About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

If a French controller has a car-sharing app available only in Morocco, Algeria and Tunisia, but the data processing activities are carried out by the appointed processor in Spain, the GDPR will apply to the processing of the personal data so long as?

- A. The individuals are European citizens or residents.
- B. The data processing activities are in Spain.
- C. The data controller is in France.
- D. The EU individuals are targeted.

Answer: D

NEW QUESTION 2

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

- Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information.
- Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files).
- Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees.

These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers.

➤ Under their security policy, the University encrypts all of its personal data records in transit and at rest. In order to improve his teaching, Frank wants to investigate how his engineering students perform in relation to Department for Education expectations. He has attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR.

After receiving her email reminder, Frank informs Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Before Anna determines whether Frank's performance database is permissible, what additional information does she need?

- A. More information about Frank's data protection training.
- B. More information about the extent of the information loss.
- C. More information about the algorithm Frank used to mask student numbers.
- D. More information about what students have been told and how the research will be used.

Answer: D

NEW QUESTION 3

SCENARIO

Please use the following to answer the next question:

Louis, a long-time customer of Bedrock Insurance, was involved in a minor car accident a few months ago. Although no one was hurt, Louis has been plagued by texts and calls from a company called Accidentable offering to help him recover compensation for personal injury. Louis has heard about insurance companies selling customers' data to third parties, and he's convinced that Accidentable must have gotten his information from Bedrock Insurance.

Louis has also been receiving an increased amount of marketing information from Bedrock, trying to sell him their full range of their insurance policies.

Perturbed by this, Louis has started looking at price comparison sites on the internet and has been shocked to find that other insurers offer much cheaper rates than Bedrock, even though he has been a loyal customer for many years. When his Bedrock policy comes up for renewal, he decides to switch to Zantrum Insurance.

In order to activate his new insurance policy, Louis needs to supply Zantrum with information about his No Claims bonus, his vehicle and his driving history. After researching his rights under the GDPR, he writes to ask Bedrock to transfer his information directly to Zantrum. He also takes this opportunity to ask Bedrock to stop using his personal data for marketing purposes.

Bedrock supplies Louis with a PDF and XML (Extensible Markup Language) versions of his No Claims Certificate, but tells Louis it cannot transfer his data directly to Zantrum as this is not technically feasible. Bedrock also explains that Louis's contract included a provision whereby Louis agreed that his data could be used for marketing purposes; according to Bedrock, it is too late for Louis to change his mind about this. It angers Louis when he recalls the wording of the contract, which was filled with legal jargon and very confusing.

In the meantime, Louis is still receiving unwanted calls from Accidentable Insurance. He writes to Accidentable to ask for the name of the organization that supplied his details to them. He warns Accidentable that he plans to complain to the data protection authority, because he thinks their company has been using his data unlawfully. His letter states that he does not want his data being used by them in any way.

Accidentable's response letter confirms Louis's suspicions. Accidentable is Bedrock Insurance's wholly owned subsidiary, and they received information about Louis's accident from Bedrock shortly after Louis submitted his accident claim. Accidentable assures Louis that there has been no breach of the GDPR, as Louis's contract included, a provision in which he agreed to share his information with Bedrock's affiliates for business purposes.

Louis is disgusted by the way in which he has been treated by Bedrock, and writes to them insisting that all his information be erased from their computer system. After Louis has exercised his right to restrict the use of his data, under what conditions would Accidentable have grounds for refusing to comply?

- A. If Accidentable is entitled to use of the data as an affiliate of Bedrock.
- B. If Accidentable also uses the data to conduct public health research.
- C. If the data becomes necessary to defend Accidentable's legal rights.
- D. If the accuracy of the data is not an aspect that Louis is disputing.

Answer: A

NEW QUESTION 4

Please use the following to answer the next question:

WonderkKids provides an online booking service for childcare. Wonderkids is based in France, but hosts its website through a company in Switzerland. As part of their service, WonderKids will pass all personal data

provided to them to the childcare provider booked through their system. The type of personal data collected on the website includes the name of the person booking the childcare, address and contact details, as well as information about the children to be cared for including name, age, gender and health information.

