

NEW QUESTION 41

- (Topic 2)
You need to resolve the user's issue with the time tracking app.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Add a component to the time tracking screen for tracking total time.
- B. Create a new component inside of the component library for the time tracking app.
- C. Upload the component to AppSource.
- D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: AB

Explanation:

Scenario Issue: Users want to be able to see their weekly total time entered from all screens.

A component library provides a centralized and managed repository of components for reusability.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 45

HOTSPOT - (Topic 2)

You need to create the solution assets.

What should you use to create the visualizations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Dashboard visualization	Tool
Sales	<div> <div></div> <div> Power BI Desktop only Power BI Service only Power BI Desktop or Power BI Service </div> </div>
Manufacturing	<div> <div></div> <div> Power BI Desktop only Power BI Service only Power BI Desktop or Power BI Service </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: PowerBI Desktop

The Sales dashboard must reside in the Sales channel and must include information about active quotes, sales pipeline, and year-to-date sales KPIs for sales quotas by region.

PowerBI Desktop to support many data source. Box 2: PowerBI Desktop or Power BI Service on

A dashboard that shows a capacity Heat map by month as well as expected sales that are

likely to close for the next month. Both support visualizations.

NEW QUESTION 46

- (Topic 2)

You need to implement the change requested by the operations manager. Which control should you use?

BF70D5D

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Answer: D

Explanation:

Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge.

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 51

- (Topic 2)

You need to modify the entity form to resolve the customer request number issue. What should you do?

- A. Use a calculated field
- B. Change the data type of the customer request number field to Lookup
- C. Change the data type of the customer request number field to Autonumber

Answer: C

Explanation:

Scenario: Users report that the customer request number is difficult to interpret. They request that you change the number to a system generated sequential number. Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/autonumber-fields>

NEW QUESTION 52

DRAG DROP - (Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.
Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Requirement	Tool
<div>Solution Checker</div>	Accessibility	<div>Tool</div>
<div>App Checker</div>	Deployment	<div>Tool</div>
<div>Object Detector</div>		
<div>Preview the app</div>		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse. Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines. Use solution checker to validate your model-driven apps in Power Apps.

NEW QUESTION 57

HOTSPOT - (Topic 1)

You need to create a flow for sending required emails to the regional manager.
How should you create the flow? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Option	Type
Flow type to use	<div><div>Instant</div><div>Automated</div><div>Business Process</div><div>Scheduled</div></div>
Trigger to start flow	<div><div>HTTP Webhook</div><div>Power Apps</div><div>Common Data Service when a record is created</div><div>Office 365 Outlook Send an email</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user

interface, text, application, email Description automatically generated

Box 1: Business Process

Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.

Box 2: Common Data Service when a record is created

The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:

? When a row is created, updated, or deleted

- ? When an action is performed
- ? When a flow step is run from a business process flow

NEW QUESTION 62

- (Topic 4)
You are creating a canvas app for a company.
The app must access data from a private web service that is provided by the company. You need to set up the connector.
Which connector type should you use?

- A. Custom
- B. Standard
- C. First-party
- D. Premium

Answer: A

NEW QUESTION 65

- (Topic 4)
A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.
A Power Automate flow monitors social media channels to identify high-impact trends. When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.
You need to streamline the Power Automate and Teams communication process.
What should you use?

- A. AI Builder
- B. Common Data Service business process flows
- C. Adaptive cards
- D. Integrated approval flows

Answer: A

Explanation:

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."
Jim Parker: Web and Collaboration Services Manager
Reference:
<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

NEW QUESTION 70

DRAG DROP - (Topic 4)
You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional
Users must be able to filter the dashboard. You need to determine how to apply the filters.
Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Dashboard types

Standard

Interactive

Power BI embedded

Answer Area

NEW QUESTION 75

HOTSPOT - (Topic 4)
You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store.
The company has strict rules about access, permissions, and privacy.
Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.
You need to ensure that these rules are observed consistently and managed in one place.
Which type of app should you create? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	App type
Access client billing details	<div>Canvas app in Microsoft Teams</div> <div>Canvas app in SharePoint</div> <div>Model-driven app in SharePoint</div> <div>Model-driven app in Microsoft Teams</div>
Log phone calls and schedule appointments with clients and the team assigned to them	<div>Dynamics 365 App for Outlook</div> <div>Microsoft Teams calendar</div> <div>SharePoint calendar</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: Model-driven app in Microsoft Teams

A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.

