

Exam Questions PL-200

Microsoft Power Platform Functional Consultant

<https://www.2passeasy.com/dumps/PL-200/>

NEW QUESTION 1

- (Exam Topic 1)

You need to add controls to the check-in solution for the health and wellness questions. Which form control should you use?

- A. Drop down
- B. Check box
- C. Text input

Answer: A

NEW QUESTION 2

- (Exam Topic 1)

A guest asks about the start time of a specific scheduled event and wants to know what the snow conditions will be like during their stay.

You need to determine how to design the chat solution to answer those questions. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Scenario	Action
Identify and reference the company event a guest mentions.	<div><div></div><div>Load the response into a variable</div><div>Use smart matching to load an entity into a topic</div><div>Load the extracted topic into a variable</div></div>
Identify attributes for snow conditions.	<div><div></div><div>Create a custom entity</div><div>Create a new topic</div><div>Create a new variable</div><div>Create an escalation</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface Description automatically generated

Box 1: Load the extracted topic into a variable

Power Virtual Agents uses entities to understand and identify a specific type of information from a user's responses. When saving the identified information to a variable, a variable type will be associated with it. The variable type is analogous with the entity.

In Power Virtual Agents, a topic defines a how a bot conversation plays out.

A topic has trigger phrases – these are phrases, keywords, or questions that a user is likely to type that is related to a specific issue – and conversation nodes – these are what you use to define how a bot should respond and what it should do.

Box 2: Create a custom entity

The prebuilt entities cover commonly used information types, but on some occasions, such as when building a bot that serves a specific purpose, you'll need to teach the bot's language understanding model some domain-specific knowledge.

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/advanced-entities-slot-filling>

NEW QUESTION 3

- (Exam Topic 1)

You need to design and create the solution for gathering contact information from guests for marketing purposes.

What should you use? To answer, select the appropriate options In the answer area. NOTE: Each correct selection is worth one point.

Action	Solution
Extract business card data.	<div><div></div><div>AI Builder</div><div>Common Data Service</div><div>Power Virtual Agents</div><div>Power Automate</div></div>
Implement the contact gathering solution.	<div><div></div><div>Create a new entity extraction component.</div><div>Integrate the solution with Azure Cognitive Services.</div><div>Use a prebuilt AI model.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Action	Solution
Extract business card data.	<div> <div>AI Builder</div> <div>Common Data Service</div> <div>Power Virtual Agents</div> <div>Power Automate</div> </div>
Implement the contact gathering solution.	<div> <div>Create a new entity extraction component.</div> <div>Integrate the solution with Azure Cognitive Services.</div> <div>Use a prebuilt AI model.</div> </div>

NEW QUESTION 4

- (Exam Topic 1)

You need to design the resort portal's email registration process.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Implement the invitation code redemption process.	<div> <div>Auto-populate the invitation code field on the sign-in screen from the email link.</div> <div>Embed the invitation code in the email link URL.</div> <div>Send the customer their username and temporary password in the email link.</div> </div>
Validate the user's email.	<div> <div>Two-factor authentication</div> <div>Azure Active Directory authentication</div> <div>Social provider sign-in</div> <div>Invitation code sign-up</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 5

- (Exam Topic 1)

You need to create the FAQ solution content What should you do first?

- A. AI Builder
- B. Suggest topics
- C. Automate
- D. Trigger phrases

Answer: B

Explanation:

You need to make sure there are three main steps need to do while doing import FAQ and add the topic to your bot application.

- > Import Suggested Topics from FAQ webpage.
- > Add a topic.
- > Enable the topics Reference:

<https://social.technet.microsoft.com/wiki/contents/articles/53820.power-virtual-agents-faq-chatbot.aspx>

NEW QUESTION 6

- (Exam Topic 1)

You need to design the guest check-in solution.

Which technologies should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

You need to design the guest check-in solution.

Answer Area

Requirement	Technology
Develop the base check-in solution.	Xamarin app
Access the check-in solution on the check-in devices.	Power Apps portal
	Model-driven app
	Canvas app
Access the check-in solution on the check-in devices.	Traditional desktop application
	Web browser
	Power Apps mobile app
	Dynamics 365 for phones and tablets

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Canvas app,
 Power Apps mobile app
<https://docs.microsoft.com/en-us/power-apps/maker/canvas-apps/offline-apps>

NEW QUESTION 7

- (Exam Topic 2)

You need to configure a Power Automate flow to send the email with the results to the client. What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Trigger settings

	▼
Set Table name to Qualification and Column filter to statecode.	
Set Table name to Qualification and Column filter to statuscode.	
Set Table name to Service Requests and Column filter to statuscode.	

Logic to complete service requests

	▼
Complete if current record is in Complete status.	
Complete if current record is in Pending Verification status.	
Loop through related qualification records and complete if all are in Complete status.	

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Box 1: Set Table table to Qualification and Column filter to statuscode.

Box 2: Loop through related qualification records and complete if all are in Complete status. The new process for completing a service request must automate the following:

Set the Service Request record status to Complete when work on all Qualification records is finished.

Send an email to the client with the results when the service request is completed. The email must list each qualification as either Valid or Not Valid, depending on the verification.

NEW QUESTION 8

- (Exam Topic 2)

You need to capture the Date Completed value from the website using a desktop flow. Which method should you use?

- A. Use optical character recognition (OCR) on the screen to locate and extract the value.
 B. Display an input dialog and prompt the user to enter the value.
 C. Extract the value from the window the browser is using.
 D. Retrieve the value from the HTML element in the webpage.

Answer: C

Explanation:

Record the name of the QV team member who performed the work and the date completed.

NEW QUESTION 9

- (Exam Topic 2)

You need to be able to move a Power Automate desktop flow used in the verification process to the testing environment. What should you do?

- A. Share a copy of the desktop flow with a member of internal IT.
- B. Use the Export option in the flow to get the flow identifier and provide it to internal IT.
- C. Send a copy of the desktop flow to a member of internal IT.
- D. Create the desktop flow in a solution and provide it to internal IT.

Answer: D

Explanation:

Internal IT reports that the solution import to the test environment failed because of missing dependencies related to the flow for completing service requests.

Flows with PowerApps steps

Flows that were created via Power Automate in the PowerApps menu or flows that have PowerApps steps added have a different issue then other Power Automate flows. As of the writing of this blog these flows are not able to be imported into another environment. This means that if you create flows with Power Apps steps within them you will need to recreate them in your destination environment.

Reference: <https://www.spyglassmtg.com/blog/power-platform-solution-export-and-import-issues>

NEW QUESTION 10

- (Exam Topic 3)

You plan to create classic workflows for process automation on the Account table. The process automation has the following requirements:

- If the Account Name column changes, a custom column named Previous Name must be updated with the original value.
- If the Credit Limit column changes, an email must be sent to the record owner with the new value.
- Asynchronous processes must be used whenever possible. You need to implement the process automation.

What is the minimum number of workflows you should use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Workflow type	Number of workflows
Background	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>
Real-time	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Workflow type	Number of workflows
Background	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>
Real-time	<div><div>1</div><div>0</div><div>1</div><div>2</div></div>

NEW QUESTION 10

- (Exam Topic 3)

You are creating tables for use with Microsoft Power components.

The display names of the tables must not be changed when the solution is promoted to the user acceptance testing environment.

You need to apply this restriction to the solution, Where should you make the changes?

- A. Power Apps
- B. Default solution
- C. Segmented solution
- D. Unmanaged solution
- E. Managed solution

Answer: C

NEW QUESTION 11

- (Exam Topic 3)

You are a consultant. A client asks you to remove several solutions in one of their Microsoft Dataverse environments. The client wants to know what effect removing the solutions will have on the rest of the system. You need to explain the results of removing the solutions. Which components be affected? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Solution description	Component or components removed
An unmanaged solution contains a custom table. The table is in a parent-child relationship with another table.	<div><div></div><div>The solution only.</div><div>The solution and the lookup column.</div><div>The solution, the table, and any data in the table.</div></div>
A managed solution patch contains an update to a column label. The column is used in several forms and views.	<div><div></div><div>The solution and the updated column label.</div><div>The solution, the column, and any data in the column.</div><div>The solution, the table, and the updated column label.</div></div>
A managed solution that was created by an independent solution provider (ISV) contains a custom table and changes to the site map.	<div><div></div><div>The solution only.</div><div>The solution and the site map.</div><div>The solution, the table, and any data in the table.</div></div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 13

- (Exam Topic 3)

You plan to create a dataflow to import data into Microsoft Dataverse by using Power Query. The dataflow has the following requirements:

- A table of aggregated data must be created in dataflow storage.
- A unique identifier must be created for the table.

You need to configure the dataflow.

Which solutions should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Table of aggregated data	<div><div></div><div>Merge query</div><div>Fact table</div><div>Merge query</div><div>Linked entity</div><div>Computed entity</div></div>
Unique identifier	<div><div></div><div>Key column</div><div>Key column</div><div>Pivot column</div><div>Alternate key</div></div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Solution
Table of aggregated data	<div><div></div><div>Merge query</div><div>Fact table</div><div>Merge query</div><div>Linked entity</div><div>Computed entity</div></div>
Unique identifier	<div><div></div><div>Key column</div><div>Key column</div><div>Pivot column</div><div>Alternate key</div></div>

NEW QUESTION 14

- (Exam Topic 3)
You modify a model-driven app for a bicycle repair help desk. The model-driven app is for help desk users when customers have an issue with their bicycle. After you add a custom table named bicycle, you configure the table for Microsoft Dataverse search. The table will contain information from callers about their bicycles. The account table is related to the custom table. Contact information is brought over to the custom table. You add the following columns to the table:

- > Bicycle type
- > Tire brand
- > Special equipment

Users must be able to perform the following types of searches:

- > Search for all customers who have a bicycle type of Contoso and live in Florida.
- > Search all tables for any record that contains the word broken.
- > You need to decide which type of search will give you the results desired.

Which search should you configure? To answer, drag the appropriate search types to the correct requirements. Each search type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Search types

Dataverse search

Quick find

Advanced find

Answer Area

Requirements

Customer with bicycle type of Contoso and lives in Florida

Includes the word **broken** across tables

Search type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Box 1: Advanced find

Operators for advanced search: Lets you use simple Boolean operators in your search term and craft the query to get the results you want.

Box 2: Dataverse search

Dataverse search helps you quickly find what you're looking for. It delivers fast and comprehensive results across multiple tables in a single list, sorted by relevance.