The privacy statement on Wonderkids' website states the following:

"WonderkKids provides the information you disclose to us through this website to your childcare provider for scheduling and health and safety reasons. We may also use your and your child's personal information for our own legitimate business purposes and we employ a third-party website hosting company located in Switzerland to store the data. Any data stored on equipment located in Switzerland meets the European Commission provisions for guaranteeing adequate safeguards for you and your child's personal information. We will only share you and your child's personal information with businesses that we see as adding real value to you. By providing us with any personal data, you consent to its transfer to affiliated businesses and to send you promotional offers."

"We may retain you and your child's personal information for no more than 28 days, at which point the data will be depersonalized, unless your personal information is being used for a legitimate business purpose beyond 28 days where it may be retained for up to 2 years."

"We are processing you and your child's personal information with your consent. If you choose not to provide certain information to us, you may not be able to use our services. You have the right to: request access to you and your child's personal information; rectify or erase you or your child's personal information; the right to correction or erasure of you and/or your child's personal information; object to any processing of you and your child's personal information. You also have the right to complain to the supervisory authority about our data processing activities."

What direct marketing information can WonderKids send by email without prior consent of the person booking the childcare?

- A. No marketing information at all.
- B. Any marketing information at all.
- C. Marketing information related to other business operations of WonderKids.
- D. Marketing information for products or services similar to those purchased from WonderKids.

Answer: C

NEW QUESTION 5

Which area of privacy is a lead supervisory authority's (LSA) MAIN concern?

- A. Data subject rights
- B. Data access disputes
- C. Cross-border processing
- D. Special categories of data

Answer: C

NEW QUESTION 6

If a company chooses to ground an international data transfer on the contractual route, which of the following is NOT a valid set of standard contractual clauses?

- A. Decision 2001/497/EC (EU controller to non-EU or EEA controller).
- B. Decision 2004/915/EC (EU controller to non-EU or EEA controller).
- C. Decision 2007/72/EC (EU processor to non-EU or EEA controller).
- D. Decision 2010/87/EU (Non-EU or EEA processor from EU controller).

Answer: B

NEW QUESTION 7

Which of the following is the weakest lawful basis for processing employee personal data?

- A. Processing based on fulfilling an employment contract.
- B. Processing based on employee consent.
- C. Processing based on legitimate interests.
- D. Processing based on legal obligation.

Answer: B

NEW QUESTION 8

To receive a preliminary interpretation on provisions of the GDPR, a national court will refer its case to which of the following?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Supervisor.
- C. The European Court of Human Rights.
- D. The European Data Protection Board.

Answer: A

NEW QUESTION 9

What type of data lies beyond the scope of the General Data Protection Regulation?

- A. Pseudonymized
- B. Anonymized
- C. Encrypted
- D. Masked

Answer: B

NEW QUESTION 10

When hiring a data processor, which action would a data controller NOT be able to depend upon to avoid liability in the event of a security breach?

- A. Documenting due diligence steps taken in the pre-contractual stage.
- B. Conducting a risk assessment to analyze possible outsourcing threats.
- C. Requiring that the processor directly notify the appropriate supervisory authority.
- D. Maintaining evidence that the processor was the best possible market choice available.

Answer: A

NEW QUESTION 10

A well-known video production company, based in Spain but specializing in documentaries filmed worldwide, has just finished recording several hours of footage featuring senior citizens in the streets of Madrid. Under what condition would the company NOT be required to obtain the consent of everyone whose image they use for their documentary?

- A. If obtaining consent is deemed to involve disproportionate effort.
- B. If obtaining consent is deemed voluntary by local legislation.
- C. If the company limits the footage to data subjects solely of legal age.
- D. If the company's status as a documentary provider allows it to claim legitimate interest.

