

Microsoft

Exam Questions MS-102

Microsoft 365 Administrator Exam

NEW QUESTION 1

DRAG DROP - (Topic 6)
DRAG DROP

You have a Microsoft 365 E5 subscription that contains two groups named Group1 and Group2.
You need to ensure that each group can perform the tasks shown in the following table.

Group	Task
Group1	<ul style="list-style-type: none">• Manage service requests.• Purchase new services.• Manage subscriptions.• Monitor service health.
Group2	<ul style="list-style-type: none">• Assign licenses.• Add users and groups.• Create and manage user views.• Update password expiration policies.

The solution must use the principle of least privilege.
Which role should you assign to each group? To answer, drag the appropriate roles to the correct groups. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Roles

Billing Administrator

Global Administrator

Helpdesk Administrator

License Administrator

Service Support Administrator

User Administrator

Answer Area

Group1:

Role

Group2:

Role

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Billing admin manage service request Purchase new services Etc.
Assign the Billing admin role to users who make purchases, manage subscriptions and service requests, and monitor service health.
Box 2: User admin User admin
Assign the User admin role to users who need to do the following for all users:

- Add users and groups
- Assign licenses
- Manage most users properties
- Create and manage user views
- Update password expiration policies
- Manage service requests
- Monitor service health

NEW QUESTION 2

HOTSPOT - (Topic 6)
HOTSPOT

You have a Microsoft 365 subscription.
You need to review metrics for the following: The daily active users in Microsoft Teams Recent Microsoft service issues
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Usage reports

The daily active users in Microsoft Teams

Microsoft 365 Reports in the admin center - Microsoft Teams usage activity

The brand-new Teams usage report gives you an overview of the usage activity in Teams, including the number of active users, channels and messages so you can quickly see how many users across your organization are using Teams to communicate and collaborate. It also includes other Teams specific activities, such as the number of active guests, meetings, and messages.

Box 2: Service Health

Recent Microsoft service issues

You can view the health of your Microsoft services, including Office on the web, Yammer, Microsoft Dynamics CRM, and mobile device management cloud services, on the Service health page in the Microsoft 365 admin center. If you are experiencing problems with a cloud service, you can check the service health to determine whether this is a known issue with a resolution in progress before you call support or spend time troubleshooting.

NEW QUESTION 3

- (Topic 6)

You have a Microsoft 365 E5 subscription that contains a user named User1.

User1 exceeds the default daily limit of allowed email messages and is on the Restricted entities list.

You need to remove User1 from the Restricted entities list. What should you use?

- A. the Exchange admin center
- B. the Microsoft Purview compliance portal
- C. the Microsoft 365 admin center
- D. the Microsoft 365 Defender portal
- E. the Microsoft Entra admin center

Answer: D

Explanation:

Admins can remove user accounts from the Restricted entities page in the Microsoft 365 Defender portal or in Exchange Online PowerShell.

Remove a user from the Restricted entities page in the Microsoft 365 Defender portal In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & collaboration > Review > Restricted entities. Or, to go directly to the Restricted entities page, use <https://security.microsoft.com/restrictedentities>.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/removing-user-from-restricted-users-portal-after-spam>

NEW QUESTION 4

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create an account for a new security administrator named SecAdmin1.

You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint, and OneDrive.

Solution: From the Microsoft 365 admin center, you assign SecAdmin1 the Exchange admin role.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

You need to assign the Security Administrator role. Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/office-365-atp?view=o365-worldwide>

NEW QUESTION 5

- (Topic 6)

You have a Microsoft 365 E5 subscription.

You plan to implement Microsoft 365 compliance policies to meet the following requirements:

? Identify documents that are stored in Microsoft Teams and SharePoint Online that contain Personally Identifiable Information (PII).

? Report on shared documents that contain PII.

What should you create?

- A. an alert policy
- B. a data loss prevention (DLP) policy
- C. a retention policy
- D. a Microsoft Cloud App Security policy

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/dlp-learn-about-dlp?view=o365-worldwide>

NEW QUESTION 6

- (Topic 6)

You have a Microsoft 365 E5 tenant that contains the resources shown in the following table.

Name	Type
Mailbox1	Microsoft Exchange Online mailbox
Account1	Microsoft OneDrive account
Site1	Microsoft SharePoint Online site
Channel	Microsoft Teams channel

To which resources can you apply a sensitivity label by using an auto-labeling policy?

- A. Mailbox1 and Site1 only
- B. Mailbox1, Account1, and Site1 only
- C. Account1 and Site1 only
- D. Mailbox1, Account1, Site1, and Channel1
- E. Account1, Site1, and Channel1 only

Answer: E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide>

NEW QUESTION 7

- (Topic 6)

Your company has 10,000 users who access all applications from an on-premises data center.

You plan to create a Microsoft 365 subscription and to migrate data to the cloud. You plan to implement directory synchronization.

User accounts and group accounts must sync to Azure AD successfully. You discover that several user accounts fail to sync to Azure AD.

You need to resolve the issue as quickly as possible. What should you do?

- A. From Active Directory Administrative Center, search for all the users, and then modify the properties of the user accounts.
- B. Run idfix.exe, and then click Edit.
- C. From Windows PowerShell, run the start-AdSyncSyncCycle -PolicyType Delta command.
- D. Run idfix.exe, and then click Complete.

Answer: B

Explanation:

IdFix is used to perform discovery and remediation of identity objects and their attributes in an on-premises Active Directory environment in preparation for migration to Azure Active Directory. IdFix is intended for the Active Directory administrators responsible for directory synchronization with Azure Active Directory.

Reference:

<https://docs.microsoft.com/en-us/office365/enterprise/prepare-directory-attributes-for-synch-with-idfix>

NEW QUESTION 8

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription.

You need to configure a group naming policy.

Which portal should you use, and to which types of groups will the policy apply? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft 365 admin center

Group types:

The Microsoft 365 Defender portal

The Microsoft Entra admin center

The Microsoft Purview compliance portal

Group types:

Security only

Microsoft 365 only

Security only

Security and mail-enabled security only

Microsoft 365 and distribution only

Microsoft 365, mail-enabled security, and distribution only

Security, Microsoft 365, mail-enabled security, and distribution

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Portal:

The Microsoft 365 admin center

The Microsoft 365 admin center

Group types:

The Microsoft 365 Defender portal

The Microsoft Entra admin center

The Microsoft Purview compliance portal

Group types:

Security only

Microsoft 365 only

Security only

Security and mail-enabled security only

Microsoft 365 and distribution only

Microsoft 365, mail-enabled security, and distribution only

Security, Microsoft 365, mail-enabled security, and distribution

NEW QUESTION 9

- (Topic 6)

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Configuration
Group1	Global security group
User1	Enabled user account
User2	Disabled user account

You configure Azure AD Connect to sync contoso.com to Azure AD.
 Which objects will sync to Azure AD?

- A. Group1 only
- B. User1 and User2 only
- C. Group1 and User1 only
- D. Group1, User1, and User2

Answer: D

Explanation:

Disabled accounts
 Disabled accounts are synchronized as well to Azure AD. Disabled accounts are common to represent resources in Exchange, for example conference rooms. The exception is users with a linked mailbox; as previously mentioned, these will never provision an account to Azure AD.
 The assumption is that if a disabled user account is found, then we won't find another active account later and the object is provisioned to Azure AD with the userPrincipalName and sourceAnchor found. In case another active account will join to the same metaverse object, then its userPrincipalName and sourceAnchor will be used.
 Reference:
<https://learn.microsoft.com/en-us/azure/active-directory/hybrid/connect/concept-azure-ad-connect-sync-user-and-contacts>

NEW QUESTION 10

HOTSPOT - (Topic 6)

You have an Azure AD tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Your company uses Microsoft Defender for Endpoint. Microsoft Defender for Endpoint contains the roles shown in the following table.

Name	Permission	Assigned user group
Microsoft Defender for Endpoint administrator (default)	View data, Alerts investigation, Active remediation actions, Manage security settings	Group3
Role1	View data, Alerts investigation	Group1
Role2	View data	Group2

Microsoft Defender for Endpoint contains the device groups shown in the following table.

Rank	Device group	Device name	User access
1	ATP1	Device1	Group1
Last	Ungrouped devices (default)	Device2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE; Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can run an antivirus scan on Device2.	<input type="radio"/>	<input type="radio"/>
User2 can collect an investigation package from Device2.	<input type="radio"/>	<input type="radio"/>
User3 can isolate Device1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can run an antivirus scan on Device2.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can collect an investigation package from Device2.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can isolate Device1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 10

- (Topic 6)

You have a Microsoft 365 tenant that contains 500 Windows 10 devices and a Microsoft Endpoint Manager device compliance policy. You need to ensure that only devices marked as compliant can access Microsoft Office 365 apps. Which policy type should you configure?

- A. conditional access
- B. account protection
- C. attack surface reduction (ASR)
- D. Endpoint detection and response

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 12

- (Topic 6)

You have a Microsoft 365 E5 subscription.

On Monday, you create a new user named User1.

On Tuesday, User1 signs in for the first time and perform the following actions:

- Signs in to Microsoft Exchange Online from an anonymous IP address
- Signs in to Microsoft SharePoint Online from a device in New York City.
- Establishes Remote Desktop connections to hosts in Berlin and Hong Kong, and then signs in to SharePoint Online from the Remote Desktop connections

Which types of sign-in risks will Azure AD Identity Protection detect for User1?

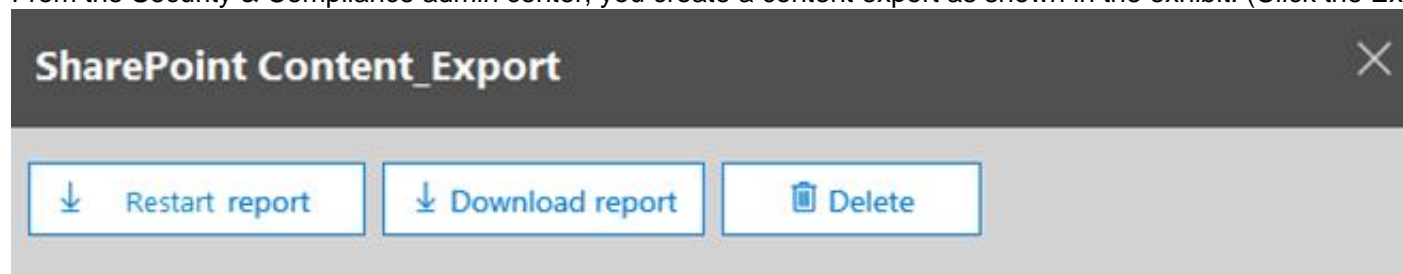

- A. anonymous IP address only
- B. anonymous IP address and atypical travel
- C. anonymous IP address, atypical travel, and unfamiliar sign-in properties
- D. unfamiliar sign-in properties and atypical travel only
- E. anonymous IP address and unfamiliar sign-in properties only

Answer: C

NEW QUESTION 13

- (Topic 6)

From the Security & Compliance admin center, you create a content export as shown in the exhibit. (Click the Exhibit tab.)

Status:

The export has completed. You can start downloading the results.

Items included from the search:

All items, excluding ones that have unrecognized format, are encrypted, or weren't indexed for other reasons.

Exchange content format:

One PST file for each mailbox.

De-duplication for Exchange content:

Not enabled.

SharePoint document versions:

Included

Export files in a compressed (zipped) folder:

Yes

The export data was prepared within region:

Default region

What will be excluded from the export?

- A. a 10-MB XLSX file
- B. a 5-MB MP3 file
- C. a 5-KB RTF file
- D. an 80-MB PPTX file

Answer: B

Explanation:

Unrecognized file formats are excluded from the search.

Certain types of files, such as Bitmap or MP3 files, don't contain content that can be indexed. As a result, the search indexing servers in Exchange and SharePoint don't perform full-text indexing on these types of files. These types of files are considered to be unsupported file types.

Reference:
<https://docs.microsoft.com/en-us/microsoft-365/compliance/partially-indexed-items-in-content-search?view=o365-worldwide>
<https://docs.microsoft.com/en-us/office365/securitycompliance/export-a-content-search-report>

NEW QUESTION 18

HOTSPOT - (Topic 6)
HOTSPOT

You have a Microsoft 365 subscription that contains the users in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	Group3

In Microsoft Endpoint Manager, you create two device type restrictions that have the settings shown in the following table.