Box 2: Sharepoint Calendar

NEW QUESTION 79

DRAG DROP - (Topic 4)

You are deploying solutions from development environments into test environments. You need to gather solution information.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options	Answer Area	
	Scenario	Action
<div>View the history</div>	Find the deployment outcome	<div>Action</div>
<div>Show dependencies</div>	Determine, in which version, a type change occurred	<div>Action</div>
<div>View solution layers</div>	Determine if any components are missing	<div>Action</div>
<div>Run the Solution checker</div>		

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: View the history

The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

Box 2: View solution layers

The see solution layers' feature allows you to view all component changes that occur due to solution changes over time. Within a solution layer, you can drill down to view specific changed and unchanged property details for a component.

The see solution layers' feature:

? Let's you see the order in which a solution changed a component.

? Let's you view all properties of a component within a specific solution, including the changes to the component.

Box 3: Show dependencies

As a result of dependency tracking the following behaviors are enforced:

? Export of a solution warns the user if there are any missing components that could cause failure when importing that solution in another system.

NEW QUESTION 82

- (Topic 4)

A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use.

Sales users only want to see information for their own region. Sales users must call sales

leads within a week of receiving a lead.

You need to recommend a solution for sales users.

Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Instruct users to create personal views that filter by region.
B. Instruct users to filter the view by region.
C. Configure the definition for each view to sort by region.
D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 86

DRAG DROP - (Topic 4)

You are creating a Power Automate cloud flow.
The data in the flow must perform the following actions:

- Return the first character of a string of text.
- Convert an array to a single string. You need to manipulate the data.

Which data operations should you use? To answer, drag the appropriate data operations to the correct changes. Each data operation may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data operations

Join

NEW QUESTION 90

- (Topic 4)

You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

A. approval request in the Teams channel that requires a response from all approvers
B. approval request in a chat with the three managers that requires a response from all approvers
C. approval template that requires responses to be completed m order
D. approval template that requires a response from all approvers

Answer: B

NEW QUESTION 93

HOTSPOT - (Topic 4)

You create a Power Automate cloud flow that runs when a user creates a Microsoft Dataverse lead record.
The cloud flow must update a custom score column on the lead record based on other column values. The flow must perform the following activities:

- Update the Microsoft Dataverse record.
- Evaluate whether the Microsoft Dataverse record should be updated. You need to configure the flow components.

Which components should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Update the Microsoft Dataverse record.

Evaluate whether the Microsoft Dataverse record should be updated.

Component

NEW QUESTION 95

DRAG DROP - (Topic 4)

You are designing a canvas app.

You need to select user interface controls to include in the app.

Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	
Radio		
Combo box	Allow users to select multiple items from a list of options by typing in a phrase.	
Drop-down list		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: List box

A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).

Box 2: Combo box

A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.

Single or multi-select mode is configured via the SelectMultiple property.

When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

NEW QUESTION 96

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<div>On the header control.</div> <div>On each RiskStatus slider input.</div> <div>In the global variables of the Power Apps app.</div> <div>On the OnStart property of the Power Apps app.</div>
Which formula should you use?	<div>SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)>=150? "HIGH RISK" : ""</div> <div>IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)<150, "", HIGH RISK)</div> <div>Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)>=150, "HIGH RISK")</div> <div>UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value>=150), "HIGH RISK")</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: On each RiskStatus slider input

You can change the value based on input.

Box 2: Updateif(..)

Use the Updateif function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.