Answer: B

NEW QUESTION 13

In which of the following situations would an individual most likely to be able to withdraw her consent for processing?

- A. When she is leaving her bank and moving to another bank.
- B. When she has recently changed jobs and no longer works for the same company.
- C. When she disagrees with a diagnosis her doctor has recorded on her records.
- D. When she no longer wishes to be sent marketing materials from an organization.

Answer: D

NEW QUESTION 16

Article 5(1)(b) of the GDPR states that personal data must be "collected for specified, explicit and legitimate purposes and not further processed in a way incompatible with those purposes." Based on Article 5(1)(b), what is the impact of a member state's interpretation of the word "incompatible"?

- A. It dictates the level of security a processor must follow when using and storing personal data for two different purposes.
- B. It guides the courts on the severity of the consequences for those who are convicted of the intentional misuse of personal data.
- C. It sets the standard for the level of detail a controller must record when documenting the purpose for collecting personal data.
- D. It indicates the degree of flexibility a controller has in using personal data in ways that may vary from its original intended purpose.

Answer: A

NEW QUESTION 21

As per the GDPR, which legal basis would be the most appropriate for an online shop that wishes to process personal data for the purpose of fraud prevention?

- A. Protection of the interests of the data subjects.
- B. Performance of a contract
- C. Legitimate interest
- D. Consent

Answer: D

NEW QUESTION 23

A multinational company is appointing a mandatory data protection officer. In addition to considering the rules set out in Article 37 (1) of the GDPR, which of the following actions must the company also undertake to ensure compliance in all EU jurisdictions in which it operates?

- A. Consult national derogations to evaluate if there are additional cases to be considered in relation to the matter.
- B. Conduct a Data Protection Privacy Assessment on the processing operations of the company in all the countries it operates.
- C. Assess whether the company has more than 250 employees in each of the EU member-states in which it is established.
- D. Revise the data processing activities of the company that affect more than one jurisdiction to evaluate whether they comply with the principles of privacy by design and by default.

Answer: B

NEW QUESTION 27

With respect to international transfers of personal data, the European Data Protection Board (EDPB) confirmed that derogations may be relied upon under what condition?

- A. If the data controller has received preapproval from a Data Protection Authority (DPA), after submitting the appropriate documents.
- B. When it has been determined that adequate protection can be performed.
- C. Only if the Data Protection Impact Assessment (DPIA) shows low risk.

D. Only as a last resort and when interpreted restrictively.

Answer: B

NEW QUESTION 31

When does the European Data Protection Board (EDPB) recommend reevaluating whether a transfer tool is effectively providing a level of personal data protection that is in compliance with the European Union (EU) level?

- A. After a personal data breach.
- B. Every three (3) years.
- C. On an ongoing basis.
- D. Every year.

Answer: C

NEW QUESTION 33

What is the MAIN reason GDPR Article 4(22) establishes the concept of the “concerned supervisory authority”?

- A. To encourage the consistency of local data processing activity.
- B. To give corporations a choice about who their supervisory authority will be.
- C. To ensure the GDPR covers controllers that do not have an establishment in the EU but have a representative in a member state.
- D. To ensure that the interests of individuals residing outside the lead authority’s jurisdiction are represented.

Answer: A

NEW QUESTION 37

If a multi-national company wanted to conduct background checks on all current and potential employees, including those based in Europe, what key provision would the company have to follow?

- A. Background checks on employees could be performed only under prior notice to all employees.
- B. Background checks are only authorized with prior notice and express consent from all employees including those based in Europe.
- C. Background checks on European employees will stem from data protection and employment law, which can vary between member states.
- D. Background checks may not be allowed on European employees, but the company can create lists based on its legitimate interests, identifying individuals who are ineligible for employment.

Answer: C

NEW QUESTION 39

Assuming that the “without undue delay” provision is followed, what is the time limit for complying with a data access request?