Reference: <https://docs.microsoft.com/en-us/power-apps/user/quick-find> <https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization>

NEW QUESTION 19

- (Exam Topic 3)

You set up a new instance of Dynamics 365 for Customer Service. Users report a variety of issues working with cases on mobile devices. You need to configure the mobile app to be able to view cases. NOTE: Each correct selection is worth one point.

Scenario	Action needed
Users cannot see case records on mobile devices.	<div><div></div><div>Configure mobile settings set on the case entity level.</div><div>Configure mobile settings at the field level within the case form.</div><div>Configure a security role in the mobile permission set for appropriate users.</div></div>
Users can open cases but cannot see the subject of the case.	<div><div></div><div>Configure mobile settings set at the case entity level.</div><div>Configure mobile settings at the field level within the case form.</div><div>Configure a security role in the mobile permission set for appropriate users.</div></div>
Users report that they cannot access the system from the Dynamics 365 mobile app.	<div><div></div><div>Configure mobile settings set at the case entity level.</div><div>Configure mobile settings at the field level within the case form.</div><div>Configure a security role in the mobile permission set for appropriate users.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

* 1. User is able to login but can't see Case Records --> "Configure Mobile Settings on Case Entity Level"

* 2. Users can open cases but cannot see the subject of the case - "configure mobile settings at the field level within the case form"

* 3. User reports that they cannot access the system from Dynamics 365 mobile app --> Configure a security role in the mobile permission set of the appropriate user
<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/mobile-app/set-up-dynamics-365-for-phon>

NEW QUESTION 21

- (Exam Topic 3)

A company creates a Microsoft Power Apps app through the Power Apps designer portal for use in Microsoft Teams.

This app needs to be promoted to the user acceptance testing environment.

You need to complete the Microsoft recommended actions before you export the solution. Which two actions should you complete? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Write validation tests.
- B. Set the Optimized embedding appearance field to true.
- C. Publish all changes.
- D. Run the solution checker.
- E. Clone a solution.

Answer: DE

Explanation:

The Power Apps solution checker performs a rich static analysis check on your solutions against a set of best practice rules to quickly identify problematic patterns. After the check completes, you receive a detailed report that lists the issues identified, the components and code affected, and links to documentation that describes how to resolve each issue.

The solution checker analyzes these solution components: Common Data Service plug-ins

Common Data Service custom workflow activities

Common Data Service web resources (HTML and JavaScript) Common Data Service configurations, such as SDK message steps

Reference: <https://www.eimagine.com/ui/>

NEW QUESTION 22

- (Exam Topic 3)

You are a Dynamics 365 Sales administrator for a software company. The sales team wants to attach a large number of supporting documents to customer records, but management does not want to incur the cost of additional storage.

The company does not have any Office 365 application integrations enabled. You need to recommend a storage solution that keeps storage costs low. Solution:

Enable Outlook integration

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead enable server-based SharePoint integration. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-dynamics-365-online-to-use-sharepoint-online>

NEW QUESTION 24

- (Exam Topic 3)

You are creating a Power Virtual Agents chatbot that uses multiple topics. Each user interaction can reference more than one topic.

You need to be able to capture a value in an initial topic and use it in subsequent topics. Which type of variable should you create?

- A. Bot
- B. Topic
- C. Context

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION 28

- (Exam Topic 3)

A company deploys several model-driven apps. The company uses shared devices in their warehouse. The devices are always powered on. Users log on to the devices and then launch the apps to perform actions.

Unauthorized users recently uploaded several files after another user failed to log out of a device. The company needs to prevent these incidents from occurring in the future.

You need to configure the solution to prevent the reported security incidents. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Prevent unauthorized access to devices.	<div><div></div><div><div>Set an inactivity limit in the user's group policy.</div><div>Set a timeout in the Power Platform admin center.</div><div>Configure access controls in Azure Active Directory.</div><div>Configure a Power Automate flow to poll for user inactivity on the devices.</div></div></div>
Prevent users from uploading a specific type of file.	<div><div></div><div><div>Enter the restricted file types in the SharePoint admin center.</div><div>Enter the allowed file types in the Power Platform admin center.</div><div>Enter the restricted file types in the Power Platform admin center.</div></div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Set a timeout in the Power Platform admin center.

To enforce users to reauthenticate after a pre-determined period of time, admins can set a session timeout for their individual environments. Users can only remain signed in the application for the duration of session. The application signs out the user when the session expires. Users need to sign in with their credentials to return to customer engagement apps.

Note: Configure session timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users.

Incorrect:

Configure inactivity timeout

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Privacy + Security.
- > Set Session Expiration and Inactivity timeout. These settings apply to all users. Box 2: Enter the restricted file types in the SharePoint admin center.

To block uploading of specific file types

- > Go to the Settings page of the new SharePoint admin center,
- > Select Sync.

Graphical user interface, text, application Description automatically generated

- > Select the Block upload of specific file types check box.
- > Enter the file name extensions you want to block, for example: exe or mp3.
- > Select Save.

Reference:

https://docs.microsoft.com/en-us/power-platform/admin/user-session-management https://docs.microsoft.com/en-us/onedrive/block-file-types

NEW QUESTION 32

- (Exam Topic 3)

A company has a canvas app that includes the following screens: Screen1 and Screen2. The OnVisible property for Screen1 contains the following expression.

Set(AgeGroups, ["1-25", "26-54", "55+"])

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input type="radio"/>
You can use the Update function to change values in AgeGroups.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
AgeGroups can be accessed from Screen1 and Screen2.	<input type="radio"/>	<input checked="" type="radio"/>
AgeGroups is a collection.	<input type="radio"/>	<input checked="" type="radio"/>
You can use the Update function to change values in AgeGroups.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 35

- (Exam Topic 3)

You create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams. Users report that they are unable to view the app in Teams. You need to ensure that users can access the app. What should you do?

- A. Share the app with a security group by using the Maker portal.
B. Share the app with a security group in Teams.
C. Request that a tenant administrator pin the app to the app bar in Teams.
D. Publish the app by using the Maker portal.
E. Share the app with individual users by using the Maker portal.

Answer: C

Explanation:

When you create a Power Apps app for Microsoft Teams using Microsoft Dataverse for Teams, the app needs to be added to the app bar in Teams before it can be accessed by users. This can only be done by a tenant administrator. To ensure that users can access the app, you would need to request that the tenant administrator pin the app to the app bar in Teams.

Sharing the app with a security group by using the Maker portal (A) or in Teams (B) would allow users in that group to access the app, but they would still need to be able to find and open the app.

Here are some references from Microsoft that may be helpful in understanding how to make Power Apps app available in Teams:

- > Microsoft docs: Add a Power Apps app to a Microsoft Teams channel
- > Microsoft docs: Pin a Power Apps app to the app bar in Microsoft Teams
- > Microsoft docs: Distribute Power Apps for Microsoft Teams

NEW QUESTION 36

- (Exam Topic 3)

You are modifying a model-driven app. You set up a customer table in Microsoft Power Platform to retrieve user data. You set up a form with the following columns for users to enter their data. The form includes the following columns:

Column	Data type
Country/region	Choices (multi-select)
Passport ownership	Choice (yes /no)
Passport expiration date	Text

The form must do the following:

- The Country/region column must automatically populate with US when English is chosen as a language. If the user selects Other for this column, the column must remain blank so that user can enter a value.
- The Passport expiration date column must appear only if the user selects Yes in the Passport ownership column.

You need to configure the app with the least amount of effort.

What should you configure? To answer, drag the appropriate solution component to the correct requirements. Each solution component may be used once, more

than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solution components

Power Automate flow

NEW QUESTION 37

- (Exam Topic 3)
A company uses a canvas app.
Supervisors must approve transactions when a user from the sales department enters a revenue amount that is over \$1 million.
You need to configure an approval process without using code. What should you create?

- A. Column Expression
- B. Power Automate cloud flow
- C. Azure Service Bus service
- D. Power Apps component framework (PCF) control

Answer: B

NEW QUESTION 42

- (Exam Topic 3)
A company plans to automate the following manual processes by using Power Automate. You need to identify UI flow types for the two business processes.

Process	Time to Complete	Comments
1	30 minutes	The user's device must remain unlocked when the business process runs. The user will be required to leave their device unattended in a secure setting while the business process runs so that the user can assist with other efforts.
2	45 minutes	The process must run after normal business hours. The device that runs the business process must remain unlocked when the business process is not running.

Which desktop flow type should you use? To answer, drag the appropriate desktop flow types to the correct business processes. Each desktop flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Desktop flow types

Attended

Unattended

Answer Area

Business process

NEW QUESTION 45

- (Exam Topic 3)
You configure an alert in Power BI.
You need to alert users when the value of a tile exceeds a threshold. To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Where should you configure the Power BI alert so that it triggers the process?

Power BI
Common Data Service
Power Automate
Power BI admin portal

Who can see alerts configured for Power BI?

The person who created the alert.
The dashboard owner and the person who created the alert.
Everyone who has access to the dashboard.
Everyone who has access to the Power BI instance.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-set-data-alerts>

NEW QUESTION 48

- (Exam Topic 3)

A company collaborates by using Microsoft Teams.

You must create a Power Apps app directly from within a Teams channel. The app will be used by members of the channel to manage sales orders.

You need to create the app by using Dataverse for Teams. How should you create the app?

- A. Create a canvas app by using a Power Apps personal app in Teams.
- B. Create a canvas app by using the App Studio app.
- C. Use the Power Apps web designer.
- D. Create a model-driven app by using the App Studio app

Answer: B

Explanation:

You can create, edit, and delete canvas apps in Teams.

Note: With Power Apps Studio embedded in the Power Apps app in Teams and the new built-in data platform providing an easy-to-use, editable data table, you can quickly build apps based on custom data tables that are Teams-specific and scenario-specific.

Reference: <https://docs.microsoft.com/en-us/power-apps/teams/create-first-app> <https://docs.microsoft.com/en-us/power-apps/teams/create-apps-overview>

NEW QUESTION 49

- (Exam Topic 3)

You deploy a Power Virtual Agents chatbot that integrates with Dynamics 365 Omnichannel for Customer Service.

You observe that the chatbot is not able to recognize the questions asked by users.

You need to ensure that the chatbot can respond to unrecognized questions. The solution must minimize administrative effort.

What should you do?

- A. Add a fallback topic
- B. Create new topics.
- C. Create an entity.
- D. Modify the Escalate system topic.

Answer: A

NEW QUESTION 51

- (Exam Topic 3)

A company is training an AI model using a custom table to determine the amount of time it takes to deliver a package based on several key fields.

The testing data used to train the model is used for all training and regression testing scenarios and is considered complete data.