NEW QUESTION 98

DRAG DROP - (Topic 4)

You are creating entities in a Common Data Service database to capture sales data. You create an entity named Sales that includes the following fields:

Field	Description
SalesPerson	The name of the salesperson who made the sale
Quantity	The number of units sold
Rate	The sale price per unit
GrossAmount	A value obtained by multiplying the Quantity times the Rate. This value is for display purposes only
DiscountAmount	An amount that a salesperson enters into the app to discount a sale
NetAmount	A value obtained by subtracting the DiscountAmount from the GrossAmount

You create a new entity that includes a field named TotalSales. The field is used to capture the aggregated sales for each salesperson. You need to configure the fields for the entities. Which field types should you use? To answer, drag the appropriate field types to the correct field names. Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Field types

Rollup

Calculated

Simple

Answer Area

Field name	Field type
GrossAmount	Field type
DiscountAmount	Field type
TotalSales	Field type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Calculated
Calculated columns are calculated in real-time when they are retrieved. Calculated columns can be composed using different data types. For example, an Integer calculated column may reference values from Decimal or Currency columns.
Box 2: Simple
A simple column isn't defined as a calculated or rollup column.
Box 3: Rollup
Because rollup columns persist in the database, they can be used for filtering or sorting just like regular columns.

NEW QUESTION 101
HOTSPOT - (Topic 4)

A company is using Power Automate to send an email with all active projects that are at risk. Projects that are stored in a table in Microsoft Dataverse are deemed at risk if the column for a risk score is greater than 70 or has a zero value. The flow will loop over all the records in the Dataverse Projects table and update the risk status field based on the risk score. You need to create a single evaluation expression to update the risk status field. Which expression component should you use? To answer, select the appropriate options in NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Expression component
Return a true value if a value in the risk column meets one of the two conditions.	<div>@or</div> <div>@or</div> <div>@and</div> <div>if</div> <div>equals</div>
Return a true value if a value in the risk column is 0.	<div>equals</div> <div>@if</div> <div>contains</div> <div>@startsWith</div> <div>equals</div>
Return a true value if the value in the risk column is above 70.	<div>greater</div> <div>@greaterOrEquals</div> <div>greater</div> <div>contains</div> <div>@if</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement

Return a true value if a value in the risk column meets one of the two conditions.

Return a true value if a value in the risk column is 0.

Return a true value if the value in the risk column is above 70.

NEW QUESTION 103

DRAG DROP - (Topic 4)

You have the following Common Data Service entities: BusinessContracts and
You need to configure an N:N relationship between the two entities.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select **Add relationship** and then select the many-to-many relationship option.

Select the BusinessAccounts entity as the related entity.

Open the relationship tab of the BusinessContracts entity.

Choose the Relationship Name and Relationship Entity Prefix.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Open the relationship tab of the BusinessContracts entity. View entity relationships
From the Power Apps portal, select either Model-driven or Canvas design mode. Select Data > Entities and select the entity that has the relationships you want to view. With the Relationships tab selected, you can select the following views:
Step 2: Select Add relationship.. Create relationships
While viewing entity relationships, in the command bar, select Add relationship and choose Many-to-many.
Step 3: Select the BusinessAccounts entity as the related entity.

NEW QUESTION 108

- (Topic 4)

You create a canvas app.
You need to ensure that there are no screen reader issues in the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Open Test Studio.

Select **Formula**.

Open the App checker.

Select **Accessibility**.

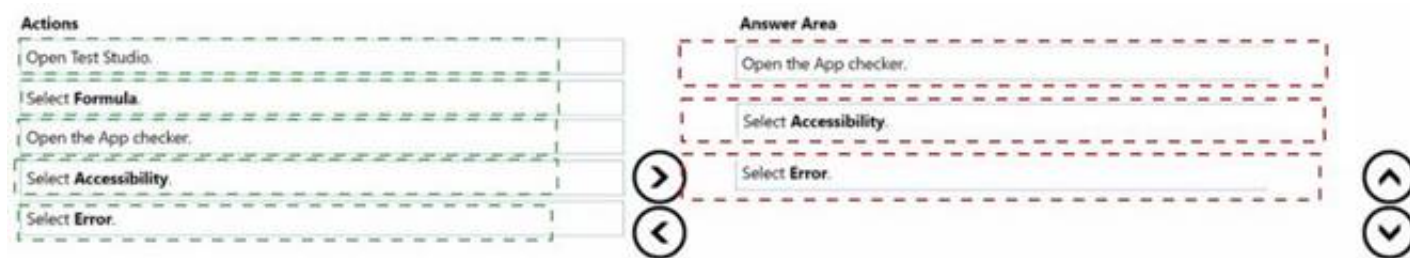

Select **Error**.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 109

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera.