- A. Within 40 days of receipt
- B. Within 40 days of receipt, which may be extended by up to 40 additional days
- C. Within one month of receipt, which may be extended by up to an additional month
- D. Within one month of receipt, which may be extended by an additional two months

Answer: C

NEW QUESTION 44

The European Parliament jointly exercises legislative and budgetary functions with which of the following?

- A. The European Commission.
- B. The Article 29 Working Party.
- C. The Council of the European Union.
- D. The European Data Protection Board.

Answer: C

NEW QUESTION 47

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company’s IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father’s company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company’s online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers’ philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer’s personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend’s daughter, Alice, who just graduated from law school in the U.S., to be the company’s new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company’s operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm. As a result of Sam's actions, the Gummy Bear Company potentially violated Articles 33 and 34 of the GDPR and will be required to do what?

- A. Notify its Data Protection Authority about the data breach.
- B. Analyze and evaluate the liability for customers in Ireland.
- C. Analyze and evaluate all of its breach notification obligations.
- D. Notify all of its customers that reside in the European Union.

Answer: A

NEW QUESTION 52

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a QUESTION, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure.

The answer is given through the figure's integrated

speakers, making it appear as though that the toy is actually responding to the child's QUESTION. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

To ensure GDPR compliance, what should be the company's position on the issue of consent?

- A. The child, as the user of the action figure, can provide consent himself, as long as no information is shared for marketing purposes.
- B. Written authorization attesting to the responsible use of children's data would need to be obtained from the supervisory authority.
- C. Consent for data collection is implied through the parent's purchase of the action figure for the child.
- D. Parental consent for a child's use of the action figures would have to be obtained before any data could be collected.

Answer: D

NEW QUESTION 53

SCENARIO

Please use the following to answer the next question:

Building Block Inc. is a multinational company, headquartered in Chicago with offices throughout the United States, Asia, and Europe (including Germany, Italy, France and Portugal). Last year the company was the victim of a phishing attack that resulted in a significant data breach. The executive board, in coordination with the general manager, their Privacy Office and the Information Security team, resolved to adopt additional security measures. These included training awareness programs, a cybersecurity audit, and use of a new software tool called SecurityScan, which scans employees' computers to see if they have software that is no longer being supported by a vendor and therefore not getting security updates. However, this software also provides other features, including the monitoring of employees' computers.

Since these measures would potentially impact employees, Building Block's Privacy Office decided to issue a general notice to all employees indicating that the company will implement a series of initiatives to enhance information security and prevent future data breaches.

After the implementation of these measures, server performance decreased. The general manager instructed the Security team on how to use SecurityScan to monitor employees' computers activity and their location. During these activities, the Information Security team discovered that one employee from Italy was daily connecting to a video library of movies, and another one from Germany worked remotely without authorization. The Security team reported these incidents to the Privacy Office and the general manager. In their report, the team concluded that the employee from Italy was the reason why the server performance decreased. Due to the seriousness of these infringements, the company decided to apply disciplinary measures to both employees, since the security and privacy policy of the company prohibited employees from installing software on the company's computers, and from working remotely without authorization.

What would be the MOST APPROPRIATE way for Building Block to handle the situation with the employee from Italy?

- A. Since the GDPR does not apply to this situation, the company would be entitled to apply any disciplinary measure authorized under Italian labor law.
- B. Since the employee was the cause of a serious risk for the server performance and their data, the company would be entitled to apply disciplinary measures to this employee, including fair dismissal.
- C. Since the employee was not informed that the security measures would be used for other purposes such as monitoring, the company could face difficulties in applying any disciplinary measures to this employee.
- D. Since this was a serious infringement, but the employee was not appropriately informed about the consequences the new security measures, the company would be entitled to apply some disciplinary measures, but not dismissal.

Answer: D

NEW QUESTION 58

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations. Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information. Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company. Which of the following BEST describes the relationship between Liem, EcoMick and JaphSoft?

