

Microsoft

Exam Questions SC-900

Microsoft Security. Compliance and Identity Fundamentals

NEW QUESTION 1

Which service includes the Attack simul-ation training feature?

- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Office 365
- C. Microsoft Defender for Identity
- D. Microsoft Defender for SQL

Answer: B

NEW QUESTION 2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Compliance Manager tracks only customer-managed controls.	<input type="radio"/>	<input type="radio"/>
Compliance Manager provides predefined templates for creating assessments.	<input type="radio"/>	<input type="radio"/>
Compliance Manager can help you asses whether data adheres to specific data protection standards.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: No

Compliance Manager tracks Microsoft managed controls, customer-managed controls, and shared controls. Box 2: Yes

Box 3: Yes

NEW QUESTION 3

Which Azure Active Directory (Azure AD) feature can you use to evaluate group membership and automatically remove users that no longer require membership in a group?

- A. access reviews
- B. managed identities
- C. conditional access policies
- D. Azure AD Identity Protection

Answer: A

Explanation:

Azure Active Directory (Azure AD) access reviews enable organizations to efficiently manage group memberships, access to enterprise applications, and role assignments.

NEW QUESTION 4

Select the answer that correctly completes the sentence.

Answer Area

provides best practices from Microsoft employees, partners, and customers, including tools and guidance to assist in an Azure deployment.

Azure Blueprints

Azure Policy

The Microsoft Cloud Adoption Framework for Azure

A resource lock

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 5

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Cloud App Security

Microsoft Defender for Endpoint

Microsoft Defender for Identity

Microsoft Defender for Office 365

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated with medium confidence

NEW QUESTION 6

Which two cards are available in the Microsoft 365 Defender portal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Users at risk
- B. Compliance Score
- C. Devices at risk
- D. Service Health
- E. User Management

Answer: BC

NEW QUESTION 7

Select the answer that correctly completes the sentence.

Microsoft Defender for Cloud Apps

Microsoft Defender for Endpoint

Microsoft Defender for Identity

Microsoft Defender for Office 365

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Defender for Identity (formerly Azure Advanced Threat Protection, also known as Azure ATP) is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

NEW QUESTION 8

In the Microsoft Cloud Adoption Framework for Azure, which two phases are addressed before the Ready phase? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Plan
- B. Manage
- C. Adopt
- D. Govern
- E. Define Strategy

Answer: AE

NEW QUESTION 9

What is a use case for implementing information barrier policies in Microsoft 365?

- A. to restrict unauthenticated access to Microsoft 365
- B. to restrict Microsoft Teams chats between certain groups within an organization
- C. to restrict Microsoft Exchange Online email between certain groups within an organization
- D. to restrict data sharing to external email recipients

Answer: B

Explanation:

Information barriers are supported in Microsoft Teams, SharePoint Online, and OneDrive for Business. A compliance administrator or information barriers administrator can define policies to allow or prevent communications between groups of users in Microsoft Teams. Information barrier policies can be used for situations like these:

NEW QUESTION 10

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. text message (SMS)
- B. Microsoft Authenticator app
- C. email verification
- D. phone call
- E. security question

Answer: ABD

NEW QUESTION 10

Select the answer that correctly completes the sentence.

Answer Area

requires additional verification, such as a verification code sent to a mobile phone.

Multi-factor authentication (MFA)
Pass-through authentication
Password writeback
Single sign-on (SSO)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Multi-factor authentication is a process where a user is prompted during the sign-in process for an additional form of identification, such as to enter a code on their cellphone or to provide a fingerprint scan.

NEW QUESTION 14

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Sensitivity labels can be used to encrypt documents.	<input type="radio"/>	<input type="radio"/>
Sensitivity labels can add headers and footers to documents.	<input type="radio"/>	<input type="radio"/>
Sensitivity labels can apply watermarks to emails.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated
Box 1: Yes
You can use sensitivity labels to provide protection settings that include encryption of emails and documents to prevent unauthorized people from accessing this data.
Box 2: Yes
You can use sensitivity labels to mark the content when you use Office apps, by adding watermarks, headers, or footers to documents that have the label applied.
Box 3: NO
<https://docs.microsoft.com/en-us/information-protection/deploy-use/configure-policy-markings>

NEW QUESTION 15

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Active Directory (Azure AD) Identity Protection can add users to groups based on the users' risk level.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) Identity Protection can detect whether user credentials were leaked to the public.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) Identity Protection can be used to invoke Multi-Factor Authentication based on a user's risk level.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
Box 1: No
Box 2: Yes
Leaked Credentials indicates that the user's valid credentials have been leaked. Box 3: Yes
Multi-Factor Authentication can be required based on conditions, one of which is user risk.