Priority	Name	Allowed platform	Assigned to
1	TypeRest1	Android, Windows (MDM)	Group1
2	TypeRest2	iOS	Group2

In Microsoft Endpoint Manager, you create three device limit restrictions that have the settings shown in the following table.

Priority	Name	Device limit	Assigned to
1	LimitRest1	7	Group2
2	LimitRest2	10	Group1
3	LimitRest3	5	Group3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can enroll up to 10 Windows 10 devices in Microsoft Endpoint Manager.	<input type="radio"/>	<input type="radio"/>
User2 can enroll up to 10 iOS devices in Microsoft Endpoint Manager.	<input type="radio"/>	<input type="radio"/>
User3 can enroll up to five Android devices in Microsoft Endpoint Manager.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can enroll up to 10 Windows 10 devices in Microsoft Endpoint Manager.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can enroll up to 10 iOS devices in Microsoft Endpoint Manager.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can enroll up to five Android devices in Microsoft Endpoint Manager.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 21

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

Box 1: Connect-MgGraph
Assign Microsoft 365 licenses to user accounts with PowerShell Use the Microsoft Graph PowerShell SDK
First, connect to your Microsoft 365 tenant.
Assigning and removing licenses for a user requires the User.ReadWrite.All permission scope or one of the other permissions listed in the 'Assign license' Microsoft Graph API reference page.
The Organization.Read.All permission scope is required to read the licenses available in the tenant.
Connect-MgGraph -Scopes User.ReadWrite.All, Organization.Read.All Box 2: Get-MgSubscribedSku
Run the Get-MgSubscribedSku command to view the available licensing plans and the number of available licenses in each plan in your organization. The number of available licenses in each plan is ActiveUnits - WarningUnits - ConsumedUnits.
Box 3: Set-MgUserLicense Assigning licenses to user accounts
To assign a license to a user, use the following command in PowerShell.
Set-MgUserLicense -UserId \$userUPN -AddLicenses @{Skuld = "<Skuld>"} -RemoveLicenses @()
This example assigns a license from the SPE_E5 (Microsoft 365 E5) licensing plan to the unlicensed user belindan@litwareinc.com:
\$e5Sku = Get-MgSubscribedSku -All | Where SkuPartNumber -eq 'SPE_E5'
Set-MgUserLicense -UserId "belindan@litwareinc.com" -AddLicenses @{Skuld = \$e5Sku.Skuld} -RemoveLicenses @()

NEW QUESTION 32

- (Topic 6)
Your company has multiple offices.
You have a Microsoft 365 E5 tenant that uses Microsoft Intune for device management. Each office has a local administrator.
You need to ensure that the local administrators can manage only the devices in their respective office.
What should you use?

- A. scope tags
- B. configuration profiles
- C. device categories
- D. conditional access policies

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/fundamentals/scope-tags>

NEW QUESTION 36

HOTSPOT - (Topic 6)
You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group1, Group2

You integrate Microsoft Intune and contoso.com as shown in the following exhibit.

You purchase a Windows 10 device named Device1.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>
If User2 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>
If User3 registers Device1 in contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
If User1 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 joins Device1 to contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input checked="" type="radio"/>
If User3 registers Device1 in contoso.com, Device1 is enrolled in Intune automatically.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 38

- (Topic 6)
You have a Microsoft 365 subscription that uses Microsoft Defender for Office 365 and contains a mailbox named Mailbox1.
You plan to use Mailbox1 to collect and analyze unfiltered email messages.
You need to ensure that Defender for Office 365 takes no action on any inbound emails delivered to Mailbox1.
What should you do?

- A. Configure a retention policy for Mailbox1.

- B. Create a mail flow rule.
- C. Configure Mailbox1 as a SecOps mailbox.
- D. Place a litigation hold on Mailbox1.

Answer: D

NEW QUESTION 43

- (Topic 6)
You have a Microsoft 365 tenant that contains a Windows 10 device named Device1 and the Microsoft Endpoint Manager policies shown in the following table.

Name	Type	Block execution of potentially obfuscated scripts (js/vbs/ps)
Policy1	Attack surface reduction (ASR)	Audit mode
Policy2	Microsoft Defender ATP Baseline	Disable
Policy3	Device configuration profile	Not configured

The policies are assigned to Device1.
Which policy settings will be applied to Device1?

- A. only the settings of Policy1
- B. only the settings of Policy2
- C. only the settings of Policy3
- D. no settings

Answer: D

NEW QUESTION 44

HOTSPOT - (Topic 6)
Your company has a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global Administrator
User2	Security Administrator, Guest Inviter
User3	None
User4	Password Administrator

External collaboration settings have default configuration.
You need to identify which users can perform the following administrative tasks:
• Modify the password protection policy.
• Create guest user accounts.
Which users should you identify for each task? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Modify the password protection policy:

User1 only

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

Create new guest users in Azure AD:

User1 and User2 only

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Modify the password protection policy:

User1 only

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

Create new guest users in Azure AD:

User1 and User2 only

User1 only

User1 and User2 only

User1, User2, and User4 only

User1, User2, User3, and User4

NEW QUESTION 45

HOTSPOT - (Topic 6)
HOTSPOT

You have an Azure AD tenant named contoso.com that contains the users shown in the following table.

Name	Member of	Multi-Factor Auth Status
User1	Group1	Disabled
User2	Group1	Enforced

Multi-factor authentication (MFA) is configured to use 131.107.5.0/24 as trusted IPs. The tenant contains the named locations shown in the following table.

Name	IP address range	Trusted location
Location1	131.107.20.0/24	Yes
Location2	131.107.50.0/24	Yes

You create a conditional access policy that has the following configurations:

? Users or workload identities assignments: All users

? Cloud apps or actions assignment: App1

? Conditions: Include all trusted locations

? Grant access: Require multi-factor authentication

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
When User1 connects to App1 from a device that has an IP address of 131.107.50.10, User1 must use MFA.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
When User2 connects to App1 from a device that has an IP address of 131.107.20.15, User2 must use MFA.	<input type="checkbox"/>	<input type="checkbox"/>
When User2 connects to App1 from a device that has an IP address of 131.107.5.5, User2 must use MFA.	<input type="checkbox"/>	<input type="checkbox"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

* 131.107.50.10 is in a Trusted Location so the conditional access policy applies. The policy requires MFA. However, User1's MFA status is disabled. The MFA requirement in the conditional access policy will override the user's MFA status of disabled. Therefore, User1 must use MFA.

Box 2: Yes.

* 131.107.20.15 is in a Trusted Location so the conditional access policy applies. The policy requires MFA so User2 must use MFA.

Box 3: No.

IP not from Trusted Location so Policy does not apply, Subnet 131.107.5.5 is not in the range of 131.107.50.0/24

NEW QUESTION 50

HOTSPOT - (Topic 6)
HOTSPOT

You have a Microsoft 365 E5 subscription.

From Azure AD Privileged Identity Management (PIM), you configure Role settings for the Global Administrator role as shown in the following exhibit.

Activation

Setting	State
Activation maximum duration (hours)	8 hour(s)
On activation, require	Azure MFA
Require justification on activation	Yes
Require ticket information on activation	No
Require approval to activate	No
Approvers	None

Assignment

Setting	State
Allow permanent eligible assignment	No
Expire eligible assignments after	3 month(s)
Allow permanent active assignment	No
Expire active assignments after	15 day(s)
Require Azure Multi-Factor Authentication on active assignment	Yes
Require justification on active assignment	Yes

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

A user that is assigned the Global Administrator role as active [answer choice].

will lose the role after eight hours

can reactivate the role every eight hours

can reactivate the role every 15 days

will lose the role after 15 days

You can make the Global Administrator role available to activation requests [answer choice].

for up to eight hours

for up to three months

for up to 15 days

until the requests are revoked manually

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: will lose the role after eight hours

From exhibit: Activation, Activation maximum duration (hours): 8 hour(s)

Box 2: for up to three months

We see from exhibit: Assignment, Expire eligible assignment after: 3 month(s)

NEW QUESTION 55

- (Topic 6)

You have a Microsoft 365 E5 tenant that has sensitivity label support enabled for Microsoft and SharePoint Online. You need to enable unified labeling for Microsoft 365 groups. Which cmdlet should you run?

- A. set-unifiedGroup
B. Set-Labelpolicy
C. Execute-AzureAdLebelSync
D. Add-UnifiedGroupLinks

Answer: C

NEW QUESTION 59

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Microsoft 365 role
User1	Cloud application administrator
User2	Application administrator
User3	Application developer
User4	None

Users are assigned Microsoft Store for Business roles as shown in the following table.

User	Role
User1	None
User2	Basic Purchaser
User3	Purchaser
User4	Device Guard signer

Which users can add apps to the private store in Microsoft Store for Business, and which users can install apps from the private store? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Add apps to the private store:

User3 only
User2 and User3 only
User1 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Install apps from the private store:

User3 only
User2 and User3 only
User1 and User3 only
User2, User3 and User4 only
User1, User2, User3, and User4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Add apps to the private store:

User3 only
User2 and User3 only
User1 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Install apps from the private store:

User3 only
User2 and User3 only
User1 and User3 only
User2, User3 and User4 only
User1, User2, User3, and User4

NEW QUESTION 61

DRAG DROP - (Topic 6)
DRAG DROP

You have a Microsoft 365 E5 subscription. Several users have iOS devices.
You plan to enroll the iOS devices in Microsoft Endpoint Manager.
You need to ensure that you can create an iOS/iPadOS enrollment profile in Microsoft Endpoint Manager.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

From the Microsoft Endpoint Manager admin center, add a device enrollment manager.

From the Microsoft Endpoint Manager admin center, download a certificate signing request.

Upload an Apple MDM push certificate to Microsoft Endpoint Manager.

Create a certificate from the Apple Push Certificates Portal.

From the Microsoft Endpoint Manager admin center, configure device enrollment restrictions.

Answer Area

>

&u2191

⇊

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Actions

From the Microsoft Endpoint Manager admin center, add a device enrollment manager.

From the Microsoft Endpoint Manager admin center, download a certificate signing request.

Upload an Apple MDM push certificate to Microsoft Endpoint Manager.

Create a certificate from the Apple Push Certificates Portal.

From the Microsoft Endpoint Manager admin center, configure device enrollment restrictions.

Answer Area

From the Microsoft Endpoint Manager admin center, download a certificate signing request.

Create a certificate from the Apple Push Certificates Portal.

Upload an Apple MDM push certificate to Microsoft Endpoint Manager.

NEW QUESTION 64

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Office 365.

The subscription has the default inbound anti-spam policy and a custom Safe Attachments policy.

You need to identify the following information:

- The number of email messages quarantined by zero-hour auto purge (ZAP)
- The number of times users clicked a malicious link in an email message

Which Email & collaboration report should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

To identify the number of emails quarantined by ZAP:

Threat protection status

Mailflow status report

Spoof detections

Threat protection status

URL threat protection

To identify the number of times users clicked a malicious link in an email:

Mailflow status report

Mailflow status report

Spoof detections

Threat protection status

URL threat protection

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

To identify the number of emails quarantined by ZAP:

Threat protection status

Mailflow status report

Spoof detections

Threat protection status

URL threat protection

To identify the number of times users clicked a malicious link in an email:

Mailflow status report

Mailflow status report

Spoof detections

Threat protection status

URL threat protection

NEW QUESTION 67

HOTSPOT - (Topic 6)
HOTSPOT

Your company has a Microsoft 365 E5 subscription. You need to perform the following tasks:
View the Adoption Score of the company. Create a new service request to Microsoft.
Which two options should you use in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Home

Users

Teams & groups

Roles

Resources

Billing

Support

Settings

Setup

Reports

Health

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Reports
View the Adoption Score of the company.
How to enable Adoption Score To enable Adoption Score:
? Sign in to the Microsoft 365 admin center as a Global Administrator and go to Reports > Adoption Score
? Select enable Adoption Score. It can take up to 24 hours for insights to become available.
Box 2: Support
Create a new service request to Microsoft.
Sign in to Microsoft 365 with your Microsoft 365 admin account, and select Support > New service request. If you're in the admin center, select Support > New service request.

NEW QUESTION 69

- (Topic 6)

You have a Microsoft 365 E5 subscription.
From the Microsoft 365 Defender portal, you plan to export a detailed report of compromised users.
What is the longest time range that can be included in the report?