- A. Liem is a controller and EcoMick is a processor because Liem provides specific instructions regarding how the marketing campaigns should be rolled out.
- B. EcoMick and JaphSoft are is a controller and Liem is a processor because EcoMick is sharing its marketing data with Liem for contacts in Europe.
- C. JaphSoft is the sole processor because it processes personal data on behalf of its clients.
- D. Liem and EcoMick are joint controllers because they carry out joint marketing activities.

Answer: B

NEW QUESTION 61 SCENARIO

Please use the following to answer the next question:

Brady is a computer programmer based in New Zealand who has been running his own business for two years. Brady's business provides a low-cost suite of services to customers throughout the European Economic Area (EEA). The services are targeted towards new and aspiring small business owners. Brady's company, called Brady Box, provides web page design services, a Social Networking Service (SNS) and consulting services that help people manage their own online stores.

Unfortunately, Brady has been receiving some complaints. A customer named Anna recently uploaded her plans for a new product onto Brady Box's chat area, which is open to public viewing. Although she realized her mistake two weeks later and removed the document, Anna is holding Brady Box responsible for not noticing the error through regular monitoring of the website. Brady believes he should not be held liable.

Another customer, Felipe, was alarmed to discover that his personal information was transferred to a third- party contractor called Hermes Designs and worries that sensitive information regarding his business plans may be misused. Brady does not believe he violated European privacy rules. He provides a privacy notice to all of his customers explicitly stating that personal data may be transferred to specific third parties in fulfillment of a requested service. Felipe says he read the privacy notice but that it was long and complicated

Brady continues to insist that Felipe has no need to be concerned, as he can personally vouch for the integrity of Hermes Designs. In fact, Hermes Designs has taken the initiative to create sample customized banner advertisements for customers like Felipe. Brady is happy to provide a link to the example banner ads, now posted on the Hermes Designs webpage. Hermes Designs plans on following up with direct marketing to these customers.

Brady was surprised when another customer, Serge, expressed his dismay that a quotation by him is being used within a graphic collage on Brady Box's home webpage. The quotation is attributed to Serge by first and last name. Brady, however, was not worried about any sort of litigation. He wrote back to Serge to let him know that he found the quotation within Brady Box's Social Networking Service (SNS), as Serge himself had posted the quotation. In his response, Brady did offer to remove the quotation as a courtesy.

Despite some customer complaints, Brady's business is flourishing. He even supplements his income through online behavioral advertising (OBA) via a third-party ad network with whom he has set clearly defined roles. Brady is pleased that, although some customers are not explicitly aware of the OBA, the advertisements contain useful products and services.

Under the General Data Protection Regulation (GDPR), what is the most likely reason Serge may have grounds to object to the use of his quotation?

- A. Because of the misrepresentation of personal data as an endorsement.
- B. Because of the juxtaposition of the quotation with others' quotations.
- C. Because of the use of personal data outside of the social networking service (SNS).
- D. Because of the misapplication of the household exception in relation to a social networking service (SNS).

Answer: D

NEW QUESTION 63 SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

JaphSoft's use of pseudonymization is NOT in compliance with the CDPR because?

- A. JaphSoft failed to first anonymize the personal data.
- B. JaphSoft pseudonymized all the data instead of deleting what it no longer needed.

- C. JaphSoft was in possession of information that could be used to identify data subjects.
- D. JaphSoft failed to keep personally identifiable information in a separate database.

Answer: B

NEW QUESTION 66

When may browser settings be relied upon for the lawful application of cookies?

- A. When a user rejects cookies that are strictly necessary.
- B. When users are aware of the ability to adjust their settings.
- C. When users are provided with information about which cookies have been set.
- D. When it is impossible to bypass the choices made by users in their browser settings.

Answer: B

NEW QUESTION 71

Which of the following is an example of direct marketing that would be subject to European data protection laws?

