

## Exam Questions C1000-132

IBM Maximo Manage v8.0 Implementation

<https://www.2passeasy.com/dumps/C1000-132/>

#### NEW QUESTION 1

How many failure reports can be created for the same Work Order?

- A. one failure report for the work order and only one for each task of the work order
- B. unlimited failure reports for either a work order or any of its tasks
- C. unlimited failure reports for each work order, but none for a task
- D. just one failure report

**Answer:** D

#### Explanation:

<https://maximosecrets.com/2022/04/14/failure-codes-and-failure-reporting/> In IBM Maximo, only one failure report can be created per work order. This failure report captures details about the issues encountered, including the failure class, problem, cause, and remedy codes. It is recorded in the Failure Reporting tab within the Work Order Tracking or Quick Reporting applications, and is designed to provide a structured report on the failure encountered for the specified work order.

While Maximo allows for multiple failure details to be reported across different work orders, each individual work order is limited to a single failure report. Tasks or child work orders associated with the main work order do not support additional, separate failure reports for each task; instead, the primary work order holds the single comprehensive report.

#### NEW QUESTION 2

Which three coverage options can be included on a contract line in a Warranty Contract? (Choose three.)

- A. Financial Loss
- B. Labor
- C. Children
- D. Shipping
- E. Replacement
- F. Materials

**Answer:** BCF

#### NEW QUESTION 3

What is the default status in the Quick Reporting Application?

- A. INPRG
- B. APPR
- C. DRAFT
- D. ENTERED

**Answer:** A

#### Explanation:

The default status in the Quick Reporting Application in IBM Maximo Manage is DRAFT.

#### NEW QUESTION 4

In which Maximo application can Workflow Delegation be set?

- A. People
- B. Person Group
- C. Workflow Administration
- D. Labor

**Answer:** A

#### NEW QUESTION 5

When users are added to multiple security groups, the authorization privileges of the security groups combine, with the exception of security groups with which setting?

- A. Independent
- B. Separate
- C. Autonomous
- D. Discreet

**Answer:** A

#### Explanation:

When users are added to multiple security groups, the authorization privileges of the security groups combine, with the exception of security groups with the "Independent" setting. When a security group has the "Independent" setting, its authorization privileges are applied separately from any other security group that the user belongs to.

#### NEW QUESTION 6

When setting up a Crew Type, Required Crafts and Required Tools can be specified. What other characteristic can be required for the Crew Type?

- A. Required Assets
- B. Required Qualifications

- C. Required Labor
- D. Required Skills

**Answer:** B

#### NEW QUESTION 7

In which three areas of Maximo can an inspection form be referenced to generate an Inspection result? (Choose three.)

- A. Work Order
- B. Ticket Template
- C. Route Stop
- D. Service Request
- E. Job Plan Task
- F. Preventive Maintenance

**Answer:** ACE

#### NEW QUESTION 8

What is the result of selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions?

- A. Any GL component can be used.
- B. Any valid GL component can be used.
- C. Only valid GL accounts can be used.
- D. Validates transactions occurred during an active financial period.

**Answer:** C

#### Explanation:

When selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions in IBM Maximo Manage, only valid GL accounts can be used.

#### NEW QUESTION 9

The IoT Connector provides Maximo Manage, Maximo Health and Maximo Predict the ability to connect to which two data sources?

- A. Maximo Spatial
- B. Maximo Assist
- C. IBM Watson IoT Platform
- D. Maximo Safety
- E. Maximo Monitor

**Answer:** CE

#### Explanation:

IoT Connector provides Maximo Manage, Maximo Health and Maximo Predict the ability to connect to C. IBM Watson IoT Platform and E. Maximo Monitor data sources. The IoT Connector in the Administration Work Center can be used to configure a connection to an IoT platform such as IBM Watson IoT Platform and IBM Maximo Asset Monitor1.

#### NEW QUESTION 10

DRAG DROP

What is the order of operations for creating the GL Account Structure and Chart of Accounts for an Organization?

#### Unordered Options

- 0 Define GL Structure in Database Configuration.
- 0 Create GL Component Codes for Organization.
- 0 Create GL Account Code combinations for Organization
- 0 Apply Database Configuration Changes.

#### Ordered Options

- 0
- 0
- 0
- 0

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

The 01st step is to define the GL Structure in the Database Configuration application, which allows you to specify the segments, lengths, and separators of the GL account code.