- A. 1 day
- B. 7 days
- C. 30 days
- D. 90 days

Answer: C

Explanation:

View email security reports in the Microsoft 365 Defender portal
The aggregate view shows data for the last 90 days and the detail view shows data for the last 30 days
Reference:
<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/reports-email-security>

NEW QUESTION 72

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 tenant that contains five devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 10
Device2	Android 8.1.0
Device3	Android 10
Device4	iOS 12
Device5	iOS 14

All the devices have an app named App1 installed.
You need to prevent users from copying data from App1 and pasting the data into other apps.
Which policy should you create in Microsoft Endpoint Manager, and what is the minimum number of required policies? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Policy to create in Microsoft Endpoint Manager:

An app configuration policy

An app protection policy

A conditional access policy

A device compliance policy

Minimum number of required policies:

1

2

3

5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Policy to create in Microsoft Endpoint Manager:

	▼
An app configuration policy	
An app protection policy	
A conditional access policy	
A device compliance policy	

Minimum number of required policies:

	▼
1	
2	
3	
5	

NEW QUESTION 74

HOTSPOT - (Topic 6)

HOTSPOT

You have a new Microsoft 365 E5 tenant. Enable Security defaults is set to Yes.

A user signs in to the tenant for the first time.

Which multi-factor authentication (MFA) method can the user use, and how many days does the user have to register for MFA? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

MFA method:

Call to phone
Email message
Security questions
Text message to phone
Notification to Microsoft Authenticator app

Number of days:

7
14
30
60

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Notification to Microsoft Authenticator app

Do users have 14 days to register for Azure AD Multi-Factor Authentication?

Users have 14 days to register for MFA with the Microsoft Authenticator app from their smart phones, which begins from the first time they sign in after security defaults has been enabled. After 14 days have passed, the user won't be able to sign in until MFA registration is completed.

Box 2: 14

Azure AD Identity Protection will prompt your users to register the next time they sign in interactively and they'll have 14 days to complete registration. During this 14-day period, they can bypass registration if MFA isn't required as a condition, but at the end of the period they'll be required to register before they can complete the sign-in process.

NEW QUESTION 79

- (Topic 6)

You have a Microsoft 365 E5 tenant.

industry regulations require that the tenant comply with the ISO 27001 standard. You need to evaluate the tenant based on the standard

- A. From Policy in the Azure portal, select Compliance, and then assign a pokey
- B. From Compliance Manager, create an assessment
- C. From the Microsoft J6i compliance center, create an audit retention policy.
- D. From the Microsoft 365 admin center enable the Productivity Score.

Answer: B

NEW QUESTION 82

- (Topic 6)

You have a Microsoft 365 E5 subscription.

You onboard all devices to Microsoft Defender for Endpoint

You need to use Defender for Endpoint to block access to a malicious website at www.contoso.com.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct answer is worth one point.

- A. Create a web content filtering policy.
- B. Configure an enforcement scope.
- C. Enable Custom network indicators.
- D. Create an indicator.
- E. Enable automated investigation.

Answer: AC

NEW QUESTION 83

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it as a result these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- User passwords must be 10 characters or more.

Solution: implement password hash synchronization and modify the password settings from the Default Domain Policy in Active Directory. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 84

- (Topic 6)

Your company has on-premises servers and an Azure AD tenant.

Several months ago, the Azure AD Connect Health agent was installed on all the servers. You review the health status of all the servers regularly.

Recently, you attempted to view the health status of a server named Server1 and discovered that the server is NOT listed on the Azure AD Connect Servers list.

You suspect that another administrator removed Server1 from the list. You need to ensure that you can view the health status of Server1.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From Azure Cloud shell, run the Connect-Azure AD cmdlet.
- B. From Server1, change the Azure AD Connect Health Services Startup type to Automatic (Delayed Start)
- C. From Server1, change the Azure AD Connect Health Services Startup type to Automatic
- D. From Windows PowerShell, run the Register-AzureADConnectHealthsyncAgent cmdlet.
- E. From Server1, reinstall the Azure AD Connect Health agent

Answer: DE

NEW QUESTION 85

DRAG DROP - (Topic 6)

You have a Microsoft 365 subscription.

You need to meet the following requirements:

- Report a Microsoft 365 service issue.
- Request help on how to add a new user to an Azure AD tenant.

What should you use in the Microsoft 365 admin center? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features

Message center

New service request

Product feedback

Service health

Answer Area

To report issues regarding a Microsoft 365 service:

To request help on how to add a new user to the tenant:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Features

Message center

New service request

Product feedback

Service health

Answer Area

To report issues regarding a Microsoft 365 service: New service request

To request help on how to add a new user to the tenant: Message center

NEW QUESTION 89

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	Fabrikam.com

The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

PROVISION FROM ACTIVE DIRECTORY

Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

Azure AD Connect sync

Sync Status

Enabled

Last Sync

Less than 1 hour ago

Password Hash Sync

USER SIGN-IN

Federation

Disabled

0 domains

Seamless single sign-on

Enabled

1 domain

Pass-through authentication

Enabled

2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com. You need to ensure that User2 can access the resources in Azure AD.
Solution: From the Microsoft Entra admin center, you add fabrikam.com as a custom domain. You instruct User2 to sign in as user2@fabrikam.com.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The on-premises Active Directory domain is named contoso.com. To enable users to sign on using a different UPN (different domain), you need to add the domain to Microsoft 365 as a custom domain.

NEW QUESTION 90

HOTSPOT - (Topic 6)

You have an Azure subscription and an on-premises Active Directory domain. The domain contains 50 computers that run Windows 10.
You need to centrally monitor System log events from the computers.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

In Azure:

Add and configure the Diagnostics settings for the Azure Activity Log.

Add and configure an Azure Log Analytics workspace.

Add an Azure Storage account and Azure Cognitive Search

Add an Azure Storage account and a file share.

On the computers:

Create an event subscription.

Modify the membership of the Event Log Readers group.

Enroll in Microsoft Endpoint Manager.

Install the Microsoft Monitoring Agent.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

In Azure:

Add and configure the Diagnostics settings for the Azure Activity Log.

Add and configure an Azure Log Analytics workspace.

Add an Azure Storage account and Azure Cognitive Search

Add an Azure Storage account and a file share.

On the computers:

Create an event subscription.

Modify the membership of the Event Log Readers group.

Enroll in Microsoft Endpoint Manager.

Install the Microsoft Monitoring Agent.

NEW QUESTION 95

- (Topic 6)
Your on-premises network contains an Active Directory domain. You have a Microsoft 365 E5 subscription. You plan to implement a hybrid configuration that has the following requirements:

- Minimizes the number of times users are prompted for credentials when they access Microsoft 365 resources
- Supports the use of Azure AD Identity Protection

You need to configure Azure AD Connect to support the planned implementation. Which two options should you select? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Password Hash Synchronization
- B. Password writeback
- C. Directory extension attribute sync
- D. Enable single sign-on
- E. Pass-through authentication

Answer: AB

NEW QUESTION 99

HOTSPOT - (Topic 6)
HOTSPOT

				actions				
SP800	15444	Incomplete	72%	3 of 450 completed	887 of 887 completed	Group1	Microsoft 365	NIST 800-53
Data Protection Baseline	14370	Incomplete	70%	3 of 489 completed	835 of 835 completed	Group2	Microsoft 365	Data Protection Baseline

The SP800 assessment has the improvement actions shown in the following table.

Answer Area	Statements	Yes	No
	Establish a threat intelligence program will appear as Implemented in the SP800 assessment.	<input type="radio"/>	<input type="radio"/>
	The SP800 assessment score will increase by 54 points.	<input type="radio"/>	<input type="radio"/>
	The Data Protection Baseline score will increase by 9 points.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area	Statements	Yes	No
	Establish a threat intelligence program will appear as Implemented in the SP800 assessment.	<input type="radio"/>	<input checked="" type="radio"/>
	The SP800 assessment score will increase by 54 points.	<input type="radio"/>	<input checked="" type="radio"/>
	The Data Protection Baseline score will increase by 9 points.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 102

HOTSPOT - (Topic 6)
You have a Microsoft 365 tenant that contains the groups shown in the following table.

Name	Type
Group1	Microsoft 365
Group2	Distribution
Group3	Mail-enabled security
Group4	Security

You plan to create a compliance policy named Compliance1.
 You need to identify the groups that meet the following requirements:
 ? Can be added to Compliance1 as recipients of noncompliance notifications
 ? Can be assigned to Compliance1
 To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Can be added to Compliance1 as recipients of noncompliance notifications:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

Can be assigned to Compliance1:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Can be added to Compliance1 as recipients of noncompliance notifications:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

Can be assigned to Compliance1:

▼

Group1 and Group4 only

Group3 and Group4 only

Group1, Group2 and Group3 only

Group1, Group3, and Group4 only

Group1, Group2, Group3, and Group4

NEW QUESTION 103

- (Topic 6)
 Your network contains an on-premises Active Directory domain named contoso.com.
 For all user accounts, the Logon Hours settings are configured to prevent sign-ins outside of business hours.
 You plan to sync contoso.com to an Azure AD tenant.
 You need to recommend a solution to ensure that the logon hour restrictions apply when synced users sign in to Azure AD.
 What should you include in the recommendation?

- A. pass-through authentication
- B. conditional access policies
- C. password synchronization
- D. Azure AD Identity Protection policies

Answer: A

Explanation:
 Reference:
<https://nickblog.azurewebsites.net/2016/10/17/azure-ad-pass-through-authentication/>

NEW QUESTION 105

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 tenant that contains the users shown in the following table.

Name	Azure Active Directory (Azure AD) role	Microsoft Store for Business role	Member of
User1	Application administrator	Basic Purchaser	Group1
User2	None	Purchaser	Group2
User3	None	Basic Purchaser	Group3

You perform the following actions:

? Provision the private store in Microsoft Store for Business.

? Add an app named App1 to the private store.

? Set Private store availability for App1 to Specific groups, and then select Group3.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can install App1 from the private store.	<input type="radio"/>	<input type="radio"/>
User2 can install App1 from the private store.	<input type="radio"/>	<input type="radio"/>
User3 can install App1 from the private store.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
User1 can install App1 from the private store.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can install App1 from the private store.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can install App1 from the private store.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 108

HOTSPOT - (Topic 6)

From the Microsoft Purview compliance portal, you create a retention policy named Policy 1.

You need to prevent all users from disabling the policy or reducing the retention period. How should you configure the Azure PowerShell command? To answer select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Set-RetentionCompliancePolicy

Set-ComplianceTag

Set-HoldCompliancePolicy

Set-RetentionCompliancePolicy

Set-RetentionPolicy

Set-RetentionPolicyTag

-Identity "Policy1"

-RestrictiveRetention

-enabled

NEW QUESTION 113

- (Topic 6)
You have a Microsoft 365 E5 subscription.
You create an account for a new security administrator named SecAdmin1.
You need to ensure that SecAdmin1 can manage Microsoft Defender for Office 365 settings and policies for Microsoft Teams, SharePoint and OneDrive.
Solution: From the Azure Active Directory admin center, you assign SecAdmin1 the Teams Administrator role.
Does this meet the goal?

- A. Yes
- B. no

Answer: B

NEW QUESTION 115

- (Topic 6)
You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Department
User1	Human resources
User2	Research
User3	Human resources
User4	Marketing

You need to configure group-based licensing to meet the following requirements:
? To all users, deploy an Office 365 E3 license without the Power Automate license option.
? To all users, deploy an Enterprise Mobility + Security E5 license.
? To the users in the research department only, deploy a Power BI Pro license.
? To the users in the marketing department only, deploy a Visio Plan 2 license.
What is the minimum number of deployment groups required?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Answer: C

Explanation:

One for all users, one for the research department, and one for the marketing department.
Note: What are Deployment Groups?
With Deployment Groups, you can orchestrate deployments across multiple servers and perform rolling updates, while ensuring high availability of your application throughout. You can also deploy to servers on-premises or virtual machines on Azure or any cloud, plus have end-to-end traceability of deployed artifact versions down to the server level.
Reference:
<https://devblogs.microsoft.com/devops/deployment-groups-is-now-generally-available-sharing-of-targets-and-more>

NEW QUESTION 117

HOTSPOT - (Topic 6)
HOTSPOT
You have a Microsoft 365 subscription.
You are planning a threat management solution for your organization.
You need to minimize the likelihood that users will be affected by the following threats:
? Opening files in Microsoft SharePoint that contain malicious content
? Impersonation and spoofing attacks in email messages
Which policies should you create in Microsoft 365 Defender? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Opening files in SharePoint that contain malicious content:

▼

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

Impersonation and spoofing attacks in email messages:

▼

Anti-spam

Anti-Phishing

Safe Attachments

Safe Links

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 121

HOTSPOT - (Topic 6)

Your company uses Microsoft Defender for Endpoint. Microsoft Defender for Endpoint contains the device groups shown in the following table.