The trained model predicts a 2 percent variance between the estimated delivery time and the actual delivery time of packages.

The executive sponsors reject the model because the actual variance is at 15 percent. You need to address the sponsors' concern.

What should you do?

- A. Reduce the size of the data used within the model.
- B. Increase the size of the data used with the model.
- C. Use sample training data from Microsoft
- D. Replace the training data with real-world data.

Answer: D

Explanation:

Note: Start using AI Builder with sample data

Don't have any data of your own to create a model? No problem! We've got you covered.

Sample data is available for several AI Builder model types, together with instructions for working with the sample data.

Reference: <https://docs.microsoft.com/en-us/ai-builder/samples>

NEW QUESTION 56

- (Exam Topic 3)

A company is building a Power Virtual Agents chatbot.

Users in the accounting department require access to collaborate with the building of the bot. Users in the sales department require access to only chat with the bot.

You need to configure the bot.

Which sharing options should you use? To answer, drag the appropriate sharing options to the correct requirements. Each sharing option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Sharing options

Users

Active Directory security groups

Everyone in the organization

Answer Area

NEW QUESTION 57

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Relevance Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Relevance Search brings the following benefits:

- > Finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."
- > Includes the ability to search documents found in Notes and Attachments on Emails and Appointments

Reference: <https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 58

- (Exam Topic 3)

You need to design the FAQ solution to handle unknown responses.

Which component should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Component
Handle an unknown question from a guest in a conversation.	<div> <div></div> <div>Escalate</div> <div>Fallback topic</div> <div>Failure path</div> </div>
Redirect a quest with an unknown question to a live staff member.	<div> <div></div> <div>Power Apps</div> <div>Power Virtual Agents web application</div> <div>Microsoft Teams</div> <div>Omnichannel for Dynamics 365 Customer Service</div> </div>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 60

- (Exam Topic 3)

You are a system administrator for a company with locations in Mexico, United States, and France. The company has both fulltime employees and contractors in all regions. Fulltime employees use a mobile app. The company has two security groups: fulltime employees and contractors.

The company requests a chatbot in Microsoft Teams to answer employee benefit questions. The chatbot must meet the following requirements:

- It must be in the local language.
- Only fulltime employees may access the chatbot. You need to configure the chatbot.

Which action should you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Configuration
Chatbot in local language	<div> <div></div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div>
Employee access	<div> <div></div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Configuration
Chatbot in local language	<div> <div></div> <div>Create one chatbot that manager all three languages.</div> <div>Create one chatbot that manages all three languages.</div> <div>Create one chatbot and add it to three Teams channels that are configured for the local language.</div> <div>Create three chatbots, one for each language.</div> </div>
Employee access	<div> <div></div> <div>Publish the chatbot in Teams.</div> <div>Share the chatbot with the fulltime employees.</div> <div>Publish the chatbot to the mobile app channel.</div> <div>Add the chatbot to Appsource.</div> <div>Publish the chatbot in Teams.</div> </div>

NEW QUESTION 65

- (Exam Topic 3)

A company has employees in France, Mexico, and the United States. You are creating a Power Apps app to allow users to add client records to Microsoft Dataverse. The default language for the company is English.

The company wants the app to display each local language. You need to add the Spanish and French languages.

Which four actions should you perform in sequence for each language? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Import the solution.

Export translations.

Replace the language code column and translated wording in the CrmTranslations.xml file.

Select an unmanaged solution.

Select a managed solution.

Add a language code column and translated wording in the CrmTranslations.xml file.

Import translations.

Export the solution.

Answer Area

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Step 1: Select an unmanaged solution. Export the localizable text

The scope of the localizable text that will be exported is the unmanaged solution that contains the localizable text.

- > From Power Apps, select Solutions.
- > In the All Solutions list, select the unmanaged solution that contains the localizable text you want.
- > On the command bar, select Translations > Export Translations.

Step 2: Export translations.

Step 3: Add a language code column and a translated wording in the CrmTranslations.xml file. Get the localizable text translated

You can send this file to a linguistic expert, translation agency, or localization firm.

If you have the knowledge to translate the text, or if you just want to see the format, you can extract the zip file that you exported you will see that it contains two XML files.

[Content_Types].xml CrmTranslations.xml

You can open the CrmTranslations.xml file with Microsoft Office Excel. When you view the data in Excel, look at the Localized Labels tab.

Graphical user interface, text, application, table, Excel Description automatically generated

	A	B	C	D	E	F
1	Entity nam	Object ID	Object Column Name	1033	1041	3082

650	cr2b3_car	99a0f788-3f64-e811-a957-000d3af3b3af	LocalizedName	Car		
651	cr2b3_car	b8d1e6ec-cc49-42f1-847e-61245a489f30	Description	Unique identifier for the		
652	cr2b3_car	b8d1e6ec-cc49-42f1-847e-61245a489f30	DisplayName	Owning User		
653	cr2b3_car	d3aa1f9d-5e88-40ec-af8d-0e13efe83eaa	Description	Status of the Car		
654	cr2b3_car	d3aa1f9d-5e88-40ec-af8d-0e13efe83eaa	DisplayName	Status		
655	cr2b3_car	21a1f788-3f64-e811-a957-000d3af3b3af	DisplayName	Status		
656	cr2b3_car	21a1f788-3f64-e811-a957-000d3af3b3af	Description	Status of the Car		
657	cr2b3_car	1da1f788-3f64-e811-a957-000d3af3b3af	DisplayName	Active		

Any custom tables or columns will have empty cells for the localizable text. Add the localized values for those items.

Step 4: Import translations. Import the localized text

Importing the text requires compressing the files and importing them into the system. Import the files

From the same unmanaged solution that you exported the translations from, in the menu choose Translations > Import Translations.

Note: If you have customized table or column text, such as column labels or drop-down list values, you can provide the users in your environment who are not working with the base language version of your environment with this customized text in their preferred languages.

The process has the following steps:

- > Enable other languages for your environment
- > Export the localizable text
- > Get the localizable text translated
- > Import the localized text

Reference: <https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/translate-localizable-text>

NEW QUESTION 66

- (Exam Topic 3)

You need to build a Power BI dashboard for sales managers to track opportunities.

When a new sale closes that is greater than \$1 million, a notification must pop up and an email must be sent to the leadership team.

You need to ensure the email is sent without editing the Microsoft Dataverse.

Which two elements should you configure? Each correct answer is part of the solution. NOTE: Each correct selection is worth one point.

- A. alerts in Power BI
- B. a calculated column in the Dataverse
- C. a custom connector
- D. a paginated report to save to Microsoft OneDrive
- E. a Power Automate flow

Answer: AE

Explanation:

In order to build a Power BI dashboard for sales managers to track opportunities and send notifications and emails when a new sale closes that is greater than \$1 million, you should configure:

* A. alerts in Power BI: You can set up alerts in Power BI that will trigger when a specific condition is met. For example, you can set an alert to trigger when the value of a specific field in the "Opportunities" table exceeds \$1 million.

* E. a Power Automate flow: To send an email to the leadership team when an alert is triggered, you can create a Power Automate flow that is triggered by the Power BI alert. The flow can then use the "Send an email" action to send an email to the leadership team with the necessary information about the sale that exceeded \$1 million.

> <https://docs.microsoft.com/en-us/power-bi/transform-model/desktop-alerts>

> <https://docs.microsoft.com/en-us/power-platform/admin/alerts-overview>

NEW QUESTION 69

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- > 0 - 17
- > 18 - 25
- > 26 - 35
- > 36 - 55
- > 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Create a custom Age group entity and synonyms for each individual age in the corresponding item.

Use Age group for Identify in the question.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 72

- (Exam Topic 3)

A company has a portal. Users sign into the portal by using a social media account.

The company wants to replace the existing portal with a Power Apps portal. users must sign up for access to the portal by using a Microsoft account and a unique invitation code that will be provided to the users.

You need to configure authentication for the home page.

Which values should you use? To answer, drag the appropriate values to the appropriate authentication settings. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values

Yes

No

Answer Area

Authentication setting	Value
External sign in	<div>Value</div>
Open registration	<div>Value</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NO NO

NEW QUESTION 77

- (Exam Topic 3)
The app needs to store temporary data

- Each screen must maintain a separate copy of data and pass the data to another screen.
- The app must be able to update separate rows of a table independently. You need to configure variables for the data.

Which variable types should you use? To answer, drag the appropriate variable types to the correct requirements. Each variable type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Variable types

Collection

Global variable

Context variable

Answer Area

Requirement

Screens maintain separate data and pass the data to another screen.

Update separate rows of a table independently.

Variable type

Global variable

Collection

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated with medium confidence

NEW QUESTION 78

- (Exam Topic 3)
A bank uses Power BI visualizations to help determine whether they should loan money to a customer. The bank has three different visuals that are part of a Power BI report. The bank uses a set of four risk variables that indicate whether the customer is creditworthy. You must create a mechanism so that bank employees can change the values of the four risk variables. Changes to the value of any variable must cause the three visualizations to update. You need to create the solution. Which action should you perform? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement

Update the visualizations when users change the values of the risk variables.

Ensure that users can adjust the values of the four risk variables that contribute to a customer's credit risk.

Action

Embed a canvas app in a Power BI report.

Embed a Power BI report in a model-driven app.

Embed a model-driven app in a Power BI report.

Use Power BI tiles.

Use Power Apps visuals.

Use the Power BI service.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Embed a Power BI report in a model-driven app
You can embed a Power BI report in a model-driven app main form. Box 2: Use the Power BI service.
The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed. With Power BI Desktop or Microsoft Excel, Power Query for authoring reports and Power BI for sharing dashboards and refreshing data from model-driven apps, your users have a powerful way to work with your app's data.
Reference:
<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/embed-powerbi-report-in-system-form>
<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/use-power-bi>

NEW QUESTION 79

- (Exam Topic 3)
You manage Dynamics 365 for a company. You must prevent users from launching and using Power Automate. You need to hide the Flows button on the user interface. Which configuration setting should you change?

- A. the Customizations section of System Settings
- B. the Site Map
- C. the Buttons tab of Flow
- D. the Entity component of the default solution

Answer: A

Explanation:
Reference:

<https://www.inogic.com/blog/2018/10/show-or-hide-microsoft-flow-button-in-dynamics-365/>

NEW QUESTION 81

- (Exam Topic 3)

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Categorized Search to search for the word run. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Relevance Search.

Note: Relevance Search finds matches to any word in the search term in any field in the entity. Matches may include inflectional words, like "stream," "streaming," or "streamed."