The 2nd step is to apply the database configuratin changes, which will create the necessary tables and columns in the database to store the GL account

information.

The 3rd step is to create the GL Component Code for the Organization, which allows u to define the value and description for each segment of the GL account code.

The fourth step is to create the GL Account Code combinations for the Organization, which allows you to generate and validate the complete GL account codes based on the component cods.

#### NEW QUESTION 10

In which three applications can Asset Depreciation be configured?

- A. Chart of Accounts
- B. Tools
- C. Asset Templates
- D. Locations
- E. Assets
- F. Item Master

**Answer:** CEF

#### Explanation:

Asset Depreciation can be configured in the following three applications:

? C. Asset Templates: You can define depreciation settings within asset templates to standardize how assets of the same type depreciate. This ensures consistency and saves time when creating new assets. (Reference: IBM Maximo Manage v8.0 documentation - Asset Templates)

? E. Assets: Depreciation can be configured directly on individual asset records. This allows for flexibility if an asset has unique depreciation circumstances that differ from the template. (Reference: IBM Maximo Manage v8.0 documentation - Assets application)

? F. Item Master: When creating an item record that will be used as an asset, you can specify depreciation information. This is useful for items that are commonly capitalized and tracked as assets. (Reference: IBM Maximo Manage v8.0 documentation - Item Master application)

#### NEW QUESTION 11

Which statement is true regarding Master Preventative Maintenance (PM) records?

- A. Associated PM records can only be created for a rotating item's asset.
- B. Associated PM records can be created for a Master PM which does not have an item
- C. Associated PM records are temporary and expire after 90 days.
- D. Associated PM records can only be created for a rotating item's location.

**Answer:** B

#### Explanation:

Regarding Master Preventative Maintenance (PM) records in IBM Maximo Manage, associated PM records can be created for a Master PM which does not have an item.

#### NEW QUESTION 12

Which Maximo application can be used to generate replacement plans for assets?

- A. Maximo Predict
- B. Maximo Health
- C. Maximo Health, Safety and Environmental (HSE)
- D. Maximo Manage

**Answer:** B

#### Explanation:

IBM Maximo Health, part of the Maximo Application Suite, is specifically designed to enable comprehensive asset performance monitoring, including the capability to generate replacement plans for assets. With Maximo Health, users can assess an asset's remaining useful life, criticality, and health scores to make data-driven decisions about whether to repair, refurbish, or replace an asset.

Key features in Maximo Health that facilitate replacement planning include:

? Expected Life and Replacement Planning: Users can evaluate assets approaching the end of their lifecycle. For assets flagged for replacement or nearing their projected end of life, Maximo Health offers views like the "Expected Life" or "Plan Costs" to initiate a replacement plan. This process allows for strategic planning of asset replacements to ensure operational reliability and cost-effectiveness

IBM GitHub

Maximo Health integrates data from asset condition monitoring, usage history, and criticality analysis, allowing for a proactive approach to asset management and enabling organizations to optimize maintenance budgets by planning replacements only when necessary. Thus, option B (Maximo Health) is the correct answer.

#### NEW QUESTION 17

In the Assets application a used engine needs to be replaced with a rebuilt engine, how might the rebuilt engine inherit the depreciation schedule from the used engine?

- A. Use the action Exchange Depreciation Schedules.
- B. Use the action Copy Depreciation Schedules.
- C. Use the action Swap Depreciation Schedules.
- D. Use the action Split Depreciation Schedules.

**Answer:** C

#### Explanation:

To replace a used engine with a rebuilt engine in the Assets application in IBM Maximo Manage v8.0 implementation and inherit the depreciation schedule from the used engine, you can use the "Copy Depreciation Schedules" action. This action allows you to copy the depreciation schedules from the old asset to the new asset, including the depreciation terms and any calculation information.

#### NEW QUESTION 19

Where can API keys be created for setting up integrations with the Maximo framework?

- A. REST API
- B. System Properties
- C. Database Configuration
- D. Administration Work Center

**Answer:** D

#### NEW QUESTION 24

What item status in the Inventory application is needed to receive a purchased item into inventory?

- A. PENDING
- B. APPROVED
- C. ACTIVE
- D. PLANNING

**Answer:** C

#### NEW QUESTION 27

How can a Master Preventive Maintenance record be associated with multiple non-rotating assets?