Rank	Device group	Member
1	Group1	Name starts with Comp
2	Group2	Name starts with Comp And OS In Windows 10
3	Group3	OS In Windows Server 2016
Last	Ungrouped devices (default)	Not applicable

You onboard computers to Microsoft Defender for Endpoint as shown in the following table.

Name	Operating system
Computer1	Windows 10
Computer2	Windows Server 2016

Of which groups are Computer1 and Computer2 members? To answer, select the appropriate options in The answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Computer1: 
Group1 only
Group2 only
Group1 and Group2
Ungrouped devices

Computer2: 
Group1 only
Group3 only
Group1 and Group3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Computer1: 
Group1 only
Group2 only
Group1 and Group2
Ungrouped devices

Computer2: 
Group1 only
Group3 only
Group1 and Group3

NEW QUESTION 126

- (Topic 6)

You have a Microsoft 365 subscription.

You plan to implement Microsoft Purview Privileged Access Management. Which Microsoft Office 365 workloads support privileged access?

- A. Microsoft Exchange Online only
- B. Microsoft Teams only
- C. Microsoft Exchange Online and SharePoint Online only
- D. Microsoft Teams and SharePoint Online only
- E. Microsoft Teams, Exchange Online, and SharePoint Online

Answer: A

Explanation:

Privileged access management

Having standing access by some users to sensitive information or critical network configuration settings in Microsoft Exchange Online is a potential pathway for compromised accounts or internal threat activities. Microsoft Purview Privileged Access Management helps protect your organization from breaches and helps to meet compliance best practices by limiting standing access to sensitive data or access to critical configuration settings. Instead of administrators having constant access, just-in-time access rules are implemented for tasks that need elevated permissions. Enabling privileged access management for Exchange Online in Microsoft 365 allows your organization to operate with zero standing privileges and provide a layer of defense against standing administrative access vulnerabilities.

Note: When will privileged access support Office 365 workloads beyond Exchange? Privileged access management will be available in other Office 365 workloads soon.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/compliance/privileged-access-management-solution-overview>

<https://learn.microsoft.com/en-us/microsoft-365/compliance/privileged-access-management>

NEW QUESTION 127

- (Topic 6)

You have a Microsoft 365 E5 subscription. You need to create a mail-enabled contact. Which portal should you use?

- A. the Microsoft 365 admin center
- B. the SharePoint admin center
- C. the Microsoft Entra admin center
- D. the Microsoft Purview compliance portal

Answer: A

NEW QUESTION 130

- (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Office 365. You have the policies shown in the following table.

Name	Type
Policy1	Anti-phishing
Policy2	Anti-spam
Policy3	Anti-malware
Policy4	Safe Attachments

All the policies are configured to send malicious email messages to quarantine. Which policies support a customized quarantine retention period?

- A. Policy1 and Policy2 only
- B. Policy2 and Policy4 only
- C. Policy3 and Policy4 only
- D. Policy1 and Policy3only

Answer: A

NEW QUESTION 132

- (Topic 6)

You have a Microsoft 365 subscription.

You need to add additional onmicrosoft.com domains to the subscription. The additional domains must be assignable as email addresses for users.

What is the maximum number of onmicrosoft.com domains the subscription can contain?

- A. 1
- B. 2
- C. 5
- D. 10

Answer: C

Explanation:

You are limited to five onmicrosoft.com domains in your Microsoft 365 environment, so make sure to check for spelling and to assess your need if you choose to create a new one.

Reference:

<https://learn.microsoft.com/en-us/microsoft-365/admin/setup/domains-faq>

NEW QUESTION 133

HOTSPOT - (Topic 6)

HOTSPOT

Your network contains an on-premises Active Directory domain. You have a Microsoft 365 E5 subscription.

You plan to implement directory synchronization.

You need to identify potential synchronization issues for the domain. The solution must use the principle of least privilege.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Tool:

☐ AccessChk
 ☐ Azure AD Connect
 ☐ Active Directory Explorer
 ☐ IdFix

Required group membership:

☐ Domain Admins
 ☐ Domain Users
 ☐ Server Operators
 ☐ Enterprise Admins

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: IdFix

Query and fix invalid object attributes with the IdFix tool

Microsoft is working to reduce the time required to remediate identity issues when onboarding to Microsoft 365. A portion of this effort is intended to address the time involved in remediating the Windows Server Active Directory (Windows Server AD) errors reported by the directory synchronization tools such as Azure AD Connect and Azure AD Connect cloud sync. The focus of IdFix is to enable you to accomplish this task in a simple, expedient fashion.

The IdFix tool provides you the ability to query, identify, and remediate the majority of object synchronization errors in your Window's Server AD forests in

preparation for deployment to Microsoft 365. The utility does not fix all errors, but it does find and fix the majority. This remediation will then allow you to successfully synchronize users, contacts, and groups from on-premises Active Directory into Microsoft 365. Note: IdFix might identify errors beyond those that emerge during synchronization. The most common example is compliance with rfc 2822 for smtp addresses. Although invalid attribute values can be synchronized to the cloud, the product group recommends that these errors be corrected.

Incorrect:

* AccessChk

Box 2: Enterprise Admins

IdFix permissions requirements

The user account that you use to run IdFix must have read and write access to the AD DS domain.

If you aren't sure if your user account meets these requirements, and you're not sure how to check, you can still download and run IdFix. If your user account doesn't have the right permissions, IdFix will simply display an error when you try to run it.

* Enterprise Admins

The Enterprise Admins group exists only in the root domain of an Active Directory forest of domains. The group is a Universal group if the domain is in native mode. The group is a Global group if the domain is in mixed mode. Members of this group are authorized to make forest-wide changes in Active Directory, like adding child domains.

Incorrect:

* Domain Admins

Members of the Domain Admins security group are authorized to administer the domain. By default, the Domain Admins group is a member of the Administrators group on all computers that have joined a domain, including the domain controllers. The Domain Admins group is the default owner of any object that's created in Active Directory for the domain by any member of the group. If members of the group create other objects, such as files, the default owner is the Administrators group.

* Server Operator

Server Operators can log on to a server interactively; create and delete network shares; start and stop services; back up and restore files; format the hard disk of the computer; and shut down the computer. Any service that accesses the system has the Service identity.

* Domain Users - too few permissions

The Domain Users group includes all user accounts in a domain. When you create a user account in a domain, it's automatically added to this group.

NEW QUESTION 137

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint site named Site1. Site1 contains the files shown in the following table.

Name	Number of IP addresses in the file
File1	2
File2	3

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

Name	Content contains	Policy tip	If there is a match, stop processing	Priority
Rule1	3 or more IP addresses	Tip1	No	0
Rule2	1 or more IP addresses	Tip2	Yes	1
Rule3	2 or more IP addresses	Tip3	No	2

You apply DLP1 to Site1.

Which policy tip is displayed for each file? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

File1:

Tip2 only

Tip2 only

Tip3 only

Tip2 and Tip3

File2:

Tip1 and Tip2 only

Tip1 only

Tip3 only

Tip1 and Tip2 only

Tip1, Tip2, and Tip3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 138

HOTSPOT - (Topic 6)
HOTSPOT

You have a Microsoft 365 E5 subscription that contains a user named User1. Azure AD Password Protection is configured as shown in the following exhibit.

Custom smart lockout

Lockout threshold

15

Lockout duration in seconds

600

Custom banned passwords

Enforce custom list

Yes

No

Custom banned password list

3hundred
Eleven
Falcon
Project
Tailspin

Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory

Yes

No

Mode

Enforced

Audit

User1 attempts to update their password to the following passwords:

- ? F@lcon
- ? Project22
- ? T4il\$pin45dg4

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

[Answer choice] will be accepted as a password.

Only T4il\$pin45dg4

Only F@lcon and T4il\$pin45dg4

Only Project22 and T4il\$pin45dg4

F@lcon, Project22, and T4il\$pin45dg4

If User1 enters the same wrong password 15 times, waits 11 minutes, and then enters the same wrong password again, the user [answer choice].

will be locked out

will trigger a user risk

can attempt to sign in again immediately

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Only T4il\$pin45dg4
Box 2: can attempt to sign in immediately Note: Manage Azure AD smart lockout values
Based on your organizational requirements, you can customize the Azure AD smart lockout values. Customization of the smart lockout settings, with values specific to your organization, requires Azure AD Premium P1 or higher licenses for your users. Customization of the smart lockout settings is not available for Azure China 21Vianet tenants.
To check or modify the smart lockout values for your organization, complete the following steps:
? Sign in to the Entra portal.

- ? Search for and select Azure Active Directory, then select Security > Authentication methods > Password protection.
 - ? Set the Lockout threshold, based on how many failed sign-ins are allowed on an account before its first lockout.
 - ? The default is 10 for Azure Public tenants and 3 for Azure US Government tenants.
 - ? Set the Lockout duration in seconds, to the length in seconds of each lockout.
 - ? The default is 60 seconds (one minute).
- If the first sign-in after a lockout period has expired also fails, the account locks out again. If an account locks repeatedly, the lockout duration increases.

NEW QUESTION 141

- (Topic 6)

You have a Microsoft 365 E5 subscription that contains a user named User1. You create a retention label named Retention1 that is published to all locations. You need to ensure that User1 can label email messages by using Retention1 as soon as possible. Which cmdlet should you run in Microsoft Exchange Online PowerShell?

- A. Start-MpScan
- B. Start-Process
- C. Start-ManagedFolderAssistant
- D. Start-AppBackgroundTask

Answer: C

NEW QUESTION 144

- (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Defender for Endpoint. When users attempt to access the portal of a partner company, they receive the message shown in the following exhibit.

You need to enable user access to the partner company's portal. Which Microsoft Defender for Endpoint setting should you modify?

- A. Alert notifications
- B. Alert suppression
- C. Custom detections
- D. Advanced hunting
- E. Indicators

Answer: E

Explanation:

This Website Is Blocked By Your Organization
Custom indicators will block malicious IPs, URLs, and domains. Then, they will display the above message for the user.
Reference: <https://jadexstrategic.com/web-protection/>

NEW QUESTION 149

- (Topic 6)
You have a Microsoft 365 subscription.
You have an Azure AD tenant that contains the users shown in the following table.

Name	Role
User1	Security Administrator
User2	Global Administrator
User3	Service Support Administrator

You configure Tenant properties as shown in the following exhibit.

Technical contact

User1@contoso.com ✓

Global privacy contact

✓

Privacy statement URL

http://contoso.com/privacy ✓

Which users will be contacted by Microsoft if the tenant experiences a data breach?

- A. Used only
- B. User2 only
- C. User3 only
- D. Used and User2 only
- E. User2 and User3 only

Answer: B

Explanation:
Microsoft 365 is committed to notifying customers within 72 hours of breach declaration.
The customer's tenant administrator will be notified.

<https://learn.microsoft.com/en-us/compliance/regulatory/gdpr-breach-office365>

NEW QUESTION 152

HOTSPOT - (Topic 6)
From the Microsoft 365 compliance center, you configure a data loss prevention (DLP) policy for a Microsoft SharePoint Online site named Site1. Site1 contains the roles shown in the following table.

Role	Member
Site owner	Prvi
Site member	User1
Site visitor	User2

Prvi creates the files shown in the exhibit. (Click the Exhibit tab.)

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

User1:

File1.docx only

File1.docx and File2.docx only

File1.docx, File2.docx, and File3.docx

User2:

File1.docx only

File1.docx and File2.docx only

File1.docx, File2.docx, and File3.docx

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1:

File1.docx only

File1.docx and File2.docx only

File1.docx, File2.docx, and File3.docx

User2:

File1.docx only

File1.docx and File2.docx only

File1.docx, File2.docx, and File3.docx

NEW QUESTION 153

User2 runs a script that modifies a file in a Microsoft SharePoint Online library once every four minutes and runs for a period of two hours. How many alerts will User1 receive?

- A. 2
- B. 5
- C. 10
- D. 25

Answer: D

NEW QUESTION 157

- (Topic 6)

You have a Microsoft 365 E5 tenant.

You create an auto-labeling policy to encrypt emails that contain a sensitive info type. You specify the locations where the policy will be applied.