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/configure-relevance-search-organization#what-is-releva>

NEW QUESTION 85

- (Exam Topic 3)

A company plans to create an app by using Power Apps. The company has the following requirements:

- The app must be able to enter data into Microsoft SharePoint
- Users must be able to add the app into Microsoft Teams.

You need to recommend which app to create. Which type of app should you recommend?

- A. model-driven app as a personal app
- B. canvas app as a personal app
- C. canvas app as a tab app
- D. model-driven app as a tab app

Answer: B

NEW QUESTION 89

- (Exam Topic 3)

You are a Dynamics 365 administrator. You create a new app.

You need to create the site map for the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Add a subarea.

Add a view.

Add a group.

Add an area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Add a view.

Add a group.

Add an area.

Answer Area

Add an area.

Add a group.

Add a subarea.

NEW QUESTION 91

- (Exam Topic 3)

A company is creating a canvas app and a model-driven app to manage their customer accounts. The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value. The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only. You need to configure the scope for the business rules. Which scope should you use? To answer, drag the appropriate scopes to the correct business rules. Each scope may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Scopes

All forms

Specific form

Table

Answer Area

Business rule

Business Type column setting for customer size

Account rating re-evaluation

Scope

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Table

The canvas app requires a business rule to set the Business Type column to large if the customer size is greater than a specific currency value. Scope the business rule to Entity (Table). Box 2: Specific form

The model-driven app requires a business rule to recommend the account rating be re-evaluated when the account goes on credit hold for this app only. For Model

The scope of the business rule determines which forms the business rule will be applied. You set the scope, according to the following:

If you select this item... The scope is set to...

Entity- The table and all forms for the table All Forms- All forms for the table

Specific form (account Main Form, for example) - Just that form

Reference: <https://debajmecrm.com/business-rules-in-powerapps-canvas-apps/>
<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-business-rules-recommendations>

NEW QUESTION 92

- (Exam Topic 3)

You plan to create a canvas app. The app must meet the following requirements:

- Send an email after a record is saved.
- Display the expiration column on a form if the creation date of the record is older than 90 days. You need to configure the app.

Which features should you use? To answer, select the appropriate options in the answer area.

Answer Area

	Requirement	Feature
	Send an email.	<div><div>Power Automate flow</div><div>Connection</div><div>Collection</div><div>Power Automate flow</div><div>Formula</div></div>
	Display the expiration column.	<div><div>Formula</div><div>Formula</div><div>Collection</div><div>Connection</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

	Requirement	Feature
	Send an email.	<div><div>Power Automate flow</div><div>Connection</div><div>Collection</div><div>Power Automate flow</div><div>Formula</div></div>
	Display the expiration column.	<div><div>Formula</div><div>Formula</div><div>Collection</div><div>Connection</div></div>

NEW QUESTION 93

- (Exam Topic 3)

You have a canvas app.

The canvas app must store data in a variable that is available only to the current screen. You need to create the variable.

Which two functions should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Navigate
- B. UpdateContext
- C. Set
- D. Collect
- E. SaveData

Answer: BC

Explanation:

* B. UpdateContext function can be used to create a variable that is only available to the current screen. This function takes in an object that defines the variable and its initial value, and updates the context of the current screen with that variable. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

* C. Set function can be used to assign a value to a variable. The Set function sets a variable to a specified value, which is useful when you need to update the value of a variable. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-set>

NEW QUESTION 98

- (Exam Topic 3)

You are implementing a model-driven app to support a new line of business. There are several places where automated business logic must be applied. You need to determine how to apply the business logic.

Which method should you use? To answer, drag the appropriate methods to the appropriate business logic statements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area
Business rule	Business logic
Real-time workflow	Method
Power Automate instant flow	Method
	Method

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Business rule

By combining conditions and actions, you can do any of the following with business rules:

- > NSE5_FSM-5.2 Set column values
- > Clear column values
- > Set column requirement levels
- > Show or hide columns
- > Enable or disable columns
- > Validate data and show error messages
- > Create business recommendations based on business intelligence.

Box 2: Real-time workflow

Real-time workflows:

Graphical user interface, text, application, email Description automatically generated

Box 3: Power Automate instant flow

Instant Flows don't have a trigger in the same way as the Automated flow. Instead, they are triggered manually or on-demand, such as a user clicking a Flow button in the mobile app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-business-rules-recommendations-a> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/configure-workflow-steps> <https://carldesouza.com/difference-between-instant-automated-and-scheduled-flows-in-power-automate-and-ho>

NEW QUESTION 99

- (Exam Topic 3)

A customer uses Power Apps to view and maintain their contacts that are stored in Microsoft Dataverse. Several columns must be configured to ensure the security settings for sales associates are view only. You need to configure the access restrictions.

Which component for field-level security should you use? TO answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Action	Component
Enable the fields for record-level security.	<div> <div></div> <div>Azure Data Lake Gen2</div> <div>Azure SQL</div> <div>Power Apps app designer</div> <div>Microsoft Power Platform admin center</div> </div>
Set the security settings for the sales associates to view only.	<div> <div></div> <div>Azure Active Directory group team</div> <div>Dataverse table</div> <div>Field Security Profiles</div> <div>User</div> </div>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 103

- (Exam Topic 3)

You are creating a business process flow for a Power Apps app. The business process flow must meet the following requirements:

- Must be available offline.
- Send an email to the team when a record is created. You need to set up business process flow.

What should you do? To answer, select the appropriate options in the answer area. Each correct selection is worth one point

Requirement	Configuration
Make it available offline.	<div> <div></div> <div>Ensure that the business process flow is referencing one table.</div> <div>Ensure that the business process flow is referencing two tables.</div> <div>Ensure that the business process flow is referencing one table per stage.</div> </div>
Send an email to the team.	<div> <div></div> <div>Create a step.</div> <div>Create a stage.</div> <div>Create a required column.</div> </div>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 106

- (Exam Topic 3)

You are configuring a new Power Apps portal. You have two web roles, one for authenticated users and one for anonymous users. You grant the Anonymous Users role to users.

A test user reports that they can access the home page but cannot view a page linked from the home page. You need to determine why the test user cannot view the portal page.

What is the cause of the issue?

- A. Maintenance mode is enabled on the portal.
 B. The setting to make the page available to everyone is disabled.
 C. The Authenticated Users Web role does not have permission to view the page.
 D. Inherited permissions are not enabled for the linked page.

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/webpage-access-control>

NEW QUESTION 111

- (Exam Topic 3)

A Company plans to send escalation emails to all customers with overdue invoices. You are creating a Microsoft Power Automate flow to determine whether to send an escalation email.

The system must send an alert for all invoices that are seven days or more overdue. You need to configure the flow.

Which expression should you use?

- A. `TriggerEmail() = 'OverdueDate' >= 7;`
- B. `'OverdueDate' >= '7'?TriggerEmail():false`
- C. `@GreaterOrEquals(TriggerEmail()?['OverdueDate']: '7')`

- A. Option A
 B. Option B
 C. Option C

Answer: C

Explanation:

Example: `equals(triggerOutputs()?['body/PDFStatus/Value'],'Ready to Generate')` Reference:
<https://evolvous.com/microsoft-power-automate-trigger-condition/>

NEW QUESTION 116

- (Exam Topic 3)

A company creates a model-driven app.

Users require access to a Power BI report that is embedded in the app. You need to configure the app.

Where should you add the report?

- A. XML report
 B. Dashboard
 C. Business rule
 D. Power Automate cloud flow

Answer: B

Explanation:

To add a Power BI report to a model-driven app, you should add it to a dashboard. Dashboards in model-driven apps provide a way to organize and display information, such as charts, tables, and reports. You can add a Power BI report to a dashboard by creating a new dashboard and then adding a Power BI report component to it. This component allows you to specify the report you want to add and configure its properties, such as size and layout. Users will then have access to the embedded report when they view the dashboard in the app. Reference:
<https://docs.microsoft.com/en-us/power-platform/admin/create-model-driven-app-dashboards>

NEW QUESTION 118

- (Exam Topic 3)

A company uses Power Apps with Microsoft Dataverse.

The company enables auditing on the Dataverse database. The company tenant reaches the maximum storage capacity.

You need to delete some auditing data.

Which three deletion options should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. by table
 B. by record
 C. between two specified dates
 D. by column
 E. older than a specified date

Answer: ACE

Explanation:

* A. Deleting by table allows you to select specific tables in the Dataverse database for which you want to delete the auditing data. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the table for which you want to delete the auditing data. You can then select the specific auditing data you want to delete and click the "Delete" button. This is useful if you want to only delete auditing data for specific tables and not for the entire database.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

* C. Deleting between two specified dates allows you to select a range of dates within which the auditing data will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Between two dates" option. Then you can specify the start and end date for which you want to delete the auditing data. This is useful if you want to delete auditing data for a specific time period and not for the entire database. Reference: <https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

* E. Deleting older than a specified date allows you to select a specific date, and any data older than that date will be deleted. This can be done by going to the Power Apps portal, navigating to the Data tab, and selecting the "Audit" option. From there, you can select the "Delete" button, and select the "Older than a specified date" option. Then you can specify the date for which you want to delete the auditing data. This is useful if you want to delete auditing data that is older than a certain date and not for the entire database. Reference: <https://docs.microsoft.com/en-us/power-platform/admin/data/data-management-auditing#delete-audit-logs>

It's always good to have a backup of Data before deletion and also check the retention period of the data you want to delete.

NEW QUESTION 120

- (Exam Topic 3)

A company uses Microsoft Teams. You plan to create a Power Apps app for Microsoft Teams. You need to determine the environment that will be used by the app.

Which environment will the app use?

- A. An existing Dataverse environment that you select.

- B. An existing Dataverse for Teams environment that you select.
- C. A Dataverse environment that is automatically created for the team.
- D. A Dataverse for Teams environment that is automatically created for the team.

Answer: D

Explanation:

The Dataverse for Teams environment is automatically created for the selected team when you create an app or bot in Microsoft Teams for the first time or install a Power Apps app from the app catalog for the first time. The Dataverse for Teams environment is used to store, manage, and share team-specific data, apps, and flows. Each team can have one environment, and all data, apps, bots, and flows created with the Power Apps app inside a team are available from that team's Dataverse for Teams database.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/about-teams-environment>

NEW QUESTION 124

- (Exam Topic 3)

A company uses Power Apps.

Users must be able to view only the address1 columns in the Account table.

You need to ensure other address columns are not visible to users when creating views and filters. What should you do?

- A. Disable the Search option for the columns.
- B. Create business rules to hide the other address columns.
- C. Delete the other address columns from the table.
- D. Use column-level security to remove read access to all users.