NEW QUESTION 17

Select the answer that correctly completes the sentence.

Answer Area

Microsoft Defender for Identity can identify advanced threats from

signals.

Azure Active Directory (Azure AD)

Azure AD Connect

on-premises Active Directory Domain Services (AD DS)

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Microsoft Defender for Identity is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

NEW QUESTION 20

Select the answer that correctly completes the sentence.

is the process of identifying whether a signed-in user can access a specific resource.

Authentication

Authorization

Federation

Single sign-on (SSO)

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 23

Select the answer that correctly completes the sentence.

enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

Active Directory Domain Services (AD DS)

Active Directory forest trusts

Azure Active Directory (Azure AD) business-to-business (B2B)

Azure Active Directory business-to-consumer B2C (Azure AD B2C)

- Active Directory Domain Services (AD DS)
- Active Directory forest trusts
- Azure Active Directory (Azure AD) business-to-business (B2B)
- Azure Active Directory business-to-consumer B2C (Azure AD B2C)

enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

Azure Security Center is a unified infrastructure security management system that strengthens the security posture of your data centers, and provides advanced threat protection across your hybrid workloads in the cloud - whether they're in Azure or not - as well as on premises.

NEW QUESTION 35

What can you use to view the Microsoft Secure Score for Devices?

- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Endpoint
- C. Microsoft Defender for Identity
- D. Microsoft Defender for Office 365

Answer: B

Explanation:

- > Artikel
- > 12.05.2022
- > 3 Minuten Lesedauer

Microsoft Secure Score for DevicesApplies to:

- > Microsoft Defender for Endpoint Plan 2
- > Microsoft Defender Vulnerability Management
- > Microsoft 365 Defender

Some information relates to pre-released product which may be substantially modified before it's commercially released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

To sign up for the Defender Vulnerability Management public preview or if you have any questions, contact us (mdvmtrial@microsoft.com).

Already have Microsoft Defender for Endpoint P2? Sign up for a free trial of the Defender Vulnerability Management Add-on.

Configuration score is now part of vulnerability management as Microsoft Secure Score for Devices.

Your score for devices is visible in the Defender Vulnerability Management dashboard of the Microsoft 365 Defender portal. A higher Microsoft Secure Score for Devices means your endpoints are more resilient from cybersecurity threat attacks. It reflects the collective security configuration state of your devices across the following categories:

- > Application
- > Operating system
- > Network
- > Accounts
- > Security controls

Select a category to go to the Security recommendations page and view the relevant recommendations.

Turn on the Microsoft Secure Score connectorForward Microsoft Defender for Endpoint signals, giving Microsoft Secure Score visibility into the device security posture. Forwarded data is stored and processed in the same location as your Microsoft Secure Score data.

Changes might take up to a few hours to reflect in the dashboard.

- > In the navigation pane, go to Settings > Endpoints > General > Advanced features
- > Scroll down to Microsoft Secure Score and toggle the setting to On.
- > Select Save preferences.

How it worksMicrosoft Secure Score for Devices currently supports configurations set via Group Policy. Due to the current partial Intune support, configurations which might have been set through Intune might show up as misconfigured. Contact your IT Administrator to verify the actual configuration status in case your organization is using Intune for secure configuration management.

The data in the Microsoft Secure Score for Devices card is the product of meticulous and ongoing vulnerability discovery process. It is aggregated with configuration discovery assessments that continuously:

- > Compare collected configurations to the collected benchmarks to discover misconfigured assets
- > Map configurations to vulnerabilities that can be remediated or partially remediated (risk reduction)
- > Collect and maintain best practice configuration benchmarks (vendors, security feeds, internal research teams)
- > Collect and monitor changes of security control configuration state from all assets

NEW QUESTION 38

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure Active Directory (Azure AD) is deployed to an on-premises environment.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>
Azure Active Directory (Azure AD) is an identity and access management service.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
Box 1: No
Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service. Box 2: Yes
Microsoft 365 uses Azure Active Directory (Azure AD). Azure Active Directory (Azure AD) is included with your Microsoft 365 subscription.
Box 3: Yes
Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

NEW QUESTION 41

You plan to implement a security strategy and place multiple layers of defense throughout a network infrastructure. Which security methodology does this represent?