Proposed solution:

? Create a Category Classification custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

A. Yes

B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 113

- (Topic 4)

You are creating an app for a company. You need to evaluate the default solution.

Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. You can change the prefix of the publisher of the default solution

B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher in the publisher

C. You can change the version number of the default solution

Answer: AC

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1>

NEW QUESTION 117

- (Topic 4)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.

What should you conclude?

A. The default solution does not contain all components and customizations from all solutions in the environment.

B. The prefix used when creating components as part of the default solution can be set to a specific value.

C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

? The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations>

NEW QUESTION 120

- (Topic 4)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security.

Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b_accountid

Answer: D

Explanation:

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

NEW QUESTION 125

- (Topic 4)

A company uses a canvas app. The last published version of the app is version 18.

You edit the app. You save your updates and run the app. When you test the app, you discover you deleted a screen.

You need to restore the last published version of the app.

What is the version number of the app after you successfully restore it?

- A. 17
- B. 18
- C. 18.1
- D. 20

Answer: B

NEW QUESTION 128

- (Topic 4)

You create a Microsoft Power BI report with multiple visualizations displayed together. The report must be available to users in all security roles. You need to display the report in a model-driven app. What should you embed?

- A. Power BI dashboard on a model-driven form.
- B. Power BI tile on a model-driven form.
- C. Power BI dashboard on a model-driven dashboard.
- D. Power BI tile on a model-driven dashboard.

Answer: D

NEW QUESTION 129

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others

might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of

actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

NEW QUESTION 131

- (Topic 4)

You work in a warehouse. You build an app for physical inventory counts that is used by different staff members. The typical count takes 14 hours.

The app has a warehouse screen with a gallery that contains the aisles in the warehouse. When a staff member selects an aisle record, another screen displays all the items stored in that aisle. The staff must know how long each aisle takes to do a physical inventory count.

You need to add logic to the app. What should you do?

- A. Configure a timer control, add it to the aisle screen, and then reset it when exiting the aisle screen
- B. Create and configure a stopwatch custom control, and then add it to the gallery
- C. Create and configure a stopwatch custom component, and then add it to the aisle screen
- D. Configure a timer control, add it to the gallery, and then reset it when the selection changes

Answer: C

Explanation:

Reference:

<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

NEW QUESTION 134

HOTSPOT - (Topic 4)