- A. Use the Move/Modify Assets action.
- B. Use an Asset Template.
- C. Add the Assets to the Multiple Assets table on the Master Preventive Maintenance record.
- D. Use the Apply Down Hierarchy action on the Master Preventive Maintenance record.

**Answer:** B

#### Explanation:

To associate a Master Preventive Maintenance record with multiple non- rotating assets, we can add the assets to the Multiple Assets table on the Master Preventive Maintenance record. This allows us to associate the preventive maintenance schedule with multiple assets, ensuring that the maintenance activities are performed on each of the associated assets as scheduled.

#### NEW QUESTION 30

What would happen if a Ticket Template with a set of Activities with Job Plans is applied to a Service Request?

- A. The activities become follow-up Work Orders with a Job Plan applied, they are visible from the Related Records tab of the Service Request.
- B. The activities are ignored when applying to a Service Request as Activities are only used with Incidents and Problems.
- C. Each activity will create a Work Order record of class ACTIVITY, no tasks would be created because records of class ACTIVITY cannot have tasks.
- D. Each activity will create a Work Order record of class ACTIVITY with the Job Plans applied, there may be tasks if the Job Plan had tasks.

**Answer:** D

#### NEW QUESTION 34

DRAG DROP

Select all that apply

What is the appropriate order of phases in order to create a workflow process?

The screenshot shows a drag-and-drop interface for creating a workflow process. It consists of two main columns: 'Unordered Options' on the left and 'Ordered Options' on the right. The 'Unordered Options' column contains four items in a list: 'Activate the process.', 'Validate the process.', 'Enable the process.', and 'Create the process.'. The 'Ordered Options' column is currently empty. Between the two columns, there are two circular arrows, one pointing right and one pointing left, indicating the drag-and-drop functionality. On the far right of the 'Ordered Options' column, there are two circular arrows, one pointing up and one pointing down, likely for reordering the items once they are placed in the column.

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

The appropriate order of phases in order to create a workflow process in IBM Maximo Manage is:

? Create the process: This involves designing the workflow process using the Workflow Designer application, including creating the activities, transitions, and conditions that make up the process.

? Validate the process: This involves ensuring that the process has been designed correctly and meets the desired requirements. This can be done by testing the process and making any necessary adjustments.

? Enable the process: This involves making the process available for use in the system by enabling it in the Workflow Designer application.

? Activate the process: This involves activating the process in the Workflow Administration application so that it is ready for use by the system.

#### NEW QUESTION 37

Which statement describes Non-Rotating Items?

- A. It can be contained within a Kit.
- B. It has assets associated with it.
- C. It can be attached to a parent asset on issue.
- D. It can have a meter group associated with it.

**Answer:** A

#### NEW QUESTION 42

In which three applications can a failure class be applied? (Choose three.)

- A. Work Order Tracking
- B. Job Plans
- C. Locations
- D. Item Masters
- E. Tools
- F. Assets

**Answer:** ACF

#### NEW QUESTION 46

Which two automation script launch points can be triggered directly by a workflow?

- A. Object
- B. Custom Condition
- C. Attribute - '
- D. Action
- E. Integration

**Answer:** BD

#### Explanation:

two automation script launch points that can be triggered directly by a workflow are B. Custom Condition and D. Action. An action launch point associates a script with an action and executes when the specified action occurs1. A custom condition launch point associates a script with a condition and executes when the specified condition is evaluated2.  
<https://www.ibm.com/docs/en/mam/7.6.0?topic=lp-script-action-launch-point>

#### NEW QUESTION 51

What is the purpose of the Admin mode?

- A. change System Properties without needing to shut down the Maximo server
- B. perform Database Configuration without needing to shut down the Maximo server
- C. apply changes in Application Designer
- D. perform administrative functions

**Answer:** D

#### Explanation:

The purpose of Admin mode in IBM Maximo Manage is to allow users to perform Database Configuration without needing to shut down the Maximo server.

#### NEW QUESTION 53

To what type of objects can a Service Level Agreement be applied?

- A. only the objects based on the Work Order or Ticket Classes, and Assets, Locations and Configuration Items
- B. only the Main Object that are Internal
- C. only the objects based on the Work Order or Ticket Classes
- D. any Main Object

**Answer:** D

#### Explanation:

According to IBM Maximo documentation, SLAs can indeed be applied to various main objects beyond Work Order or Ticket Classes, including additional objects like assets, locations, and configuration items. This allows broader application across records where service level commitments need to be tracked  
<https://www.ibm.com/docs/en/maximo-for-aviation/7.6.1?topic=records-service-level-agreements-slas>

#### NEW QUESTION 54

Which two domain types can have a specified error message?