- A. threat modeling
- B. identity as the security perimeter
- C. defense in depth
- D. the shared responsibility model

Answer: C

NEW QUESTION 44

Select the answer that correctly completes the sentence.

Microsoft Sentinel

analytic rules

hunting queries

playbooks

workbooks

use Azure Logic Apps to automate and orchestrate responses to alerts.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

playbooks
<https://docs.microsoft.com/en-us/azure/sentinel/tutorial-respond-threats-playbook>

NEW QUESTION 48

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Policy supports automatic remediation.	<input type="radio"/>	<input type="radio"/>
Azure Policy can be used to ensure that new resources adhere to corporate standards.	<input type="radio"/>	<input type="radio"/>
Compliance evaluation in Azure Policy occurs only when a target resource is created or modified.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 50

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Verify explicitly is one of the guiding principles of Zero Trust.	<input type="radio"/>	<input type="radio"/>
Assume breach is one of the guiding principles of Zero Trust.	<input type="radio"/>	<input type="radio"/>
The Zero Trust security model assumes that a firewall secures the internal network from external threats.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Yes

Box 2: Yes

Box 3: No

The Zero Trust model does not assume that everything behind the corporate firewall is safe, the Zero Trust model assumes breach and verifies each request as though it originated from an uncontrolled network.

NEW QUESTION 52

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. phone call
- B. text message (SMS)
- C. email verification
- D. Microsoft Authenticator app
- E. security question

Answer: ABD

NEW QUESTION 57

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Applying system updates increases an organization's secure score in Azure Security Center.	<input type="radio"/>	<input type="radio"/>
The secure score in Azure Security Center can evaluate resources across multiple Azure subscriptions.	<input type="radio"/>	<input type="radio"/>
Enabling multi-factor authentication (MFA) increases an organization's secure score in Azure Security Center.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

System updates reduces security vulnerabilities, and provide a more stable environment for end users. Not applying updates leaves unpatched vulnerabilities and results in environments that are susceptible to attacks.

Box 2: Yes

Box 3: Yes

If you only use a password to authenticate a user, it leaves an attack vector open. With MFA enabled, your accounts are more secure.

NEW QUESTION 60

Select the answer that correctly completes the sentence.

Answer Area

You can use

Reports

Hunting

Attack simulator

Incidents

 in the Microsoft 365 security center to view an aggregation of alerts that relate to the same attack.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 65

What should you use in the Microsoft 365 security center to view security trends and track the protection status of identities?

- A. Attack simulator
- B. Reports
- C. Hunting
- D. Incidents

Answer: B

NEW QUESTION 67

Match the Azure networking service to the appropriate description.
To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.
NOTE: Each correct match is worth one point.

Services

Azure Bastion

Azure Firewall

Network security group (NSG)

Answer Area

Service

Service

Service

Provides Network Address Translation (NAT) services

Provides secure and seamless Remote Desktop connectivity to Azure virtual machines

Provides traffic filtering that can be applied to specific network interfaces on a virtual network

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated
Box 1: Azure Firewall
Azure Firewall provide Source Network Address Translation and Destination Network Address Translation. Box 2: Azure Bastion
Azure Bastion provides secure and seamless RDP/SSH connectivity to your virtual machines directly from the Azure portal over TLS.
Box 3: Network security group (NSG)
You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network.

NEW QUESTION 71

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can add a resource lock to an Azure subscription.	<input type="radio"/>	<input type="radio"/>
You can add only one resource lock to an Azure resource.	<input type="radio"/>	<input type="radio"/>
You can delete a resource group containing resources that have resource locks.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Yes NO NO
YES - As an administrator, you can lock a subscription, resource group, or resource to prevent other users in your organization from accidentally deleting or modifying critical resources. The lock overrides any permissions the user might have.
NO - The most restrictive lock in the inheritance takes precedence.
NO - If you delete a resource group with a locked resource, the portal UI will give you an error and no resources are deleted.
<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/lock-resources?tabs=json>

NEW QUESTION 72

Select the answer that correctly completes the sentence.