Answer: D

NEW QUESTION 125

- (Exam Topic 3)

You implement an editable grid for the Account entity.

The business team provides the following list of features that they would like you to implement:

- > Group by or sort columns in the current view.
- > Configure a business rule to show an error message.
- > Edit values in calculated fields.
- > Edit the Address composite field.
- > Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Action	Can be performed?
Group by or sort columns in the current view.	<div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div>Yes</div><div>No</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Action	Can be performed?
Group by or sort columns in the current view.	<div><div>Yes</div><div>No</div></div>
Configure a business rule to show an error message.	<div><div>Yes</div><div>No</div></div>
Edit values in calculated fields.	<div><div>Yes</div><div>No</div></div>
Edit the Address composite field.	<div><div>Yes</div><div>No</div></div>
Use the editable grid on mobile phones.	<div><div>Yes</div><div>No</div></div>

NEW QUESTION 130

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You administer the Microsoft 365 and Power Platform environments for Contoso, Ltd. The company has a model-driven app that is used to track customer interactions with employees. The app uses standard table types for customers. A user named Elisabeth Rice signs in to the app by using the following sign in name: Elisabeth.Rice@contoso.com.

After marriage, Elisabeth changes her legal name to Elisabeth Mueller.

You need to update the sign in name for the user without losing any application history. Solution: Change Elizabeth's username in the user record for the app. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 132

- (Exam Topic 3)

A company uses a model-driven app with Microsoft Dataverse in a single environment

The company requires a canvas app that includes the same data as the model-driven app. You need to create the canvas app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select the **Excel** option.

Sign into the Microsoft Power Platform admin portal.

Sign into the Power Apps Maker portal.

Select the **Dataverse** option.

Select the data source and tables to include in the canvas app and then save the app.

NEW QUESTION 133

- (Exam Topic 3)

You plan to create a Power Virtual Agents bot. The bot must support single sign-on.

You need to publish the bot.

Which two locations should you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Microsoft Teams
- B. Mobile app developed for iOS and Android
- C. Azure Bot Service channels
- D. Website developed using pro developer tools

Answer: CD

Explanation:

* C. Azure Bot Service channels: You can configure a Power Virtual Agents bot as a channel in Azure Bot Service. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.

* D. Website developed using pro developer tools: You can embed a Power Virtual Agents bot on a website using the Web Chat control. Single sign-on can be configured for the bot using Azure Active Directory (AAD) and the OpenID Connect protocol. This allows you to use your existing AAD users and groups to control access to your bot.

NEW QUESTION 137

- (Exam Topic 3)

A company that manufactures medical devices uses Power Apps to manage their sales and device maintenance.

A Table named Devices in Microsoft Dataverse has a column named Status. The Status column must have a new status value of Review added to the existing Choice values of Active and Inactive.

The table must be added to a solution to be promoted once the change is made.

Only this change must be promoted to the test environment. The changes must not be able to be changed once promoted. You need to add the change to a solution for promotion.

Options

Add column

Add existing

Add required components

Add subcomponent

Answer Area

Action

Add the Devices table to the solution.

Add the status column changes only to the solution.

Option

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Options

Add column

Add existing

Add required components

Add subcomponent

Answer Area

Action

Add the Devices table to the solution.

Add the status column changes only to the solution.

Option

Add existing

Add required components

NEW QUESTION 141

- (Exam Topic 3)

You create a Power Apps app.

The app must be able to display a list of records that are sorted by category. The app must also expand or hide the list by subtopics.

You need to configure the app. Which tool should you use?

- A. card
- B. expression
- C. Power BI dashboard
- D. gallery

Answer: D

Explanation:

A gallery control in Power Apps allows you to display a list of records, and can be configured to sort the records by a specific field, such as category. Additionally, the gallery control has built-in functionality for expanding or hiding a list of subtopics. This can be done by adding a toggle control within the gallery template to show or hide the subtopics based on user interaction. Reference:

Passing Certification Exams Made Easy

NEW QUESTION 142

- (Exam Topic 3)

You are using power Automate to create a list of customers from a Microsoft Excel file, The list must contain customers who meet one of the following criteria:

- > Sales of less than \$500,000.
- > Customers who are on credit hold.

You need to create a condition to filter the list Of customers.

How should you complete the filter condition? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

@

or

and

not

(less(item()?['sales'], 500000),

empty(item()?['credithold'], 'true')

equals(item()?['credithold'], 'true')

not>equals(item()?['credithold'], 'true')

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application, Word Description automatically generated

Box 1: or

Or: Takes two arguments and returns true if either argument is true. Box 2: equals(item()?['credithold'],'true')

Equals: Returns true if two values are equal.

For example, if parameter1 is someValue, this expression returns true: equals(parameters('parameter1'), 'someValue')

Reference:

<https://docs.microsoft.com/en-us/power-automate/use-expressions-in-conditions>

NEW QUESTION 146

- (Exam Topic 3)

You plan to add a Power Apps app to Microsoft Teams.

A Microsoft Dataverse for Teams environment has not been provisioned. You need to create a Dataverse for Teams environment.

Which two actions can you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new environment in the Microsoft Power Platform Admin Center.
- B. Create a new app in Teams.
- C. Create an app permission policy in the Teams admin center.
- D. Install an existing app in Teams.

Answer: BD

NEW QUESTION 149

- (Exam Topic 3)

You are designing a canvas app that connects to Common Data Service.

You need to configure the app to meet the requirements and ensure that the canvas app is available offline. What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Function
Pass values from the current screen when moving to another screen.	<div>Navigate</div> <div>Back</div> <div>MovePrevious</div>
Display data to a user when the app is offline.	<div>LoadData</div> <div>LoadDateOffline</div> <div>ShowData</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps

NEW QUESTION 150

- (Exam Topic 3)

A company uses a Microsoft Power Platform environment

The company plans to implement a Power Apps app. The application must meet the following requirements:

- Audit all user activity and only retain the audit logs for one year.
- Annually remove products that were created over a year ago. You need to configure the automated processes.

What should you configure? To answer, drag the appropriate configurations to the correct requirements. Each configuration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 152

- (Exam Topic 3)
A company uses a model-driven Power Apps app in a new environment. The base language is English. You need to configure French and Spanish. Which configuration component should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement

Allow a language to be used within an organization.

Configuration component

Default language

Language collation

Language packs

LCID

Browser

Environment

Power Apps app

Tenant

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Language packs
Before users can start using a Language Pack to display a language, the Language Pack must be enabled in your organization.
Box 2: Environment Enable the language
These settings can be found in the Microsoft Power Platform admin center by going to Environments > [select an environment] > Settings > Product > Languages.
Reference: <https://docs.microsoft.com/en-us/power-platform/admin/enable-languages>

NEW QUESTION 154

- (Exam Topic 3)
You are using Power BI to build a dashboard for a company.
You must make the dashboard available to a specific set of users, including employees and five external users. The number of employees that require access to the dashboard varies, but usually less than 100. Employees and external users must not be permitted to share the dashboard with other users.
You need to share the dashboard with the employees and external users.
Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Create a dynamic distribution lis
- B. Add all users to the distribution group and use the list to share the dashboard.
- C. Sign into the Power BI servic
- D. Open the dashboard and select Share.
- E. Enter the individual email address of internal and external users.
- F. Sign into Power BI Deskto
- G. Open the dashboard and select Share.
- H. Clear the Allow recipients to share your dashboard (or report) option.
- I. Create a distribution grou
- J. Add all users to the distribution group and use the list to share the dashboard.

Answer: BEF

Explanation:

Reference:
<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION 157

- (Exam Topic 3)

You plan on implementing complex business logic in Microsoft Dataverse tables by using Power Automate flows.

You realize that the functionality required to implement the business logic is not available in a Power Automate flow.

The new business logic must work in multiple Dataverse tables. In addition, the operation must return a value after it finishes and must be able to run from an existing Dataverse action.

You need to recommend the method to implement the missing logic. What should you recommend?

- A. Scheduled workflow
- B. Bound action
- C. Custom API
- D. Unbound action

Answer: D

Explanation:

<https://docs.microsoft.com/en-us/power-automate/dataverse/bound-unbound> <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/custom-api>

NEW QUESTION 161

- (Exam Topic 3)

You have a model-driven app. You create five Microsoft Excel templates for analyzing customer data. Four of the templates must be available to all users. The remaining template must be available only to you.

You configure the appropriate security roles for users.

You need to determine how to upload the Excel templates.

Which method should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Availability	Method
Available to everyone	<div><div></div><div>In the Settings menu, select Document Templates.</div><div>In the view for the email records, select Excel Templates.</div><div>In the Settings menu, select Email Templates.</div></div>
Available only to yourself	<div><div></div><div>In the Settings menu, select Document Templates.</div><div>In the view for the email records, select Excel Templates.</div><div>In the Settings menu, select Email Templates.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Table Description automatically generated with medium confidence

Box 1: In the Settings menu, select Document Templates

Templates uploaded from the Settings page are available to all users. You don't need to take any further action. Administrators can use the Settings page to upload the Excel template. A template uploaded in Settings is available to all users.

For admins: Upload the Excel template

- > Go to Settings > Templates > Document Templates.
- > Click Upload Template.
- > Drag the Excel file into the dialog box or browse to find and upload the file.
- > Upload Template dialog box.
- > Click Upload.

Box 2: In the view for the email records, select Excel templates

Note: For non-admins or admins wanting to create a personal template: Upload the Excel template

Open a page with a list of records, for example, the list of Sales Opportunities. Go to Sales > Opportunities > My Open Opportunities.

- > On the menu bar, click Excel Templates > Create Excel Template.
- > Click Excel Template > Upload.
- > Click Upload to add the Excel template.
- > Drag the file into the dialog box or browse to find and upload the file.
- > Click Upload.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/analyze-your-data-with-excel-templates>

NEW QUESTION 162

- (Exam Topic 3)

A company uses a model-driven app. The app uses a workflow to send email. Emails are sent to new customers that enter an email address for the first time in the app.

Customers report that they do not receive an email after entering an email address. You need to troubleshoot the issue. In which order should you perform the actions? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Edit the workflow.

Review the tab with the process sessions.

Clear the option to delete the workflow retention jobs.

Run the workflow.

Answer area

1 Edit the workflow.

2 Review the tab with the process sessions.

3 Clear the option to delete the workflow retention jobs.

4 Run the workflow.

NEW QUESTION 163

- (Exam Topic 3)
You create workflows to automate business processes. You need to create a workflow that automatically sends emails based on a mail merge template. The workflow must contain the following configurations:
> Run immediately.
> Validate when a condition is met.
> Perform an action when a condition is met.
To answer, select the appropriate configuration in the answer area.
NOTE: Each correct selection is worth one point.