You need to deploy the policy. What should you do first?

- A. Review the sensitive information in Activity explorer
- B. Turn on the policy
- C. Run the policy in simulation mode
- D. Configure Azure Information Protection analytics

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/apply-sensitivity-label-automatically?view=o365-worldwide>

NEW QUESTION 162

- (Topic 6)

You have Windows 10 devices that are managed by using Microsoft Endpoint Manager. You need to configure the security settings in Microsoft Edge.

What should you create in Microsoft Endpoint Manager?

- A. an app configuration policy
- B. an app
- C. a device configuration profile
- D. a device compliance policy

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/deployedge/configure-edge-with-intune>

NEW QUESTION 164

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it As a result these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- User passwords must be 10 characters or more.

Solution: implement password hash synchronization and configure password protection in the Azure AD tenant.

Does this meet the goal?

- A. Yes
B. No

Answer: B

NEW QUESTION 169

- (Topic 6)

You have a Microsoft 365 E5 tenant.

You need to be notified when emails with attachments that contain sensitive personal data are sent to external recipients.

Which two policies can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. a data loss prevention (DLP) policy
B. a sensitivity label policy
C. a Microsoft Cloud App Security file policy
D. a communication compliance policy
E. a retention label policy

Answer: AD

NEW QUESTION 170

- (Topic 6)

You have a Microsoft 365 E5 subscription.

Users have the devices shown in the following table.

Name	Platform	Owner	Enrolled in Microsoft Endpoint Manager
Device1	Android	User1	Yes
Device2	Android	User1	No
Device3	iOS	User1	No
Device4	Windows 10	User2	Yes
Device5	Windows 10	User2	No
Device6	iOS	User2	Yes

On which devices can you manage apps by using app configuration policies in Microsoft Endpoint Manager?

- A. Device1, Device4, and Device6
B. Device2, Device3, and Device5
C. Device1, Device2, Device3, and Device6
D. Device1, Device2, Device4, and Device5

Answer: C

Explanation:

You can create and use app configuration policies to provide configuration settings for both iOS/iPadOS or Android apps on devices that are and are not enrolled in Microsoft Endpoint Manager.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/apps/app-configuration-policies-overview>

NEW QUESTION 173

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Name	Group
Device1	DeviceGroup1
Device2	DeviceGroup2

At 08:00. you create an incident notification rule that has the following configurations:

- Name: Notification!
 - Notification settings
 - o Notify on alert severity: Low
 - o Device group scope: All (3)
 - o Details: First notification per incident
 - Recipients: User1@contoso.com, User2@contoso.com
- At 08:02, you create an incident notification rule that has the following configurations:
- Name: Notification
 - Notification settings
 - o Notify on alert severity: Low, Medium
 - o Device group scope: DeviceGroup1, DeviceGroup2
 - Recipients: User1@contoso.com
- in Microsoft 365 Defender, alerts are logged as shown in the following table.

Time	Alert name	Severity	Impacted assets
08:05	Activity1	Low	Device1
08:07	Activity1	Low	Device1
08:08	Activity1	Medium	Device1
08:15	Activity2	Medium	Device2
08:16	Activity2	Medium	Device2
08:20	Activity1	High	Device1
08:30	Activity3	Medium	Device2
08:35	Activity2	High	Device2

For each of the following statements, select Yes if the statement is true. Otherwise, select No1.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1@contoso.com will receive two incident notification emails for the alert at 08:05.	<input type="radio"/>	<input type="radio"/>
User2@contoso.com will receive an incident notification email for the alert at 08:07.	<input type="radio"/>	<input type="radio"/>
User1@contoso.com will receive an incident notification email for the alert at 08:20.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1@contoso.com will receive two incident notification emails for the alert at 08:05.	<input type="radio"/>	<input checked="" type="radio"/>
User2@contoso.com will receive an incident notification email for the alert at 08:07.	<input checked="" type="radio"/>	<input type="radio"/>
User1@contoso.com will receive an incident notification email for the alert at 08:20.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 178

- (Topic 6)
You have a Microsoft 365 E5 tenant that contains 100 Windows 10 devices.
You plan to deploy a Windows 10 Security Baseline profile that will protect secrets stored in memory.
What should you configure in the profile?

- A. Microsoft Defender Credential Guard
- B. BitLocker Drive Encryption (BitLocker)
- C. Microsoft Defender
- D. Microsoft Defender Exploit Guard

Answer: A

NEW QUESTION 183

DRAG DROP - (Topic 6)
You have a Microsoft 365 E5 subscription that contains the devices shown in the following table.

Type	Number of devices	Operating system	Enrollment status
Corporate	150	Windows 11	Azure AD-joined, Microsoft Intune-managed
Bring your own device (BYOD)	25	Windows 11	Unmanaged

You need to onboard the devices to Microsoft Defender for Endpoint. The solution must minimize administrative effort.

What should you use to onboard each type of device? To answer, drag the appropriate onboarding methods to the correct device types. Each onboarding method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Onboarding method

A local script

Group Policy

Integration with Microsoft Defender for Cloud

Microsoft Intune

Virtual Desktop Infrastructure (VDI) scripts

Device Type

Corporate:

BYOD:

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Onboarding method

A local script

Group Policy

Integration with Microsoft Defender for Cloud

Microsoft Intune

Virtual Desktop Infrastructure (VDI) scripts

Device Type

Corporate: Microsoft Intune

BYOD: Integration with Microsoft Defender for Cloud

NEW QUESTION 186

- (Topic 6)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain. You deploy an Azure AD tenant.

Another administrator configures the domain to synchronize to Azure AD.

You discover that 10 user accounts in an organizational unit (OU) are NOT synchronized to Azure AD. All the other user accounts synchronized successfully.

You review Azure AD Connect Health and discover that all the user account synchronizations completed successfully.

You need to ensure that the 10 user accounts are synchronized to Azure AD. Solution: You run idfix.exe and export the 10 user accounts.

Does this meet the goal?

- A. Yes
B. No

Answer: B

Explanation:

The question states that "all the user account synchronizations completed successfully". If there were problems with the 10 accounts that needed fixing with idfix.exe, there would have been synchronization errors in Azure AD Connect Health.

It is likely that the 10 user accounts are being excluded from the synchronization cycle by a filtering rule.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-configure-filtering>

NEW QUESTION 187

- (Topic 6)

You have a Microsoft 365 E5 subscription that uses Endpoint security.

You need to create a group and assign the Endpoint Security Manager role to the group. Which type of group can you use?

- A. Microsoft 365 only
B. security only
C. mail-enabled security and security only
D. mail-enabled security, Microsoft 365, and security only
E. distribution, mail-enabled security, Microsoft 365, and security

Answer: D

NEW QUESTION 192

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform	Intune
Device1	iOS	Enrolled
Device2	macOS	Not enrolled

You need to onboard Device1 and Device2 to Microsoft Defender for Endpoint.
What should you use to onboard each device? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Device1:

Microsoft Endpoint Manager

A local script

Group Policy

Microsoft Endpoint Manager

An app from the Google Play store

Integration with Microsoft Defender for Cloud

Device2:

A local script

A local script

Group Policy

Microsoft Endpoint Manager

An app from the Google Play store

Integration with Microsoft Defender for Cloud

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Device1:

Microsoft Endpoint Manager

A local script

Group Policy

Microsoft Endpoint Manager

An app from the Google Play store

Integration with Microsoft Defender for Cloud

Device2:

A local script

A local script

contoso221018.onmicrosoft.com, east.contoso221018.onmicrosoft.com, and contoso.com domains

Exchange Online can receive inbound email messages sent to the [answer choice].

contoso221018.onmicrosoft.com domain only

contoso221018.onmicrosoft.com domain only

contoso221018.onmicrosoft.com domain and all its subdomains only

contoso221018.onmicrosoft.com and east.contoso221018.onmicrosoft.com domains only

contoso221018.onmicrosoft.com, east.contoso221018.onmicrosoft.com, and contoso.com domains

NEW QUESTION 199

HOTSPOT - (Topic 6)

HOTSPOT

Your company uses Microsoft Defender for Endpoint. Microsoft Defender for Endpoint includes the device groups shown in the following table.

Rank	Device group	Members
1	Group1	Tag Equals demo And OS In Windows 10
2	Group2	Tag Equals demo
3	Group3	Domain Equals adatum.com
4	Group4	Domain Equals adatum.com And OS In Windows 10
Last	Ungrouped devices (default)	Not applicable

You onboard a computer named computer1 to Microsoft Defender for Endpoint as shown in the following exhibit.

Settings > Endpoints > computer1

Device summary

Risk level ⓘ
None

Device details

Domain
adatum.com

OS
Windows 10 64-bit
Version 21H2
Build 19044.2130

Use the drop-down menus to select the answer choice that completes each statement.
NOTE: Each correct selection is worth one point.

Answer Area

Computer1 will be a member of [answer choice].

Group3 only

Group4 only

Group3 and Group4 only

Ungrouped devices

If you add the tag demo to Computer1, the computer will be a member of [answer choice].

Group1 only

Group1 and Group2 only

Group1, Group2, Group3, and Group4

Ungrouped devices

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Box 1: Group3 and Group4 only Computer1 has no Demo Tag.
Computer1 is in the adatum domain and OS is Windows 10. Box 2: Group1, Group2, Group3 and Group4

NEW QUESTION 202
- (Topic 6)
You have the sensitivity labels shown in the following exhibit.

[Home](#) > sensitivity

Labels

Label policies

Auto-labeling(preview)

Sensitivity labels are used to classify email messages, documents, sites, and more. When a label is applied (automatically or by the user), the content or site is protected based on the settings you choose. For example, you can create labels that encrypt files, add content marking, and control user access to specific sites. [Learn more about sensitivity labels](#)

+ Create a label Publish labels Refresh

Name ↑	Order	Created by	Last modified
Label1	0-highest	Pri	04/24/2020
Label2	1	Pri	04/24/2020
Label3	0-highest	Pri	04/24/2020
Label4	0-highest	Pri	04/24/2020
Label5	5	Pri	04/24/2020
Label6	0-highest	Pri	04/24/2020

Which labels can users apply to content?

- A. Label3, Label4, and Label6 only
- B. Label1, Label2, Label3, Label4, Label5, and Label6
- C. Label1, Label2, and Label5 only
- D. Label1, Label3, Label4, and Label6 only

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/sensitivity-labels?view=o365-worldwide>

NEW QUESTION 203

HOTSPOT - (Topic 6)

HOTSPOT

You have a Microsoft 365 E5 subscription.

All company-owned Windows 11 devices are onboarded to Microsoft Defender for Endpoint.

You need to configure Defender for Endpoint to meet the following requirements:

? Block a vulnerable app until the app is updated.

? Block an application executable based on a file hash.

The solution must minimize administrative effort.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Block a vulnerable app until the app is updated:

An allow or block file

A file indicator

A remediation request

An update ring

Block an application executable based on a file hash:

An allow or block file

A file indicator

A remediation request

An update ring

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: A remediation request
 Block a vulnerable app until the app is updated.
 Block vulnerable applications
 How to block vulnerable applications
 ? Go to Vulnerability management > Recommendations in the Microsoft 365 Defender portal.
 ? Select a security recommendation to see a flyout with more information.
 ? Select Request remediation.
 ? Select whether you want to apply the remediation and mitigation to all device groups or only a few.
 ? Select the remediation options on the Remediation request page. The remediation options are software update, software uninstall, and attention required.
 ? Pick a Remediation due date and select Next.
 ? Under Mitigation action, select Block or Warn. Once you submit a mitigation action, it is immediately applied.
 ? Review the selections you made and Submit request. On the final page you can choose to go directly to the remediation page to view the progress of remediation activities and see the list of blocked applications.

Box 2: A file indicator
 Block an application executable based on a file hash.
 While taking the remediation steps suggested by a security recommendation, security admins with the proper permissions can perform a mitigation action and block vulnerable versions of an application. File indicators of compromise (IOC)s are created for each of the executable files that belong to vulnerable versions of that application. Microsoft Defender Antivirus then enforces blocks on the devices that are in the specified scope.
 The option to View details of blocked versions in the Indicator page brings you to the Settings > Endpoints > Indicators page where you can view the file hashes and response actions.

NEW QUESTION 205

- (Topic 6)

You have a hybrid deployment of Microsoft 365 that contains the users shown in the following table.