Compliance Manager can be directly accessed from the

Microsoft 365 admin center.
Microsoft 365 Defender portal.
Microsoft 365 Compliance Center
Microsoft Support portal.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Compliance Manager can be directly accessed from the

Microsoft 365 admin center.
Microsoft 365 Defender portal.
Microsoft 365 Compliance Center
Microsoft Support portal.

NEW QUESTION 74

What should you use to ensure that the members of an Azure Active Directory group use multi-factor authentication (MFA) when they sign in?

- A. Azure Active Directory (Azure AD) Identity Protection
B. a conditional access policy
C. Azure role-based access control (Azure RBAC)
D. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)

Answer: B

Explanation:

The recommended way to enable and use Azure AD Multi-Factor Authentication is with Conditional Access policies. Conditional Access lets you create and define policies that react to sign-in events and that request additional actions before a user is granted access to an application or service.

NEW QUESTION 77

Which two tasks can you implement by using data loss prevention (DLP) policies in Microsoft 365? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Display policy tips to users who are about to violate your organization's policies.
B. Enable disk encryption on endpoints.
C. Protect documents in Microsoft OneDrive that contain sensitive information.
D. Apply security baselines to devices.

Answer: AC

NEW QUESTION 79

Select the answer that correctly completes the sentence.

Answer Area

Customer Lockbox
Data loss prevention (DLP)
eDiscovery
A resource lock

is used to identify, hold, and export electronic information that might be used in an investigation.

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

eDiscovery
<https://docs.microsoft.com/en-us/microsoft-365/compliance/ediscovery?view=o365-worldwide>

NEW QUESTION 84

Select the answer that correctly completes the sentence.

Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
Microsoft Defender for Cloud
Microsoft Sentinel
Microsoft Defender for Cloud Apps

can use conditional access policies

to control sessions in real time.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
Microsoft Defender for Cloud
Microsoft Sentinel
Microsoft Defender for Cloud Apps

can use conditional access policies

to control sessions in real time.

NEW QUESTION 86

What is the purpose of Azure Active Directory (Azure AD) Password Protection?

- A. to control how often users must change their passwords
- B. to identify devices to which users can sign in without using multi-factor authentication (MFA)
- C. to encrypt a password by using globally recognized encryption standards
- D. to prevent users from using specific words in their passwords

Answer: D

Explanation:

Azure AD Password Protection detects and blocks known weak passwords and their variants, and can also block additional weak terms that are specific to your organization.

With Azure AD Password Protection, default global banned password lists are automatically applied to all users in an Azure AD tenant. To support your own business and security needs, you can define entries in a custom banned password list.

NEW QUESTION 87

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

Yes

No

Conditional access policies can be applied to global administrators.

☐☐

Conditional access policies are evaluated before a user is authenticated.

☐☐

Conditional access policies can use a device platform, such as Android or iOS, as a signal.

☐☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

Conditional access policies can be applied to all users Box 2: No

Conditional access policies are applied after first-factor authentication is completed. Box 3: Yes

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

NEW QUESTION 90

Which Microsoft 365 feature can you use to restrict users from sending email messages that contain lists of customers and their associated credit card numbers?

- A. retention policies

- B. data loss prevention (DLP) policies
- C. conditional access policies
- D. information barriers

Answer: B

NEW QUESTION 91

Which two Azure resources can a network security group (NSG) be associated with? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. a network interface
- B. an Azure App Service web app
- C. a virtual network
- D. a virtual network subnet
- E. a resource group

Answer: CE

Explanation:

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources.

NEW QUESTION 96

Select the answer that correctly completes the sentence.

▼

Azure Defender

The Microsoft 365 compliance center

The Microsoft 365 security center

Microsoft Endpoint Manager

provides a central location for managing information protection, information governance, and data loss prevention (DLP) policies.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 97

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can use Advanced Audit in Microsoft 365 to view billing details.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to view the contents of an email message.	<input type="radio"/>	<input type="radio"/>
You can use Advanced Audit in Microsoft 365 to identify when a user uses the search bar in Outlook on the web to search for items in a mailbox.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence

Box 1: No

Advanced Audit helps organizations to conduct forensic and compliance investigations by increasing audit log retention.