Workflow Requirement	Configuration Option
Run immediately.	<div><div></div><div>Approve the workflow.</div><div>Configure the workflow to run now.</div><div>Configure child workflow to run now.</div></div>
Validate when a condition is met.	<div><div></div><div>Publish workflow.</div><div>Subject contains data.</div><div>Trigger when a Power Automate button is pressed.</div></div>
Perform an action when a condition is met.	<div><div></div><div>Send an email.</div><div>View chart.</div><div>Update a security role.</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 165

- (Exam Topic 3)
You add a business process flow to the Account table. The flow has three stages. You need to ensure that a workflow can run when a user completes the final stage. Which option should you use?
A. Start when: Record status changes
B. Available to run: Run this workflow in the background
C. Available to run: As an on-demand process
D. Available to run: As a child process

Answer: C

Explanation:

You can trigger on-demand workflows from inside a business process flow. For example, you can add an on-demand workflow to a business process flow so that an activity, such as a task or email, is created whenever a stage is completed.

Note: A workflow becomes activated based on where you drop the workflow onto the business process flow designer.

On-demand stage processes. When the workflow is dropped onto a business process flow stage, the workflow is triggered on entry or exit of the stage.

Reference:

https://docs.microsoft.com/en-us/power-automate/bpf-add-on-demand-workflow

NEW QUESTION 167

- (Exam Topic 3)

You are creating a canvas app.

A user will click a button on each screen of a Power Apps app to proceed to the next screen. You need to implement an action that selects the next screen that the user sees.

Which event should you handle?

- A. OnLoad
- B. OnCheck
- C. ScreenTransition
- D. OnSelect

Answer: D

Explanation:

Add navigation

* 1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.

* 2. With the arrow still selected, select the Action tab, and then select Navigate.

* 3. The OnSelect property for the arrow is automatically set to a Navigate function.

* 4. When a user selects the arrow, the Target screen fades in.

* 5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:

* 6. Navigate(Source, ScreenTransition.Fade)

* 7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen. Reference:

https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-screen-context-variables

NEW QUESTION 170

- (Exam Topic 3)

A company uses Power Apps.

You create a custom table and configure a child table relationship with the contact table. You need to configure the cascading rules for each action.

Which behavior should you use? To answer, drag the appropriate behaviors to the correct actions. Each behavior may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Behaviors

Restrict

Cascade All

Cascade None

Answer Area

Action

Custom table record is deleted.

Custom table record is shared.

Behavior

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Behaviors

Restrict

Cascade All

Cascade None

Answer Area

Action

Custom table record is deleted.

Custom table record is shared.

Behavior

Restrict

Cascade All

NEW QUESTION 171

- (Exam Topic 3)

You are using the Data import wizard to import records into the account table from a CSV file. The CSV-to-table mapping is as following:

- Name column represents the account and maps to the Account column.
- TIE Parent Name column represents the holding company of the account with subsidiaries underneath Records that are imported into the table are only related to other records in the file.

You need to configure the import to create the relationship between records. What should you do?

- A. Map Parent Name in the CSV file to the Parent Account column
- B. Select Account as lookup criteria
- C. Lookup the record IDs Of the records in the ParentAccount column
- D. Add the record IDs new column in the fil
- E. Map the new column to the ParentAccount column.
- F. Map Parent Name in the file to the Parent Account column
- G. Select Parent Account as lookup criteria
- H. Create an alternate key the account table by using the Account Name column
- I. DO not map parent Name in file.

Answer: C

Explanation:

Add a new column for the self-referential mapping.

Reference: <https://docs.microsoft.com/en-us/power-apps/developer/data-platform/import-data>

NEW QUESTION 175

- (Exam Topic 3)

You have a classic workflow. The workflow updates a custom column on a record when an account record is created. The workflow must update the custom column based on the following conditions:

- Update the custom column value using the Account Number.
- If the Account Number column is blank, update the custom column value using the Ticker Symbol.
- If the Ticker Symbol column is blank, update the custom column value to N/A

You need to configure the custom column value by using the update record step. What should you do?

- A. Add the two columns with the default value by using the Forms Assistant.
- B. Add an expression that evaluates the two column values and uses the first populated value or else the default value.
- C. Add check conditions to determine if the two columns contain data.
- D. Add a formula that evaluates the two column values and uses the first populated value or else the default value

Answer: A

NEW QUESTION 177

- (Exam Topic 3)

A company creates a Power Automate cloud flow for a Power Apps app.

The cloud flow must send a daily email that contains a list of year-to-date (YTD) totals. You need to configure the flow.

Which feature should you use?

- A. Parallel branch
- B. Loop
- C. Condition
- D. Wait

Answer: B

Explanation:

In order to send a daily email that contains a list of year-to-date (YTD) totals, you would need to use a loop in the Power Automate cloud flow. A loop allows you to repeat a specific set of actions until a certain condition is met. In this case, the loop would be used to iterate through the data for each day, accumulating the totals for the year-to-date (YTD) and then sending the email at the end of the loop with the accumulated totals.

Here are some references from Microsoft that may be helpful in understanding how to use loops in Power Automate:

- Microsoft docs: Loops in Power Automate
- Microsoft docs: Repeating a flow with a loop
- Microsoft docs: Using the do-until loop in Power Automate

NEW QUESTION 182

- (Exam Topic 3)

You have a canvas app that contains the following text input fields: Id, FirstName, LastName. The app also has a button named Button1.

The OnSelect property for Button1 contains the following expression: Collect(People, {Id:Id.Text, FirstName:FirstName.Text, LastName:LastName.Text})

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
The People collection is automatically created if it does not already exist.	<input type="radio"/>	<input type="radio"/>
When Button1 is pressed, if a record with the current value of Id.Text already exists in the People collection, the values for FirstName and LastName are updated.	<input type="radio"/>	<input type="radio"/>
If you update the record in the Collection function to iclude the value from a new field named Age, it will result in an error.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

If the data source doesn't already exist, a collection is created. Box 2: No

Note: The Collect function adds records to a data source. The items to be added can be:

- > A single value: The value is placed in the Value field of a new record. All other properties are left blank.
- > A record: Each named property is placed in the corresponding property of a new record. All other properties are left blank.
- > A table: Each record of the table is added as a separate record of the data source as described above. The table isn't added as a nested table to a record. To do this, wrap the table in a record first.

Box 3: No Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect>

NEW QUESTION 186

- (Exam Topic 3)

You have a form that displays a custom field from an entity.

A customer wants to restrict users from filtering on the custom field. You need to prevent users from filtering the field in Advanced Find. What should you modify?

- A. Fields in the Edit Filter Criteria option of the Quick Find view
- B. the Field Security field on the Field Properties form
- C. a searchable field on the Field Properties form
- D. Fields in the Add Find Columns option of the Quick Find view

Answer: C

Explanation:

Reference:

<https://community.dynamics.com/365/b/dynamics365apps/posts/kb-understanding-dynamics-365-field-ssearcha>

NEW QUESTION 187

- (Exam Topic 3)

You plan to create a Power Bi dataflow.

The Power BI dataflow has the following requirements:

- Be able to create a copy of the dataflow to separate Power BI workspaces
- Schedule the dataflow to update every day at 11:00 AW. You need to configure the dataflow.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Copy Power BI dataflow.	Export the JSON file.
Schedule updates.	Export the JSON file.
	Change the settings.
	Change the properties.
	Add Streaming dataset.
Schedule updates.	Configure the Power BI service.
	Refresh the history.
	Configure the Power BI service.
	Share the dashboards with other users.
	Refresh automatically.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Answer Area

Requirement	Action
Copy Power BI dataflow.	Export the JSON file.
Schedule updates.	Export the JSON file.
	Change the settings.
	Change the properties.
	Add Streaming dataset.
Schedule updates.	Configure the Power BI service.
	Refresh the history.
	Configure the Power BI service.
	Share the dashboards with other users.
	Refresh automatically.

NEW QUESTION 192

- (Exam Topic 3)
You have a Power Apps portal app that supports a sales community and a service community in the same environment. The only language configured in the environment is English. The company wants to add support for two more languages. The solution must meet the following requirements:

- > Languages must be for both sales and service functions.
- > The company logo and colors must be used and apply to all screens.
- > Communities must be separate with different URLs and access lists.

You need to configure the solution.
What should you configure? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Requirement	Configuration
Languages	<div><div></div><div>Create two portals, one for each community.</div><div>Create three portals, one for each language.</div><div>Create one portal and import translations.</div><div>Create six portals, one for each combination of language and community.</div></div>
Company logo and colors	<div><div></div><div>Add themes.</div><div>Add web resources.</div><div>Add a portal header and footer</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Create two portals, one for each community Power Apps portal app languages
Box 2: Add themes
You can create a custom look and feel (a theme), for your app by making changes to the default colors and visual elements provided in the uncustomized system. For example, you can create your personal product branding by adding a company logo and providing table-specific coloring. A theme can be created by using the Themes area, without requiring a developer to write code. You can create, clone, change, or delete themes that are used in your environment.
Reference:
<https://docs.microsoft.com/en-us/power-apps/maker/model-driven-apps/create-themes-organization-branding>

NEW QUESTION 195

- (Exam Topic 3)
You create functionality for a company. The functionality includes a Microsoft Dataverse table with a form for data entry. The functionality will be distributed to other lines of business in the company, each with its own Dataverse environment. New forms must not be created in order for updates to the functionality to work correctly. You need to package the new functionality for distribution. What should you do?

- A. Use a patch solution and disable the ability to create new forms for the table.
- B. Use a managed solution and include only the needed form.
- C. Use an unmanaged solution and include only the needed form.
- D. Use a managed solution and disable the ability to create new forms for the table.

Answer: B

Explanation:
Managed solutions are used to deploy to any environment that isn't a development environment for that solution. This includes test, UAT, SIT, and production

environments. Managed solutions can be serviced independently from other managed solutions in an environment. As an ALM best practice, managed solutions should be generated by exporting an unmanaged solution as managed and considered a build artifact. Additionally: You can't edit components directly within a managed solution.

Reference: <https://docs.microsoft.com/en-us/power-platform/alm/solution-concepts-alm>

NEW QUESTION 196

- (Exam Topic 3)

You create a Power Platform help Desk solution.