Name	Source	Last sign in
User1	Azure AD	Yesterday
User2	Active Directory Domain Services (AD DS)	Two days ago
User3	Active Directory Domain Services (AD DS)	Never

Azure AD Connect has the following settings:

? Password Hash Sync: Enabled

? Pass-through authentication: Enabled

You need to identify which users will be able to authenticate by using Azure AD if connectivity between on-premises Active Directory and the internet is lost.

Which users should you identify?

- A. none
- B. User1 only
- C. User1 and User2 only
- D. User1, User2, and User3

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn>

NEW QUESTION 207

- (Topic 6)

You have a Microsoft 365 E5 tenant. You configure sensitivity labels.

Users report that the Sensitivity button is unavailable in Microsoft Word for the web. The sensitivity button is available in Word for Microsoft 365.

You need to ensure that the users can apply the sensitivity labels when they use Word for the web.

What should you do?

- A. Copy policies from Azure Information Protection to the Microsoft 365 Compliance center
- B. Publish the sensitivity labels.
- C. Create an auto-labeling policy
- D. Enable sensitivity labels for files in Microsoft SharePoint Online and OneDrive.

Answer: B

NEW QUESTION 212

- (Topic 6)

You have a Microsoft 365 E5 subscription.

All users have Mac computers. All the computers are enrolled in Microsoft Endpoint Manager and onboarded to Microsoft Defender for Endpoint.

You need to configure Microsoft Defender for Endpoint on the computers. What should you create from the Endpoint Management admin center?

- A. a Microsoft Defender for Endpoint baseline profile
- B. an update policy for iOS
- C. a device configuration profile
- D. a mobile device management (MDM) security baseline profile

Answer: D

NEW QUESTION 216

- (Topic 6)
Your on-premises network contains an Active Directory domain.
You have a Microsoft 365 subscription.
You need to sync the domain with the subscription. The solution must meet the following requirements:
On-premises Active Directory password complexity policies must be enforced. Users must be able to use self-service password reset (SSPR) in Azure AD. What should you use?

A. password hash synchronization
B. Azure AD Identity Protection
C. Azure AD Seamless Single Sign-On (Azure AD Seamless SSO)
D. pass-through authentication

Answer: D

Explanation:
Azure Active Directory (Azure AD) Pass-through Authentication allows your users to sign in to both on-premises and cloud-based applications using the same passwords.
This feature is an alternative to Azure AD Password Hash Synchronization, which provides the same benefit of cloud authentication to organizations. However, certain organizations wanting to enforce their on-premises Active Directory security and password policies, can choose to use Pass-through Authentication instead.
Note: Azure Active Directory (Azure AD) self-service password reset (SSPR) lets users reset their passwords in the cloud, but most companies also have an on-premises Active Directory Domain Services (AD DS) environment for users. Password writeback allows password changes in the cloud to be written back to an on-premises directory in real time by using either Azure AD Connect or Azure AD Connect cloud sync. When users change or reset their passwords using SSPR in the cloud, the updated passwords also written back to the on-premises AD DS environment.
Password writeback is supported in environments that use the following hybrid identity models:
Password hash synchronization
Pass-through authentication
Active Directory Federation Services
Reference:
<https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-pta> <https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-writeback>

NEW QUESTION 220

DRAG DROP - (Topic 6)
DRAG DROP
You have a Microsoft 365 E5 tenant.
You need to implement compliance solutions that meet the following requirements:

- Use a file plan to manage retention labels.
- Identify, monitor, and automatically protect sensitive information.
- Capture employee communications for examination by designated reviewers.

Which solution should you use for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Solutions

Data loss prevention

Information governance

Insider risk management

Records management

Answer Area

Identify, monitor, and automatically protect sensitive information:

Capture employee communications for examination by designated reviewers:

Use a file plan to manage retention labels:

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Solutions

Data loss prevention

Information governance

Insider risk management

Records management

Answer Area

Identify, monitor, and automatically protect sensitive information: Data loss prevention

Capture employee communications for examination by designated reviewers: Insider risk management

Use a file plan to manage retention labels: Information governance

NEW QUESTION 221

HOTSPOT - (Topic 6)
HOTSPOT
You have a Microsoft 365 E5 subscription.
From Azure AD Identity Protection on August 1, you configure a Multifactor authentication registration policy that has the following settings:
? Assignments: All users
? Controls: Require Azure AD multifactor authentication registration
? Enforce Policy: On
? On August 3, you create two users named User1 and User2.
Users authenticate by using Azure Multi-Factor Authentication (MFA) for the first time on the dates shown in the following table.

User	Date
User1	August 5
User2	August 7

By which dates will User1 and User2 be forced to complete their Azure MFA registration? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

User1:

▼

August 6

August 17

August 19

September 3

September 5

User2:

▼

August 8

August 17

August 19

August 21

September 7

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: August 19
 Note: Security defaults will trigger a 14 day grace period for registration after a user's first login and security defaults being enabled. After 14 days users will be required to register for MFA and will not be able to skip.
 Conditional Access by itself without Azure Identity Protection does not allow for the 14 day grace period. Identity Protection includes the registration policy that allows registration on its own with no apps assigned to the policy. If a Conditional Access policy requires Multi- Factor Authentication, then the user must be able to pass that MFA request.
 Box 2: August 21

NEW QUESTION 225

- (Topic 6)
 You have a Microsoft 365 subscription.
 You have a data loss prevention (DLP) policy that blocks sensitive data from being shared in email messages.
 You need to modify the policy so that when an email message containing sensitive data is sent to both external and internal recipients, the message is only prevented from being delivered to the external recipients.
 What should you modify?

- A. the policy rule exceptions
- B. the DLP policy locations
- C. the policy rule conditions
- D. the policy rule actions

Answer: C

NEW QUESTION 229

HOTSPOT - (Topic 6)
 You have a Microsoft 365 E5 subscription.
 You plan to create the data loss prevention (DLP) policies shown in the following table.

Name	Apply to location
DLP1	Exchange email
DLP2	SharePoint sites
DLP3	OneDrive accounts

You need to create DLP rules for each policy.
Which policies support the sender is condition and the file extension is condition? To answer select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Sender is condition:

DLP1 only

DLP1 only

DLP2 only

DLP3 only

DLP2 and DLP3 only

DLP1, DLP2, and DLP3

File extension is condition:

DLP1, DLP2, and DLP3

DLP1 only

DLP2 only

DLP3 only

DLP2 and DLP3 only

DLP1, DLP2, and DLP3

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Sender is condition:

DLP1 only

DLP1 only

DLP2 only

DLP3 only

DLP2 and DLP3 only

DLP1, DLP2, and DLP3

File extension is condition:

DLP1, DLP2, and DLP3

DLP1 only

DLP2 only

DLP3 only

DLP2 and DLP3 only

DLP1, DLP2, and DLP3

NEW QUESTION 234
HOTSPOT - (Topic 6)

Your company has a Microsoft 365 subscription that uses an Azure AD tenant named contoso.com. The tenant contains the users shown in the following table.

Name	Role	Office 365 role group
User1	None	Compliance Data Administrator
User2	Global Administrator	None

You create a retention label named Label 1 that has the following configurations:

- Retains content for five years
- Automatically deletes all content that is older than five years

You turn on Auto labeling for Label1 by using a policy named Policy1. Policy1 has the following configurations:

- Applies to content that contains the word Merger
- Specifies the OneDrive accounts and SharePoint sites locations

You run the following command.

Set-RetentionCompliancePolicy Policy1 -RestrictiveRetention Strue -Force

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can add Exchange email as a location to Policy1.	<input type="radio"/>	<input type="radio"/>
User2 can remove SharePoint sites from Policy1.	<input type="radio"/>	<input type="radio"/>
User2 can add the word Acquisition to Policy1.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can add Exchange email as a location to Policy1.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can remove SharePoint sites from Policy1.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can add the word Acquisition to Policy1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 239

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains the users shown in the following table. The subscription has the following two anti-spam policies:

- Name: AntiSpam1
- Priority: 0
- Induce these users, groups and domains
 - o Users: User3
 - o Groups: Group1
- Exclude these users, groups and domains
 - o Groups: Group2
- Message limits
 - o Set a daily message limit 100
- Name: AntiSpam2
- Priority: 1
- Include these users, groups and domains
 - o Users: User1
 - o Groups: Group2
- Exclude these users, groups and domains
 - o Users: User3
- Message limits
 - o Set a daily message limit 50

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can send a maximum of 150 email messages per day.	<input type="radio"/>	<input type="radio"/>
User2 can send a maximum of 50 email messages per day.	<input type="radio"/>	<input type="radio"/>
User3 can send a maximum of 100 email messages per day.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can send a maximum of 150 email messages per day.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can send a maximum of 50 email messages per day.	<input checked="" type="radio"/>	<input type="radio"/>
User3 can send a maximum of 100 email messages per day.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 242

- (Topic 6)

You have a Microsoft 365 E5 subscription that uses Microsoft Intune. You need to access service health alerts from a mobile phone. What should you use?

- A. the Microsoft Authenticator app
- B. the Microsoft 365 Admin mobile app
- C. Intune Company Portal
- D. the Intune app

Answer: B

NEW QUESTION 246

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 subscription that contains a user named User1 and the administrators shown in the following table.

User1 reports that after sending 1,000 email messages in the morning, the user is blocked from sending additional emails. You need to identify the following:

- Which administrators can unblock User1
- What to configure to allow User1 to send at least 2,000 emails per day without being blocked

What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

NEW QUESTION 249

- (Topic 6)

You have a Microsoft 365 subscription.

Your company has a customer ID associated to each customer. The customer IDs contain 10 numbers followed by 10 characters. The following is a sample customer ID: 12-456-7890-abc-de- fghij.

You plan to create a data loss prevention (DLP) policy that will detect messages containing customer IDs.

D18912E1457D5D1DDCBD40AB3BF70D5D

What should you create to ensure that the DLP policy can detect the customer IDs?

- A. a sensitive information type
- B. a sensitivity label
- C. a supervision policy
- D. a retention label

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/custom-sensitive-info-types?view=o365-worldwide>

NEW QUESTION 251

- (Topic 6)

Your network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates an Azure AD tenant named contoso.onmicrosoft.com.

You plan to install Azure AD Connect on a member server and implement pass-through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From a domain controller install an Authentication Agent
- B. From the Microsoft Entra admin center, configure an authentication method.
- C. From Active Director,' Domains and Trusts add a UPN suffix
- D. Modify the email address attribute for each user account.
- E. From the Microsoft Entra admin center, add a custom domain name.
- F. Modify the User logon name for each user account.

Answer: ABE

Explanation:

Deploy Azure AD Pass-through Authentication Step 1: Check the prerequisites

Ensure that the following prerequisites are in place. In the Entra admin center

* 1. Create a cloud-only Hybrid Identity Administrator account or a Hybrid Identity administrator account on your Azure AD tenant. This way, you can manage the configuration of your tenant should your on-premises services fail or become unavailable.

(E) 2. Add one or more custom domain names to your Azure AD tenant. Your users can sign in with one of these domain names.

(A) In your on-premises environment

* 1. Identify a server running Windows Server 2016 or later to run Azure AD Connect. If not enabled already, enable TLS 1.2 on the server. Add the server to the same Active Directory forest as the users whose passwords you need to validate. It should be noted that installation of Pass-Through Authentication agent on Windows Server Core versions is not supported.

* 2. Install the latest version of Azure AD Connect on the server identified in the preceding step. If you already have Azure AD Connect running, ensure that the version is supported.

* 3. Identify one or more additional servers (running Windows Server 2016 or later, with TLS 1.2 enabled) where you can run standalone Authentication Agents. These additional servers are needed to ensure the high availability of requests to sign in. Add the servers to the same Active Directory forest as the users whose passwords you need to validate.

* 4. Etc.

(B) Step 2: Enable the feature

Enable Pass-through Authentication through Azure AD Connect.

If you're installing Azure AD Connect for the first time, choose the custom installation path. At the User sign-in page, choose Pass-through Authentication as the Sign On method. On successful completion, a Pass-through Authentication Agent is installed on the same server as Azure AD Connect. In addition, the Pass-through Authentication feature is enabled on your tenant.

Incorrect:

Not C: From Active Directory Domains and Trusts, add a UPN suffix Not D. Modify the email address attribute for each user account. Not F. Modify the User logon name for each user account.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/hybrid/connect/how-to-connect-pta- quick-start>

NEW QUESTION 253

- (Topic 6)

Your company has three main offices and one branch office. The branch office is used for research.