Box 2: No

Box 3: Yes

NEW QUESTION 100

Which three authentication methods does Windows Hello for Business support? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. fingerprint
- B. facial recognition
- C. PIN
- D. email verification

E. security question

Answer: ABC

NEW QUESTION 104

What can you use to provision Azure resources across multiple subscriptions in a consistent manner?

- A. Azure Defender
- B. Azure Blueprints
- C. Azure Sentinel
- D. Azure Policy

Answer: B

NEW QUESTION 106

What is an example of encryption at rest?

- A. encrypting communications by using a site-to-site VPN
- B. encrypting a virtual machine disk
- C. accessing a website by using an encrypted HTTPS connection
- D. sending an encrypted email

Answer: B

NEW QUESTION 108

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure AD Connect can be used to implement hybrid identity.	<input type="radio"/>	<input type="radio"/>
Hybrid identity requires the implementation of two Microsoft 365 tenants.	<input type="radio"/>	<input type="radio"/>
Hybrid identity refers to the synchronization of Active Directory Domain Services (AD DS) and Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 110

Select the answer that correctly completes the sentence.

When using multi-factor authentication (MFA), a password is considered something you

are

have

know

share

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Multifactor authentication combines two or more independent credentials: what the user knows, such as a password; what the user has, such as a security token; and what the user is, by using biometric verification methods.

NEW QUESTION 113

Which Microsoft 365 feature can you use to restrict communication and the sharing of information between members of two departments at your organization?

- A. sensitivity label policies
- B. Customer Lockbox

- C. information Barriers
- D. Privileged Access Management (PAM)

Answer: C

NEW QUESTION 115

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Digitally signing a document requires a private key.	<input type="radio"/>	<input type="radio"/>
Verifying the authenticity of a digitally signed document requires the public key of the signer.	<input type="radio"/>	<input type="radio"/>
Verifying the authenticity of a digitally signed document requires the private key of the singer.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes
A certificate is required that provides a private and a public key. Box 2: Yes
The public key is used to validate the private key that is associated with a digital signature. Box 3: NO

NEW QUESTION 120

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Statements	Yes	No
Microsoft Defender for Cloud can detect vulnerabilities and threats for Azure Storage.	<input type="radio"/>	<input type="radio"/>
Cloud Security Posture Management (CSPM) is available for all Azure subscriptions.	<input type="radio"/>	<input type="radio"/>
Microsoft Defender for Cloud can evaluate the security of workloads deployed to Azure or on-premises.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Microsoft Defender for Cloud can detect vulnerabilities and threats for Azure Storage.	<input checked="" type="radio"/>	<input type="radio"/>
Cloud Security Posture Management (CSPM) is available for all Azure subscriptions.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Defender for Cloud can evaluate the security of workloads deployed to Azure or on-premises.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 122

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
Conditional access policies always enforce the use of multi-factor authentication (MFA).	<input type="radio"/>	<input type="radio"/>
Conditional access policies can be used to block access to an application based on the location of the user.	<input type="radio"/>	<input type="radio"/>
Conditional access policies only affect users who have Azure Active Directory (Azure AD)-joined devices.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 123

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Statements	Yes	No
Enabling multi-factor authentication (MFA) increases the Microsoft Secure Score.	<input type="radio"/>	<input type="radio"/>
A higher Microsoft Secure Score means a lower identified risk level in the Microsoft 365 tenant.	<input type="radio"/>	<input type="radio"/>
Microsoft Secure Score measures progress in completing actions based on controls that include key regulations and standards for data protection and governance.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Enabling multi-factor authentication (MFA) increases the Microsoft Secure Score.	<input checked="" type="radio"/>	<input type="radio"/>
A higher Microsoft Secure Score means a lower identified risk level in the Microsoft 365 tenant.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Secure Score measures progress in completing actions based on controls that include key regulations and standards for data protection and governance.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 127

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Microsoft Secure Score in the Microsoft 365 security center can provide recommendations for Microsoft Cloud App Security.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with low confidence
You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network. A network security group contains security rules that allow or deny inbound network traffic to, or outbound network traffic from, several types of Azure resources. For each rule, you can specify source and destination, port, and protocol.

NEW QUESTION 142

Select the answer that correctly completes the sentence.