You need to create a dashboard that displays information on help desk cases that are handled each week. Which dashboard components should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Component type
Add a tag chart by using opened cases.	<div>▼</div> <div>System chart</div> <div>Personal dashboard</div> <div>Area chart</div>
Add a stacked column chart shared with your team.	<div>▼</div> <div>System chart</div> <div>Personal dashboard</div> <div>Area chart</div>
Add a Microsoft Power BI visualization.	<div>▼</div> <div>System chart</div> <div>Personal dashboard</div> <div>Area chart</div>
Add a chart from a view that a user creates.	<div>▼</div> <div>System chart</div> <div>Personal dashboard</div> <div>Area chart</div>
Add a doughnut chart that shows cases by owner.	<div>▼</div> <div>System chart</div> <div>Personal dashboard</div> <div>Area chart</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Area chart Box 2: System chart

System charts are organization-owned charts, which makes them available to anyone with access to read the data running the app. System charts can't be assigned or shared with specific app users.

Box 3: Personal dashboard Box 4: Personal dashboard Box 5: Area chart

Reference:

<https://docs.microsoft.com/en-us/powerapps/user/add-powerbi-dashboards> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-system-chart>

NEW QUESTION 201

- (Exam Topic 3)

A company has a sales application that is supported by an Azure SQL database. You are developing a Power Apps app for use by customer service agents.

The app must reference customer data from the sales application. Data in the sales application is constantly changing and must not be replicated in Microsoft Dataverse

Some customer data is considered sensitive. You must protect data for specific fields when users view data in the app.

You need to configure table creation for the app.

How should you configure the app? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point

Requirement	Action
Dataverse table type to create for the referenced customer data.	<div>Create a virtual table.</div> <div>Create an activity table.</div> <div>Create a user-owned table.</div> <div>Create an organization-owned table.</div>
Protect sensitive customer data for specific fields.	<div>Create an alternate key.</div> <div>Create a secured column.</div> <div>Implement input method editor (IME) mode.</div> <div>Set the value of the visible property of the fields to false.</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Action
Dataverse table type to create for the referenced customer data.	<div>Create a virtual table. Create an activity table. Create a user-owned table. Create an organization-owned table.</div>
Protect sensitive customer data for specific fields.	<div>Create an alternate key. Create a secured column. Implement input method editor (IME) mode. Set the value of the visible property of the fields to false.</div>

NEW QUESTION 202

- (Exam Topic 3)

You are designing an app for a bank.

You must create entities for the app and configure relationships between entities:

Entity	Requirements
LoanApplicant	This entity represents a person who is applying for a loan. The entity must contain an attribute named Email. This attribute must provide look-up for the name of the applicant.
Loan	This entity represents a loan application. Loan applicants may apply for one loan per application. Loan applicants may have more than one active application.
Property	This entity represents the property that the applicant intends to purchase.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct requirements. Each relationship type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Relationship types	Answer Area								
<div>1 : N N : N N : 1</div>	<table><tr><th>Requirement</th><th>Relationship type</th></tr><tr><td>The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.</td><td></td></tr><tr><td>Loan applicants can apply for one type of loan per application. Applicants can have more than one application.</td><td></td></tr><tr><td>Loans must be applied for for a single property.</td><td></td></tr></table>	Requirement	Relationship type	The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.		Loan applicants can apply for one type of loan per application. Applicants can have more than one application.		Loans must be applied for for a single property.	
Requirement	Relationship type								
The email attribute of the Loan Applicant entity must provide a look-up to the contact name and email.									
Loan applicants can apply for one type of loan per application. Applicants can have more than one application.									
Loans must be applied for for a single property.									

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Box 1: N:1

You add a lookup column with a many-to-one relationship. Box 2: N:N

Box 3: N:1

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-entity-lookup>

NEW QUESTION 204

- (Exam Topic 3)

A farm uses a canvas app to manage schedules for planting fields with crop seeds. The farm uses business intelligence to provide recommendations for schedule changes based on weather data.

You must implement a business rule that changes information for several forms in the canvas app based on business intelligence data.

You need to configure the business rule. Which scope should you use?

- A. Table
- B. All Forms

C. Form specific

Answer: A

NEW QUESTION 209

- (Exam Topic 3)

You have a business process flow.

You need to update the business process flow while minimizing administrative and maintenance efforts. What should you implement? To answer, drag the appropriate features to the correct requirements. Each

feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

Action step

Classic workflow

Power Automate flow

Answer Area

Requirement

Allow users to navigate to the previous stage only from specific stages.

Create checklist records in specific stages on demand.

NEW QUESTION 210

- (Exam Topic 3)

A company creates a bot by using Power Virtual Agents.

The company requires the bot to transfer callers to an agent if the bot is unable to recognize a customers request.

You need to configure the bot for the unrecognized information from the customer. Which feature should you use?

- A. Fallback workstream
- B. Fallback topic
- C. Fallback skill
- D. Fallback queue
- E. Fallback entity

Answer: B

Explanation:

A Fallback topic is a type of topic in Power Virtual Agents that is used when the bot is unable to understand the customer's request. When a Fallback topic is triggered, it takes over the conversation and presents the customer with a set of options or a message that allows them to get the help they need. This can include options such as requesting to speak with an agent, providing feedback, or getting more information about the bot's capabilities. Fallback topic can be configured to automatically transfer the customer to an agent.

References:

- > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/fallback>
- > <https://docs.microsoft.com/en-us/power-virtual-agents/create-bot/bot-topics>

NEW QUESTION 213

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result, these questions will not appear in the review screen.

On a Contact record, a user creates a Note record that contains the word running.

One week later, the user reports that they cannot find the Contact record associated with the Note record. You need to find the Note record.

Solution: Use Dataverse Search to search for the word run. Does the solution meet the goal?

- A. Yes

B. No

Answer: B

NEW QUESTION 217

- (Exam Topic 3)

You are a Dynamics 365 Customer Service help desk administrator.

Cases entered in forms require different types of data to be stored in different types of fields. You need to create forms for each of the following case types:

Case type	Requirement
Case type A	A new case form that includes a timeline
Case type B	A new case form that includes a business process flow
Case type C	A new case form that can display case data on an interactive dashboard
Case type D	A new mobile-friendly case form that requires minimal fields for record creation
Case type E	A new mobile-friendly case form that displays the subject, case title, and status fields from a parent case

Which form types should you create? To answer, drag the appropriate form types to the meet the data entry requirements. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Form types	Answer Area	
quick create	Case type	Form type
main	Case type A	Form type
quick view	Case type B	Form type
card	Case type C	Form type
	Case type D	Form type
	Case type E	Form type

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/create-design-forms-customer-service-hub>

NEW QUESTION 221

- (Exam Topic 3)

You are creating a Power Virtual Agents chatbot for a Microsoft Power Platform power apps portal app. The job title of users must be stored automatically when users log in. The job title must always appear in the chatbot.

You need to configure the job title functionality.

Which mechanism should you use?

A. artificial intelligence

B. variable

C. entity

D. topic

Answer: B

Explanation:

After enabling the Authentication, you will now have access to Two variables, bot.UserDisplayName

bot.UserId

Reference:

<https://powerusers.microsoft.com/t5/Power-Virtual-Agents-Community/Getting-User-Details-To-Use-In-Power>

NEW QUESTION 225

- (Exam Topic 3)

The business team provides the following list of features that they would like you to implement:

- Group by or sort columns in the current view.
- Configure a business rule to show an error message.
- Edit values in calculated fields.

- Edit the Address composite field.
- Use the editable grid on mobile phones.

Which actions can you perform? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Group by or sort columns in the current view.	<div>Yes</div> <div>No</div>
Configure a business rule to show an error meessage.	<div>Yes</div> <div>No</div>
Edit values in calculated fields	<div>Yes</div> <div>No</div>
Edit the Address composite field.	<div>Yes</div> <div>No</div>
use the editable grid on mobile phones.	<div>Yes</div> <div>No</div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Group by or sort columns in the current view.	<div>Yes</div> <div>No</div>
Configure a business rule to show an error meessage.	<div>Yes</div> <div>No</div>
Edit values in calculated fields	<div>Yes</div> <div>No</div>
Edit the Address composite field.	<div>Yes</div> <div>No</div>
use the editable grid on mobile phones.	<div>Yes</div> <div>No</div>

NEW QUESTION 229

- (Exam Topic 3)

You create a canvas app for a sales team. The app has an embedded Power BI tile that shows year-to-date sales. Sales users do not have access to the data source that the tile uses.

Sales team users must be able to see data in the Power BI tile. You must minimize the level of permissions that you grant and minimize administrative overhead. You need to share another Power BI component to make the data visible. What should you share?

- A. The Power BI dataset the tile uses as a data source.
B. The Power BI workspace that includes the tile.
C. The Power BI dashboard that includes the tile.

Answer: C

Explanation:

Once shared, the PowerApps app will be accessible by all users who have permissions to access the app. However, in order to make the Power BI content visible to those users, the dashboard where the tile comes from needs to be shared with the user on Power BI. This ensures that Power BI sharing permissions are respected when Power BI content is accessed in an app.

Reference:

<https://powerapps.microsoft.com/en-us/blog/power-bi-tile-in-powerapps/>

NEW QUESTION 230

- (Exam Topic 3)

A company creates a canvas app.

The app requires near real-time data from an accounting system that resides in a customers data center. You need to implement a solution for the app. What should you create?

- A. Azure DevOps pipeline
B. On-premises data gateway
C. Power Pages
D. Data integration project

Answer: B

Explanation:

When a company creates a canvas app that requires near real-time data from an accounting system that resides in a customer's data center, one solution that can

be implemented is to create an On-premises data gateway.

An On-premises data gateway is a service that allows Power Apps to connect to and access data sources that are located on-premises, such as the accounting system in the customer's data center. The gateway acts as a bridge between the cloud-based Power Apps and the on-premises data sources, enabling real-time data transfer and integration.

References:

- <https://docs.microsoft.com/en-us/power-platform/admin/gateway-reference>
- <https://docs.microsoft.com/en-us/power-platform/admin/gateway-onprem>
- <https://docs.microsoft.com/en-us/power-platform/admin/real-time-data-integration>

NEW QUESTION 233

- (Exam Topic 3)

You create and publish a Power BI report that contains an embedded canvas app. The report will be used by multiple people.

The canvas app has an issue that must be corrected. You update the canvas app.

You need to ensure that the updated canvas app is available in the published Power BI report. What should you do?

- A. Publish the Power BI report from Power BI Desktop.
- B. Manually refresh the data source on the published Power BI report.
- C. Publish the Power BI report from Power BI Desktop and reshare to any users.
- D. Publish the canvas app.