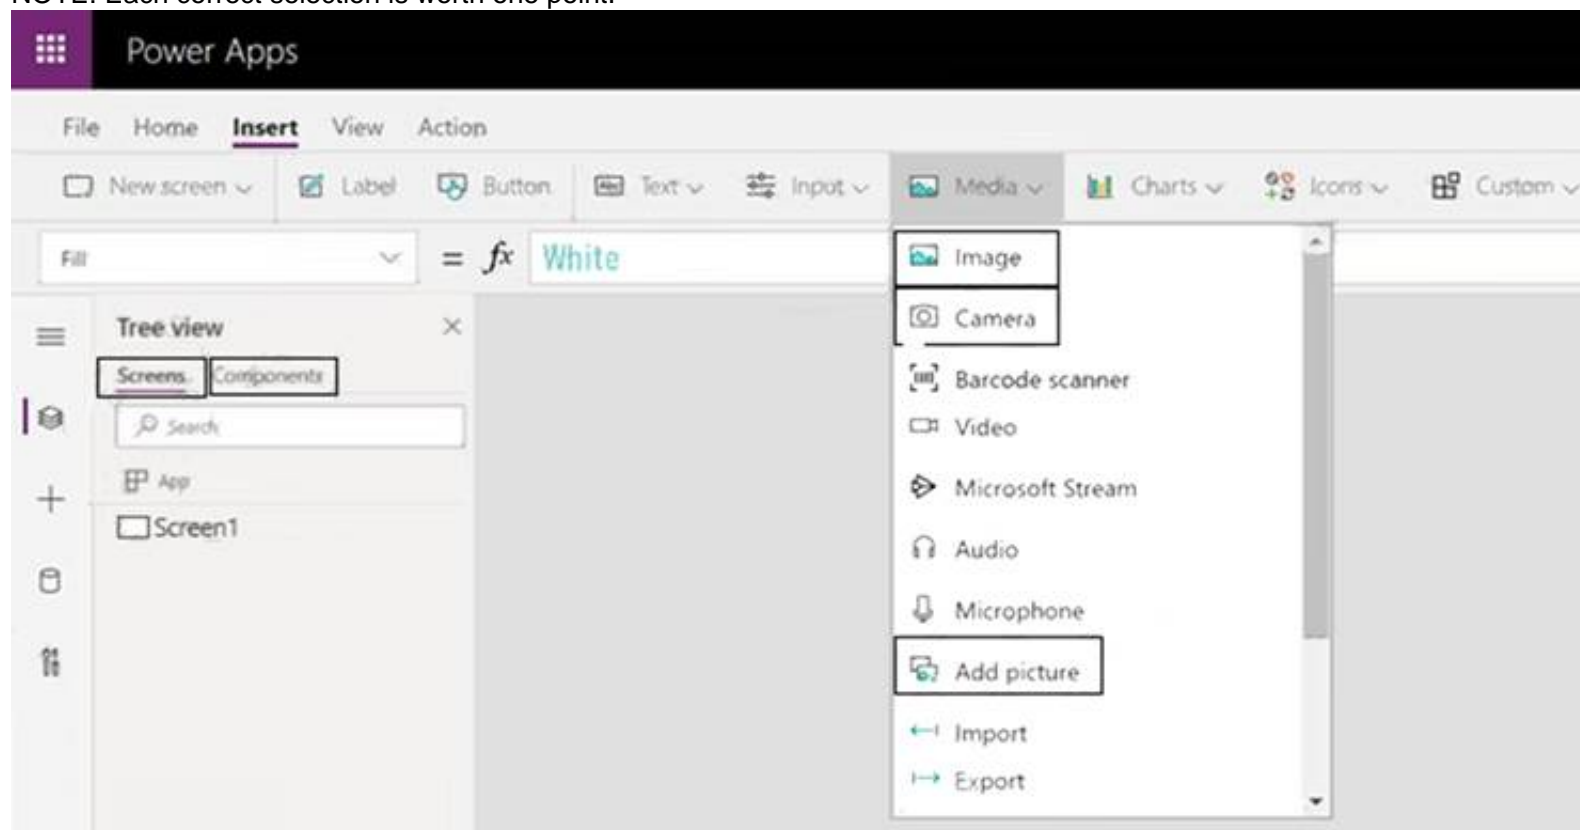

You are developing an app for a package delivery company. Delivery team members will use the app on their phones. Distribution center team members will use a web-based version of the app that runs on tablet devices.

When a delivery person arrives at a location and the package recipient is present, the app must capture the recipient's signature. If the recipient is not available, the app must capture a picture of the drop-off location or the person receiving the package.

You need to design phone-based and web-based versions of the app.

Which app type and media control should you use? To answer, configure the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

App Type: Screens

To insert the Camera control in your PowerApps program you can use the blank screen, and select Insert->Media->Camera.

Media Type: Camera

Use the Camera control to capture pictures with a device's camera. The device must have a camera and the user must authorize the app to use the camera.

Tap or select the camera control to capture a picture from the camera.

The most recently captured picture is available through the Photo property. With this property, the images can be:

? Viewed with the Image control. Use the Image control to view the captured image.

? Temporarily put in a variable or a collection.

? Stored in a database.

? Transmitted as a base64 encoded text string.

NEW QUESTION 139

HOTSPOT - (Topic 4)

HOTSPOT

The customer service team of a company uses a model-driven app to log customer interactions. The app contains two tables: one to track customer interactions and one to track products.