The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.

You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office.

What should you include in the recommendation?

- A. Azure AD password protection
- B. a Microsoft Intune device configuration profile
- C. a Microsoft Intune device compliance policy
- D. Azure AD conditional access

Answer: D

NEW QUESTION 257

- (Topic 6)
You have a Microsoft 365 tenant that contains 1,000 Windows 10 devices. The devices are enrolled in Microsoft Intune. Company policy requires that the devices have the following configurations:
? Require complex passwords.
? Require the encryption of removable data storage devices.
? Have Microsoft Defender Antivirus real-time protection enabled.
You need to configure the devices to meet the requirements.
What should you use?

- A. an app configuration policy
- B. a compliance policy
- C a security baseline profile
- D a conditional access policy

Answer: B

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/intune/protect/device-compliance-get-started>

NEW QUESTION 260

HOTSPOT - (Topic 6)
Your network contains an on-premises Active Directory domain named adatum.com that syncs to Azure AD by using the Azure AD Connect Express Settings. Password write back is disabled.
You create a user named User1 and enter Pass in the Password field as shown in the following exhibit.

The Azure AD password policy is configured as shown in the following exhibit. Password policy Set the password policy for all users in your organization. Days before passwords expire 90 Days before a user is notified about 14 expiration You confirm that User1 is synced to Azure AD. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area		
Statements	Yes	No
User1 can sign in to Azure AD.	<input type="radio"/>	<input type="radio"/>
User1 can change the password immediately by using the My Apps portal.	<input type="radio"/>	<input type="radio"/>
From Azure AD, User1 must change the password every 90 days.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can sign in to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can change the password immediately by using the My Apps portal.	<input type="radio"/>	<input checked="" type="radio"/>
From Azure AD, User1 must change the password every 90 days.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 265

HOTSPOT - (Topic 6)

You work at a company named Contoso, Ltd.

Contoso has a Microsoft 365 subscription that is configured to use the DNS domains shown in the following table.

Contoso purchases a company named Fabrikam, Inc.

Contoso plans to add the following domains to the Microsoft 365 subscription:

- fabrikam.com
- east.fabrikam.com
- west.contoso.com

You need to ensure that the devices in the new domains can register by using Autodiscover.

How many domains should you verify, and what is the minimum number of enterprise registration DNS records you should add? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Domains:

NEW QUESTION 266

HOTSPOT - (Topic 6)

You have a Microsoft 365 tenant that has Enable Security defaults set to No in Azure Active Directory (Azure AD).

The tenant has two Compliance Manager assessments as shown in the following table.

Name	Score	Status	Assessment progress	Your improvement actions	Microsoft actions	Group	Product	Regulation
SP800	15444	Incomplete	72%	3 of 450 completed	887 of 887 completed	Group1	Microsoft 365	NIST 800-53
Data Protection Baseline	14370	Incomplete	70%	3 of 489 completed	835 of 835 completed	Group2	Microsoft 365	Data Protection Baseline

The SP800 assessment has the improvement actions shown in the following table.

Improvement action	Test status	Impact	Points achieved	Regulations
Establish a threat intelligence program	None	+9 points	0/9	NIST 800-53, Data Protection Baseline
Establish and document a configuration management program	None	+9 points	0/9	NIST 800-53, Data Protection Baseline

You perform the following actions:
 ? For the Data Protection Baseline assessment, change the Test status of Establish a threat intelligence program to Implemented.
 ? Enable multi-factor authentication (MFA) for all users.
 For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
Establish a threat intelligence program will appear as Implemented in the SP800 assessment.	<input type="radio"/>	<input type="radio"/>
The SP800 assessment score will increase by 54 points.	<input type="radio"/>	<input type="radio"/>
The Data Protection Baseline score will increase by 9 points.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Establish a threat intelligence program will appear as Implemented in the SP800 assessment.	<input type="radio"/>	<input checked="" type="radio"/>
The SP800 assessment score will increase by 54 points.	<input type="radio"/>	<input checked="" type="radio"/>
The Data Protection Baseline score will increase by 9 points.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 267
 HOTSPOT - (Topic 6)
 You have an Azure AD tenant that contains the users shown in the following table.

Name	Role
User1	Global Administrator
User2	Billing Administrator
User3	None

You enable self-service password reset for all users. You set Number of methods required to reset to 1, and you set Methods available to users to Security questions only.
 What information must be configured for each user before the user can perform a self- service password reset? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Answer Area

User1:

Phone number and email address

Email address only

Phone number only

Security questions only

Phone number and email address

User2:

Phone number and email address

Email address only

Phone number only

Security questions only

Phone number and email address

User3:

Security questions only

Email address only

Phone number only

Security questions only

Phone number and email address

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

User	Selected Option	Available Options
User1:	Phone number and email address	Phone number and email address, Email address only, Phone number only, Security questions only
User2:	Phone number and email address	Phone number and email address, Email address only, Phone number only, Security questions only
User3:	Security questions only	Security questions only, Email address only, Phone number only, Phone number and email address

NEW QUESTION 270

- (Topic 6)

You have a Microsoft 365 subscription.

You configure a new Azure AD enterprise application named App1. App1 requires that a user be assigned the Reports Reader role.

Which type of group should you use to assign the Reports Reader role and to access App1?

- A. a Microsoft 365 group that has assigned membership
- B. a Microsoft 365 group that has dynamic user membership
- C. a security group that has assigned membership
- D. a security group that has dynamic user membership

Answer: C

Explanation:

To grant permissions to assignees to manage users and group access for a specific enterprise app, go to that app in Azure AD and open in the Roles and Administrators list for that app. Select the new custom role and complete the user or group assignment. The assignees can manage users and group access only for the specific app.

Note: You can add the following types of groups:

Assigned groups - Manually add users or devices into a static group.

Dynamic groups (Requires Azure AD Premium) - Automatically add users or devices to user groups or device groups based on an expression you create.

Note:

Security groups

Security groups are used for granting access to Microsoft 365 resources, such as SharePoint. They can make administration easier because you need only administer the group rather than adding users to each resource individually.

Security groups can contain users or devices. Creating a security group for devices can be used with mobile device management services, such as Intune.

Security groups can be configured for dynamic membership in Azure Active Directory, allowing group members or devices to be added or removed automatically based on user attributes such as department, location, or title; or device attributes such as operating system version.

Security groups can be added to a team.

Microsoft 365 Groups can't be members of security groups. Microsoft 365 Groups

Microsoft 365 Groups are used for collaboration between users, both inside and outside your company. With each Microsoft 365 Group, members get a group email and shared workspace for conversations, files, and calendar events, Stream, and a Planner.

Reference:

<https://learn.microsoft.com/en-us/azure/active-directory/roles/custom-enterprise-apps> <https://learn.microsoft.com/en-us/microsoft-365/admin/create-groups/compare-groups?> <https://learn.microsoft.com/en-us/mem/intune/apps/apps-deploy>

NEW QUESTION 271

- (Topic 6)

You purchase a new computer that has Windows 10, version 21H1 preinstalled.

You need to ensure that the computer is up-to-date. The solution must minimize the number of updates installed.

What should you do on the computer?

- A. Install all the feature updates released since version 21H1 and the latest quality update only.
- B. Install the latest feature update and all the quality updates released since version 21H1.
- C. Install the latest feature update and the latest quality update only.
- D. Install all the feature updates released since version 21H1 and all the quality updates released since version 21H1 only.

Answer: C

NEW QUESTION 272

- (Topic 6)

You have a Microsoft Azure Active Directory (Azure AD) tenant named Contoso.com. You create a Microsoft Defender for identity instance Contoso.

The tenant contains the users shown in the following table.

Name	Member of group	Azure AD role
User1	Defender for Identity Contoso Administrators	None
User2	Defender for Identity Contoso Users	None
User3	None	Security administrator
User4	Defender for Identity Contoso Users	Global administrator

You need to modify the configuration of the Defender for identify sensors.

Solutions: You instruct User3 to modify the Defender for identity sensor configuration. Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 274

- (Topic 6)

Your company has a Microsoft 365 E5 subscription.

Users in the research department work with sensitive data.

You need to prevent the research department users from accessing potentially unsafe websites by using hyperlinks embedded in email messages and documents.

Users in other departments must not be restricted.

What should you do?

- A. Create a data loss prevention (DLP) policy that has a Content is shared condition.
- B. Modify the safe links policy Global settings.
- C. Create a data loss prevention (DLP) policy that has a Content contains condition.
- D. Create a new safe links policy.

Answer: D

Explanation:

Use the Microsoft 365 Defender portal to create Safe Links policies

In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & Collaboration > Policies & Rules > Threat policies > Safe Links in the Policies section. Or, to go directly to the Safe Links page, use <https://security.microsoft.com/safelinksv2>.

* 1. On the Safe Links page, select Create to start the new Safe Links policy wizard.

* 2. On the Name your policy page, configure the following settings: Name: Enter a unique, descriptive name for the policy.

Description: Enter an optional description for the policy.

* 3. When you're finished on the Name your policy page, select Next.

* 4. On the Users and domains page, identify the internal recipients that the policy applies to (recipient conditions):

Users: The specified mailboxes, mail users, or mail contacts.

*-> Groups:

Members of the specified distribution groups (including non-mail-enabled security groups within distribution groups) or mail-enabled security groups (dynamic distribution groups aren't supported).

The specified Microsoft 365 Groups.

Domains: All recipients in the specified accepted domains in your organization. Etc.

NEW QUESTION 278

HOTSPOT - (Topic 6)

You have three devices enrolled in Microsoft Endpoint Manager as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group2, Group3
Device3	Windows 10	Disabled	Group2

The device compliance policies in Endpoint Manager are configured as shown in the following table.

Name	Platform	Require BitLocker	Assigned
Policy1	Windows 10 and later	Require	Yes
Policy2	Windows 10 and later	Not configured	Yes
Policy3	Windows 10 and later	Require	No

The device compliance policies have the assignments shown in the following table.

Name	Assigned to
Policy1	Group3
Policy2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is compliant.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 279

- (Topic 6)
You have a Microsoft 365 E5 tenant that contains the devices shown in the following table.

Name	Platform
Device1	MacOS
Device2	Windows 10 Pro
Device3	Windows 10 Enterprise
Device4	Ubuntu 18.04 LTS

You plan to implement attack surface reduction (ASR) rules. Which devices will support the ASR rules?

- A. Device 1, Device2, and Device3 only
- B. Device3 only
- C. Device2 and Device3 only
- D. Device1, Device2, Devices and Device4

Answer: C

Explanation:

Reference:
<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/enable-attack-surface-reduction?view=o365-worldwide#requirements>

NEW QUESTION 282

- (Topic 6)
You have a Microsoft 365 E5 tenant.
The Microsoft Secure Score for the tenant is shown in the following exhibit.

Microsoft Secure Score

Overview Improvement actions History Metrics & trends

Actions you can take to improve your Microsoft Secure Score. Score updates may take up to 24 hours.

↓ Export	12 items	🔍 Search	⌵ Filter	{≡ Group by ▾
Applied filters:

1	Require MFA for administrative roles	+16.95%	0/10	
2	Ensure all users can complete multi-factor authentication for...	+15.25%	0/9	
3	Enable policy to block legacy authentication	+13.56%	0/8	
4	Turn on user risk policy	+11.86%	0/7	
5	Turn on sign-in risk policy	+11.86%	0/7	
6	Do not allow users to grant consent to unmanaged applicatio...	+6.78%	0/4	
7	Enable self-service password reset	+1.69%	0/1	
8	Turn on customer lockbox feature	+1.69%	0/1	
9	Use limited administrative roles	+1.69%	0/1	
10	Designate more than one global admin	+1.69%	0/1	

You plan to enable Security defaults for Azure Active Directory (Azure AD). Which three improvement actions will this affect?

- A. Require MFA for administrative roles.
- B. Ensure all users can complete multi-factor authentication for secure access
- C. Enable policy to block legacy authentication
- D. Enable self-service password reset
- E. Use limited administrative roles

Answer: ABC

NEW QUESTION 283

- (Topic 6)

Your on-premises network contains an Active Directory domain named Contoso.com and 500 devices that run either macOS, Windows 8.1, Windows 10, or Windows 11. All the devices are managed by using Microsoft Endpoint Configuration Manager. The domain syncs with Azure Active Directory (Azure AD). You plan to implement a Microsoft 365 E5 subscription and enable co-management. Which devices can be co-managed after the implementation?