- A. SYNONYM
- B. NUMERIC
- C. TABLE

- D. CROSSOVER
- E. ALN

**Answer:** D

**Explanation:**

In IBM Maximo Manage, the two domain types that can have a specified error message are TABLE and ALN.

**NEW QUESTION 56**

Which type of inspection can be created in the Conduct an Inspection Work Center?

- A. Group
- B. Conditional
- C. Preventive Maintenance
- D. Unscheduled

**Answer:** D

**NEW QUESTION 59**

In the Receiving application, what are the three statuses that show the overall receipt status of the purchase order?

- A. COMPLETE
- B. RETURNED
- C. PARTIAL
- D. NONE
- E. WINSP
- F. VOID

**Answer:** ACD

**Explanation:**

In the Receiving application in IBM Maximo Manage, the three statuses that show the overall receipt status of the purchase order are COMPLETE, PARTIAL and NONE.

**NEW QUESTION 62**

How does a user make a GL account inactive in the Chart of Accounts application?

- A. populate the Expiration Date with a value in the past
- B. select action Add/Modify GL Account
- C. deselect the Active checkbox
- D. select action Change Status

**Answer:** A

**NEW QUESTION 67**

How is the Lock Out / Tag Outs application structured?

- A. Specify a Lock Out on an Asset with a Locking Device and define the Tag Out Operations.
- B. Specify a Lock Out on the Location or Asset and define the Tag Out Operations.
- C. Specify a Tag Out on the Location or Asset and define the Lock Out Operations.
- D. Define the isolation procedures on a set of related assets and specify a sequence.

**Answer:** C

**NEW QUESTION 70**

Calendars can be associated with which three record types?

- A. Items
- B. Locations
- C. Job Plan
- D. Person
- E. Contracts
- F. Assets

**Answer:** BDF

**NEW QUESTION 73**

Which three Safety Module applications require a Site (SITEID) to be defined for each record? (Choose three.)

- A. Accident Reporting
- B. Danger Zones
- C. Tag Outs
- D. Safety Plans
- E. Hazards
- F. Precautions

**Answer:** CDF

#### NEW QUESTION 75

When using flow control on a Work Order, how can you ensure that Work Order status changes are inherited from the Parent to Child Work Orders?

- A. Check the Inherit Status Changes flag on the Work Order and ensure the mxe.app.wo.flowControlStatusInheritance System Properties is set to 1.
- B. In the Organization application, check the Inherit Status Changes flag in Work Order Options -> Flow Control Options.
- C. Ensure the Asset or Location on both the Parent and Child Work Order.
- D. Check the Roll Down Status Changes flag on the Parent and Child Work Order.

**Answer:** A

#### Explanation:

When using flow control on a Work Order in IBM Maximo Manage, to ensure that Work Order status changes are inherited from the Parent to Child Work Orders, you should go to the Organization application and check the Inherit Status Changes flag in Work Order Options -> Flow Control Options.

#### NEW QUESTION 80

What occurs by default when a Desktop Requisition with one direct issue line is submitted?

- A. A assignment is created for the purchase agent
- B. B Desktop Requisition will wait for a Workflow action
- C. A Purchase Requisition will be created.
- D. An authorized person must approve the Desktop Requisition.

**Answer:** C

#### NEW QUESTION 84

In which application can a user view a history of changes made to attributes in the Specifications tab?

- A. Locations
- B. Item Master
- C. Purchase Orders
- D. Assets

**Answer:** D

#### NEW QUESTION 87

A user wishes to perform the same work tasks on several assets simultaneously. How can this be configured?

- A. A Route should be created with each stop being one Asset and the Job Plan associated with the Route record.
- B. A Master Job Plan should be created with Tasks for each Asset.
- C. A Work Order Hierarchy should be created against the same Job Plan used for all stops.
- D. The Assets should be specified on the Multiple Assets, Locations and CIs table on the Work Order.

**Answer:** D

#### Explanation:

In IBM Maximo Manage, when the same work tasks need to be applied simultaneously to multiple assets, the recommended method is to use the Multiple Assets, Locations, and CIs table on a single Work Order. This approach allows users to specify multiple assets for the work order without creating separate child work orders or task hierarchies, streamlining record management and reducing complexity.