The team requires an interactive dashboard to display the activities. The dashboard must display the products that have the most complaints. Each chart must display the associated data.
You need to create the dashboard-
Which features should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Display customer interactions and products.	Single-stream dashboard
	Multi-stream dashboard
	Single-stream dashboard
	Standard dashboard
Display charts with associated data.	Default Chart
	Show Chart Only
	Display Chart Selection
	Default Chart

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Activity	Feature
Display customer interactions and products.	Single-stream dashboard
Display charts with associated data.	Default Chart

NEW QUESTION 143

- (Topic 4)
You are creating a multi-page canvas app that loads tabular data from an external data source.
Once loaded, the data must be available to all screens within the canvas app.
You need to reduce the number of times that the app must retrieve data from the data source.
Which two data stores can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. parameter
- B. collection
- C. environment variable

Answer: CD

Explanation:

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources>

NEW QUESTION 144

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.
You need to create a visualization that displays the total amount of orders by country/region in USD.
Proposed solution:
Create a custom calculated field of type currency on the order table that converts the order total to USD and displays the total amounts by region in a Power BI chart.
Does the solution meet the goal?

- A. Yes

Answer: A

Explanation:

Instead use a calculated field.
Need to calculate the exchange rate in USD.
Calculated columns are calculated in real-time when they are retrieved. Reference:
<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 148

HOTSPOT - (Topic 4)
A company is building a canvas app.
A user needs to understand which data they can make available for the 500 contacts that are present in the Contact table. All relevant data must be shown in the app. Single fields must show one record and grids must show multiple records. Only the primary fields for each related table should be shown for a contact.

Display name	Relationship name	Related table	Relationship type	Type	Customizable
Company Name	contact_customer_contacts	Contact	Many-to-one	Managed	Yes
Connected From	contact_connections1	Connection	One-to-many	Managed	Yes
Owning Team	Team_contacts	Team	Many-to-one	Standard	Yes

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

How should you design a screen to display the Connection table information for each contact in the Contacts table?

▼

Use a grid for the Contact table and a grid for the Connection table

Use a single field for the Contact table and a grid for the Connection table

Use a grid for the Contact table and a single field for the Connection table

Use a single field for the Contact table and a single field for the Connection table

How should you design a screen to display the Team table information for each contact in the Contact table?

▼

Use a grid for the Contact table and a grid for the Team table

Use a single field for the Contact table and a grid for the Team table

Use a grid for the Contact table and a single field for the Team table

Use a single field for the Contact table and a single field for the Team table

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a single field for Contact table and a grid for the Connection table The Contact table is on 1-side of the 1-to-many relation to the Connection table.
Box 2: Use a single field for Team table and a grid for the Connect table The Team table is on 1-side of the 1-to-many relation to Contact.

NEW QUESTION 149

DRAG DROP - (Topic 4)

The company is adding a multi-stream interactive dashboard to a model-driven app.
The company requires configuration of the dashboard to filter the table data based on modified accounts over the last month.
You need to configure the filters for the model-driven app dashboard.
Which configuration should you use? To answer, drag the appropriate locations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Configurations

Filter by

Table view

Filter table

Time frame

Answer Area

Requirement

Configuration

Configure visual filter attributes that the dashboard can use.

Configure the field that the dashboard uses to filter the table data monthly.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Filter table
Filter Table: The visual filters and global filter attributes are based on this table.
Box 2: Filter By
Filter By: The column that the time frame filter applies to.

NEW QUESTION 152

- (Topic 4)

A company uses a canvas app to encourage employees to take reading breaks during their work schedule. The reading breaks are created automatically as Outlook tasks in the employees Outlook app. The app must trigger a Power Automate cloud flow when specific data is captured in the canvas app. You need to create and configure the flow. Which flow step should you configure first?

- A. Flow button for mobile
- B. Power Apps step with trigger conditions
- C. New Microsoft Outlook task
- D. Condition step

Answer: A

NEW QUESTION 154

DRAG DROP - (Topic 4)

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Relationship types

One-to-one

One-to-many

Many-to-one

Many-to-many

Answer Area

Relationship		
Source entity	Target entity	Relationship type
Clients	Bank accounts	Relationship type
Clients	Branch offices	Relationship type
Branch offices	Employees	Relationship type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Many-to-many

Box 2: Many-to-one

A client have a single branch office.

A branch office can have many clients.

Box 3: One-to-many

A branch office can have many employees. An employee only works at one branch office.

NEW QUESTION 159

HOTSPOT - (Topic 4)

You use Microsoft Power BI Desktop to create a report. Users note that column headings are confusing.

You need to modify some columns and delete other columns.