- A. An updated privacy notice sent to an individual's personal email address.
- B. A charity fundraising event notice sent to an individual at her business address.
- C. A service outage notification provided to an individual by recorded telephone message.
- D. A revision of contract terms conveyed to an individual by SMS from a marketing organization.

Answer: B

NEW QUESTION 72

Which EU institution is vested with the competence to propose new data protection legislation on its own initiative?

- A. The European Council
- B. The European Parliament
- C. The European Commission
- D. The Council of the European Union

Answer: D

NEW QUESTION 73

Which of the following is NOT recognized as being a common characteristic of cloud-computing services?

- A. The service's infrastructure is shared among the supplier's customers and can be located in a number of countries.
- B. The supplier determines the location, security measures, and service standards applicable to the processing.
- C. The supplier allows customer data to be transferred around the infrastructure according to capacity.
- D. The supplier assumes the vendor's business risk associated with data processed by the supplier.

Answer: D

NEW QUESTION 75

The GDPR forbids the practice of "forum shopping", which occurs when companies do what?

- A. Choose the data protection officer that is most sympathetic to their business concerns.
- B. Designate their main establishment in member state with the most flexible practices.
- C. File appeals of infringement judgments with more than one EU institution simultaneously.
- D. Select third-party processors on the basis of cost rather than quality of privacy protection.

Answer: B

NEW QUESTION 77

What permissions are required for a marketer to send an email marketing message to a consumer in the EU?

- A. A prior opt-in consent for consumers unless they are already customers.
- B. A pre-checked box stating that the consumer agrees to receive email marketing.
- C. A notice that the consumer's email address will be used for marketing purposes.
- D. No prior permission required, but an opt-out requirement on all emails sent to consumers.

Answer: A

NEW QUESTION 79

The Planet 49 CJEU Judgement applies to?

- A. Cookies used only by third parties.
- B. Cookies that are deemed technically necessary.
- C. Cookies regardless of whether the data accessed is personal or not.
- D. Cookies where the data accessed is considered as personal data only.

Answer: C

NEW QUESTION 80

Under what circumstances would the GDPR apply to personal data that exists in physical form, such as information contained in notebooks or hard copy files?

- A. Only where the personal data is produced as a physical output of specific automated processing activities, such as printing, labelling, or stamping.
- B. Only where the personal data is to be subjected to specific computerized processing, such as image scanning or optical character recognition.
- C. Only where the personal data is treated by automated means in some way, such as computerized distribution or filing.
- D. Only where the personal data is handled in a sufficiently structured manner so as to form part of a filing system.

Answer: D

NEW QUESTION 83

SCENARIO

Please use the following to answer the next question:

BHealthy, a company based in Italy, is ready to launch a new line of natural products, with a focus on sunscreen. The last step prior to product launch is for BHealthy to conduct research to decide how extensively to market its new line of sunscreens across Europe. To do so, BHealthy teamed up with Natural Insight, a company specializing in determining pricing for natural products. BHealthy decided to share its existing customer information – name, location, and prior purchase history – with Natural Insight. Natural Insight intends to use this information to train its algorithm to help determine the price point at which BHealthy can sell its new sunscreens.

Prior to sharing its customer list, BHealthy conducted a review of Natural Insight's security practices and concluded that the company has sufficient security measures to protect the contact information. Additionally, BHealthy's data processing contractual terms with Natural Insight require continued implementation of technical and organization measures. Also indicated in the contract are restrictions on use of the data provided by BHealthy for any purpose beyond provision of the services, which include use of the data for continued improvement of Natural Insight's machine learning algorithms.

In which case would Natural Insight's use of BHealthy's data for improvement of its algorithms be considered data processor activity?

- A. If Natural Insight uses BHealthy's data for improving price point predictions only for BHealthy.
- B. If Natural Insight receives express contractual instructions from BHealthy to use its data for improving its algorithms.
- C. If Natural Insight agrees to be fully liable for its use of BHealthy's customer information in its product improvement activities.
- D. If Natural Insight satisfies the transparency requirement by notifying BHealthy's customers of its plans to use their information for its product improvement activities.