? Multiple Assets, Locations and CIs Table: This table allows the user to list all assets requiring the same work on a single work order. When tasks are defined on the work order, they apply uniformly across all assets listed in this table. This method is efficient for routine inspections, simple tasks, or other repetitive maintenance where the same task applies to multiple assets

? Routes as an Alternative: A route could also be configured so that each route stop (representing different assets or locations) populates the Multiple Assets, Locations, and CIs table on a single work order when applied. This allows for sequence control and record management while still using a single main work order. This setup minimizes the need to manage multiple child work orders or complex work order hierarchies, particularly when performing similar tasks on several assets simultaneously.

#### NEW QUESTION 92

Where can Default Values be specified for Service Requests created using the Service Request Work Center?

- A. Service Desk Application
- B. in the user's Profile
- C. Administration Work Center
- D. Application Designer

**Answer:** C

#### NEW QUESTION 94

How can an asset be moved from one location to another in a different organization using the Assets application?

- A. The asset must be recreated manually in the target organization.
- B. Use the action Move/Modify Assets.
- C. Use the action Transfer Asset.
- D. Use the action Create Change from Asset.

**Answer:** B

#### NEW QUESTION 97

What are the three usage types in the Inventory Usage application?

- A. MIXED
- B. ISSUE
- C. STAGED
- D. MOVE
- E. TRANSFER
- F. RECEIV

**Answer:** BCE

#### Explanation:

In IBM Maximo Manage v8.0 implementation, the usage types in the Inventory Usage application are ISSUE, STAGED, and TRANSFER. ISSUE is used to relieve items from inventory for use in maintenance or other processes. STAGED is used to reserve items for future use. TRANSFER is used to move items from one inventory location to another, typically within the same organization.

#### NEW QUESTION 98

What are the three Service Level Agreement Commitment Types that require a unit of measure because they calculate a date? (Choose three.)

- A. RESOLUTION
- B. FIRSTFIX
- C. DELIVERY
- D. RESPONSE
- E. COMPLETION
- F. CONTACT

**Answer:** ADF

#### NEW QUESTION 103

In the Preventive Maintenance (PM) application, how is the Estimated Next Due Date calculated when Adjust Next Due Date is selected?

- A. Extended Date + Alert Lead (Days)
- B. Extended Date + Frequency
- C. Extended Date + Target Start Time
- D. Extended Date -Alert Lead (Days)

**Answer:** B

#### NEW QUESTION 104

In the Manage Inventory Work Center a pick list can be created, its initial status is Entered. Which three actions will cause the status to change to in Progress? (Choose three.)

- A. Picked
- B. Restocked
- C. Prepared
- D. Issued
- E. Staged
- F. Returned

**Answer:** ADE

#### Explanation:

In the IBM Maximo Manage Inventory Work Center, a pick list starts with a status of "Entered." To change this status to "In Progress," certain actions need to be performed on the items within the pick list. The following actions trigger the transition from "Entered" to "In Progress":

? Picked: When items on the pick list are marked as "Picked," it signals that the inventory has been gathered and is ready for further processing. This action moves the pick list status to "In Progress"

? Staged: Staging items on the pick list moves them to an intermediate location or prepares them for issuance. Moving items to this state changes the pick list status to "In Progress" as well

? Issued: Issuing items from the pick list directly fulfills the reservation and removes the inventory from the system. This also updates the pick list status to "In Progress" as it reflects the inventory movement out of storage

Thus, actions A (Picked), D (Issued), and E (Staged) are the correct answers, as they all cause the pick list to shift from "Entered" to "In Progress."

#### NEW QUESTION 106

When adding an Asset to a Work Order, both the Asset and its Location record have a Failure Class defined. Which Failure Class will be used on the Work Order?

- A. It will use the record with the highest priority.
- B. It will be left empty.
- C. Location
- D. Asset

**Answer:** D

#### NEW QUESTION 108

If additional attributes are added to the Work View, how can they be automatically updated from changes made to a corresponding Ticket and Work Order fields?

- A. by modifying the existing Crossover Domains TKT2WV or W02WV
- B. by adding a Crossover Domain to TICKETID or WONUM
- C. by updating the existing Cron Task UpdateWorkView that has two instances TKT2WV and W02WV that use the Crossover Domains of the same name
- D. by modifying the existing Object Launch Point automation script UpdateWV

**Answer:** B

**Explanation:**

In IBM Maximo Manage v8.0 implementation, if you add additional attributes to the Work View and want them to be automatically updated from changes made to corresponding Ticket and Work Order fields, you can modify the existing Crossover Domains TKT2WV or W02WV. Crossover Domains define a mapping between fields on two different objects, allowing data to be synchronized between them.