Which tool should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Modification	Tool
Rename a column	<div>Power Query Editor</div> <div>Report canvas</div> <div>Filters pane</div> <div>Power Query Editor</div>
Delete a column	<div>Fields pane</div> <div>Report canvas</div> <div>Fields pane</div> <div>Filters pane</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 162

DRAG DROP - (Topic 4)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app. You need to insert the custom control into the Power Apps app. Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Screens

Answer Area

Action

Location

Import a custom control from a file.

Add an alignment to the custom control to display it in the middle of the Power Apps app screen.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Box 1: Components
- * 1. To add code components to a canvas app:
 - * 2. Navigate to Power Apps Studio.
 - * 3. Create a new canvas app or edit an existing app to which you want to add the code component.
 - * 4. Go to Insert > Custom > Import component.

NEW QUESTION 166

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You are creating a canvas app that displays a list of accounts. Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts. You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail. You need to complete the app. Solution: ? Add a display form to Screen_AccountDetail. ? Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail). ? Set the data source of the form to Accounts. ? Set the Item property of the form to Selected. ? Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts). Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

If you add a Display form control, the user can display all fields of a record or only the fields that you specify.

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form- detail>

NEW QUESTION 171

DRAG DROP - (Topic 4)

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.
You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.
You need to embed the list of boats associated with a Marina record in the entity form.
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add a Subgrid component to a form

Select **Show related records** and then select the related entity and default view for the subgrid

Save and publish the form

Select the **Allow users to change view** option

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Add a Subgrid component to a form
You add a subgrid component the same way as you add any other component.
Step 2: Select Show related records and then select the related entity and default view for the subgrid
Configure a subgrid component.
Properties available to configure when using a subgrid component on a form using the form designer include:
? Show related rows
When selected, the subgrid displays only rows related to the current row that is displayed on the form.
Step 3: Select the Allow users to change view option
Configure a subgrid component.
Properties available to configure when using a subgrid component on a form using the form designer include:
? Allow users to change view
When selected, app users can change from the Default view to another view of the table selected in the Table property. Step 4: Save and publish the form

NEW QUESTION 172

DRAG DROP - (Topic 4)

You create a canvas app. You run App checker to validate the app. App checker returns error results.
You need to locate where the errors occur.
Which areas should you review? To answer drag the appropriate areas to the correct error messages. Each area may be used once, more than once, or not at all
You may need to drag the spirt bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

NEW QUESTION 176

- (Topic 4)
A company has 500 vendor records stored in a SQL table. Each record contains the team wants to view the vendor records by using Power Apps. The team must be able to change the list results by applying filters. You need to display the vendor records in a canvas app. Which control should you use?

- A. Text
- B. Form
- C. Chart
- D. Gallery

Answer: D

NEW QUESTION 181

- (Topic 4)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You are creating a canvas app.
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:
? Create a Prediction custom model in AI Builder.
? Train the model with pictures of bicycles and then publish the trained model.
? Add the Object Detector control to your canvas app.
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model
Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

NEW QUESTION 186

HOTSPOT - (Topic 4)
You are creating a capacity planning dashboard with Power BI desktop.
The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.
The data sources are as follows:
You need to determine the appropriate method for accomplishing each task.
Which methods should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	<div><div></div><div>Use a Data Gateway</div><div>Use a Custom Connector</div><div>Use a Service Content Pack</div></div>
Create the relationship between the employee file and the work estimates.	<div><div></div><div>Create a composite model</div><div>Create an aggregated table</div><div>Create entity relationships in the CDS Solution Explorer</div></div>
Create calculations for work remaining, remaining budget.	<div><div></div><div>Create a Data Analysis Expressions formula</div><div>Create an aggregated table</div><div>Create a modeling view</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer.

Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

NEW QUESTION 190

- (Topic 4)

You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.

Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

You need to incorporate the flows that can be added to the solution.

Which two flows can you include? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. FlowA
- B. FlowB
- C. FlowC
- D. FlowD

Answer: AD

Explanation:

You can add any of these conditions to determine precisely when your flow is triggered.

NEW QUESTION 195

- (Topic 4)

A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Chores
- B. Choice
- C. Text
- D. Lookup

Answer: D