- A. Windows 11 and Windows 10 only
- B. Windows 11, Windows 10-Windows8.1.andmacOS
- C. Windows 11 and macOS only
- D. Windows 11 only
- E. Windows 11. Windows 10, and Windows8.1 only

Answer: C

NEW QUESTION 288

- (Topic 6)

You have a Microsoft 365 subscription. You add a domain named contoso.com.

When you attempt to verify the domain, you are prompted to send a verification email to admin@contoso.com.

You need to change the email address used to verify the domain. What should you do?

- A. From the Microsoft 365 admin center, change the global administrator of the Microsoft 365 subscription.
- B. Add a TXT record to the DNS zone of the domain.
- C. From the domain registrar, modify the contact information of the domain.
- D. Modify the NS records for the domain.

Answer: C

NEW QUESTION 292

HOTSPOT - (Topic 6)

You have 2,500 Windows 10 devices and a Microsoft 365 E5 tenant that contains two users named User1 and User2. The devices are not enrollment in Microsoft Intune.

In Microsoft Endpoint Manager, the Device limit restrictions are configured as shown in the following exhibit.

Device limit restrictions

Define how many devices each user can enroll.

Priority	Name	Device limit	Assigned
Default	All Users	2	Yes

In Azure Active Directory (Azure AD), the Device settings are configured as shown in the following exhibit.

Users may register their devices with Azure AD ⓘ

AllNone

Learn more on how this setting works

Require Multi-Factor Auth to join devices ⓘ

YesNo

Maximum number of devices per user ⓘ

5

From Microsoft Endpoint Manager, you add User2 as a device enrollment manager (DEM).
For each of the following statement, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can enroll only five devices in Intune.	<input type="radio"/>	<input type="radio"/>
User1 can join only five devices to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 can enroll all the devices in Intune.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User1 can enroll only five devices in Intune.	<input type="radio"/>	<input checked="" type="radio"/>
User1 can join only five devices to Azure AD.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can enroll all the devices in Intune.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 295

- (Topic 6)
You have a Microsoft 365 E5 tenant that contains the devices shown in the following table.

Name	Platform	Azure Active Directory (Azure AD)
Device1	Windows 10	Joined
Device2	Windows 10	Registered
Device3	Windows 10	Not joined or registered
Device4	Android	Registered

You plan to review device startup performance issues by using Endpoint analytics. Which devices can you monitor by using Endpoint analytics?

- A. Device1 only
- B. Device1 and Device2 only
- C. Device1, Device2, and Device3 only
- D. Device1, Device2, and Device4 only
- E. Device1, Device2, Device3, and Device4

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/mem/analytics/overview>

NEW QUESTION 298

DRAG DROP - (Topic 6)

You have a Microsoft 365 subscription that uses Microsoft Defender for Office 365. You need to configure policies to meet the following requirements:

- ? Customize the common attachments filter.
- ? Enable impersonation protection for sender domains.

Which type of policy should you configure for each requirement? To answer, drag the appropriate policy types to the correct requirements. Each policy type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Policy Types

Anti-malware

Anti-phishing

Anti-spam

Safe Attachments

Answer Area

Customize the common attachments filter:

Enable impersonation protection for sender domains:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Anti-malware
Customize the common attachments filter. See step 5 below.

- * 1. Use the Microsoft 365 Defender portal to create anti-malware policies

In the Microsoft 365 Defender portal at <https://security.microsoft.com>, go to Email & Collaboration > Policies & Rules > Threat policies > Anti-Malware in the Policies section. To go directly to the Anti-malware page, use <https://security.microsoft.com/antimalwarev2>

- * 2. On the Anti-malware page, select Create to open the new anti-malware policy wizard. On the Name your policy page, configure these settings:
Name: Enter a unique, descriptive name for the policy. Description: Enter an optional description for the policy.
- * 3. When you're finished on the Name your policy page, select Next.
- * 4. On the Users and domains page, identify the internal recipients that the policy applies to (recipient conditions)
- * 5. On the Protection settings page, configure the following settings: Protection settings section:
Enable the common attachments filter: If you select this option, messages with the specified attachments are treated as malware and are automatically quarantined. You can modify the list by clicking Customize file types and selecting or deselecting values in the list.
- * 6. Etc.

Box 2: Anti-phishing
Enable impersonation protection for sender domains. Anti-phishing policies in Microsoft 365

The high-level differences between anti-phishing policies in EOP and anti-phishing policies in Defender for Office 365 are described in the following table:

Feature	Anti-phishing policies in EOP	Anti-phishing policies in Defender for Office 365
Automatically created default policy	✓	✓
Create custom policies	✓	✓
Common policy settings*	✓	✓
Spoof settings	✓	✓
First contact safety tip	✓	✓
Impersonation settings		✓
Advanced phishing thresholds		✓

NEW QUESTION 303

HOTSPOT - (Topic 6)

You have a Microsoft 365 subscription that contains the administrative units shown in the following table.

Name	Members
AU1	Group1, User2
AU2	Group2, User3, User4

The groups contain the members shown in the following table.

Name	Members
Group1	User1
Group2	User2, User4

The users are assigned the roles shown in the following table.

Name	Role	Scope
User1	None	Not applicable
User2	Password Administrator	AU1
User3	License Administrator	Organization
User4	None	Not applicable

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE; Each correct selection is worth one point.

Answer Area			
Statements	Yes	No	
User2 can reset the password of User1.	<input type="radio"/>	<input type="radio"/>	
User2 can reset the password of User4.	<input type="radio"/>	<input type="radio"/>	
User3 can assign licenses to User1.	<input type="radio"/>	<input type="radio"/>	

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
User2 can reset the password of User1.	<input checked="" type="radio"/>	<input type="radio"/>
User2 can reset the password of User4.	<input type="radio"/>	<input checked="" type="radio"/>
User3 can assign licenses to User1.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 306

HOTSPOT - (Topic 6)

You have a Microsoft 365 E5 tenant that contains a Microsoft SharePoint Online site named Site1. Site1 contains the files shown in the following table.

Name	Number of IP addresses in the file
File1.docx	1
File2.txt	2
File3.xlsx	5

You create a sensitivity label named Sensitivity1 and an auto-label policy that has the following configurations:

? Name: AutoLabel1

? Label to auto-apply: Sensitivity1

? Rules for SharePoint Online sites: Rule1-SPO

? Choose locations where you want to apply the label: Site1

Rule1-SPO is configured as shown in the following exhibit.

Pass-through authenticationDisabled0 agents

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
NOTE: Each correct selection is worth one point.

Answer Area

During Project1, sales department users can access [answer choice] applications by using SSO.

- both on-premises and cloud-based
- only cloud-based
- only on-premises

If Active Directory becomes unavailable during Project1, sales department users can access the resources [answer choice].

both on-premises and in the cloud

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Box 1: only on-premises

In the exhibit, seamless single sign-on (SSO) is disabled. Therefore, as SSO is disabled in the cloud, the Sales department users can access only on-premises applications by using SSO.

In the exhibit, directory synchronization is enabled and active. This means that the on-premises Active Directory user accounts are synchronized to Azure Active Directory user accounts. If the on-premises Active Directory becomes unavailable, the users can access resources in the cloud by authenticating to Azure Active Directory. They will not be able to access resources on-premises if the on-premises Active Directory becomes unavailable as they will not be able to authenticate to the on-premises Active Directory.

Box 2: in the cloud only

NEW QUESTION 319

HOTSPOT - (Topic 3)

You need to configure the information governance settings to meet the technical requirements.

Which type of policy should you configure, and how many policies should you configure? To answer, select the appropriate options in the answer area.

NEW QUESTION 326

- (Topic 3)

You need to create the DLP policy to meet the technical requirements. What should you configure first?

- A. sensitive info types
- B. the Insider risk management settings
- C. the event types
- D. the sensitivity labels

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-test-tune-dlp-policy?view=o365-worldwide>

NEW QUESTION 329

HOTSPOT - (Topic 3)

You plan to implement the endpoint protection device configuration profiles to support the planned changes.

You need to identify which devices will be supported, and how many profiles you should implement.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Supported devices:

▼
Device1 only
Device1 and Device2 only
Device1 and Device3 only
Device1, Device2, and Device3
Device1, Device4, and Device5
Device1, Device2, Device3, Device4, and Device5

Number of required profiles:

▼
1
2
3
4
5

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Supported devices:

Device1 only
Device1 and Device2 only
Device1 and Device3 only
Device1, Device2, and Device3
Device1, Device4, and Device5
Device1, Device2, Device3, Device4, and Device5

Number of required profiles:

4
5

NEW QUESTION 332

- (Topic 2)

You need to meet the technical requirement for the EU PII data. What should you create?

- A. a retention policy from the Security & Compliance admin center.
- B. a retention policy from the Exchange admin center
- C. a data loss prevention (DLP) policy from the Exchange admin center
- D. a data loss prevention (DLP) policy from the Security & Compliance admin center

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/retention-policies>

EU PII wants both documents and email message to be preserved so S&C Admin Center for Retention. If this was for Email only, this probably could have been done in EAC.

NEW QUESTION 336

HOTSPOT - (Topic 2)

You need to meet the technical requirement for the SharePoint administrator. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

From the Security & Compliance admin center, perform a search by using:

Audit log
Data governance events
DLP policy matches
eDiscovery

Filter by:

Activity
Detail
Item
User agent

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-security-and-compliance#step-3-filter-the-search-results>

NEW QUESTION 341

DRAG DROP - (Topic 2)

You need to meet the requirement for the legal department.

Which three actions should you perform in sequence from the Security & Compliance admin center? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a data loss prevention (DLP) policy.	
Create an eDiscovery case.	
Create a label.	
Run a content search.	
Create a label policy.	
Create a hold.	
Assign eDiscovery permissions.	
Publish a label.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References: <https://www.sherweb.com/blog/ediscovery-office-365/>

NEW QUESTION 342

- (Topic 1)
You need to create the Microsoft Store for Business. Which user can create the store?

- A. User2
- B. User3
- C. User4
- D. User5

Answer: C

Explanation:

References:
<https://docs.microsoft.com/en-us/microsoft-store/roles-and-permissions-microsoft-store-for-business>

NEW QUESTION 345

- (Topic 1)
On which server should you use the Defender for identity sensor?

- A. Server1
- B. Server2
- C. Server3
- D. Server4
- E. Servers5

Answer: A

Explanation:

However, if the case study had required that the DCs can't have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.

NEW QUESTION 348

- (Topic 2)
You need to protect the U.S. PII data to meet the technical requirements. What should you create?

- A. a data loss prevention (DLP) policy that contains a domain exception
- B. a Security & Compliance retention policy that detects content containing sensitive data
- C. a Security & Compliance alert policy that contains an activity
- D. a data loss prevention (DLP) policy that contains a user override

Answer: A

NEW QUESTION 352

HOTSPOT - (Topic 1)
As of March, how long will the computers in each office remain supported by Microsoft? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Seattle:

▼
6 months
18 months
24 months
30 months
5 years

New York:

▼
6 months
18 months
24 months
30 months
5 years

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<https://support.microsoft.com/en-gb/help/13853/windows-lifecycle-fact-sheet> March Feature Updates: Serviced for 18 months from release date September Feature Updates: Serviced for 30 months from release date

References:

<https://www.windowscentral.com/whats-difference-between-quality-updates-and-feature-updates-windows-10>

NEW QUESTION 353

HOTSPOT - (Topic 1)

You need to meet the Intune requirements for the Windows 10 devices.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Settings to configure in Azure AD:

▼
Device settings
Mobility (MDM and MAM)
Organizational relationships
User settings

Settings to configure in Intune:

▼
Device compliance
Device configuration
Device enrollment
Mobile Device Management Authority

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/intune/windows-enroll>

NEW QUESTION 358

- (Topic 1)

You need to ensure that User1 can enroll the devices to meet the technical requirements. What should you do?

- A. From the Azure Active Directory admin center, assign User1 the Cloud device administrator role.
- B. From the Azure Active Directory admin center, configure the Maximum number of devices per user setting.
- C. From the Intune admin center, add User1 as a device enrollment manager.
- D. From the Intune admin center, configure the Enrollment restrictions.

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager>

NEW QUESTION 359

- (Topic 1)

You need to meet the compliance requirements for the Windows 10 devices. What should you create from the Intune admin center?

- A. a device compliance policy
- B. a device configuration profile
- C. an application policy
- D. an app configuration policy

Answer: C