Answer: B

Explanation:

➤ If you change the data fields associated with the visual, you must edit the app from within the Power BI service by selecting the ellipsis (...) and then selecting Edit. Otherwise, the changes won't be propagated to Power Apps, and the app will behave in unexpected ways.

➤ The Power Apps visual can't trigger a refresh of Power BI reports and Power BI data sources from within Power BI Desktop. If you write back data from the app to the same data source as the report, your changes won't be reflected immediately in Power BI Desktop. Changes are reflected on the next scheduled refresh.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual#limitations-of-the-po>

NEW QUESTION 234

- (Exam Topic 3)

You are a Dynamics 365 administrator for a veterinarian clinic.

On the client appointment form, there is a dropdown field for clients to select their type of pet. If a client selects the option Other, the veterinarian wants a text field to appear so that additional details can be added.

You need to create a dynamically visible field. What should you configure?

- A. field visibility on the form
- B. business process flow
- C. workflow
- D. business rule

Answer: D

Explanation:

References:

<https://www.sherweb.com/blog/dynamics-365/configuring-business-rules-within-microsoft-dynamics-365-crm/>

NEW QUESTION 237

- (Exam Topic 3)

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots. Where should you store the model data?

- A. Global variables
- B. Custom entities
- C. Topics
- D. Multiple choice options

Answer: A

NEW QUESTION 241

- (Exam Topic 3)

A company has a model-driven app.

The app must meet the following requirements:

- Prevent users from saving a record if validation from a custom action fails.
- Query and update a list of records.

You need to configure processes for the app without using code.

Which processes should you use? To answer, drag the appropriate processes to the correct requirements. Each process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Processes	Answer Area	Requirement	Process
Cloud flow		Prevent users from saving a record.	
Classic workflow		Query and update records.	
Business process flow			

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Processes	Answer Area	Requirement	Process
Cloud flow		Prevent users from saving a record.	Business process flow
Classic workflow		Query and update records.	Cloud flow
Business process flow			

NEW QUESTION 244

- (Exam Topic 3)

A company uses Common Data Service to manage prospects. The company has a business process flow named BPFA that is associated with the Prospect entity to streamline the prospect management process.

You add a field named Category to the Prospect entity. You create additional business process flows. You apply the business process flows to Prospect records based on the selected category. Users can switch to any other newly configured business process flows but must not use BPFA.

You need to configure the solution.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution. NOTE Each correct selection is worth one point.

- A. Remove all of the privileges for BPFA.
 B. Deactivate BPFA.
 C. Use a business rule to prevent users from switching to BPFA.
 D. Change the display order of the business process flows to move BPFA to the bottom of the list.

Answer: AB

NEW QUESTION 247

- (Exam Topic 3)

The sales manager receives a list of leads from a partner company monthly. The field names that are provided do not match the fields in Dynamics 365. A data map does not exist.

You need to import the leads without changing the data from the partner company. What should you do?

- A. Create a data map in Data Management.
 B. Add a template for Import Data.
 C. Use Import Field Translations.
 D. Create a data map on the first import by using the Import Data wizard.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/basics/import-accounts-leads>

NEW QUESTION 252

- (Exam Topic 3)

A company uses a model-driven app for customer support. The company has the following requirements for the app:

- Send an email in real-time to customers when they enter their email address.
- Send an email to customers at the same time every day for cases that are open for more than 24 hours. The solution should require the least amount of customization.

You need to configure the model-driven app. Which components should you use?

Components		Requirement	Component
Power Apps component framework (PCF) control	<input type="checkbox"/>	Send email to customer when email address entered.	<input type="text"/>
Classic workflow		Send email at the same time every day.	<input type="text"/>
Power Automate flow	<input type="checkbox"/>		
JavaScript	<input type="checkbox"/>		

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Components		Requirement	Component
Power Apps component framework (PCF) control	<input type="checkbox"/>	Send email to customer when email address entered.	Classic workflow
Classic workflow		Send email at the same time every day.	Power Automate flow
Power Automate flow	<input type="checkbox"/>		
JavaScript	<input type="checkbox"/>		

NEW QUESTION 254

- (Exam Topic 3)

Your organization does not permit the use of custom code for solutions. You need to create a view that can be viewed by all users in an organization. Where should you create the view?

- A. Microsoft Visual Studio
B. Maker portal
C. Advanced Find
D. System Settings

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer>

NEW QUESTION 255

- (Exam Topic 3)

A company's sales staff wants a simplified way to manage their opportunities in Dynamics 365 Sales without adding custom code.

You need to provide a solution for each requirement.

Which solutions should you provide? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Drag and drop opportunities to change the stage.	<div> Add a Kanban control. Add a Timeline control. Add an Editable Grid control. Add a Calendar control. </div>
Show each salesperson their opportunities in Calendar and Kanban view.	<div> Add both controls to a custom view. Add both controls to the My Opportunities view. Add one control to All Opportunities and a custom view. Add one control to My Opportunities and a custom view. </div>
Show each salesperson the number of open opportunities by stage in a standard view.	<div> Use the List view. Use the Timeline control. Use the Kanban control. Use the chart pane on the view. </div>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Add a Kanban control.

The Kanban view allows your sales team to move opportunities from one stage to another by simply dragging them.

Box 2: Add both controls to the My Opportunities view.

➤ Kanban views help salespeople to manage their opportunities and activities effectively. Add the Kanban control to the Opportunity and Activity entity so salespeople can use the Kanban views. The Kanban control works only on the Opportunity and Activity entities.

➤ If you use unified interface, you can display any record in a calendar view via the calendar control.

- Go to Settings->Customization->Customize the System
- Open the configuration for the entity that you want to use the calendar control (Opportunities in our example)
- Click the View tab
- Click "Add Control" and select the calendar control.
- Click the dot for every interface from which you want the calendar control to be available.

Box 3: Use a List view

opportunities in Dynamics 365 Sales

<https://fivep.com.au/how-to-get-visibility-and-report-on-an-opportunities-active-current-sales-stage-without-cod>

NEW QUESTION 259

- (Exam Topic 3)

You create a JavaScript web resource named MyBusinessLogic. The code it contains uses functionality from a third-party JavaScript library.

You notice that an independent software vendor (ISV) solution uses the same third-party library in their managed solution.

You plan to deploy your solution to other environments by using a managed solution. The ISV solution might not be installed in the other environments.

You need to package the solution for deployment

What are two ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Create a new JavaScript web resource by using the code from the third-party library
- B. Add the new JavaScript web resource along with MyBusinessLogic to the solution.
- C. Add a copy of the JavaScript library from the ISV to the solution along with MyBusinessLogic.
- D. Add the code from the third-party JavaScript library to MyBusinessLogic
- E. Add MyBusinessLogic to the solution.
- F. Add only the third-party JavaScript web resource to the solution.

Answer: AC

Explanation:

Web resources in model-driven apps.

Web resources are virtual files that are stored in the Microsoft Dataverse database and that you can retrieve by using a unique URL address.

Capabilities of web resources.

Web resources represent files that can be used to extend the Dataverse web application such as html files, JavaScript, and CSS, and several image formats.

Reference: <https://docs.microsoft.com/en-us/power-apps/developer/model-driven-apps/web-resources>

NEW QUESTION 263

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating Power Virtual Agents chatbot that captures demographic information about customers. The chatbot must determine the group a customer belongs to based on their age. The age groups are:

- > 0 - 17
- > 18 - 25
- > 26 - 35
- > 36 - 55
- > 55 - 100

You need to configure the chatbot to ask a question that can be used to determine the correct age group. Solution: Use multiple choice for Identify in the question and create options that represent of the age groups. Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 264

- (Exam Topic 3)

You manage the Dynamics 365 environment for a company.

You need to ensure that there are no leads for a customer before you create a new opportunity for the customer.

How can you use duplicate detection rules to achieve this goal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Duplicate detection rule criteria	Value
Base record type	<div>▼</div> <div>Lead</div> <div>Account</div> <div>Opportunity</div>
Base record field	<div>▼</div> <div>Topic</div> <div>Account</div> <div>Originating Lead</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Duplicate detection rule criteria	Value
Base record type	<div>▼</div> <div>Lead</div> <div>Account</div> <div>Opportunity</div>
Base record field	<div>▼</div> <div>Topic</div> <div>Account</div> <div>Originating Lead</div>

NEW QUESTION 266

- (Exam Topic 3)

You configure and test a user interface (UI) flow. You plan to run the flow as a scheduled flow.

The UI flow must run on a Windows 10 device. As part of process automation, the UI flow must sign into the Windows 10 device with the credentials for a user account named User1.

You need to ensure that the flow runs during non-peak hours and requires no physical user intervention. What should you do?

- A. Ensure that all user sessions are signed out except for locked user sessions.
- B. Ensure that the User1 account has an active user session on the device.
- C. Ensure that all user sessions are signed out.
- D. Ensure that there are no active user sessions on the device.

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-automate/ui-flows/run-ui-flow>

NEW QUESTION 270

- (Exam Topic 3)

You have a canvas app with an embedded Power BI tile.

You share the canvas app. Users report that they are unable to access the Power BI content. You need to determine why users are unable to access the content

What is the cause of the user s problems?

- A. The Power BI dashboard is not shared.
- B. The Power BI interactions property on the Power BI tiles is set to Off.
- C. The Power BI connection is not shared.
- D. The Power BI Display mode property on the Power BI tiles is set to Disabled

Answer: A

Explanation:

When embedding a Power BI tile in a Canvas app, there are several factors that must be considered in order to ensure that users have access to the content. One of the most important is sharing the Power BI dashboard that the tile is embedded in. If the dashboard is not shared with the users, they will not be able to view the content in the tile.

To share a Power BI dashboard, you must have the "Edit" permission for the dashboard. Once you have this permission, you can share the dashboard with other users by following these steps:

- Click the "Share" button in the top-right corner of the dashboard.
- In the "Share" pane that appears, enter the email addresses of the users that you want to share the dashboard with.
- Select the level of access that you want to grant to the users. You can choose to give them "View" access, which allows them to view the dashboard but not make changes, or "Edit" access, which allows them to view and make changes to the dashboard.
- Click the "Share" button to share the dashboard with the users. Additionally, there are other factors that could cause user's problems:
- B. The Power BI interactions property on the Power BI tiles is set to Off. In that case, the user's won't be able to interact with the visuals.
- C. The Power BI connection is not shared. In that case, the user's won't have the access to the data source
- D. The Power BI Display mode property on the Power BI tiles is set to Disabled, in that case the user's won't see the tile

It is important to check all of these factors and ensure that they are properly configured in order to ensure that users have access to the content.