**NEW QUESTION 109**

What are three available associations in the Hazards application?

- A. Lock Outs
- B. Material Safety Data Sheets (MSDS)
- C. Hazardous Materials
- D. Tag Outs
- E. Precautions
- F. Safety Plans

**Answer:** CDE

**Explanation:**

The Hazards application in IBM Maximo Manage v8.0 allows users to associate Material Safety Data Sheets (MSDS), Hazardous Materials, and Precautions with a particular hazard. These associations help in managing safety information related to hazards and in ensuring compliance with safety regulations.

**NEW QUESTION 113**

In the Master PM application, which two meter-based fields can be updated on associated Preventive Maintenance records? (Choose two.)

- A. Estimation Type
- B. Current Meter Reading
- C. Generate WO Ahead By
- D. Meter Type
- E. Frequency

**Answer:** CE

**Explanation:**

In the IBM Maximo Master PM application, certain meter-based fields can be updated on associated Preventive Maintenance (PM) records when changes are made to the Master PM. Specifically:

? Generate WO Ahead By: This field sets a lead time for generating work orders

ahead of their scheduled due date based on meter readings. Updating this field on the Master PM will adjust when work orders are generated on associated PMs

? Frequency: The frequency determines how often maintenance should occur based on meter readings. When the frequency is updated on the Master PM, this adjustment is applied to associated PMs, ensuring they reflect the updated maintenance interval

These updates allow for consistent and centralized management of preventive maintenance intervals and scheduling, essential for meter-based maintenance tracking in Maximo. Other fields like "Current Meter Reading" or "Meter Type" are not directly updated on associated PMs through the Master PM.

**NEW QUESTION 114**

Which two types of invoice line items can have their costs distributed across multiple GL Accounts? (Choose two.)

- A. Direct Issue
- B. Service Item
- C. Credit Line
- D. Split Invoice
- E. Hard Reserved

**Answer:** AB

**Explanation:**

In IBM Maximo, costs for certain types of invoice line items can be distributed across multiple GL accounts. Specifically, the following types of line items are eligible for cost distribution:

? Direct Issue: These are items directly issued to a work order, asset, or location

rather than being stored in inventory. Costs for direct issue items can be distributed across multiple GL accounts based on the relevant cost centers or departments associated with the purchase

? Service Item: For service-related invoice lines, costs can also be distributed across

multiple GL accounts. This is useful when a service, such as consulting or maintenance, benefits multiple departments, allowing for cost allocation to relevant GL accounts

Other options like "Credit Line," "Split Invoice," and "Hard Reserved" are not applicable for GL account distribution in this context.

**NEW QUESTION 117**

Where can the Asset Up/Down status be modified?

- A. use the Move/Modify Asset action in the Assets application
- B. from the Report Downtime action on the Work Order

- C. use the Move/Swap/Modify action on the Work Order
- D. use the Failure Reporting option on the Work Order

**Answer:** B

#### NEW QUESTION 120

What is a licensing method used to obtain the Maximo Asset Suite?

- A. Cloud based license
- B. Feature based license
- C. Monthly license
- D. User credits license

**Answer:** D

#### Explanation:

One licensing method used to obtain the Maximo Asset Suite is a Cloud based license.

#### NEW QUESTION 121

In the Work Order Tracking application, a Work Order is generated from a Preventive Maintenance (PM) record. How is the target finish date calculated?

- A. the Job Plan finish date
- B. the PM target finish date
- C. the Work Order target start date + the Job Plan duration
- D. the Job Plan start date + the Job Plan duration

**Answer:** C

#### Explanation:

In the Work Order Tracking application, when a Work Order is generated from a Preventive Maintenance (PM) record, the target finish date is calculated as the Work Order target start date + the Job Plan duration.

#### NEW QUESTION 126

On a Work Order with no GL Account specified, which GL Account will take precedence?

- A. Work Order Control Account
- B. Job Plan
- C. Asset
- D. Location

**Answer:** C

#### NEW QUESTION 129

What Downtime Types are available?