Answer: A

NEW QUESTION 87

Which of the following describes a mandatory requirement for a group of undertakings that wants to appoint a single data protection officer?

- A. The group of undertakings must obtain approval from a supervisory authority.
- B. The group of undertakings must be comprised of organizations of similar sizes and functions.
- C. The data protection officer must be located in the country where the data controller has its main establishment.
- D. The data protection officer must be easily accessible from each establishment where the undertakings are located.

Answer: D

NEW QUESTION 91

Which of the following is one of the supervisory authority's investigative powers?

- A. To notify the controller or the processor of an alleged infringement of the GDPR.
- B. To require that controllers or processors adopt approved data protection certification mechanisms.
- C. To determine whether a controller or processor has the right to a judicial remedy concerning a compensation decision made against them.
- D. To require data controllers to provide them with written notification of all new processing activities.

Answer: A

NEW QUESTION 93

A grade school is planning to use facial recognition to track student attendance. Which of the following may provide a lawful basis for this processing?

- A. The school places a notice near each camera.
- B. The school gets explicit consent from the students.
- C. Processing is necessary for the legitimate interests pursued by the school.
- D. A state law requires facial recognition to verify attendance.

Answer: A

NEW QUESTION 95

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

- Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information.
- Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files).
- Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees.

These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers.

- Under their security policy, the University encrypts all of its personal data records in transit and at rest.

In order to improve his teaching, Frank wants to investigate how his engineering students perform in relational to Department for Education expectations. He has

attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR.

After receiving her email reminder, Frank informs

Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Which of the University's records does Anna NOT have to include in her record of processing activities?

- A. Student records
- B. Staff and alumni records
- C. Frank's performance database
- D. Department for Education records

Answer: C

NEW QUESTION 97

Which of the following was the first to implement national law for data protection in 1973?

- A. France
- B. Sweden
- C. Germany
- D. United Kingdom

Answer: B

NEW QUESTION 102

What is the key difference between the European Council and the Council of the European Union?

- A. The Council of the European Union is helmed by a president.
- B. The Council of the European Union has a degree of legislative power.
- C. The European Council focuses primarily on issues involving human rights.
- D. The European Council is comprised of the heads of each EU member state.

Answer: D

NEW QUESTION 104

A company is located in a country NOT considered by the European Union (EU) to have an adequate level of data protection. Which of the following is an obligation of the company if it imports personal data from another organization in the European Economic Area (EEA) under standard contractual clauses?

- A. Submit the contract to its own government authority.
- B. Ensure that notice is given to and consent is obtained from data subjects.
- C. Supply any information requested by a data protection authority (DPA) within 30 days.
- D. Ensure that local laws do not impede the company from meeting its contractual obligations.

Answer: A

NEW QUESTION 106

Based on GDPR Article 35, which of the following situations would trigger the need to complete a DPIA?

- A. A company wants to combine location data with other data in order to offer more personalized service for the customer.
- B. A company wants to use location data to infer information on a person's clothes purchasing habits.
- C. A company wants to build a dating app that creates candidate profiles based on location data and data from third-party sources.
- D. A company wants to use location data to track delivery trucks in order to make the routes more efficient.

Answer: C

NEW QUESTION 107

SCENARIO

Please use the following to answer the next question:

TripBliss Inc. is a travel service company which has lost substantial revenue over the last few years. Their new manager, Oliver, suspects that this is partly due to the company's outdated website. After doing some research, he meets with a sales representative from the up-and-coming IT company Techiva, hoping that they can design a new, cutting-edge website for TripBliss Inc.'s foundering business.