- A. Critical and Non-critical
- B. Operational and Non-operational
- C. Planned and Unplanned
- D. Started and Stopped

**Answer:** B

#### NEW QUESTION 134

In the Budget Monitoring application, where are the budget amounts entered?

- A. Budget Line
- B. Budget Record
- C. Budget Rules
- D. Focal Point

**Answer:** A

#### Explanation:

the budget amounts in the Budget Monitoring application are entered at the Budget Line level. A Budget Line represents a specific account or category within a budget and allows for detailed tracking and analysis of budget data.

#### NEW QUESTION 136

What are two of the filters in the Select Value of a Location or Asset in the Service Requests application?

- A. Public
- B. Service Address
- C. Service Group/Services
- D. User/Custodians
- E. Work Zones

**Answer:** AD

**Explanation:**

Two of the filters in the Select Value of a Location or Asset in the Service Requests application in IBM Maximo Manage are Service Address and Service Group/Services

<https://www.ibm.com/support/pages/maximo-support-desk-change-default-filter-asset-lookup-create-service-request-application>

**NEW QUESTION 140**

In which two places can Service Request Categories be created for use in the Service Request Work Center?

- A. Classifications Application
- B. Administration Work Center
- C. Business Analysis Work Cen
- D. Service Desk Application
- E. Service Catalog Application

**Answer:** AB

**Explanation:**

[https://www.ibm.com/support/pages/creating-service-request-categories-and-category-options-service-request-work-center#:~:text=In%20the%20Service%20Request%20Work%20Center%2C%20an%20ad](https://www.ibm.com/support/pages/creating-service-request-categories-and-category-options-service-request-work-center#:~:text=In%20the%20Service%20Request%20Work%20Center%2C%20an%20administrator,Object%20parameter%20and%20Asset%20parameter%20set%20to%20SR.)  
[ministrator,Object%20parameter%20and%20Asset%20parameter%20set%20to%20SR.](https://www.ibm.com/support/pages/creating-service-request-categories-and-category-options-service-request-work-center#:~:text=In%20the%20Service%20Request%20Work%20Center%2C%20an%20administrator,Object%20parameter%20and%20Asset%20parameter%20set%20to%20SR.)

In IBM Maximo Manage v8.0, Service Request Categories for the Service Request Work Center can be created in the Administration Work Center and through the Classifications Application:

? Administration Work Center: The Service Request Configuration section within the

Administration Work Center enables administrators to set up and customize service request categories specifically for use in the Service Request Work Center.

This involves defining properties, categories, and issues users select when creating service requests

? Classifications Application: Categories are also managed by setting up

classifications associated with service requests in the Classifications application. When a classification is created with associations to the "Asset" and "SR"

(Service Request) objects, it becomes available as a category option in the Service Request tool. This approach allows issues to be assigned to specific categories using ticket templates tied to classifications

These configurations provide a structured way to set up service categories that enhance service request management by ensuring users select relevant, predefined options during request creation.

**NEW QUESTION 145**

In the Inventory Usage application, which three statuses will activate the Split Usage Quantity feature? (Choose three.)

- A. CANCELED
- B. RETURNED
- C. ENTERED
- D. STAGED
- E. COMPLETE
- F. SHIPPED

**Answer:** DEF

**NEW QUESTION 150**

What happens if the Specification of a rotating item is updated in the Item Master application?

- A. New locations and assets that reference the rotating item will inherit the changes, there are no changes to existing locations and assets.
- B. By default, existing assets referencing the rotating item will be updated with the changes, there are no changes to existing locations.
- C. By default, all locations and assets referencing the rotating item will be updated with the changes.
- D. Only locations inherit the specification from a rotating item and only when new locations are create
- E. Assets only inherit the specification from an asset template.

**Answer:** C

**Explanation:**

It works on both locations and assets. <https://maximosecrets.com/2020/08/17/item-and-locations/> and <https://maximosecrets.com/2020/08/03/item-specifications-for-rotating-items/>

**NEW QUESTION 153**

When creating a labor record, what must be associated with it?

- A. User Record
- B. Person Record
- C. Crew
- D. Supervisor

**Answer:** B

**Explanation:**

When you create a labor record in IBM Maximo Manage v8.0, you enable a person to report time against a work request<sup>1</sup>. Before you create a labor record, you must create a corresponding person record<sup>1</sup>. A person record is defined at the System level and when a person works across multiple organizations, they need multiple Labor records linked to the same Person record<sup>2</sup>.

**NEW QUESTION 158**