During negotiations, a Techiva representative describes a plan for gathering more customer information through detailed Questionnaires, which could be used to tailor their preferences to specific travel destinations. TripBliss Inc. can choose any number of data categories – age, income, ethnicity – that would help them best accomplish their goals. Oliver loves this idea, but would also like to have some way of gauging how successful this approach is, especially since the Questionnaires will require customers to provide explicit consent to having their data collected. The Techiva representative suggests that they also run a program to analyze the new website's traffic, in order to get a better understanding of how customers are using it. He explains his plan to place a number of cookies on customer devices. The cookies will allow the company to collect IP addresses and other information, such as the sites from which the customers came, how much time they spend on the TripBliss Inc. website, and which pages on the site they visit. All of this information will be compiled in log files, which Techiva will analyze by means of a special program. TripBliss Inc. would receive aggregate statistics to help them evaluate the website's effectiveness. Oliver enthusiastically engages Techiva for these services.

Techiva assigns the analytics portion of the project to longtime account manager Leon Santos. As is standard practice, Leon is given administrator rights to TripBliss Inc.'s website, and can authorize access to the log files gathered from it. Unfortunately for TripBliss Inc., however, Leon is taking on this new project at a time when his dissatisfaction with Techiva is at a high point. In order to take revenge for what he feels has been unfair treatment at the hands of the company, Leon asks his friend Fred, a hobby hacker, for help. Together they come up with the following plan: Fred will hack into Techiva's system and copy their log files onto a USB stick. Despite his initial intention to send the USB to the press and to the data protection authority in order to denounce Techiva, Leon experiences a crisis of conscience and ends up reconsidering his plan. He decides instead to securely wipe all the data from the USB stick and inform his manager that the company's system of access control must be reconsidered.

After Leon has informed his manager, what is Techiva's legal responsibility as a processor?

- A. They must report it to TripBliss Inc.
- B. They must conduct a full systems audit.
- C. They must report it to the supervisory authority.
- D. They must inform customers who have used the website.

Answer: B

NEW QUESTION 111

There are three domains of security covered by Article 32 of the GDPR that apply to both the controller and the processor. These include all of the following EXCEPT?

- A. Consent management and withdrawal.
- B. Incident detection and response.
- C. Preventative security.
- D. Remedial security.

Answer: A

NEW QUESTION 116

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

Ben's collection of additional data from customers created several potential issues for the company, which would most likely require what?

- A. New corporate governance and code of conduct.
- B. A data protection impact assessment.
- C. A comprehensive data inventory.
- D. Hiring a data protection officer.

Answer: A

NEW QUESTION 117

SCENARIO

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B.

Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

- > Name
- > Address
- > Date of Birth
- > Payroll number
- > National Insurance number
- > Sick pay entitlement
- > Maternity/paternity pay entitlement
- > Holiday entitlement
- > Pension and benefits contributions

➤ Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to

Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees.

Under the GDPR, which of Company B's actions would NOT be likely to trigger a potential enforcement action?

- A. Their omission of data protection provisions in their contract with Company C.
- B. Their failure to provide sufficient security safeguards to Company A's data.
- C. Their engagement of Company C to improve their payroll service.
- D. Their decision to operate without a data protection officer.

Answer: C

NEW QUESTION 122

If a company is planning to use closed-circuit television (CCTV) on its premises and is concerned with GDPR compliance, it should first do all of the following EXCEPT?

- A. Notify the appropriate data protection authority.
- B. Perform a data protection impact assessment (DPIA).
- C. Create an information retention policy for those who operate the system.
- D. Ensure that safeguards are in place to prevent unauthorized access to the footage.

Answer: C

NEW QUESTION 127

Many businesses print their employees' photographs on building passes, so that employees can be identified by security staff. This is notwithstanding the fact that facial images potentially qualify as biometric data under the GDPR. Why would such practice be permitted?

- A. Because use of biometric data to confirm the unique identification of data subjects benefits from an exemption.
- B. Because photographs qualify as biometric data only when they undergo a "specific technical processing".
- C. Because employees are deemed to have given their explicit consent when they agree to be photographed by their employer.
- D. Because photographic ID is a physical security measure which is "necessary for reasons of substantial public interest".

Answer: B
